Operation and maintenance for overseas contingency operations (sec. 4302)

The Senate amendment contained an authorization funding table (sec. 4302) for oper-

ation and maintenance for overseas contingency operations.

The House bill contained no similar provision.

The House recedes with an amendment authorizing specific projects, programs, or activities and associated dollar amounts subject to appropriations.

*Military construction for overseas contingency operations (sec. 4503)*

The Senate amendment contained an authorization funding table (sec. 4504) for mili-

tary construction for overseas contingency operations.

The House bill contained no similar provision.

The House recedes with an amendment authorizing specific projects, programs, or activities and associated dollar amounts subject to appropriations.

**TITLE XLVI—DEPARTMENT OF ENERGY  
NATIONAL SECURITY PROGRAMS**

*Department of Energy national security programs (sec. 4601)*

The Senate amendment contained an authorization funding table (sec. 4601) for De-

partment of Energy national security programs.

The House bill contained no similar provision.

The House recedes with an amendment authorizing specific projects, programs, or ac-

tivities and associated dollar amounts subject to appropriations.

LEGISLATIVE PROVISION NOT ADOPTED

*American Recovery and Reinvestment Act military construction*

The Senate amendment contained an authorization funding table (sec. 4503) for military construction using amounts appropriated by title X of the American Recovery and Reinvestment Act of 2009 (Public Law 111-5).

The House bill contained no similar provision.

The Senate recedes.

*DIVISION E—MATTHEW SHEPARD AND JAMES BYRD, JR. HATE CRIMES PREVENTION ACT*

TITLE XLVII

*Matthew Shepard and James Byrd, Jr. Hate Crimes Prevention Act (secs. 4701–4713)*

The Senate amendment contained a Division (secs. 4701–4714) that would provide support for criminal investigations and prosecutions of hate crimes by State, local, and tribal law enforcement officials; add a new section to title 18, United States Code, prohibiting certain hate crime acts; establish certain limitations and guidelines for the prosecution of hate crimes; and add a new section to title 18, United States Code, prohibiting attacks on United States service members on account of their service.

The House bill contained no similar provision.

The House recedes with an amendment that would clarify the First Amendment protections in the provision; eliminate language authorizing the death penalty for certain hate crimes; direct the U.S. Sentencing Commission to produce a report on mandatory minimum sentencing provisions under Federal law; and make other technical and clarifying amendments.

PROVIDING FOR CONCURRENCE BY HOUSE WITH AMENDMENT IN SENATE AMENDMENT TO H.R. 1035, MORRIS K. UDALL SCHOLARSHIP AND EXCELLENCE IN NATIONAL ENVIRONMENTAL POLICY AMENDMENTS ACT OF 2009

Mr. GRIJALVA. Mr. Speaker, I move to suspend the rules and agree to the resolution (H. Res. 806) providing for the concurrence by the House in the Senate amendment to H.R. 1035, with an amendment.

The Clerk read the title of the resolution.

The text of the resolution is as follows:

H. RES. 806

*Resolved*, That upon the adoption of this resolution the bill (H.R. 1035) entitled "An Act to amend the Morris K. Udall Scholarship and Excellence in National Environmental and Native American Public Policy Act of 1992 to honor the legacy of Stewart L. Udall, and for other purposes.", with the Senate amendment thereto, shall be considered to have been taken from the Speaker's table to the end that the Senate amendment thereto be, and the same is hereby, agreed to with the following amendment:

At the end of the Senate amendment, add the following:

At the end of the bill, add the following new section:

**SEC. 11. TRAVEL PROMOTION ACT OF 2009.**

(a) **SHORT TITLE.**—This section may be cited as the "Travel Promotion Act of 2009".

(b) **THE CORPORATION FOR TRAVEL PROMOTION.**—

(1) **ESTABLISHMENT.**—The Corporation for Travel Promotion is established as a nonprofit corporation. The Corporation shall not be an agency or establishment of the United States Government. The Corporation shall be subject to the provisions of the District of Columbia Nonprofit Corporation Act (D.C. Code, section 29-1001 et seq.), to the extent that such provisions are consistent with this subsection, and shall have the powers conferred upon a nonprofit corporation by that Act to carry out its purposes and activities.

(2) **BOARD OF DIRECTORS.**—

(A) **IN GENERAL.**—The Corporation shall have a board of directors of 11 members with knowledge of international travel promotion and marketing, broadly representing various regions of the United States, who are United States citizens. Members of the board shall be appointed by the Secretary of Commerce (after consultation with the Secretary of Homeland Security and the Secretary of State), as follows:

(i) 1 shall have appropriate expertise and experience in the hotel accommodations sector;

(ii) 1 shall have appropriate expertise and experience in the restaurant sector;

(iii) 1 shall have appropriate expertise and experience in the small business or retail sector or in associations representing that sector;

(iv) 1 shall have appropriate expertise and experience in the travel distribution services sector;

(v) 1 shall have appropriate expertise and experience in the attractions or recreations sector;

(vi) 1 shall have appropriate expertise and experience as officials of a city convention and visitors' bureau;

(vii) 2 shall have appropriate expertise and experience as officials of a State tourism office;

(viii) 1 shall have appropriate expertise and experience in the passenger air sector;

(ix) 1 shall have appropriate expertise and experience in immigration law and policy, including visa requirements and United States entry procedures; and

(x) 1 shall have appropriate expertise in the intercity passenger railroad business.

(B) **INCORPORATION.**—The members of the initial board of directors shall serve as incorporators and shall take whatever actions are necessary to establish the Corporation under the District of Columbia Nonprofit Corporation Act (D.C. Code, section 29-301.01 et seq.).

(C) **TERM OF OFFICE.**—The term of office of each member of the board appointed by the Secretary shall be 3 years, except that, of the members first appointed—

(i) 3 shall be appointed for terms of 1 year;  
 (ii) 4 shall be appointed for terms of 2 years; and

(iii) 4 shall be appointed for terms of 3 years.

(D) REMOVAL FOR CAUSE.—The Secretary of Commerce may remove any member of the board for good cause.

(E) VACANCIES.—Any vacancy in the board shall not affect its power, but shall be filled in the manner required by this subsection. Any member whose term has expired may serve until the member's successor has taken office, or until the end of the calendar year in which the member's term has expired, whichever is earlier. Any member appointed to fill a vacancy occurring prior to the expiration of the term for which that member's predecessor was appointed shall be appointed for the remainder of the predecessor's term. No member of the board shall be eligible to serve more than 2 consecutive full 3-year terms.

(F) ELECTION OF CHAIRMAN AND VICE CHAIRMAN.—Members of the board shall annually elect one of the members to be Chairman and elect 1 or 2 of the members as Vice Chairman or Vice Chairmen.

(G) STATUS AS FEDERAL EMPLOYEES.—Notwithstanding any provision of law to the contrary, no member of the board may be considered to be a Federal employee of the United States by virtue of his or her service as a member of the board.

(H) COMPENSATION; EXPENSES.—No member shall receive any compensation from the Federal government for serving on the Board. Each member of the Board shall be paid actual travel expenses and per diem in lieu of subsistence expenses when away from his or her usual place of residence, in accordance with section 5703 of title 5, United States Code.

#### (3) OFFICERS AND EMPLOYEES.—

(A) IN GENERAL.—The Corporation shall have an executive director and such other officers as may be named and appointed by the board for terms and at rates of compensation fixed by the board. No individual other than a citizen of the United States may be an officer of the Corporation. The Corporation may hire and fix the compensation of such employees as may be necessary to carry out its purposes. No officer or employee of the Corporation may receive any salary or other compensation (except for compensation for services on boards of directors of other organizations that do not receive funds from the Corporation, on committees of such boards, and in similar activities for such organizations) from any sources other than the Corporation for services rendered during the period of his or her employment by the Corporation. Service by any officer on boards of directors of other organizations, on committees of such boards, and in similar activities for such organizations shall be subject to annual advance approval by the board and subject to the provisions of the Corporation's Statement of Ethical Conduct. All officers and employees shall serve at the pleasure of the board.

(B) NONPOLITICAL NATURE OF APPOINTMENT.—No political test or qualification shall be used in selecting, appointing, promoting, or taking other personnel actions with respect to officers, agents, or employees of the Corporation.

(4) NONPROFIT AND NONPOLITICAL NATURE OF CORPORATION.—

(A) STOCK.—The Corporation shall have no power to issue any shares of stock, or to declare or pay any dividends.

(B) PROFIT.—No part of the income or assets of the Corporation shall inure to the

benefit of any director, officer, employee, or any other individual except as salary or reasonable compensation for services.

(C) POLITICS.—The Corporation may not contribute to or otherwise support any political party or candidate for elective public office.

(D) SENSE OF CONGRESS REGARDING LOBBYING ACTIVITIES.—It is the sense of Congress that the Corporation should not engage in lobbying activities (as defined in section 3(7) of the Lobbying Disclosure Act of 1995 (5 U.S.C. 1602(7)).

#### (5) DUTIES AND POWERS.—

(A) IN GENERAL.—The Corporation shall develop and execute a plan—

(i) to provide useful information to foreign tourists, business people, students, scholars, scientists, and others interested in traveling to the United States, including the distribution of material provided by the Federal government concerning entry requirements, required documentation, fees, processes, and information concerning declared public health emergencies, to prospective travelers, travel agents, tour operators, meeting planners, foreign governments, travel media and other international stakeholders;

(ii) to identify, counter, and correct misperceptions regarding United States entry policies around the world;

(iii) to maximize the economic and diplomatic benefits of travel to the United States by promoting the United States of America to world travelers through the use of, but not limited to, all forms of advertising, outreach to trade shows, and other appropriate promotional activities;

(iv) to ensure that international travel benefits all States and the District of Columbia and to identify opportunities and strategies to promote tourism to rural and urban areas equally, including areas not traditionally visited by international travelers; and

(v) to give priority to the Corporation's efforts with respect to countries and populations most likely to travel to the United States.

(B) SPECIFIC POWERS.—In order to carry out the purposes of this subsection, the Corporation may—

(i) obtain grants from and make contracts with individuals and private companies, State, and Federal agencies, organizations, and institutions;

(ii) hire or accept the voluntary services of consultants, experts, advisory boards, and panels to aid the Corporation in carrying out its purposes; and

(iii) take such other actions as may be necessary to accomplish the purposes set forth in this subsection.

(C) PUBLIC OUTREACH AND INFORMATION.—The Corporation shall develop and maintain a publicly accessible website.

(6) OPEN MEETINGS.—Meetings of the board of directors of the Corporation, including any committee of the board, shall be open to the public. The board may, by majority vote, close any such meeting only for the time necessary to preserve the confidentiality of commercial or financial information that is privileged or confidential, to discuss personnel matters, or to discuss legal matters affecting the Corporation, including pending or potential litigation.

(7) MAJOR CAMPAIGNS.—The board may not authorize the Corporation to obligate or expend more than \$25,000,000 on any advertising campaign, promotion, or related effort unless—

(A) the obligation or expenditure is approved by an affirmative vote of at least 2/3 of the members of the board present at the meeting;

(B) at least 6 members of the board are present at the meeting at which it is approved; and

(C) each member of the board has been given at least 3 days advance notice of the meeting at which the vote is to be taken and the matters to be voted upon at that meeting.

#### (8) FISCAL ACCOUNTABILITY.—

(A) FISCAL YEAR.—The Corporation shall establish as its fiscal year the 12-month period beginning on October 1.

(B) BUDGET.—The Corporation shall adopt a budget for each fiscal year.

(C) ANNUAL AUDITS.—The Corporation shall engage an independent accounting firm to conduct an annual financial audit of the Corporation's operations and shall publish the results of the audit. The Comptroller General of the United States may review any audit of a financial statement conducted under this paragraph by an independent accounting firm and may audit the Corporation's operations at the discretion of the Comptroller General. The Comptroller General and the Congress shall have full and complete access to the books and records of the Corporation.

(D) PROGRAM AUDITS.—Not later than 2 years after the date of enactment of this section, the Comptroller General shall conduct a review of the programmatic activities of the Corporation for Travel Promotion. This report shall be provided to appropriate congressional committees.

#### (C) ACCOUNTABILITY MEASURES.—

(1) OBJECTIVES.—The Board shall establish annual objectives for the Corporation for each fiscal year subject to approval by the Secretary of Commerce (after consultation with the Secretary of Homeland Security and the Secretary of State). The Corporation shall establish a marketing plan for each fiscal year not less than 60 days before the beginning of that year and provide a copy of the plan, and any revisions thereof, to the Secretary.

(2) BUDGET.—The board shall transmit a copy of the Corporation's budget for the forthcoming fiscal year to the Secretary not less than 60 days before the beginning of each fiscal year, together with an explanation of any expenditure provided for by the budget in excess of \$5,000,000 for the fiscal year. The Corporation shall make a copy of the budget and the explanation available to the public and shall provide public access to the budget and explanation on the Corporation's website.

(3) ANNUAL REPORT TO CONGRESS.—The Corporation shall submit an annual report for the preceding fiscal year to the Secretary of Commerce for transmittal to the Congress on or before the 15th day of May of each year. The report shall include—

(A) a comprehensive and detailed report of the Corporation's operations, activities, financial condition, and accomplishments under this section;

(B) a comprehensive and detailed inventory of amounts obligated or expended by the Corporation during the preceding fiscal year;

(C) a detailed description of each in-kind contribution, its fair market value, the individual or organization responsible for contributing, its specific use, and a justification for its use within the context of the Corporation's mission;

(D) an objective and quantifiable measurement of its progress, on an objective-by-objective basis, in meeting the objectives established by the board;

(E) an explanation of the reason for any failure to achieve an objective established by

the board and any revisions or alterations to the Corporation's objectives under paragraph (1);

(F) a comprehensive and detailed report of the Corporation's operations and activities to promote tourism in rural and urban areas; and

(G) such recommendations as the Corporation deems appropriate.

(4) **LIMITATION ON USE OF FUNDS.**—Amounts deposited in the Fund may not be used for any purpose inconsistent with carrying out the objectives, budget, and report described in this subsection.

(d) **MATCHING PUBLIC AND PRIVATE FUNDING.**—

(1) **ESTABLISHMENT OF TRAVEL PROMOTION FUND.**—There is hereby established in the Treasury a fund which shall be known as the Travel Promotion Fund.

(2) **FUNDING.**—

(A) **START-UP EXPENSES.**—For fiscal year 2010, the Secretary of the Treasury shall make available to the Corporation such sums as may be necessary, but not to exceed \$10,000,000, from amounts deposited in the general fund of the Treasury from fees under section 217(h)(3)(B)(i)(I) of the Immigration and Nationality Act (8 U.S.C. 1187(h)(3)(B)(i)(I)) to cover the Corporation's initial expenses and activities under this section. Transfers shall be made at least quarterly, beginning on January 1, 2010, on the basis of estimates by the Secretary, and proper adjustments shall be made in amounts subsequently transferred to the extent prior estimates were in excess or less than the amounts required to be transferred.

(B) **SUBSEQUENT YEARS.**—For each of fiscal years 2011 through 2014, from amounts deposited in the general fund of the Treasury during the preceding fiscal year from fees under section 217(h)(3)(B)(i)(I) of the Immigration and Nationality Act (8 U.S.C. 1187(h)(3)(B)(i)(I)), the Secretary of the Treasury shall transfer not more than \$100,000,000 to the Fund, which shall be made available to the Corporation, subject to paragraph (3) of this subsection, to carry out its functions under this section. Transfers shall be made at least quarterly on the basis of estimates by the Secretary, and proper adjustments shall be made in amounts subsequently transferred to the extent prior estimates were in excess or less than the amounts required to be transferred.

(3) **MATCHING REQUIREMENT.**—

(A) **IN GENERAL.**—No amounts may be made available to the Corporation under this subsection after fiscal year 2010, except to the extent that—

(i) for fiscal year 2011, the Corporation provides matching amounts from non-Federal sources equal in the aggregate to 50 percent or more of the amount transferred to the Fund under paragraph (2); and

(ii) for any fiscal year after fiscal year 2011, the Corporation provides matching amounts from non-Federal sources equal in the aggregate to 100 percent of the amount transferred to the Fund under paragraph (2) for the fiscal year.

(B) **GOODS AND SERVICES.**—For the purpose of determining the amount received from non-Federal sources by the Corporation, other than money—

(i) the fair market value of goods and services (including advertising) contributed to the Corporation for use under this section may be included in the determination; but

(ii) the fair market value of such goods and services may not account for more than 80 percent of the matching requirement under subparagraph (A) for the Corporation in any fiscal year.

(C) **RIGHT OF REFUSAL.**—The Corporation may decline to accept any contribution in-kind that it determines to be inappropriate, not useful, or commercially worthless.

(D) **LIMITATION.**—The Corporation may not obligate or expend funds in excess of the total amount received by the Corporation for a fiscal year from Federal and non-Federal sources.

(4) **CARRYFORWARD.**—

(A) **FEDERAL FUNDS.**—Amounts transferred to the Fund under paragraph (2)(B) shall remain available until expended.

(B) **MATCHING FUNDS.**—Any amount received by the Corporation from non-Federal sources in fiscal year 2010, 2011, 2012, 2013, or 2014 that cannot be used to meet the matching requirement under paragraph (3)(A) for the fiscal year in which amount was collected may be carried forward and treated as having been received in the succeeding fiscal year for purposes of meeting the matching requirement of paragraph (3)(A) in such succeeding fiscal year.

(e) **TRAVEL PROMOTION FUND FEES.**—Section 217(h)(3)(B) of the Immigration and Nationality Act (8 U.S.C. 1187(h)(3)(B)) is amended to read as follows:

“(B) **FEES.**—

“(i) **IN GENERAL.**—No later than 6 months after the date of enactment of the Travel Promotion Act of 2009, the Secretary of Homeland Security shall establish a fee for the use of the System and begin assessment and collection of that fee. The initial fee shall be the sum of—

“(I) \$10 per travel authorization; and

“(II) an amount that will at least ensure recovery of the full costs of providing and administering the System, as determined by the Secretary.

“(ii) **DISPOSITION OF AMOUNTS COLLECTED.**—Amounts collected under clause (i)(I) shall be credited to the Travel Promotion Fund established by subsection (d) of section 11 of the Travel Promotion Act of 2009. Amounts collected under clause (i)(II) shall be transferred to the general fund of the Treasury and made available to pay the costs incurred to administer the System.

“(iii) **SUNSET OF TRAVEL PROMOTION FUND FEE.**—The Secretary may not collect the fee authorized by clause (i)(I) for fiscal years beginning after September 30, 2014.”

(f) **ASSESSMENT AUTHORITY.**—

(1) **IN GENERAL.**—Except as otherwise provided in this subsection, the Corporation may impose an annual assessment on United States members of the international travel and tourism industry (other than those described in subsection (b)(2)(A)(iii) or (H)) represented on the Board in proportion to their share of the aggregate international travel and tourism revenue of the industry. The Corporation shall be responsible for verifying, implementing, and collecting the assessment authorized by this subsection.

(2) **INITIAL ASSESSMENT LIMITED.**—The Corporation may establish the initial assessment after the date of enactment of this section at no greater, in the aggregate, than \$20,000,000.

(3) **REFERENDA.**—

(A) **IN GENERAL.**—The Corporation may not impose an annual assessment unless—

(i) the Corporation submits the proposed annual assessment to members of the industry in a referendum; and

(ii) the assessment is approved by a majority of those voting in the referendum.

(B) **PROCEDURAL REQUIREMENTS.**—In conducting a referendum under this paragraph, the Corporation shall—

(i) provide written or electronic notice not less than 60 days before the date of the referendum;

(ii) describe the proposed assessment or increase and explain the reasons for the referendum in the notice; and

(iii) determine the results of the referendum on the basis of weighted voting apportioned according to each business entity's relative share of the aggregate annual United States international travel and tourism revenue for the industry per business entity, treating all related entities as a single entity.

(4) **COLLECTION.**—

(A) **IN GENERAL.**—The Corporation shall establish a means of collecting the assessment that it finds to be efficient and effective. The Corporation may establish a late payment charge and rate of interest to be imposed on any person who fails to remit or pay to the Corporation any amount assessed by the Corporation under this section.

(B) **ENFORCEMENT.**—The Corporation may bring suit in Federal court to compel compliance with an assessment levied by the Corporation under this section.

(5) **INVESTMENT OF FUNDS.**—Pending disbursement pursuant to a program, plan, or project, the Corporation may invest funds collected through assessments, and any other funds received by the Corporation, only in obligations of the United States or any agency thereof, in general obligations of any State or any political subdivision thereof, in any interest-bearing account or certificate of deposit of a bank that is a member of the Federal Reserve System, or in obligations fully guaranteed as to principal and interest by the United States.

(g) **OFFICE OF TRAVEL PROMOTION.**—Title II of the International Travel Act of 1961 (22 U.S.C. 2121 et seq.) is amended by inserting after section 201 the following:

“**SEC. 202. OFFICE OF TRAVEL PROMOTION.**

“(a) **OFFICE ESTABLISHED.**—There is established within the Department of Commerce an office to be known as the Office of Travel Promotion.

“(b) **DIRECTOR.**—

“(1) **APPOINTMENT.**—The Office shall be headed by a Director who shall be appointed by the Secretary.

“(2) **QUALIFICATIONS.**—The Director shall be a citizen of the United States and have experience in a field directly related to the promotion of travel to and within the United States.

“(3) **DUTIES.**—The Director shall be responsible for ensuring the office is carrying out its functions effectively and shall report to the Secretary.

“(c) **FUNCTIONS.**—The Office shall—

“(1) serve as liaison to the Corporation for Travel Promotion established by subsection (b) of section 11 of the Travel Promotion Act of 2009 and support and encourage the development of programs to increase the number of international visitors to the United States for business, leisure, educational, medical, exchange, and other purposes;

“(2) work with the Corporation, the Secretary of State and the Secretary of Homeland Security—

“(A) to disseminate information more effectively to potential international visitors about documentation and procedures required for admission to the United States as a visitor;

“(B) to ensure that arriving international visitors are generally welcomed with accurate information and in an inviting manner;

“(C) to collect accurate data on the total number of international visitors that visit each State; and

“(D) enhance the entry and departure experience for international visitors through the use of advertising, signage, and customer service; and

“(3) support State, regional, and private sector initiatives to promote travel to and within the United States.

“(d) REPORTS TO CONGRESS.—Within a year after the date of enactment of the Travel Promotion Act of 2009, and periodically thereafter as appropriate, the Secretary shall transmit a report to the Senate Committee on Commerce, Science, and Transportation, the Senate Committee on Homeland Security and Governmental Affairs, the Senate Committee on Foreign Relations, the House of Representatives Committee on Energy and Commerce, the House of Representatives Committee on Homeland Security, and the House of Representatives Committee on Foreign Affairs describing the Office's work with the Corporation, the Secretary of State and the Secretary of Homeland Security to carry out subsection (c)(2).”

(h) RESEARCH PROGRAM.—Title II of the International Travel Act of 1961 (22 U.S.C. 2121 et seq.), as amended by subsection (g), is further amended by inserting after section 202 the following:

**“SEC. 203. RESEARCH PROGRAM.**

“(a) IN GENERAL.—The Office of Travel and Tourism Industries shall expand and continue its research and development activities in connection with the promotion of international travel to the United States, including—

“(1) expanding access to the official Mexican travel surveys data to provide the States with traveler characteristics and visitation estimates for targeted marketing programs;

“(2) expanding the number of inbound air travelers sampled by the Commerce Department's Survey of International Travelers to reach a 1 percent sample size and revising the design and format of questionnaires to accommodate a new survey instrument, improve response rates to at least double the number of States and cities with reliable international visitor estimates and improve market coverage;

“(3) developing estimates of international travel exports (expenditures) on a State-by-State basis to enable each State to compare its comparative position to national totals and other States;

“(4) evaluate the success of the Corporation in achieving its objectives and carrying out the purposes of the Travel Promotion Act of 2009; and

“(5) research to support the annual reports required by section 202(d) of this Act.

“(b) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to the Secretary of Commerce for fiscal years 2010 through 2014 such sums as may be necessary to carry out this section.”

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Arizona (Mr. GRIJALVA) and the gentleman from Tennessee (Mr. ROE) each will control 20 minutes.

The Chair recognizes the gentleman from Arizona.

**GENERAL LEAVE**

Mr. GRIJALVA. Mr. Speaker, I ask unanimous consent for 5 legislative days during which Members may revise and extend and insert extraneous material on H. Res. 806 into the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

Mr. GRIJALVA. Mr. Speaker, I yield myself such time as I may consume.

I rise in support of this bill that enhances the Morris K. Udall Foundation and honors the life of Stewart Udall.

The Morris K. Udall Foundation is an independent Federal agency based in Tucson, Arizona, which operates exceptional educational programs focused on developing leadership on environmental issues and Native American issues. It also includes the U.S. Institute for Environmental Conflict Resolution, the only program within the Federal Government focused entirely on preventing, managing, and resolving Federal environmental conflicts.

The legislation today will enhance the foundation's programs and operations, and at the same time honor one of the greatest public servants and conservationists in history, Stewart L. Udall, by adding his name to the foundation of his late brother, Morris K. Udall.

The Udall Foundation was established by Congress in 1992. Initially, the foundation's mission was to provide educational opportunities for studies related to the environment and Native American tribal policy and health care.

In 1998, Congress amended the Udall Foundation's enabling legislation to add a new mission: resolving conflicts related to the environment, natural resources, and public lands through services including mediation, facilitation, and training. The work of the Udall Foundation has become even more important today as the Nation seeks long-term responses to climate change, sustainable energy supplies, and a sustainable economy for all Americans.

Through its education programs, the Udall Foundation identifies and educates tomorrow's leaders in fields that are critical to the energy, climate change, and economic issues that face our Nation. These programs include:

The premier college scholarship and doctoral fellowship for studies related to the environment and a scholarship for Native Americans studying tribal policy or health care.

The Native American Congressional Internship Program that has provided to many of our offices over 150 young Native American leaders that have been part of that internship program.

The Native Nations Institute for Leadership, Management, and Policy that provides both governance and economic development resources for tribal nations as they develop their own self-determination and fully develop the sovereignty that they have.

The Parks in Focus Program which connects underserved youth to nature through the art of photography and instilling them with a long-lasting understanding and appreciation for our national parks and other public lands.

□ 1615

I think it is very appropriate for Congress to provide solid support for the Udall Foundation and very important programs through this legislation, while at the same time recognizing the unsurpassed contributions of Stewart Udall by adding his name to the foundation's title. Stewart Udall served in the House of Representatives with distinction from 1955, representing an area that included what is now my district, until he was appointed Secretary of the Interior in 1961 by President John F. Kennedy.

As Secretary of the Interior, Stewart Udall had an unmatched record of environmental leadership, overseeing the creation of 4 national parks, 6 national monuments, 8 national sea shore and lake shores, 9 recreation areas, 20 historic sites, and 56 wildlife refuges. He continued to make substantial contributions to environmental and Native American policy as a lawyer and author following his tenure at the Interior.

For these reasons, I believe that the legislation deserves the support of the House.

At this point, Mr. Speaker, I yield the remainder of my time to the gentlelady from Florida (Ms. CASTOR) and ask unanimous consent that she manage the remainder of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

Mr. ROE of Tennessee. Mr. Speaker, I yield myself as much time as I may consume. I rise today in support of H.R. 1035, a bill that amends the Morris K. Udall Scholarship and Excellence in National Environmental Policy Act. The Morris K. Udall Foundation was created by Congress in 1992 to honor Mr. Udall's 30 years of public service. The Foundation was created to help educate new generations to protect the environment. The Foundation works to increase the awareness of our Nation's natural resources, foster a greater recognition and understanding of the role of the environment and the development of our Nation, and through the U.S. Institute for Environmental Conflict Resolution, provide for mediation and other services to resolve environmental disputes involving Federal agencies.

The Foundation operates several educational programs. The Morris K. Udall scholarship program awards approximately 80 merit-based scholarships of about \$5,000 each year. It also supports about 12 Native Americans or Alaskan natives every summer for a 10-week bipartisan congressional internship program.

Finally, the foundation supports two fellows every year in a doctoral program whose research focuses on environmental policy.

As we noted when this passed the House this summer, the legislation before us honors Stewart L. Udall's service to the Nation by adding his name to the foundation, making it the Morris K. Udall and Stewart L. Udall Foundation. Mr. Udall served in Congress and the administration, and then continued his work for the environment in the private sector. I would like to point out that there is one difference between this bill and the version passed by the House in July. The other body removed the authorization level of "such sums," thereby leaving the authorization of these programs at \$40 million, which is current law.

Finally, I would like to note this bill is being amended by the House to include the Travel Promotion Act, which creates a corporation to promote travel in the United States. My colleague from Missouri, Mr. BLUNT, a member of the Energy and Commerce Committee, will speak to these provisions. But let me just say that I'm glad that we are acting to promote tourism in this economic downturn. Attractions like the Great Smoky Mountains National Park, the most visited park in America, Dollywood, Jonesboro, the oldest town in Tennessee, and Sycamore Shoals historic site in my district stand to benefit greatly from increased tourism. The Senate amendment to the underlying Udall scholarship bill makes this legislation better. I urge my colleagues to support this bill.

Mr. Speaker, I yield the balance of my time to the gentleman from Missouri (Mr. BLUNT) and ask unanimous consent that he be allowed to control that time.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

Ms. CASTOR of Florida. Mr. Speaker, I rise in strong support of the Udall Scholarship in Excellence in NEPA Act by Congressman GRIJALVA. As part of the act, the House will consider Senate bill 1023, the Travel Promotion Act, which is similar to H.R. 2935 by Representative DELAHUNT of Massachusetts, a bill of which I'm pleased to be an original cosponsor.

The Travel Promotion Act is a jobs bill. It's a vital economic development initiative to combat the economic downturn that we've been battling since the spring of 2008. The Travel Promotion Act establishes a nonprofit corporation for travel promotion to promote tourism in the United States and provide travel information to people around the world.

Tourism is particularly important to my home State of Florida. Florida is a top travel destination from across the globe. The millions and millions of tourists who travel to Florida support a \$57 billion tourism industry and our economy. People come from every nation to visit our beautiful beaches,

Busch Gardens, Disneyworld and Universal Studios, the Everglades and more, and the Florida economy thrives and families have good jobs in a clean industry because of tourism.

Having the beaches and attractions is not enough, however. Florida also communicates to the world about Florida vacations through the Visit Florida tourism Web site and outreach and advertising campaigns. But, you know, there is no similar initiative for the United States as a whole internationally. So the USA needs to get creative and create new jobs through growing tourism nationwide.

Unfortunately, there are a lot of misconceptions out there that the United States is not a friendly place for international tourists. Other nations actively promote international tourism through advertising campaigns and outreach, but some say that we've allowed our image to become an unwelcoming one. Nations that project a welcoming image are reaping economic benefits, while we run the risk of being left behind. Overseas travel in the United States has declined by 10 percent in the first quarter of 2009.

Our travel bill would let world travelers know that we want them to visit America's great cities and natural wonders. We want the world to come and share our culture and experience the richness that is the United States of America. Therefore, I urge adoption of the Travel Promotion Act to get our economy moving and create jobs.

Mr. Speaker, I now recognize Congresswoman LORETTA SANCHEZ of the Committee on Homeland Security.

Ms. LORETTA SANCHEZ of California. I thank my colleague for recognizing me to express support for the travel promotion legislation being considered today. I do, however, have a few concerns that I would like to discuss in a colloquy with the gentlelady from Florida.

First, I am concerned that the bill would allow the Corporation For Travel Promotion to distribute information on Federal entry and exit requirements to foreign tourists without the Department of Homeland Security or the State Department reviewing that information. To ensure accuracy and consistency it's imperative that the DHS and the State Department have the opportunity to review this information before it is released to the public. Do I understand that the gentlelady shares my concern and is willing to work with me to resolve that matter?

I yield to the gentlelady for a response.

Ms. CASTOR of Florida. I thank the gentlelady from California for raising this important issue. Yes, it is extremely important that the U.S. has a unified voice abroad, and that all information about Federal travel requirements is properly vetted. I look forward to working with you and the committee to address this issue.

Ms. LORETTA SANCHEZ of California. I thank my colleague. And the other concern that I have relates to the fee provision and its mandatory nature. I have heard concerns expressed by our European partners and others about these fees. And under the 9/11 Act, the Secretary of Homeland Security has discretion about how to fund the Electronic System For Travel Authorization program. This legislation appears to remove that discretion and to require our Secretary to collect fees for ESTA in addition to the fees collected for the corporation.

So I believe the Secretary should retain that discretion to determine how to fund the ESTA program. And I also believe that any fees collected in excess of the needs of the corporation should be made available to the Department of Homeland Security to fund important travel, security, and facilitation programs, including our US-VISIT and our Global Entry program.

Would my colleague work with me to ensure that the Secretary has this flexibility and the resources needed to effectively carry out the missions of the department?

Ms. CASTOR of Florida. I share your concern about the fee structure, and I will be happy to work with you and the committee to ensure that these matters are addressed.

I would also like to submit for the RECORD an exchange of letters between the leadership of the Energy and Commerce Committee and the Senate Commerce Committee that reflects a shared commitment to work on these very issues as well as other important issues raises by other Members.

HOUSE OF REPRESENTATIVES,  
COMMITTEE ON ENERGY AND COMMERCE,  
Washington, DC, October 7, 2009.

Hon. JOHN D. ROCKEFELLER IV,  
Chairman, Senate Committee on Commerce,  
Science, and Transportation.

Hon. AMY KLOBUCHAR,  
Chairman, Subcommittee on Competitiveness,  
Innovation, and Export Promotion.

Hon. BYRON L. DORGAN,  
U.S. Senator.

DEAR SENATORS ROCKEFELLER, KLOBUCHAR, AND DORGAN: As the House may consider S. 1023, the Travel Promotion Act of 2009, shortly, we write to clarify your intent with regard to several provisions in the bill.

#### I. CREATION OF THE CORPORATION

It is our understanding that the intent of the legislation is for the Department of Commerce to administer grants to the newly created nonprofit, "Corporation for Travel Promotion." It will be left to the judgment of the Secretary of Commerce to transfer sums necessary for the operations of the nonprofit and the administration of the grants. We understand further that the Department of Treasury will hold the separate "Travel Promotion Fund," but will have no substantive role with regard to the Corporation. By having the Department of Commerce issue grants to the Corporation, we can assure the application of Circular A-110, Uniform Administrative Requirements for Grants and Agreements with Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations. A-110 imposes a number of requirements on non-profit entities spending

federal dollars, including the requirement that contracts target small businesses owned by women and minorities.

In addition, we appreciate that you share our commitment to diversity on the Corporation Board of Directors. We want to stress that the Secretary of Commerce should make every effort to ensure that the homeland security and small business communities are adequately represented on the Corporation's Board, and that the Board has a balance of gender, ethnicity, and economic status, as well as representatives from both urban and rural areas.

Also, we understand the importance of a functioning Corporation and the decision to allow expenditures to be made when six Board members are present. We would suggest that for expenditures over \$25 million, the Board strive to have more than four members support approval of such an expenditure.

Moreover, we would expect the Corporation's campaigns to target travelers from a diverse set of regions of the world and to advertise a wide range of destinations across the United States and its territories.

#### II. COORDINATION WITH THE FEDERAL GOVERNMENT

Although the legislation creates a requirement that the Corporation consult with the Department of Commerce, we believe that the Corporation should consult regularly with the Departments of State and Homeland Security which also have key responsibilities relating to travel and tourism. For example, it is imperative that the Corporation coordinate on any information it may disseminate regarding entry requirements, required documentation, fees, processes, and information concerning declared public health emergencies and requirements for entering the United States. This coordination is necessary in order to avoid the risk that prospective travelers to the United States could receive conflicting or confusing information regarding entry requirements and processes.

#### III. TRAVEL PROMOTION FUND FEES

Under the Implementing Recommendations of the 9/11 Commission Act of 2007 (P.L. 100-53), the Secretary of Homeland Security already has authority to charge a fee to cover the cost of administering the Electronic System for Travel Authorization (ESTA), but also has discretion to pay for ESTA with other funds. Similarly, the legislation before us should maintain the Secretary's discretion to determine the most appropriate manner to fund ESTA administration.

The legislation does not specify how funds collected in excess of \$100 million or greater than the needs of the Corporation for Travel Promotion should be used. We believe that these funds should be transferred to the Department of Homeland Security to: (1) reinvest in ESTA to support changes necessary to collect the new fee, and (2) enhance critical border security programs such as US-VISIT and Global Entry. Under the Implementing Recommendations of the 9/11 Commission Act of 2007, full implementation of the US-VISIT air exit capability is required for increased flexibility to expand the Visa Waiver Program, which would help increase tourism to the United States.

#### IV. LIMITATIONS AND ACCOUNTABILITY

Furthermore, we believe it is essential to ensure that the Corporation's funds are invested only in low risk vehicles and that none of the funds provided to the Corporation be used to directly promote or advertise

a specific corporation. Finally, we understand that under this bill, Congress has full and complete access to the books and records of the Corporation. We would suggest that the Corporation proactively send its marketing plan to Congress.

#### V. SUMMARY

While there is strong support in the House for passage of S. 1023, the Travel Promotion Act of 2009, we remain concerned about some aspects of the bill. We look forward to working with you to conduct vigorous oversight of the Travel Promotion Act once it is law and to make any changes to the legislation that may become necessary. Thank you in advance for clarifying your thoughts on the matters discussed in this letter.

Sincerely,

HENRY A. WAXMAN,  
*Chairman.*  
JOHN D. DINGELL,  
*Chairman Emeritus.*

U.S. SENATE, COMMITTEE ON COMMERCE, SCIENCE, AND TRANSPORTATION,

Washington, DC, October 7, 2009.

Hon. HENRY A. WAXMAN,  
*Chairman, House Committee on Energy and Commerce, Rayburn House Office Building, Washington, DC.*

Hon. JOHN D. DINGELL,  
*Chairman Emeritus, House Committee on Energy and Commerce, Rayburn House Office Building, Washington DC.*

DEAR CHAIRMAN WAXMAN AND CHAIRMAN EMERITUS DINGELL, Thank you for your letter regarding S. 1023, the Travel Promotion Act of 2009. We appreciate your significant interest in and contributions to this important piece of economic development legislation.

Many members of the Senate have praised this legislation for two main reasons. First, the legislation would stimulate the economy at a time when our country is facing record level job losses and deficits. A study by Oxford Economics showed that a coordinated international travel promotion campaign, such as the type that would be created by S. 1023, could drive as much as \$8 billion in new spending and create nearly \$1 billion in tax revenues annually. Additionally, the Congressional Budget Office found that enacting S. 1023 would have the added benefit of reducing budget deficits by \$425 million over fiscal years 2010–2019. This is the rare bill that stimulates economic growth while reducing the deficit at the same time.

Second, S. 1023 is a broadly bipartisan piece of legislation. Authored by Senators Dorgan and Ensign, 53 senators signed on as co-sponsors to the measure. The Travel Promotion Act of 2009 passed the Senate on September 9, 2009 by a vote of 79–19. While bipartisanship has been difficult to achieve on many issues, the solidarity of support across the aisle shows the Senate's strong commitment to enacting this legislation. The travel industry is crucial to every state and region, and we are excited to join together with you and the members of the House to aid in sending this important bill to President Obama's desk.

Presuming House passage of the Travel Promotion Act of 2009 on Wednesday, October 7, 2009 and the President's signature thereafter, we agree that the efficient and proper implementation of the Act is the cornerstone of a successful and equitable program. As Chairman of the Senate Committee on Commerce, Science, and Transportation, joined by the Chairman of the Subcommittee on Competitiveness, Innovation, and Export

Promotion and the author of S. 1023, please find the following statements of intent regarding the Travel Promotion Act of 2009.

Consultation with the Department of Homeland Security and the Department of State: One of the central purposes of the Travel Promotion Act of 2009 is to assist in disseminating information to foreign travelers about documents and procedures required for admission to the United States. While the Office of Travel Promotion and the Corporation would have the mandated responsibility to serve as an outlet for this information, in no way does the Act change the primary responsibilities of the Departments of State and Homeland Security for this function. The Department of Homeland Security has authority over the entry portals to the United States, and the Department of State is responsible for the execution of the visa policy. The Act does not create an express or implied ability for the Department of Commerce to supersede either agency's responsibilities. The purpose of the Office of Travel Promotion is to educate potential foreign tourists regarding the visa and entry policies set by those agencies—not to change visa and entry policies.

It is our expectation that the consultation requirements established in Sections 3 and 7 of the Act will establish an open, ongoing and vigorous line of communication between the Departments of Commerce, Homeland Security and State. The goal is for the Commerce Department and the Office of Travel Promotion to work closely with the other agencies to clearly and accurately communicate visa and entry policies and to improve the entry experience for international arrivals. In that vein, we expect the Departments of Homeland Security and State to work with the Department of Commerce to achieve the goals of the Act, and we would insist that the Department of Commerce, the Office of Travel Promotion, or the Corporation for Travel Promotion not go forward with any communication regarding the entry or visa process without prior consultation with the Departments of State and Homeland Security.

Board of Directors Composition and Guidance: The Secretary of Commerce has the responsibility of appointing the Board of Directors for the Corporation for Travel Promotion, after consultation with the Secretaries of Homeland Security and State. In addition to the mandates regarding the Board expressed in Section 2(a), (b), (c) and (d), we strongly encourage the Secretary of Commerce to select board members that are reflective of the diversity of our country. As with any governmental posting, we would expect the Board to reflect a balance of gender, racial and ethnic diversity.

Section 2(g) limits the Board's ability to obligate or expend more than \$25 million without at least 6 members of the Board present. We would strongly suggest that as part of the Board's procedures and rules of corporate governance that at least 5 members be present before the authorization, obligation or expenditure of any funds for campaigns, promotions or related efforts.

Small Business Representation and Diversity of Contractors: Approximately 90 percent of all employers that are part of the travel industry are small businesses. One of the primary purposes of the Act is to craft campaigns to encourage overseas travelers to come to America so these small businesses generate new revenue and create new jobs. Because small businesses play a vital role in the travel industry, we strongly encourage the Secretary of Commerce to select

board members who have knowledge and expertise of small businesses. We expect the Board and the Executive Director to strive to make certain that promotional efforts benefit small businesses in every region. In the planning and execution of campaigns, the Corporation should make special efforts in the bidding and contract process to target small businesses and businesses owned by women and minorities.

**Considerations for Promotion Campaigns:** The Corporation and the Office for Travel Promotion shall plan and execute the promotion campaigns to maximize the return of investment for each advertising dollar expended. The campaigns should be comprehensive in scope and should advertise in all regions of the world to encourage overseas arrivals to the United States.

Per the mandate in Section 2(e)(1)(D), the Corporation shall develop and execute a plan to generate international tourism benefits for all states and the District of Columbia and to identify opportunities and strategies to encourage tourism to underserved rural and urban areas equally, including areas not traditionally visited by international travelers. It is our intention that U.S. territories are included in the promotional plan along with the states and District of Columbia. We expect the Corporation and the Office of Travel Promotion to vigorously implement and execute this mandate.

**Accountability and Oversight:** Section 3(c) of the Act mandates that the Secretary of Commerce transmit an annual report to Congress, which shall include a comprehensive and detailed report of the operations, activities, financial condition and accomplishments of the Corporation. To aid in the oversight of the Corporation and the Office of Travel Promotion, we strongly suggest the Corporation submit its marketing plan to the Senate Committee on Commerce, Science, and Transportation and the House Committee on Energy and Commerce.

**Corporation for Travel Promotion Funding:** The Corporation has the fiduciary duty to collect and ascertain the quality of the private sector contributions, protect the corpus of the fund from undue and unnecessary risks, and to make certain that the funds are not used in a discriminatory fashion.

**In-Kind Goods and Services:** The Act allows for up to 80 percent of the private sector contribution be fulfilled with in-kind contributions of goods and services that are appropriate to carry out the dictates of the Act. The Corporation shall be very conservative in its acceptance of these goods and services. The contributions must be directly useable for the campaigns, their value assessed at current fair market rates, and they must have true commercial value. In making that evaluation, we suggest that the good or service be able to be sold on the open market and garner the assessed fair market return. As example, but not for the purposes of limiting the discretion of the Corporation, we would consider television air-time or print advertising space to be examples of goods and services that would be appropriate for acceptance and usage.

**Protecting the Corpus of the Fund:** As part of its fiduciary duties to protect the Fund, the Board of Directors must invest the fund in conservative investment vehicles, such as United States Government Treasury Bills. While the Corporation should invest a \$200 million dollar corpus to take advantage of the fund's size to benefit American travel businesses and taxpayers, the Fund should not be exposed to undue risk.

**Prohibition on Discriminatory Fund Distribution and Campaign Focus:** As mandated

in Section 2(e), the international travel advertising campaign must benefit all states and the District of Columbia. We read this mandate as strictly forbidding the Corporation from expending funds to promote one specific company. The campaign should promote travel to the United States to provide benefits to multiple regions and businesses. A campaign singling out specific travel related companies would violate Section 3(d) of the Act.

**Governmental Responsibilities for Collecting and Distributing Funds:** We expect the Departments of Commerce, Homeland Security and Treasury to work together collaboratively to execute the collection and distribution of monies to the Travel Promotion Fund.

**Department of Homeland Security and Electronic System for Travel Authorization (ESTA) Funding Discretion:** The Travel Promotion Act of 2009 mandates that the Secretary of Homeland Security establish and collect a fee from visa waiver travelers to use the ESTA for the Travel Promotion Fund and an amount to ensure the costs of providing and administering the system. This mandate does not supersede or limit any additional authority or discretion for the Department of Homeland Security to pay for ESTA administration with other funds. The need for this additional ESTA fee is at the determination of the Secretary. If the ESTA system is funded by other means, the Secretary of Homeland Security shall collect the minimum \$10 for the Travel Promotion Fund as mandated by the Travel Promotion Act of 2009.

**Usage of Fees after seeding the Travel Promotion Fund:** The Travel Promotion Fund Fee as established in Section 5 of the Act is to provide the funding level mandated by the year of collection. After the Federal contribution level for the Fund has reached its annual cap, we strongly suggest that any funds collected beyond that level may be used to complete visa waiver system improvements to the ESTA.

The Department of Commerce is the Primary Agency: The Department of Commerce is responsible for administering the Travel Promotion Fund. As part of the Secretary's duties, which include selecting the Board of Directors of the Corporation, overseeing the Office of Travel Promotion within the Department, and executing the accountability measures mandated by the Act, the Secretary also is responsible for administering the Fund. The Department of the Treasury is not responsible for administering the Travel Promotion Fund; its responsibilities are limited to holding and distributing the funds to the Corporation of Travel Promotion.

Again, we thank you for your consideration and assistance in bringing the Travel Promotion Act of 2009 before the House for a vote. The Senate Committee on Commerce, Science and Transportation will stand with you to execute aggressive and exacting oversight of the implementation and execution of S. 1023. As always, we look forward to working with you on this and other matters before our Committees.

Sincerely,

JOHN D. ROCKEFELLER IV,  
*Chairman*

AMY KLOBUCHAR,  
*Chairman, Subcommittee on Competitiveness, Innovation and Export Promotion.*

BYRON L. DORGAN,  
*U.S. Senator.*

Ms. LORETTA SANCHEZ of California. I thank my colleague for her continued support, and I look forward to working with you on this issue.

Mr. Speaker, I rise in support of S. 1023 the Travel Promotion Act, and the underlying bill, H.R. 1035, the Morris K. Udall Scholarship and Excellence in National Environmental Policy Amendments Act of 2009.

The Travel Promotion Act would help establish an independent non-profit corporation that would provide and maintain useful tourist information.

Most importantly, this bill will further educate potential tourists abroad about the U.S. entry policies.

As the Chairwoman of the Subcommittee in charge of all ingress and egress into our country, this bill will play an important role in educating foreign travelers about our border and port of entry procedures and will help clear up misconceptions about traveling to the United States.

This outreach and expansion will improve research and development activities to promote international travel to the United States at a time when many foreigners are wary of traveling to our country.

Foreign travelers traditionally stay in a visited region longer and spend more money during their stay than domestic travelers do.

This bill will find ways to encourage more foreign travelers to visit the United States.

As the Representative of the district that includes the happiest place on earth, Disneyland, this bill is crucial to my district.

In Orange County, the tourist industry alone supports approximately 160,000 jobs, both directly and indirectly.

Furthermore, in 2008 tourism brought in over 43 million visitors, including 2.5 million foreign visitors, to Orange County, California.

These visitors generated over 7.9 billion dollars in spending which provided critical support to local businesses and governments.

I want to thank Representative DELAHUNT, Senator DORGAN, and the leadership of both the House and Senate for advocating for this legislation.

I urge my colleagues to vote for the underlying legislation and pass H.R. 1035.

Ms. CASTOR of Florida. Mr. Speaker, I'd also like to add for the RECORD that we intend to work with Congressman DOYLE of Pennsylvania regarding non-profit cultural destinations as part of the bill.

I reserve the balance of my time.

Mr. BLUNT. Mr. Speaker, I would like to join Mr. ROE in supporting the Morris K. Udall Act, and that now includes the Travel Promotion Act, an act that passed this body in the last Congress with 244 cosponsors and by voice vote, a very similar piece of legislation we sent to the Senate and to the other body in the last Congress. I'd also like to thank my good friend, Mr. DELAHUNT from Massachusetts, for his sponsorship of the House version of this legislation, and my co-Chair of the House Travel and Tourism Caucus, Mr. FARR from California, for his support and advocacy of this bill. Also, Mr. BARTON from Texas, Mr. RADANOVICH

from California, Mr. KING from New York and Mr. SMITH from Texas have been helpful in moving this bill through the process.

I believe that the House bill was superior in some ways to the Senate bill, but the goal of both of these bills is a worthy goal. It's a goal that this Congress should move forward with. Every State and every congressional district is a tourism destination. In Missouri, whether it's the St. Louis Arch, the world's largest sporting goods store in Springfield, Missouri, the Bass Pro Shop, or for the 8.4 million tourists that visited Branson, Missouri, last year, all benefit from tourism, and our country benefits from international visitors and international tourism.

This bill does create a fee paid by visitors to the United States that, in fact, based on information I have, is lower than the entry and exit fees in the countries that are generally discussed. The Czech Republic, Denmark, Estonia, Finland, France, Germany, Hungary, Ireland, Italy, Lithuania, the Netherlands, Slovenia, Spain, Sweden, and the U.K. all have entry fees for Americans that would exceed this entry fee that would allow us to have a matching fund to encourage international tourism.

After barely recovering to its pre-9/11 numbers in 2007, international tourism took a 17 percent decline. The bill we're considering today will remind people overseas of what the United States has to offer. The corporation created by this bill will be composed of individuals with expertise across the spectrum that will show the value and the logistics of international travel. Foreign travelers to the United States spend more time in the country than the average domestic traveler. They spend more money, and frankly, in virtually every case, they like Americans and America better after they've visited here than they did when they first came. I'm hopeful the House will pass this legislation today, and I'm looking forward to seeing it signed into law.

I reserve the balance of my time.

Ms. CASTOR of Florida. Mr. Speaker, I am proud to yield 1 minute to my colleague from the House Energy and Commerce Committee, Mrs. CHRISTENSEN from the Virgin Islands.

Mrs. CHRISTENSEN. Mr. Speaker, as a member of Energy and Commerce and also a former Steering Committee Member of the Travel and Tourism Caucus and a cosponsor of this bill, I too support its enactment with the understanding that its implementation will benefit the territories and not just the 50 States. So I want to thank Ms. CASTOR, Mr. DELAHUNT, Mr. BLUNT and others for their work on the bill; thank them for the exchange of letters clarifying the application of the territories, and we look forward to working with you on the implementation of the bill.

□ 1630

Mr. BLUNT. I am wondering if I can enter into a colloquy with the gentleman from Massachusetts, the principal sponsor of this bill, Mr. DELAHUNT.

Mr. DELAHUNT, as this legislation advances, it's important that tour operators, most of which are small businesses involved in inbound U.S. travel, are not adversely affected and that any marketing Web site the corporation will create is protected from being misused in a way that would favor particular companies or segments of the industry over any other and would provide equal access and choice. There are three issues I need to have further clarification on as we move forward.

First, the board of directors of the Corporation for Travel Promotion created by this legislation will include representatives from many sectors of the travel industry. I'm hopeful that at least one member of this board will be a representative from the receptive/inbound tour operator sector. In addition, given their current efforts to market the United States as part of their business model, tour operators should be excluded from any assessment the corporation may impose.

Second, any marketing Web site the corporation might create may include destination information for all 50 States, the U.S. territories, and the District of Columbia; but it should not include an internal consumer booking engine or reservation system that would infringe on the services provided by existing travel operators.

A Web site should include no link to sites promoting non-U.S. destinations except those I mentioned, and any external Web links on the site, including those connected to paid advertisements, should be prohibited from the homepage.

Third, any advertising space on a Web site the corporation might create should be equally available to any sector or company promoting travel to the United States and should not be focused on any one sector. To ensure this availability, I'd encourage the corporation to ensure that no single entity be allowed to purchase more than 5 percent of the total advertising space available on the marketing Web site, and at least 10 percent of the space offered should be reserved for small businesses. No industry segment should receive any favored pricing or access.

I respectfully ask my friend from Massachusetts that he work with me to ensure that all sectors of our travel industry be protected and any Web site created by the corporation be used effectively and without abuse.

I yield to the gentleman.

Mr. DELAHUNT. I want to thank the gentleman from Missouri for bringing these concerns to our attention and to the floor. I want to assure the gentleman that these points and these

issues are important to the success and effectiveness of this legislation, and I'm in full agreement with the gentleman.

Mr. BLUNT. I reserve the balance of my time, Mr. Speaker.

Ms. CASTOR of Florida. Mr. Speaker, I yield 3 minutes to the original sponsor of the Travel Promotion Act, the gentleman from Massachusetts (Mr. DELAHUNT).

Mr. DELAHUNT. I thank the gentleman for her leadership on this effort and the work that many who are sitting here have contributed to today's debate on the floor.

As has been indicated, the bill addresses the sharp decline in the number of overseas visitors to the United States. There were over 600,000 fewer visitors in 2008 than there were in 2000. This is happening as the world travel market is expanding but our market share is plummeting. In other words, overseas tourists and businessmen and students are going elsewhere. This has a devastating consequence to our economy, as one of every eight nonfarm jobs is created directly or indirectly through travel and tourism.

This drop in foreign travel during the 7-year period from 2001 to 2008 translates into a loss of \$182 billion in visitor spending, a loss of \$27 billion in tax revenue, and the loss of more than 200,000 American jobs annually. The question is: Why? Why did this happen?

The reason is painfully simple. We don't make a coherent effort to tell America's story, to say to foreign visitors that they are welcome here or to explain the confusing and sometimes intimidating rules and delays and even indignities that have become part of our visa and border entry process since 9/11.

Just last week, an International Olympic Committee member from Pakistan went out of his way in explaining his vote against Chicago to host the games to note that going through the United States customs can be a harrowing experience.

This legislation would clarify misperceptions about security protocols and other confusing aspects of our entry process that scare away potential visitors in droves and to communicate unambiguously: welcome to the United States.

And the best part: it would not cost U.S. taxpayers a penny. The program is partially funded by a \$10 fee charged to visitors under the Visa Waiver Program. The rest of the cost is defrayed by the U.S. travel industry itself. In fact, it will actually reduce the deficit by some \$400 million. So it's a win for the economy, it's a win for American foreign policy, and it's a win for fiscal responsibility.

So I urge my colleagues to join my friend from Missouri (Mr. BLUNT) and I, along with the co-Chair of the Travel Caucus, Mr. FARR, in voting for this

legislation. I look forward to getting this program under way within the next few months.

I understand that the gentlelady from Guam wishes to enter into a colloquy.

Ms. CASTOR of Florida. I'll yield the gentleman an additional 1½ minutes.

Mr. DELAHUNT. I yield to the gentlelady from Guam.

Ms. BORDALLO. I thank my colleague for yielding, and I rise to clarify the application of the Travel Promotion Act to the territories. Of chief interest to me and my colleagues representing the territories is ensuring that the travel promotion mandates of this legislation fully encompass and take into account the territories.

Tourism is a critical component of the economies of the territories Guam, Puerto Rico, the Virgin Islands, American Samoa, and the Northern Mariana Islands.

I support the underlying bill. Given the territories depend heavily on tourism and will make contributions to the Travel Promotion Fund, they should be included.

I ask my colleagues, Mr. DELAHUNT and Mr. BLUNT, to clarify its application of the territories.

Mr. DELAHUNT. I thank the gentlelady from Guam for raising this issue and for her leadership. It is not the intent of this body for the territories to be excluded from the mandate of the Corporation for Travel Promotion or from the scope of duties prescribed by the bill for the offices within the Department of Commerce.

This bill should be interpreted, rather, as granting the corporation both the authority and obligation to promote tourism in the territories.

Ms. BORDALLO. I thank the gentleman.

Mr. BLUNT. Mr. Speaker, I second the views expressed by my friend from Massachusetts. The territories should, without question, be made part of the corporation's and the Commerce Department's effort to promote international travel.

Having traveled to the territories, I recognize the value of their visitor industries to their economic development and reiterate our expectation that this legislation, when implemented, will take into account travel promotion for the territories.

Mr. Speaker, I'd like to yield 2 minutes to my friend from California (Mr. FARR). He and I are co-Chair of the Travel and Tourism Caucus. Again, every State and probably every congressional district feels that it has a tourism destination. And over 100 Members of the Congress are members of the Travel and Tourism Caucus to promote that important part of our economy, and nobody more actively does that than Mr. FARR.

Mr. FARR. Thank you very much, Mr. BLUNT, for yielding and for the nice

comments. I co-chair, as Mr. BLUNT said, the Travel and Tourism Caucus. This is a caucus that is essentially looking at how we can increase the usage of travel and tourism in the United States. The travel and tourism industry is the biggest industry in the United States—in fact, the world.

If you really look at this bill, it's called the Travel Promotion Act, but this is really about jobs—jobs and jobs. It's about understanding the United States of America and its territories. It's about peace, because it's about people. I think it's especially about jobs everywhere, because every part of the United States has something special to offer. Yet, we never take the advantage of telling anybody overseas about that. We have never done that.

You watch television today and there's countries all over the world advertising for you to come there. We're not doing that. This allows us to do that, but with private money, not taxpayer money. So it's a paid-for bill.

If anybody has been watching the Ken Burns series on the national parks, the comments I've heard and I felt were, Wow, I'm really proud to be an American. That is a beautiful series about the United States. That's not shown overseas. People don't know about all these assets that we have.

This act is going to allow that process to attract people. So, in a way, it is the biggest job promoter that we do, because it's the biggest industry, and it's everywhere.

The average international visitor spends \$4,500 per visit. That's more than we spend when we're traveling around the United States.

So I think this is good for America, it's good for the world, it's good for peace and understanding. But, most of all, it's good for putting people back to work in the United States of America. Please support this act.

Ms. CASTOR of Florida. Mr. Speaker, may I inquire how much time is left on both sides.

The SPEAKER pro tempore. The gentlewoman from Florida has 5 minutes remaining. The gentleman from Missouri has 9½ minutes remaining.

Ms. CASTOR of Florida. At this time I am pleased to yield 1 minute to my good friend, the gentlewoman from Nevada (Ms. TITUS).

Ms. TITUS. I rise in strong support of the Travel Promotion Act of 2009. Passage of the Travel Promotion Act is vital to my congressional district in southern Nevada. The current economic recession has hit our area especially hard, and unemployment is at an all-time high because travel and tourism revenue, the driver of our local economy, has declined dramatically.

Travel and tourism generate billions in tax revenue for local, State and Federal governments. Nationally, the travel and tourism industry employs 7.7 million people. In Nevada, more than

450,000 jobs are created by travelers who pumped \$34.5 billion into the Nevada economy in 2007.

This act will bring millions of additional travelers to the United States at no cost to our taxpayers; it will create a public-private partnership to promote our Nation as a leading international travel destination; and it will communicate U.S. security and entry policies to people abroad. It's estimated that the program will generate \$4 billion in new spending and \$321 million in new Federal tax revenue annually.

So I strongly support passage of the Travel Promotion Act. It will help our economy in Nevada and across the Nation.

Mr. BLUNT. I continue to reserve the balance of my time.

Ms. CASTOR of Florida. At this time I'm very pleased to yield 1 minute to my good friend, the gentleman from the great State of Florida (Mr. KLEIN).

Mr. KLEIN of Florida. I thank the gentlelady. Mr. Speaker, I rise to support the Travel Promotion Act for all the reasons that have been discussed so far. Tourism is an economic engine for our home State of Florida. From our pristine beaches to the Everglades to our large destination amusement parks, Florida has so much to offer both international and domestic tourists.

The tourism industry creates jobs in all sorts of sectors: hospitality, construction, travel. In fact, in my home county of Palm Beach, as well as Broward County, 160,000 people are employed in tourism-related jobs, contributing over \$11 billion to our local economy.

The tourism industry has faced challenges this year, which is why it is imperative that Congress pass the Travel Promotion Act. This bill will greatly strengthen south Florida's ability and all over the United States the ability to attract tourists from abroad, which will in turn reinforce our local economies.

I encourage our colleagues to join me in supporting this legislation.

Mr. BLUNT. I continue to reserve the balance of my time.

Ms. CASTOR of Florida. At this time I'm very pleased to yield 1 minute to my good friend, the gentlewoman from Nevada (Ms. BERKLEY).

Ms. BERKLEY. I thank the gentlelady for yielding, and I particularly thank Mr. DELAHUNT for his steadfast leadership on this issue.

□ 1645

Mr. Speaker, I rise today in strong support of the Travel Promotion Act. In these difficult economic times, this bill is vital for our Nation's economy. It is essential to my hometown and congressional district of Las Vegas, which is the very definition of tourism and travel.

Last year, the United States lost nearly 200,000 travel-related jobs. In my district of Las Vegas and North Las Vegas, we've been hit particularly hard, with one of the highest unemployment rates in the country and a hotel occupancy rate just about as low as we've ever seen it.

This bill will bring back these jobs and put Americans back to work. Independent economists say that for every dollar we spend on this program, we will bring in \$3 of increased revenue from added jobs and economic growth that will be created by increased tourism to our country. And this could be accomplished without adding to our national debt.

Every State in our Nation benefits from tourism. Tourism is one of the largest industries in America. Whether you have mountains, beaches, amusement parks, vineyards, ballparks, historic monuments or gaming, we all benefit from this bill.

This is a great piece of legislation that will help energize our economy at a time when we need it most. I urge support for this bill.

Mr. BLUNT. I continue to reserve the balance of my time.

Ms. CASTOR of Florida. Mr. Speaker, I am the last speaker on my side, so I will reserve my time. I have the right to close.

Mr. BLUNT. Mr. Speaker, I would say that I'm as hopeful as all the speakers have been that this bill passes, that this effort encourages foreign travel and that this effort encourages that important segment of our economy. This is an area where the United States has a lot to gain by encouraging foreign travelers who, as we've said before, come, stay longer, they spend more and they like us better. It's an important part of our diplomacy. It's an important part of our economy.

I urge the passage of this bill, and I yield back the balance of my time.

Ms. CASTOR of Florida. Mr. Speaker, I would like to thank the gentleman from Missouri for his support in all of his endeavors to promote travel and tourism in the United States of America.

My hat is also off to Congressman DELAHUNT from Massachusetts who certainly understands the importance of reviving our economy and bringing good, clean industry jobs in the tourism and travel sector to our great Nation.

We need the Travel Promotion Act now more than ever during this economic downturn. The Travel Promotion Act is a jobs bill. It is a vital economic development initiative to help us combat this horrendous economic downturn.

Mr. SABLON. Mr. Speaker, I rise today in support of H.R. 1035, the Morris K. Udall Scholarship and Excellence in National Environmental Policy Amendments Act of 2009, as

amended. Specifically Title II, which consists of the full text of S-1023, the Travel Promotion Act of 2009. Tourism is the main driver of the economy of the Northern Mariana Islands and for the other U.S. Territories. S-1023 would establish the Corporation for Travel Promotion (Corporation) and the Travel Promotion Fund, both of which I support, and recognizes the need for the United States government to have an active role in promoting tourism to the U.S. In addition, it allows the collection of an entry fee through 2014 for foreign visitors to the U.S., including the Territories. However, S-1023 as currently written does not recognize the Territories, even though the majority of our visitors are foreign visitors and will be paying the assessed fee. Like a taxpayer who pays into a system, you should expect to get some benefit, and this is no different. I appreciate the gentlelady from Guam and Representative DELAHUNT for their colloquy in ensuring that the intent of this Congress in S-1023 is to include the Territories and ensure they receive the full benefits of the activities of the Corporation under this important legislation. Tourism is one of the major industries in our country and in the Northern Mariana and the Territories, it is our economic lifeline and I urge my colleagues to support this legislation.

Mr. DINGELL. Mr. Speaker, while I support H.R. 1035, the "Morris K. Udall Scholarship and Excellence in National Environmental Policy Amendments Act of 2009," I rise to voice my most rigorous protest at its inclusion of S. 1023, the "Travel Promotion Act of 2009." This legislation, which has not benefitted from proper consideration by the various committees of jurisdiction in this body, creates an unnecessary Corporation for Travel Promotion. In sharp contrast to my long-held view that private corporations can and should promote travel to the United States on their own, the Corporation for Travel Promotion, comprised of companies from the travel and tourism industry, will be the recipient of taxpayer funds to finance its operations. Admittedly, the Corporation will be required to match public sector funds with contributions from its members, but these matching contributions may be up to 80 percent in the form of goods and services, whose value is to be determined by the Corporation itself. This outrage underscores the deficient public oversight to which the Corporation will be subject, as well as the fundamental dearth in meaningful constraints placed on its operation under pending statute. Further illustration of this is the legislation's omission of a provision to prevent the Corporation from acting solely in the benefit of one constituent member, as well as no requirement that public funds appropriated to the Corporation be returned to the Treasury in the event they are not expended.

The questions of the Corporation's establishment, functioning, and funding aside, I feel S. 1023 neglects to consider the more basic reasons for declining travel to the United States. Anecdotal evidence suggests potential foreign visitors take issue with America's reputation of late, particularly in the wake of the Iraq War, and moreover are confused and very likely offended by the difficulties of obtaining a visa to this country and the unfriendly treatment when they arrive at its borders. We

would do well to examine what must be done in order to rehabilitate our image internationally, as well as how to facilitate easier entry into this country, while maintaining a necessary degree of security. In short, simply creating a corporation to promote travel to the U.S. will not address the more essential elements of why fewer foreigners decide to come to our country as tourists.

Finally, I must also object to the apparent failure of this body to afford the Travel Promotion Act proper consideration under the auspices of regular order. I would note that during the 110th Congress, the Committees on Energy and Commerce, the Judiciary, and Homeland Security worked cooperatively to produce an amended version of this legislation for consideration by the full House. While I confess that bill was in no way perfect, it included much-needed improvements to the oversight and accountability measures applicable to the Corporation and, in my view, represented a more palatable alternative to the measure before us for consideration today.

In closing, I intend to vote in favor of H.R. 1035 but must voice my most rigorous protest at its inclusion of the Travel Promotion Act, legislation I find remarkably lacking in merit and deficient in due deliberation by this body.

Ms. CASTOR of Florida. I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Arizona (Mr. GRIJALVA) that the House suspend the rules and agree to the resolution, H. Res. 806.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the ayes have it.

Ms. CASTOR of Florida. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX and the Chair's prior announcement, further proceedings on this motion will be postponed.

#### CONFERENCE REPORT ON H.R. 2997, AGRICULTURE, RURAL DEVELOPMENT, FOOD AND DRUG ADMINISTRATION, AND RELATED AGENCIES APPROPRIATIONS ACT, 2010

Ms. DELAUNO. Mr. Speaker, pursuant to House Resolution 799, I call up the conference report on the bill (H.R. 2997) making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes, and ask for its immediate consideration.

The Clerk read the title of the bill.

(For conference report and statement, see proceedings of the House of September 30, 2009, at page 23257.)

The SPEAKER pro tempore. Pursuant to House Resolution 799, the gentlewoman from Connecticut (Ms. DELAUNO) and the gentleman from

Georgia (Mr. KINGSTON) each will control 30 minutes.

The Chair recognizes the gentleman from Connecticut.

#### GENERAL LEAVE

Ms. DELAURO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include tabular and extraneous material on the conference report to accompany H.R. 2997.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

Ms. DELAURO. Mr. Speaker, I yield myself such time as I may consume.

I am delighted to present the 2010 Agriculture-Food and Drug Administration appropriations conference report. I want to note for my colleagues that this is the earliest that an Agriculture appropriations conference report has come to the House floor since 1999.

This report represents a culmination of many months of hard work in both Houses of Congress. I want to offer my thanks to the ranking member, Congressman JACK KINGSTON, for his collaboration and input over these months, and I also want to say "thank you" to the minority and majority staff for all of their tireless work in this effort, a "thank you" to our ranking member, Mr. LEWIS, and a special "thank you" to Chairman OBEY for his counsel on this effort.

We have been busy all year. The subcommittee has held seven hearings so far, including two hearings with the Secretary of Agriculture, a hearing with the Acting Commissioner of the Food and Drug Administration and another with the Inspector General of the Department of Health and Human Services. We had a hearing on domestic nutrition programs, a hearing on the equivalency process for imported meat and poultry. We also had a hearing in which members discussed their priorities.

The fiscal year 2010 conference report before us, the culmination of the process, focuses on several key areas such as: supporting agricultural research, investing in rural communities, protecting public health, bolstering food nutrition programs and food aid, and conserving our natural resources. The final bill invests in these priorities and the agencies that can help us to meet them while making specific and sensible budget cuts where feasible.

The 2010 Agriculture-FDA appropriations conference report provides for \$23.3 billion in funding, a 13 percent increase over 2009 levels, with major and responsible investments across the board.

In terms of protecting public health, the bill provides a substantial increase for the Food and Drug Administration—\$306 million—to conduct more inspections of domestic and foreign food and medical products.

In addition, the bill fully funds the administration's request for the Food Safety and Inspection Service at the United States Department of Agriculture, providing over \$1 billion for FSIS for the first time in history.

The appropriate funding of FDA and FSIS is not only a matter of public health and consumer safety, it is a matter of national and economic security. Not all of the dangers that threaten the health and safety of American families can be found in airports, border checkpoints or harbor containers. Sometimes they lurk in our refrigerators and on our kitchen tables. We cannot afford to neglect our food safety system any longer, and I am pleased that we fund the FDA and the FSIS adequately in this bill.

With regards to nutrition, the bill provides \$7.25 billion for WIC, the women, infants and children program, to serve our Nation's vulnerable populations and help those hit hardest by the economic crisis.

Our fundamental responsibility as legislators and as leaders, to say nothing of basic morality and fairness, demands that we do everything that we can to help Americans suffering right now from poverty and malnutrition. Each dollar we spend on nutrition here in this bill means food on the table for hungry families who are struggling.

The bill also includes \$171 million for the Commodity Supplemental Food Program, or CSFP, and expands assistance to seven new States: Arkansas, Oklahoma, Delaware, Utah, New Jersey, Georgia and Maine.

In addition, conferees agreed to extend the school lunch program for 1 year at the request of the Education and Labor Committee to ensure that the school lunch program remains operational and that schoolchildren will not go hungry.

The bill makes significant investments in agricultural research: \$1.2 billion for the Agricultural Research Service, over \$1.3 billion for the National Institute for Food and Agriculture, and among the key programs funded is \$262.5 million for the Agriculture and Food Research Initiative, a competitive research program.

In addition, the report seeks to create new opportunities for growth in the Nation's small-town economies with rural development and conservation. The agreement provides \$12 billion for the section 502 Guaranteed Single-Family Housing Loans and \$164 million for the Rural Energy for America Program, just two of the important programs funded here to encourage rural development.

The bill addresses concerns raised on a bipartisan basis about the need to modernize the Farm Service Agency's information technology networks and databases in order to provide more effective and secure service for the agency's customers. It fully funds the request of \$67.3 million for this work.

The conference report increases funding for key safety nets for our farmers, \$257 million more in farm ownership loans and \$676 million more in farm operating loans than the President's request.

This agreement includes \$350 million for dairy assistance, \$290 million to the Secretary of Agriculture to supplement producers' income and \$60 million for purchasing surplus cheese and other dairy products to distribute to food banks.

The conference agreement also works to conserve America's natural resources and thus sustain our national prosperity. It includes approximately \$1 billion for the Natural Resources Conservation Service to improve service in the field, conserve and protect the environment and upgrade aging dams at risk of catastrophic failure. It restores funding eliminated in the budget for the Resource Conservation and Development program and maintains the House position of keeping it in a separate account.

It funds the Commodity Futures Trading Commission above the President's request to better secure the markets from improper speculation. And it continues to protect our Nation's families and farmers from the dangers posed by unsafe processed poultry imports from overseas. Some of you may be familiar with the long debate we've had over processed poultry from China. From the very beginning, I have insisted that the question of processed Chinese poultry imports be taken as a public health issue that must not be entangled in trade discussions. This conference report language provides meaningful assurances that the public health will be protected and that adequate preventive measures will be taken to ensure poultry products from China are safe.

The final conference language firmly establishes that Chinese poultry imports must live up to American sanitary conditions before being shipped to the United States. This includes requiring new onsite audits, new onsite inspections and an increased level of port-of-entry reinspections. The language also requires USDA to report frequently to the Congress on the implementation of any rule authorizing China to export poultry products to the U.S. This will allow the Congress to monitor USDA's work in this area on a frequent basis.

In short, the new language ensures the USDA will perform the necessary inspection and monitoring functions to minimize possible food safety threats from Chinese processed poultry imports. I look forward to working with the Secretary as this process moves forward.

Finally, for all the important investments in this bill, we have also made responsible cuts where warranted. This report includes \$194 million in cuts

below 2009, more than \$1 billion in cuts below the 2010 budget request, and \$346 million in cuts below the 2010 House-passed bill.

Taken as a whole, I believe we have crafted responsible agriculture legislation that alleviates short-term suffering, encourages long-term growth,

invests in our future and reflects our priorities as a Nation.

In closing, let me take a moment to thank the staff who have worked diligently to help to put this bill together. Subcommittee majority staff—Martha Foley, our clerk, Leslie Barrack, Matthew Smith, Jason Weller, Cliff Isenberg and Kerstin Millius have

worked closely with David Gibbons on the minority staff. In addition, Brian Ronholm and Letty Mederos on my staff, and Merritt Myers and Meg Gilley from Mr. KINGSTON's staff have been of tremendous help to this subcommittee.

I urge you to support this bill.

I reserve the balance of my time.

□ 1700

Mr. KINGSTON. Mr. Speaker, I yield myself as much time as I may consume.

I want to tell a story about Kika de la Garza who at one time was chairman of the Ag Committee. Chairman de la Garza came down to Georgia and visited the Kings Bay nuclear submarine plant. At that time, as it still is, our nuclear submarine plant was a marvel of technology and was really a floating and submerged fortress that was one of the most powerful weapons on the globe today.

He asked the captain, Tell me about this nuclear generator. Well, the generator goes on and on, and of course nuclear is a very powerful source of fuel. He said, Well, what would make you turn the submarine around? If the nuclear generation can make this submarine go all over the globe without stopping, without ever having to stop to refuel, what makes you go back to port? And the captain of the nuclear submarine looked at the chairman of the Agriculture Committee with some amazement and amusement and said, Well, Mr. Chairman, we turn around when we run out of food. That's a very profound statement. It's something that as we debate this bill, I think we should be aware of.

Our agricultural policies can be a little peculiar, can be a little bit difficult to follow, and can be open to a lot of criticism, but our food policy works. We have a large food supply, an abundant food supply at very low prices. Indeed, when you go into a grocery store, you complain if you can't get fruit 12 months a year or if the milk isn't at a good price or whatever it is. We have a good food policy in America and, as a result, we spend more time talking about obesity than we do hunger. So I think all Members should be very appreciative of the Ag appropriations conference report. We all support it in some fashion, sometimes not necessarily casting a vote "yes," but the vote, nonetheless, isn't indicative of how we feel about the importance of agriculture.

I have some concerns about this bill. We have worked very closely as a subcommittee. We've had a lot of hearings. The chairwoman is a very vigorous, energized member and has a lot of passion on lots of different issues. We have a lot of great agreements and a lot of disagreements on some things that she feels passionately about and some things I feel passionately about. As she has mentioned, we both have very strong staffs on the majority and on the minority side. We're very appreciative of that, and I think we have got a good ag family. My concerns about this bill though, Mr. Speaker, focus on the spending levels.

This bill was higher than last year when it left the House, and now it's

again higher, now that it's come back to the House from the Senate. The bill is nearly 14 percent higher than it was last year. The discretionary spending level is \$23.3 billion, and it's about \$2.8 billion over last year's level. The mandatory spending is 11 percent higher than 2009. Combined, the mandatory and the discretionary spending levels are about 12 percent higher than last year. I'm concerned about that because, you know, food prices haven't gone up that much.

Think about Social Security. Our seniors will not be receiving a COLA this year because, among other things, Social Security is based on inflation, which has a reflection of food. So they are scheduled not to receive a COLA, and yet people on food stamps are going to get a huge increase. I find that bothersome. If we look at some of the individual accounts, I could tick them off. But I would just say, if you look at some things, why is the spending up so high?

Well, take broadband. Broadband has about \$4 million in it this year, yet in the stimulus package which was passed—the stimulus package which was financed not on tax dollars but on borrowed dollars and printed dollars. It's a package that our children's children will be paying for. In that package, the Rural Utility Service received \$2.5 billion, not to mention another \$2.5 billion—actually, about \$3 billion—that was in another account that the Department of Commerce will be funding. None of that has been spent yet. So we've got \$6 billion to \$7 billion in broadband that came out of the stimulus bill that has not been used, yet this bill gives them another \$4.5 billion. That defies common sense.

Food stamps, this bill has \$4.3 billion more than 2009. Half of the mandatory spending is in food stamps, \$58.3 billion. But in the stimulus bill, food stamps received a \$19 billion slug of money. It wasn't because of an increase in food prices. It was allegedly because of new enrollment or anticipated new enrollment. But this bill still gives food stamps an increase. It's ironic, because one of the things this bill also does in reaction to falling milk prices is it gives the dairy farmers more money. So we're giving people who get food stamps an increase.

This bill does not fund Social Security, but just to think about this in a sequence, Social Security recipients do not get an increase; food stamp recipients do get an increase because of a rise in food costs and dairy farmers get money because of falling dairy prices. That's not consistent. I think we could do better than that.

Food for Peace gets \$1.69 billion. That's an increase of \$462 million on top of what they just got in the stimulus bill of \$700 million. I don't think that is justified at this point in time. So I have some real concerns about our

spending. Keep in mind that the Obama administration will have the historical record of the highest deficit in the history of the United States Congress, three times as high as the highest deficit in the history of the United States. I want to repeat that. The Obama-Pelosi deficit will be \$1.5 trillion this year. That's three times as high as the highest deficit in the history of the United States of America.

Now, we had an opportunity to save some money. We had an opportunity to save \$150 million, but instead, what we did in the conference report was air-drop five new pilot programs: a summer food program for \$85 million; equipment assistance program, \$25 million; WIC breast-feeding outreach at about \$5 million; nutrition outreach for day care, \$8 million; and direct certification expansion of \$25 million. These programs may have some merit. Perhaps we can easily get these programs passed by Members of the House and Members of the Senate, but they did not come through the authorizing committee. They did not come through the Ag Committee. They were not debated. There were not hearings on it. They were air-dropped in this committee, and I'm not convinced that the administration formally asked for them.

There was a lot of discussion about these so-called pilot programs. But why not give the money back to the taxpayers? Why not say, Okay, we have got \$150 million. Let's not go out and create new programs because we know what happens to new programs. Ronald Reagan said it best. He said, If you don't believe in eternal life, try killing a Federal program. It's impossible. You find out how many people have a brother-in-law who works for the particular agency anytime you try to kill any program whatsoever.

So I'm very concerned about the spending of the Obama-Pelosi team, and it has less to do with the Ag appropriations bill but much more to do with the direction of Congress. So my worry about this bill was really tied into a bigger picture of spending.

As I said, I think we've done a good job this year. We've worked hard on a lot of things. Many of these accounts are things that I would fight for and I would certainly support 100 percent of what we're doing with them. But I am concerned about the big picture, because when I talk about that big Pelosi-Obama deficit of \$1.5 trillion, that doesn't even talk about the \$1.29 trillion health care bill that we will be facing soon, which I would say that even if you think a public option is great, if you think that the government who brought us Cash for Clunkers can run health care, you've still got to step back and say, But can you afford it?

So as we look at these appropriations bills, I think more and more people in America are saying, You know what?

You Republicans spent too much money, but doggone it if it's not on supercharge right now. You've got to do something about it.

With that, Mr. Speaker, I'll reserve the balance of my time.

Ms. DELAURO. Mr. Speaker, just to set the record straight on one or two items, as the gentleman from Georgia knows, the difference between a little over 11 percent and a little over 13 percent comes from the \$350 million allocation for U.S. dairy farmers. Now, I don't know if the gentleman has dairy farmers in his district, but North, South, East and West, the dairy industry is collapsing.

Now, it may be that you and your side of the aisle would like to see the dairy industry collapse. We pay for it. It's within the allocation, in addition to which we thought it was the right thing to do in order to deal with small farmers, people who are on their knees with regard to the dairy industry, and essentially because of what happened in China. If the truth be known, it is that given the tainted product in China, we were exporting—we were doing a voluminous export business to China. Because the product was tainted, the Chinese were not buying their product because it killed their kids. So they are not buying milk, and our dairy farmers are suffering as a result of that.

Now, I happen to believe it is an appropriate responsibility for our government to look at what was happening to the U.S. dairy farmers and to provide them with assistance, and the gentleman knows what that is.

In addition to this, one additional point. We keep hearing about air-dropping. You know, it sounds good, and maybe the view is that if you continue to repeat it often enough, it will somehow in some way catch on. There was no such thing as air-dropping anything into this bill. As a matter of fact, as far as I know, Education and Labor is an authorizing committee. This went through the authorizing committee, and essentially, as I said in my opening remarks, conferees—House, Senate, Democrat, Republican—agreed to extend for 1 year the child nutrition program because it isn't ready to move to reauthorization yet. And what would that cut off if we did not, if we did not extend it under this bill? It would mean the school breakfast program, the school lunch program.

I know several years ago folks on the other side of the aisle thought it was a good idea to end the school lunch program. I think probably on a bipartisan basis these days no one believes that we should end these nutrition programs. So nothing was air-dropped. It was vetted by the committee, supported by Chairs and ranking members, both sides of the aisle, House and Senate, and essentially what we did, at no cost within this allocation, was to extend this program for a year.

With that, I yield 3 minutes to the gentleman from Texas (Mr. HINOJOSA).

Mr. HINOJOSA. Thank you, Madam Chair, for yielding time to me.

Mr. Speaker, as chairman of the Congressional Rural Housing Caucus, I rise in strong support of the Agriculture appropriations conference report for fiscal year 2010. It goes a long way to improving the affordability, availability, and quality of housing in rural America.

On April 2, 2009, several of my colleagues and I sent a letter to Chairwoman ROSA DELAURO and to Ranking Member JACK KINGSTON from Georgia encouraging them to provide significant funding for several rural housing programs. I am pleased with the amount of funding each of these have received and look forward to providing additional funding to some of those that were kept at the fiscal year 2009 appropriations level.

Mr. Speaker, rural America needs our help. Our rural constituents, their families and their communities need our support. This conference report will improve the quality of life in rural America, an area of the country that was neglected for quite some time.

I want to thank Chairwoman ROSA DELAURO and Ranking Member JACK KINGSTON of the Appropriations Subcommittee on Agriculture for finding and for providing the ways and means to improve the affordability, availability and quality of housing in rural America. I also want to thank Chairman OBEY and Ranking Member LEWIS for bringing this conference report to the floor. I applaud you for your efforts and thank you for this conference report. I look forward to continuing to work with all of you to increase funding in future fiscal years for programs that help rural America.

I urge all my colleagues to support this conference report that will bring much-needed help to our neighbors in rural America.

Mr. KINGSTON. Mr. Speaker, I would just like to make the point that an earmark that has not been vetted by the subcommittee, not been voted on by the full committee and appears in a conference report is an air-dropped earmark. In this case, the Education and Labor Committee debated these, but they never voted on it. And if they did vote on it, we could have had the vote on the House floor on suspension.

□ 1715

Maybe we could say it's an unauthorized earmark, but it did not come through the House, did not come through the Senate. It appeared in conference committee. And as my friend knows, I have been very steadfast and maybe the only Republican to constantly compliment the majority on a very good job of reducing the number of earmarks. In fact, I have said that at the subcommittee level, at the full

committee level, and at the conference committee level. So credit where credit is due. But I really think on this one these things have been air dropped because they did not come through our committee and they did not come through the Senate. Maybe there's a better word than "air dropped," but they were not voted on by the committee.

Mr. Speaker, I reserve the balance of my time.

Ms. DELAURO. I am happy to yield 3 minutes to a member of the committee and former member of the committee, the gentlewoman from Ohio (Ms. KAPTUR).

Ms. KAPTUR. I thank Chairwoman DELAURO for her excellent work on this bill and the open and bipartisan process that yielded it, and the ranking member, Mr. KINGSTON of Georgia, for his great work always.

I rise in support of this measure because it truly undergirds the four pillars of U.S. agriculture: food, forestry, fiber, and, the most recent, fuel to help America become energy independent.

The American people know that in the area of nutrition truly the funding in this bill, especially for those who are out of work and their families, is extraordinarily important. The Commodity Supplemental Food Program will be expanded to seven States, and we really have no choice in this and the other programs in the bill to try to help the American people weather this really terrible economy. The Special Nutritional Assistance Program and the Women, Infants and Children food program are essentials. They're not frills. They're not unnecessary.

I am particularly pleased that through the Department of Agriculture, and through this measure and the leadership of the chairwoman, that community gardening and hunger-free communities are highlighted so that people become involved in the production of their own food to try to alleviate some of the growing want across the country. These are really very important and they really work.

In the area of rural development, we know that energy independence has to be our future, and agriculture has a rare opportunity to become a part of the green revolution. Really this initiative started with Congress. It really didn't start with USDA. Some of the folks over there have seen the light, and we know that the farmers of our country have to help our Nation transition in this new millennium to an energy-independent future.

In terms of sustainable agriculture, I again want to compliment the chairwoman for the growing efforts in the Urban and Sustainable Agriculture arena to help a whole new generation of American farmers reinvent American agriculture. If you look at our imports, they've increased from \$43 billion in food in 1997 to over \$85 billion

today. They've doubled. In our Nation we can produce our own food. What are we doing? The Agricultural Research Service has ways and means to help us invest and invent new growing platforms in this country to recapture these markets 12 months out of the year. So sustainable farming is given a real boost in this bill.

And I want to praise Chairwoman DELAURO again for her steadfast leadership on this and so many other areas, including food safety, to produce a fair and honest bill that maintains a leadership role for American agriculture and protects the health and safety of our citizens while investing in very important conservation and development tools for rural America and for a sustainable ecosystem. I thank the gentlewoman for yielding me time.

Ms. DELAURO. I am delighted to yield 3 minutes to the gentleman from California (Mr. FARR).

Mr. FARR. I thank the chairwoman for yielding time to me.

I rise in strong support of the Agriculture appropriations conference report. I'm really proud that I think I'm the only member of the committee who sits in the Western United States, where an awful lot of our agriculture in this country comes from. And one of the things I've learned about being on this committee, in the regular authorization committee, is that there is probably no other subject matter that touches every part of the United States as much as the Department of Agriculture. One of the oldest departments in government, essentially touching all the cultures and all of the qualities of rural America.

And in a very urbanized country right now, it's important that we think about rural America because that's the part of America that feeds us and in many cases feeds much of the world. The food and fiber produced in this country is the lifeblood of our Nation. This bill continues the focus on the needs of all Americans, both rural and urban.

Just a few of the things I am very keen on is that I don't think we can stay ahead of the rest of the world in any field unless we commit our best brains and talent to it. The best resources of America are intellectual resources. So you apply those intellectual resources to research, staying ahead of the curve. I am fortunate to represent "the salad bowl of the United States," the Salinas Valley in Monterey County. The production of agriculture there in just one county is about \$4 billion, and it's about 85 different crops. And those crops are what we call fresh crops. That means they go from the field to your fork. And we need to make sure we have all the research that's necessary to make those things fresh and safe for you.

I am also keen on this committee because this is the committee that's in

charge of putting the funds in for school nutrition programs and all the other kinds of nutrition programs, food stamps and the WIC program, Women, Infants, and Children. And these are the nutrition programs that are so essential to getting the right start and a healthy start not only in the beginning of life but for every day in our schools. And we have a lot of work to do in that area.

I'd also like to thank the chairwoman because she has been very involved in plusing-up the Buildings and Facilities Account in order to advance some of these important construction projects that would allow research to continue. I have a very active agriculture research station in Salinas, and it's leading the way on crop improvement protection.

So I appreciate what both Mr. KINGSTON and Ms. DELAURO have done in bringing this bill and the conference report to us today, and I would strongly urge that all our Members support this. This is going to appropriate money to keep the Department of Agriculture and Food and Drug and safety going for another year with conditions that I think are very meaningful for this year in the United States.

It's a good bill and it deserves support. A lot of hard work went into it, and I thank them for their leadership.

Mr. Speaker, I rise in strong support of the Agriculture Appropriations Conference Report for fiscal year 2010.

Chairwoman DELAURO and Ranking Member KINGSTON are to be commended for the product they helped craft. As a member of the Subcommittee I know that there are differences in ideas and I appreciate the Chairwoman's efforts to have open debate.

Mr. Speaker—the food and fiber produced in this country is the lifeblood of our nation. This bill continues to focus on the needs of all Americans, both rural and urban.

It is imperative that we continue to fund priority areas such as research, food safety, nutrition programs and pest detection—just to name a few—that are important to the nation as well as my constituents on California's Central Coast.

I am fortunate to represent the Salad Bowl of the World, the Salinas Valley in Monterey County, that has a production value for agriculture of almost \$4 billion last year, according to Eric Lauritzen, our County Agriculture Commissioner.

We grow primarily for a fresh market, and the investments made in this bill for research, pest detection and food safety are paramount to the growers because without them they couldn't do business.

Agricultural research is an everyday job for many in the Salinas Valley, and the Agriculture Research Service's Research Station in Salinas is leading the way in crop improvement and protection.

Every day, the station's researchers are making agriculture better for all of us. From organics, verticillium wilt and vine mealy bug research to methyl bromide alternatives and treatments for postharvest pest control on per-

ishable commodities, Salinas is leading the charge to keep our food supplies healthy and safe.

The Chairwoman and I have discussed at length many times the need to plus-up the Buildings and Facilities Account in order to advance some of these important construction projects.

I appreciate the gentlewoman's efforts to increase the B&F this year and look forward to working with you in the future to find a solution so we can get shovels in the ground for many of these vital research facilities.

Having the largest fresh production capacity in the world, my growers know how important food safety is. They have already invested millions of dollars in their own resources to provide safe and wholesome food to the nation and the world.

I also appreciate the gentlewoman's efforts to help FDA improve the safety of domestic and imported food by adding \$306 million above the investment we made 2009.

It is time that FDA receives necessary resources to perform time-critical inspections when dealing with the fresh market.

No less important than food safety is pest detection. I am especially glad this conference agreement bolstered the APHIS account in this area. We have in recent outbreaks that strong pest detection program that prevent outbreaks of invasive species in the first place is the most cost-effective way to deal with pests and diseases that are not native to our country.

Finally I would be remiss not to mention the investment made in this conference report for nutrition. In a country as bountiful as ours, it is unacceptable that so many still go to bed hungry.

This conference report includes a one-year extension for the child nutrition program authorities and has reinvested \$150 million in savings back into the child nutrition programs to fund select administration and committee priorities for reducing childhood hunger and improving child nutrition, building program capacity and improving program access and program performance.

Thank you Chairwoman DELAURO for crafting another outstanding bill, and I urge my colleagues to join me in supporting this conference report.

Ms. DELAURO. Mr. Speaker, I am pleased to yield 2 minutes to the gentlewoman from Wisconsin (Ms. MOORE).

Ms. MOORE of Wisconsin. I thank the chairwoman for yielding.

Mr. Speaker, I rise in strong support of the fiscal year 2010 Agriculture appropriations conference report, and specifically the provision included in the bill that will grant Wisconsin a waiver in the Child and Adult Food Care Program to serve a third meal through the At-Risk After-School Supper Program. As a matter of fact, Representative ANDRÉ CARSON and I have introduced H.R. 3321 that would also provide a third After-School Supper meal. I want to thank the chairwoman here and Senator HERB KOHL in the Senate for diligently putting together a bill with record funding that will help to meet the needs of all those who are food insecure.

Every 35 seconds a child is born into poverty, and in the United States 12 million children are at risk of going hungry. In the city of Milwaukee, a city I represent, this is the 11th-poorest large city in the Nation, and we are in dire need of this expansion.

Mr. Speaker, as a school-aged youth, I attended school hungry every day. But now that our country is facing a recession, all signs point to an epidemic of hunger unlike anything we have seen in our lifetime. Between 2000 and 2007, the number of people we have seen living in poverty and suffering from very low food security rose from 8.5 million to 11.9 million. This is a 40 percent increase in the numbers of households living in poverty.

In my own city of Milwaukee, we have the largest achievement gap between blacks and whites in Wisconsin. But studies have shown that students who eat nutritious meals every day perform better on standardized tests, improve reading and are more attentive in class. Every single day this program provides 3.1 million children with nutritious meals.

Mr. Speaker, I again congratulate the gentlewoman.

Mr. KINGSTON. Mr. Speaker, I want to talk about some of the great research that we have done in agriculture which I think is important.

A few years ago I was talking to an ag researcher down in south Georgia, and he's an entomologist and has been doing some work with wasps, and he found out that wasps react differently around gunpowder. And it was a fascinating study because they thought maybe there would be an application in the war on terrorism with wasps, and they might be cheaper than using these very expensive canine dogs to sniff cars. I thought that's pretty interesting. I don't know how they're going to do it. I don't want wasps let loose in my car the way these dogs are. But that's just one example of some of the research that's being done that could potentially save us money.

Another example of some of the great research is, take a city like New Orleans. They have a huge problem with subterranean termites. Termites are a fascinating animal. The more you learn about it, the more you appreciate them. They actually can change sexes. They can live underground in colonies for years and years. But when they run out of wood, they start burrowing holes in all directions trying to find another piece of wood, and when they can't find one, they start coming up to our foundation. Now, that is millions of dollars a year, millions of dollars a year that we have in termite damage that this bill seeks to study.

Another thing, and it doesn't affect my friend up in Connecticut, but everybody in the South who has ever eaten a proper breakfast with grits knows that if you leave the grits in the cabinet too

long, it doesn't matter how good your bug spray is. There are grubs coming up. I know I shouldn't be telling you this before I invite you over to eat at my house. But a problem in any household that has flour or something is that after a while, if you leave it on the shelf, you start getting these bugs that get in it. And you wonder how do they get in there? They actually come as part of the meal, and that's not the meal you eat but the meal from the meal. And the question is, how do you stop that problem? Ag research is doing that kind of work, and it's an example of some of the things that we're looking at in this bill.

So while we do have some disagreements on the funding, we both believe passionately, as Mr. FARR said, let the smart guys with the white coats in the back room study these things and come up with new inventions and new technologies.

At the University of Georgia one of the labs is studying getting fuel from algae. And, of course, we know algae can be a problem. If they can figure out how to make fuel out of it, it would be a wonderful thing. Kudzu, a plant that we actually imported from China maybe 60 or 70 years ago to stop erosion in the South, has grown wild, and yet the University of Tennessee is trying to figure out can you get fuel from kudzu?

□ 1730

They're doing the same thing with pine trees. Can you make cellulosic ethanol out of pine trees and, if so, a State like Georgia, which is about 66 percent in trees, we would become the Saudi Arabia of cellulosic ethanol. So it would be a great thing.

We're excited about this. There are so many great mysteries that we have yet to solve in our plants and animal world that this bill does study.

With that, I reserve the balance of my time.

Ms. DELAURO. I would be happy to accept an invitation for breakfast. I love grits with butter and salt. What do you put first, the butter or the salt? I'll take your advice on that.

Mr. KINGSTON. If my friend will yield.

Ms. DELAURO. I'd be happy to yield.

Mr. KINGSTON. The great thing about really great grits is you put cheese in them.

Ms. DELAURO. Amen.

Mr. KINGSTON. But the invitation is open.

Ms. DELAURO. With that, let me yield 3 minutes to the gentleman from Tennessee (Mr. DAVIS).

Mr. DAVIS of Tennessee. I thank the chairman and ranking member for their work in bringing before the floor the conference agreement between the House and the Senate.

I rise in support of the conference agreement for H.R. 2997, the Agri-

culture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations for Fiscal Year 2010. I believe this is a robust investment in America's farming and rural development needs, and it ensures a brighter economic future for all Americans.

I am particularly pleased with the investment in America's farmers, both through funding for agriculture research and for farm production. As a long-time farmer, and also a former employee of the United States Department of Agriculture, I understand firsthand how focused investments make concrete differences in America's food production as well as the folks that work tirelessly to provide it.

Contained in this conference agreement, the Agriculture Research receives a 5 percent increase from the current level of funding. This vital service provides research in a variety of areas, including bio-based products, bioenergy, floriculture, and nurseries. Included in the approximate 100 research locations nationwide that are funded by ARS is the University of Tennessee; the Institute of Agriculture, which is conducting bioenergy research on converting switchgrass into cellulosic ethanol. Research on clean bioenergy is vital to America's quest to become energy independent.

Also included is increased funding for research to provide early warning technologies for the detection of crop disease to prevent crop failure from natural causes or a terrorist event. The research addresses needs to produce such a system that could take advantage of biotech advances to develop a precision agriculture tool for guarding America's crops.

Further, I am pleased by the increase in funding for the Farm Service Agency. The FSA administers major commodity programs and farm loan programs such as the Farm Ownership and Farm Operating loan programs. Farm Ownership loans, which received a 47 percent increase through fiscal year 2009 funding levels, often provided the initial investments to help farmers acquire and expand land ownership. Farm operating loans, which receive a 43 percent increase from fiscal year 2009 funding levels, allow farmers to purchase equipment, livestock, and seed. This funding is critical to ensure the continued role of America as the world's greatest agriculture producer.

As a lifelong farmer representing the district with the fourth largest percentage of rural residents, I am proud to support these investments and urge passage of the conference agreement for H.R. 2997. Saying that is the fourth largest congressional district, as far as rural residents that I represent, means we have a variety and probably one of the most diverse agriculture districts in America: cotton, soybeans, corn, nursery stock. We have timber; both beef cattle and dairy cattle.

We also have a large poultry, the broiler industry, across the Cumberland Plateau, in the southern part of the plateau and the northern part of the plateau.

The SPEAKER pro tempore (Mr. WEINER). The time of the gentleman has expired.

Ms. DELAURO. Mr. Speaker, I am happy to yield the gentleman an additional 1 minute.

Mr. DAVIS of Tennessee. I am pleased that in this legislation it at least addresses import and reimportation of poultry that may be produced here in America. There are some guards and some guidelines that I think we must have.

I have been a poultry producer of broilers as a youngster growing up on a farm in Fentress County, Tennessee; and I know if we allow the poultry industry to be run out of business, it will destroy many of the farms in the Fourth Congressional District that I represent.

So I am pleased that our chairman was willing to work an agreement that would at least require certain inspection to be sure that safe food was imported into America from poultry and to also help protect our poultry industry in America and certainly in the Fourth Congressional District.

Mr. KINGSTON. Mr. Speaker, I yield myself such time as I may consume.

I just wanted to thank the Chair and the majority staff for all of the good work. We have had a very good process. I congratulate you on passing this bill as among the very first—and let the record show that if it was up to Agriculture, we would adjourn on time, whenever that may be.

And also I want to thank you for working with us on poultry, as Mr. DAVIS said. It's very, very important to particular States especially. And having a Chinese market is important but at the same time—you know, what Ms. KAPTUR said is very interesting. She said we don't need to be importing food; we need to produce our own food and then exporting that which is left. And yet as important as that is economically, you have always focused on the food safety as you should as the number one value. And I think that's important because if you are importing or exporting food that is not inspected and it is not at the highest quality and standard of food safety, then we're not doing our job.

So I certainly commend you for keeping that bar very high, and yet we were able to work something out. I've enjoyed the whole process.

My concern with the bill—as you know I've been very open about it—has something to do beyond this room, if you will, in terms of the spending picture. But having been in the majority, I know that your job is to come together with lots of different factions and philosophies, and I think you have

done a great job on it. I am proud to be your ranking member and look forward to a long relationship, and you are going to love my grits.

I yield back the balance of my time.

Ms. DELAURO. First of all, let me just say thank you to the ranking member, Mr. KINGSTON; and, in fact, it is a pleasure to work with Mr. KINGSTON. We always say that we may have philosophical differences, but we are good-natured about it and understand that and work in a very collaborative effort. And I, too, thank you for all of your help and your input with regard to the issue of Chinese poultry. It was a long discussion, but one in which I think we came to a conclusion as our colleague, Mr. DAVIS, said being able to strike that balance where we are able to protect the public health and at the same time to protect an industry. And I feel good about that.

And I, too, look forward to our continued efforts together as we approach problems—as you know and I do—that really face people with the jurisdiction that we have that comes under this portfolio. It really touches people's lives in so, so many ways. And I know that you have a deep and abiding concern for what happens to our farmers and our ranchers, what's happening to our industries and to making sure that we have the wherewithal and provide the resources people need to succeed.

I would like to, if I might, just make one further comment, and then we'll yield back whatever time is remaining.

I wanted to bring the attention of my colleagues to an important matter of health and safety. And when we talked about the child nutrition program and its extension, our Nation's schoolchildren and the people who work with them on a daily basis are faced with a growing public health concern. Awareness of vaccine for H1N1 flu, annual flu has made the front pages of our communities these days.

You've got school food service workers who face a very difficult dilemma in trying to do their jobs. They don't have any paid sick leave. These are people without any leave. So there's thousands of food service workers who pose a real risk to the health and safety of our Nation's kids. And the comment is “show up for work or do not get paid.”

So rather than exacerbating the problems, these workers can and should be part of the solution to ensuring the health and safety of our children. I look forward to working in the months ahead as Education and Labor looks to reauthorize their legislation, and I pledge to work with my colleagues to see if we can provide a minimum and a reasonable standard for paid sick leave for school service workers.

In the meantime, I am also encouraging the administration to examine this issue because I think it is a health

problem and the Nation's well-being depends on it.

Mr. VAN HOLLEN. Mr. Speaker, I rise in support of the FY 2010 Agriculture, Rural Development, and Food and Drug Administration Appropriations Conference Report, and I commend Chairwoman DELAURO for bringing this bipartisan legislation to the floor today.

The FY 2010 Agriculture, Rural Development, and Food and Drug Administration Appropriations bill makes key investments in protecting our public health, bolstering food nutrition programs, and conserving our natural resources.

The conference report provides \$2.36 billion for the Food and Drug Administration, which represents a 15 percent increase over last year. We need to ensure that the FDA has the necessary tools and resources to fulfill its vital mission in protecting the American public so that FDA-regulated products, like food, are safe. This important investment in the FDA will help the agency in meeting its mission in protecting the public health.

The \$58 billion provided for the Supplemental Nutrition Assistance Program will help low income and elderly Americans struggling with rising food costs in this current economic downturn. In addition, \$7.3 billion is provided for the Special Supplemental Nutrition Program for Women, Infants, and Children, WIC, to help encourage a healthy pregnancy for women and promote a healthy start for their children.

This legislation provides \$1 billion for the Natural Resources Conservation Service to help face the demands for cleaner water, reduced soil erosion, and more wildlife habitat. I am particularly pleased that almost \$4 million is provided for Chesapeake Bay restoration activities that will provide farmers, landowners, and communities within the Chesapeake Bay watershed technical assistance in implementing important conservation programs which will help improve the health of the Chesapeake Bay.

Mr. Speaker, I urge adoption of this conference report.

Mrs. MILLER of Michigan. Mr. Speaker, I rise today in strong support of the Conference Report for H.R. 2997, the Agriculture Appropriations Act of 2010.

My district is home to some of the most fertile farm land in our great nation, as well as some of the hardest working farmers.

While so many people identify Michigan with manufacturing, it can be easy to forget that agriculture is Michigan's second leading industry, and the bright spot in a struggling Michigan economy.

As you drive through my district, you will see fields full of dry beans, sugar beets, corn, wheat, soybeans, various vegetables, and other crops needed to feed our nation and the rest of the world. You will also see thriving cattle and pork industries.

This bill is important because it provides much needed funding for the Farm Services Agency which administers disaster and loan programs, farm commodities and conservation programs directed towards producers.

The bill also goes a long way in providing money for continued agriculture research which is so important in increasing harvest yields and furthering education for our producers. Agriculture research is vitally important

to ensure that America remains the greatest food producer in the world.

Finally, this legislation will provide necessary money for our nation's struggling dairy farmers. In these tough economic times, dairy producers have been struggling with a steep drop in price for their product. My district is home to a large dairy industry, and it is of vital importance that we do all that we can to help these producers out.

While there are certainly challenges with this bill, it is vital that we move this important funding bill forward. The funding provided by this bill will serve as strong support for an industry that is crucial for our national economy.

I strongly urge my colleagues to vote in favor of this important legislation.

Ms. DELAURO. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. Pursuant to House Resolution 799, the previous question is ordered.

The question is on the conference report.

Pursuant to clause 10 of rule XX, the yeas and nays are ordered.

Pursuant to clause 8 of rule XX, this 15-minute vote on adopting the conference report will be followed by 5-minute votes on suspending the rules and agreeing to H. Res. 806 and H. Res. 795.

The vote was taken by electronic device, and there were—yeas 263, nays 162, not voting 7, as follows:

[Roll No. 761]

NOT VOTING—7

Carney	Neugebauer	Tsongas
Johnson, Sam	Radanovich	
Maloney	Ruppersberger	

□ 1805

Mr. ALTMIRE changed his vote from “yea” to “nay.”

Mr. SPRATT, Mr. CARTER and Mrs. MILLER of Michigan changed their vote from “nay” to “yea.”

So the conference report was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PROVIDING FOR CONCURRENCE BY HOUSE WITH AMENDMENT IN SENATE AMENDMENT TO H.R. 1035, MORRIS K. UDALL SCHOLARSHIP AND EXCELLENCE IN NATIONAL ENVIRONMENTAL POLICY AMENDMENTS ACT OF 2009

The SPEAKER pro tempore. The unfinished business is the vote on the motion to suspend the rules and agree to the resolution, H. Res. 806, on which the yeas and nays were ordered.

The Clerk read the title of the resolution.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Arizona (Mr. GRIJALVA) that the House suspend the rules and agree to the resolution, H. Res. 806.

This will be a 5-minute vote.

The vote was taken by electronic device, and there were—yeas 358, nays 66, not voting 8, as follows:

[Roll No. 762]

## NOT VOTING—8

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE  
The SPEAKER pro tempore (during the vote). Members are advised there is less than 1 minute remaining in this vote.

□ 1812

Mr. WILSON of South Carolina changed his vote from “nay” to “yea.” So (two-thirds being in the affirmative) the rules were suspended and the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

## HONORING EFFORTS TO CREATE A FLIGHT 93 MEMORIAL

The SPEAKER pro tempore. The unfinished business is the vote on the motion to suspend the rules and agree to the resolution, H. Res. 795, on which the yeas and nays were ordered.

The Clerk read the title of the resolution.

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from Guam (Ms. BORDALLO) that the House suspend the rules and agree to the resolution, H. Res. 795.

This will be a 5-minute vote.

The vote was taken by electronic device, and there were—yeas 426, nays 0, not voting 6, as follows:

[Roll No. 763]

## NOT VOTING—6

Carney	Maloney	Radanovich
Johnson, Sam	Neugebauer	Tsongas

## ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. CONNOLLY of Virginia) (during the vote). There are 2 minutes remaining in this vote.

□ 1820

Mr. BURGESS changed his vote from "nay" to "yea."

So (two-thirds being in the affirmative) the rules were suspended and the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

## ELECTING A MINORITY MEMBER TO A STANDING COMMITTEE

Mr. PENCE. Mr. Speaker, by direction of the Republican Conference, I send to the desk a privileged resolution and ask for its immediate consideration.

The Clerk read the resolution, as follows:

## H. RES. 807

*Resolved*, That the following member be, and is hereby, elected to the following standing committee:

COMMITTEE ON OVERSIGHT AND GOVERNMENT REFORM—Mr. CAO.

Mr. PENCE (during the reading). Mr. Speaker, I ask unanimous consent that the resolution be considered as read.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

The resolution was agreed to.

A motion to reconsider was laid on the table.

## REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF CONFERENCE REPORT ON H.R. 2647, NATIONAL DEFENSE AUTHORIZATION ACT FOR FISCAL YEAR 2010

Ms. SLAUGHTER, from the Committee on Rules, submitted a privileged report (Rept. No. 111-289) on the resolution (H. Res. 808) providing for consideration of the conference report to accompany the bill (H.R. 2647) to authorize appropriations for fiscal year 2010 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe military personnel strengths for such fiscal year, to provide special pays and allowances to certain members of the Armed Forces, expand concurrent receipt of military retirement and VA disability benefits to disabled military retirees, and for other purposes, which was referred to the House Calendar and ordered to be printed.

## SUSAN G. KOMEN RACE FOR THE CURE

(Ms. ROS-LEHTINEN asked and was given permission to address the House for 1 minute and to revise and extend her remarks.

Ms. ROS-LEHTINEN. Saturday, October 17, at Bayfront Park in Miami, in my congressional district, we will be having the 14th Annual Miami/Fort Lauderdale Susan G. Komen Race for the Cure. Since its inception in 1996, the Miami/Fort Lauderdale Race for the Cure has raised more than \$4.5 million and has reached hundreds of thousands of people through educational outreach and grassroots efforts.

Volunteers are dedicated to ending breast cancer by making it a nonlife-threatening disease through community grants to support research, education, screening, and treatment.

More than 465,000 die from this disease every year, Mr. Speaker. But there are more than 2.5 million breast cancer survivors alive in the U.S. today, the largest group of all cancer survivors.

The Susan G. Komen Race for the Cure helps them fight the disease through breast cancer survivors networks. Thanks to this Race for the Cure, we are making great strides toward a world without breast cancer.

I encourage all in our community in south Florida to participate on Saturday, October 17, at Bayfront Park in Miami, to fight breast cancer.

## DISCOVERY OF GLOBALLY RARE PLANT COMMUNITIES

(Mr. CONNOLLY of Virginia asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CONNOLLY of Virginia. I rise to congratulate the Prince William Conservation Alliance, the Prince William Wildflower Society, and the Prince William County Park Authority for their discovery of globally rare plant communities at Silver Lake Park. The Virginia Department of Conservation and Recreation confirmed that the diabase flatwoods and a pin oak-white oak upland depression swamp qualify as globally rare or threatened species.

Diabase flatwoods are a rare type of oak-hickory forest that are only found in northern Virginia and central Maryland. It's very rare to find a site such as this, which has not been substantially disturbed by land development or incursion of invasive species.

The rare pin oak-white oak upland depression swamp habitat is characterized by small wetlands with hardwood forests. These environments have often been disturbed by past development.

I applaud local activists in Prince William County in my district, the 11th District of Virginia, for their work to protect these rare plant communities and offer them my full support and congratulations in permanently preserving these important ecological resources.

## DEDICATION TO OUR FIREFIGHTERS

(Mr. THOMPSON of Pennsylvania asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. THOMPSON of Pennsylvania. Madam Speaker, this is National Fire Prevention Week. Last weekend, the National Fallen Firefighters Foundation held their memorial service out in Emmitsburg, Maryland. They added the names of 103 firefighters who died this year in the line of duty. That brings the total to 3,330 names on the memorial to fallen firefighters since it was established in 1981.

As a volunteer firefighter and EMT, I've seen the bravery and dedication of the men and women who face infernos to save lives and property. They walk into hell, and they do so knowingly. Many never walk out again. That was the case on September 11, 2001, when 343 firefighters lost their lives.

There are more than a million firefighters across this country who respond to more than 2 million calls per year. We owe them a debt of gratitude that cannot be repaid.

But there is something we can do. This week I cosponsored H. Res. 729, a measure to request that the President designate a day as National Firefighters Memorial Day to commemorate Federal, State, and local firefighters killed or disabled in the line of duty. It's the least we can do for these heroes.

## AVOID MISTAKES OF THE PAST

(Ms. JENKINS asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. JENKINS. "This is not a war of choice. This is a war of necessity." But just 7 weeks after the President spoke those words, White House political advisers consider rejecting General McChrystal's assessment.

To win in Afghanistan, we must provide the general the resources he needs. Insufficient troop levels is a mistake that must not be repeated.

Servicemembers from my district from Fort Leavenworth, Fort Riley, and the Kansas National Guard are putting their lives on the line in this war of necessity. As the President decides on his strategy in Afghanistan, I remind him of his words.

Leaving our brave soldiers in Afghanistan without the resources they need is indefensible. Our duty is to avoid the mistakes of the past.

Mr. President, please listen to the generals you have placed in command.

## TRIBUTE TO PATRICK JOYCE, JR.

(Mr. ENGEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ENGEL. I rise today to speak on behalf of a fallen hero from my district. On October 2, Patrick Joyce, Jr., and his fellow firefighters responded to a call of a burning building in Yonkers, New York. He was searching the burning building when an explosion of flame hurled him and two other firefighters out of a third-story window. The other two survived with serious injuries; but, sadly, Patrick, married and the father of two little girls, did not survive.

Patrick and his wife, Tara, met as teenagers in my neighborhood of Riverdale the year before I first came to Congress. They married and had two daughters, Charlotte and Isabella. The family was planning to visit an apple orchard this weekend. Instead, they attended his funeral.

I also attended Patrick Joyce's funeral mass. He was beloved by not only his family but by his fellow firefighters and his community. The loss of any life is one to be mourned, but the loss of a life such as Patrick's is doubly devastating. The Nation truly honors people like Patrick who are willing to risk their lives to save others.

Little Charlotte said of her father, "This wasn't supposed to happen. Daddy fixed everything. He made everything better." Now he's gone at age 39, and we all miss him.

It's become almost a cliché to praise our firefighters since the heroism shown on 9/11 but, for me, there will never be enough. Patrick Joyce, Jr. was taken from us far too early. On be-

half of his wife, Tara; his children, Charlotte and Isabella; his friends and family; and the people of Yonkers, I would like to state for the record, in conclusion, in the words of Charlotte, that this was not supposed to happen. You did make everything better.

Patrick, you will be sorely missed by everyone you touched in life and those of us who are saddened by your death.

## DEFUND ACORN ACT

(Mr. INGLIS asked and was given permission to address the House for 1 minute.)

Mr. INGLIS. Recently on this House floor, Mr. BOEHNER was successful in getting the Defund ACORN Act attached to the student aid bill. By a vote of 345-75, this House voted to cut off funding to ACORN.

My constituents are very relieved by that because throughout August I heard from them very clearly that they don't want an organization that's been up to the things that ACORN has been up to receiving Federal funds.

In fact, since 1994, according to Leader BOEHNER's office, they may have received directly as much as \$53 million; more than that indirectly through block grants that may have come from State sources.

Madam Speaker, that's got to stop. It's a good step that we took in the Defund ACORN Act, but we're not through yet, because something tells me that throughout the appropriations process there's money tucked away.

And so we must remain vigilant and see this organization associated with voter fraud and other irregularities must be cut off at the Federal trough.

## WHAT TO DO IN AFGHANISTAN

(Ms. JACKSON-LEE of Texas asked and was given permission to address the House for 1 minute.)

Ms. JACKSON-LEE of Texas. Very quickly, I know that all of us understand you're innocent until proven guilty. We are very pleased with the leadership that ACORN is taking in addressing the needs of those who cannot speak for themselves.

They understand the need for transparency; they understand the need for audits; they understand the need for new leadership in many of their areas. And they are doing it. And I'm grateful for the fact that we have congressional oversight. But I'm not going to demonize an organization that helps those that cannot help themselves.

Very quickly, it is important for the President to be addressing the question of: What do we do in Afghanistan, counterinsurgency or counterterrorism? I believe we should surge up diplomacy, fight the terrorists, and gain the friendship of the Afghan people, and let the Afghans fight the fight alongside of us—and not send 40,000 troops into Afghanistan.

□ 1830

## WHAT HAPPENED TO AUGUST?

(Mr. DANIEL E. LUNGREN of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DANIEL E. LUNGREN of California. Madam Speaker, before I return to my district this weekend, I thought I might ask the question on this floor once again, what happened to August? What happened to August? What happened to those town hall meetings? What happened to the pleas we heard from average, everyday Americans coming to town hall meetings by ones, twos and threes, coming with families, not coming bused, not coming organized, but just coming out of a concern about what we were about to do on this floor.

And yet I returned here after that period of time, and I have heard deafening silence from the White House about August. I have heard an absolute repudiation of August by the Democrats in the House and in the Senate.

No. We are talking about health care reform as if August did not exist, as if the American people did not exist and as if their concerns were not our concerns.

What happened to August? What happened to August?

## HATE CRIMES BILL

(Mr. GOHMERT asked and was given permission to address the House for 1 minute.)

Mr. GOHMERT. Madam Speaker, today we had a conference report after just voting to send the matter to conference last night on the Defense authorization bill.

This authorizes what is being done in the military. On the backs of our soldiers is put the hate crimes bill. That is unbelievable. As if our soldiers don't have enough to do, we are going to put social bills like that on their shoulders and say, If you don't pass this to help the soldiers, then we are going to say, gee, you're against the soldiers.

It's outrageous. They deserve better treatment. They deserve a straight-up vote on the Defense authorization without a hate crimes bill that will be, when coupled with 18 U.S.C. 2(a), the mechanism to muzzle ministers. I stood with dozens of African American ministers out here who knew they would be muzzled under this bill. It's not the right thing to do.

## SPECIAL ORDERS

The SPEAKER pro tempore (Mrs. DAHLKEMPER). Under the Speaker's announced policy of January 6, 2009, and under a previous order of the House, the following Members will be recognized for 5 minutes each.

## DANCING WITH CZARS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. POE) is recognized for 5 minutes.

Mr. POE of Texas. Madam Speaker, we have 45 czars in America, and the dance card keeps growing. The President has the right to get advice from as many people as he wants to. And that's not new with our Presidents, and that is not a problem. Advisers are one thing, but policymakers are another thing altogether.

If someone is putting a policy in place, if someone is to govern and rule over the rest of us, they must be confirmed by the United States Senate. That's what the Constitution says and demands. After all, article II, section 2 states in part that the President may appoint ambassadors and other public ministers with the advice and consent of the Senate.

The American people have been asking a lot of questions about these czars. Who are these czars? What do they do? Is this a shadow government? What are the Cabinet secretaries doing? Why aren't they in charge of implementing policy instead of these czars? Do Cabinet secretaries report to our shadow government czars? Is that what happens? And why haven't we had transparency or confirmation hearings on these czars?

Now, Madam Speaker, here are some of the czars that we have. It's not all 45, but it's some of them. And let me list some of them for you. We have the Afghan-Pakistan czar. We have the AIDS czar and the auto recovery czar. We are getting a behavioral science czar. Now, what's that about, spanking of kids? No. It is actually about the study of human behavior and how the government can influence human conduct. Sounds a bit like the book "1984" to me.

We have a bailout czar. We have a border czar. Is the border czar supposed to secure the border or open up the border? Who knows? Nobody is telling us.

We have a climate change czar, a copyright czar, a counterterrorism czar. We have a cyber security czar and a communications diversity czar. Let me repeat that one. A communications diversity czar. Ironically, this communications diversity czar is now barred from talking or communicating with the media. Now isn't that lovely? That's kind of odd in my opinion.

We have the disinformation czar. Now what does that person do? It sounds like he should be called the government propaganda czar to me.

We have two economic czars. We probably could use a few more of those. We have an education czar. We have an energy CIA. There's a food czar, the government performance czar, the Great Lakes czar, the Gitmo closure czar and the health care czar.

We have an info tech czar—well, we had an info tech czar, Madam Speaker.

His last day in D.C. Government was March 4, but on March 12 the FBI raided his office and arrested two staffers. That position is still open for people who want to apply.

We have an intelligence czar. We have a Latin American czar, a Mideast peace czar and a Mideast policy czar. We have a pay czar and a regulatory czar. We have a religion, or God, czar; a safe school czar and a science czar. Now there's a beaut. Our science czar wrote a controversial book promoting population control.

We have a stimulus czar. And then, of course, there's the TARP czar, the technology czar, the trade czar and the urban affairs czar. We have the war czar, the water czar and, of course, there is a weapons czar.

Now, Madam Speaker, we know very little about those czars or what they do. We don't know who pays them or whether they paid their income tax. So Congress should defund these czars and no taxpayer money should go to pay for them or their salaries or their staffs.

After all, Madam Speaker, since we continue to dance with the czars, it would be nice to know who brought us to the dance.

And that's just the way it is.

## COMMENDING OUR FIRST RESPONDERS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Ms. SUTTON) is recognized for 5 minutes.

Ms. SUTTON. Madam Speaker, I rise in support of H. Res. 731 to commend our first responders for their tireless efforts to ensure our safety as they serve on our Nation's front lines. These brave men and women are often the first ones on the scene and the last ones to leave.

Firefighters in Lorain, Elyria, Barberton, Akron, Brunswick, Strongsville and throughout my district and our Nation deserve our deepest gratitude. In spite of all of the cuts that our firefighters are facing, they continue to put their lives on the line to save ours.

Far too many communities in the 13th District of Ohio have had to lay off firefighters. In Lorain, 33 percent of the time, fire station No. 4 is closed. But even with these frequent closures, they still put their lives on the line. They risk their lives without hesitation. Lorain firefighters Shawn Lloyd and Dan Russell were injured as they pulled a 6-year-old girl from a fire. Four firefighters from Elyria saved the 56-year old life of Russell Bowles, who wasn't breathing and had no heartbeat. They used a defibrillator to bring him back to life and then rushed him to the hospital.

In August, an Elyria Township firefighter was injured by a gas tank explosion as he was responding to a house

fire. In Akron, fire captains Albert Bragg and Charles Twigg arrived at a house fire and were told someone was still in the home. Without hesitation, they ran into the house. They found the man and they carried him to safety. And when a man in Brunswick was experiencing a type of cardiac arrest known as the "widow maker" because it almost always results in death, it was firefighter Russ Merhaut and his fellow team members who arrived on the scene and resuscitated him.

First responders not only keep us safe, they also actively support our communities. This year, Barberton police officers and firefighters helped raise about \$1,800 for the Youth in Action fund during the Police versus Fire Olympics. In Strongsville, the fire department plays an active role in Safety Town, which is a fire safety program that teaches children about fire safety and prevention.

We can sleep soundly at night knowing that these men and women are here to serve and protect us. But all too often, their service comes at a costly price. Each year, approximately 80,000 of our Nation's firefighters are injured. And last year, 103 firefighters were killed. Those who have made the ultimate sacrifice put their community and their neighbors above their own lives. And even though our departed firefighters are no longer with us, the lessons they taught us will last forever. Their noble and unrelenting allegiance to public service embodies the American spirit, and I cannot imagine better role models.

For these reasons, our Nation's firefighters and first responders deserve our continued praise and support. H. Res. 731 expresses our great appreciation for these great men and women. However, true support should come in the form of job stability. Protecting the jobs of our first responders is a top priority in ensuring the safety of all communities.

I was very pleased that language included in the supplemental appropriations bill this year expanded the use of the SAFER grants to allow communities to retain and rehire firefighters. Communities in my district are looking forward to applying for those grants that they so desperately need.

Given the economic hardships currently facing our country, these grants are critically important to the wellbeing of our firefighters and communities. Far too many communities have had to lay off firefighters. And as we all know, these fire department closures cause response times to be longer. This can be risky for emergency callers as well as for our firefighters because a working fire has more time to grow and become more dangerous.

Lorain firefighters need these SAFER grants, and Fire Chief Tom Brown is ready and waiting to apply

for them. Elyria firefighters need these SAFER grants, and Elyria Fire Chief Rich Benton is ready and waiting to apply for them. In Akron, 38 firefighters have been laid off. Our firefighters are people with mortgages and young children. Akron firefighters need these SAFER grants, and Fire Chief Larry Bunner is ready and waiting to apply for them.

Competition for the estimated \$630 million for the entire country will be intense. In 2008, 72 firefighters protected the city of Elyria, but today only 46 are tasked with the duty. And our union presidents like Dean Marks and Jon George are working hard to preserve jobs and the safety of their communities. The IAFF and the OAPF are working hard to protect the jobs of these brave men and women.

Our Nation's first responders can never be thanked enough for their efforts. Through this resolution, we recognize their brave work, and it does not go unnoticed. We salute the sacrifices and commitment to our State and local government officials for their efforts to keep our communities safe and deter acts of terrorism. Let's get those SAFER grants out.

□ 1845

#### CZARS NEED TO BE CONFIRMED BY THE SENATE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Indiana (Mr. BURTON) is recognized for 5 minutes.

Mr. BURTON of Indiana. Madam Speaker, the reason I rise tonight is to follow up on my good friend Mr. POE of Texas. He was talking about 45 czars being appointed by the President to run this government in large part. The thing that bothers me about that and what Mr. POE said is that these people do not have to go through the normal process of confirmation in the Senate.

The reason we have that process of advice and consent of the Senate is to make sure that the people that are being appointed are not only capable of doing the job, but they don't have anything in their closets that is going to cause disrepute, disrespect, or anything on the administration. But the administration continues to appoint these people as czars in large part, I believe, because he doesn't want the American people to know their backgrounds.

We've had people that have been appointed who are admitted Communists, people who have been appointed who have been involved in supporting nefarious activities and deviant kinds of activities, and it just seems to me that the American people need to know those things. But unfortunately, the administration continues to appoint these czars because they know they do not have to go through the confirmation process. I think that's just wrong.

So, if I were talking to the President, I think if the American people were talking to the President tonight, as would Mr. POE, my good friend from Texas, would like to say, Hey, let's have these people unveiled. Let's find out what they're all about before they take on positions of responsibility, positions that spend taxpayers' money and make decisions on how this government is run. We need to know what kind of people they are. We need to know their backgrounds.

So I would just like to say, if I were talking to the President on behalf of the American people, Let's go through the regular process, Mr. President, just like you do with Cabinet appointees. Make sure that there is a background check done on them by the FBI so we know what they're about. Let's make sure they go through the confirmation process, through the Senate, through the committee system and are voted upon by the United States Senate so that they are confirmed. And if we do that, we'll know that they're competent people, honorable people who will do the job for the American people and not people that we're going to be embarrassed by later on.

#### IN AFGHANISTAN, "EIGHT IS ENOUGH" TO PROVE THERE'S NO MILITARY SOLUTION

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from California (Ms. WOOLSEY) is recognized for 5 minutes.

Ms. WOOLSEY. Madam Speaker, today is the eighth anniversary of American involvement in Afghanistan. America will soon be at war in Afghanistan longer than we were in World War I, World War II, and the Korean War combined.

For 8 long years we've been trying to find a military solution in Afghanistan, but we have not succeeded. Hundreds of billions of dollars have been spent, and over 850 of our brave troops have died, but the insurgency continues to grow. Now President Obama is being urged to double down on the military option. Some people believe that all we need to do is send in 40,000 more troops, and then we can roll out the "mission accomplished" sign. But the last 8 years of fighting, Madam Speaker, have proven beyond doubt that there is no military solution to Afghanistan, and escalating the war now will only make things worse, not better.

A study done by the Carnegie Endowment for International Peace found that "the presence of foreign troops is the most important element driving the resurgence of the Taliban." That's why I have joined with 56 of my colleagues in the House on both sides of the aisle to send a letter to President Obama urging him to reject calls to increase the number of combat troops in

Afghanistan. But I'm not urging the President to walk away from Afghanistan; far from it.

America needs to stay involved, but we need a winning strategy, and that means understanding the plight of the Afghan people and what they need so that they can reject the Taliban and violent extremism. They desperately need food, education, economic development, agricultural enrichment, better infrastructure, protection from disease, and a government that they can trust.

Afghanistan is easy pickings for violent extremists because it's virtually the poorest nation on Earth, and without assistance from the outside world, the Afghan people have little hope for a better future. The United Nations issues its annual Human Development Index on Monday, and it ranks the countries of the world on criteria such as life expectancy, literacy, school enrollment, and gross domestic product. Out of 182 countries, Afghanistan ranks 181, next to last.

That's why, Madam Speaker, the United States must break from the military-only approach that hasn't worked for the past 8 years and change our mission to emphasize development, reconstruction, humanitarian aid, and civil affairs. NGOs and military forces can be directed to support these efforts. That would improve the lives of the Afghan people, and it would achieve the crucial goal of removing the impression that America is an occupying country.

We must also step up our diplomatic efforts. We've got to do a better job of engaging all the Nations in the region that have an interest in stabilizing Afghanistan. President Obama himself has recognized that military power alone is not the answer to our problems. In his inaugural address, he said that—and I quote him—"Our power alone cannot protect us, nor does it entitle us to do as we please . . . Our power grows through its prudent use (and) our security emanates from the justness of our cause, the force of our example, and the tempering qualities of humility and restraint."

President Obama is right to believe that America does best when we demonstrate our commitment to peace, to democracy, to human rights and progress.

Madam Speaker, I urge the President to remember his words and use them to guide his decisions about Afghanistan in the coming days. If he does, he will take important steps toward defeating violent extremism and making America and the world safer.

#### HONDURAS' UPCOMING ELECTION

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Florida (Ms. ROSLEHTINEN) is recognized for 5 minutes.

Ms. ROS-LEHTINEN. Madam Speaker, I rise tonight to express my strong support for the upcoming November elections in Honduras and to underscore my ongoing concern with the current U.S. policy toward this Central American nation and its people.

I have just returned from Honduras, where I had the opportunity to see with my own eyes what is happening on the ground there. Let me tell you, Madam Speaker, it's very quiet on the streets of Tegucigalpa. Despite the efforts of the pro-Zelaya camp to create the impression that chaos is reigning in Honduras, there are no fires burning in the streets, there are no massive protests urging Manuel Zelaya's return, no collapse of democratic order or institutions.

I met with officials of the constitutional, democratic Government of Honduras. I met with Honduran civil society. I met with their religious leaders. I met with the Honduran press. I even had the opportunity to meet with some of our fellow Americans who are living in Honduras now. And through it all, there was a very consistent and a very clear message. That is: The Honduran people are committed to the defense and the protection of their democracy, of their constitution, of the rule of law.

The people of Honduras do not want Manuel Zelaya back in office. The Honduran people do not want outside actors infringing upon and determining their democracy and their rule of law. For the Honduran people, the November 29 elections are the solution, they are the way forward, and I couldn't agree with them more.

I introduced House Resolution 749. What does it do? It calls on Secretary Clinton to support the efforts of the appropriate authorities in Honduras to ensure that the November elections are free, are fair, are now transparent.

It calls on President Obama to recognize these elections as an important step in the consolidation of democracy and the rule of law in Honduras. No matter how one views the events of June 28, it is critical that the implementation and the recognition of the validity of the November 29 Honduran elections remains separate and independent from the current political fray.

The date of the elections, the presidential candidates, and the presidential term were determined long before Zelaya's removal, and nothing has changed since then. Again, the Honduran electoral process is continuing in accordance with the Honduran Constitution.

The U.S. has historically recognized free, fair, and transparent elections as a fundamental component of a democracy. So why now is the U.S. so quick to admonish what appears to be the only viable way forward for a peaceful resolution in Honduras? How could the U.S. help to open the door to the Cuban

tyranny to rejoin the Organization of American States but yet push for Honduras' expulsion because the Honduran people defended their constitution and their democracy? How could the U.S. directly engage with Ahmadinejad, let him into the United States to address the General Assembly at the United Nations yet revoke the visas of the constitutionally democratic constituted representatives of the Honduran Government? These are all questions that I have been asking officials in this administration and have been asked time and time again.

Madam Speaker, I'm concerned that if we in the U.S. continue along this misguided path and continue to impose this misguided Zelaya-centric policy, that the goodwill and the respect and the admiration that the U.S. currently enjoys in Honduras will now start to dissipate. We can't afford for that to happen. The United States has always been the beacon of democracy. How can we take this undemocratic way forward for Honduras?

I'm deeply concerned about the impact that this action will have on our U.S. security interests as well, Madam Speaker. After all of my meetings and briefings and during my visit in Honduras, I'm more concerned and more convinced than ever that the current U.S. approach is severely undermining our immediate security interests in Honduras—in fact, in Central America as a whole—and it will significantly impact and have detrimental long-term ramifications for the stability and the security of our hemisphere.

But there is still time to reconsider. There is still time to correct our wrongs and find a way forward, and that can begin with the U.S. Government publicly announcing that it will respect the sovereignty of the free Honduran people and respect what it says in the Honduran Constitution, that the U.S. will support the will of the Honduran people and recognize free, fair, transparent elections in Honduras this November. The future and the will of the Honduran people are far too important to let Manuel Zelaya or his puppeteers run the show any longer.

#### BATTLING BREAST CANCER THROUGH HEALTH CARE REFORM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Rhode Island (Mr. LANGEVIN) is recognized for 5 minutes.

Mr. LANGEVIN. Madam Speaker, I would like to offer my sincere thanks to my colleagues and friends Congresswoman WASSERMAN SCHULTZ and Congresswoman MYRICK for their incredible courage and leadership in fighting for those who are affected by breast cancer.

October, as we know, is National Breast Cancer Awareness Month, and I can think of no better way to honor

and support the women living with this disease or to honor the memories of those who have lost their battle with breast cancer than to help raise awareness by sharing some of our own personal stories. Each one of us has a personal story to tell about how breast cancer touched the lives of our families and has changed our lives, and I'm no exception.

My mother is a breast cancer survivor. She beat this disease several years ago, and I'm so proud of her for the strength and the courage that she has shown throughout a very difficult journey. She has served as an inspiration to me to be a voice here in Washington, not just for her, but for the hundreds of thousands of women and men who are diagnosed with breast cancer each year.

For far too long, our Nation was silent about this disease because of a pervasive fear and stigma. Thankfully, education and advocacy efforts over the past several decades have empowered survivors to come out of the shadows and walk down the Halls of Congress to demand action.

It's because of my mother and the Rhode Island advocates who I am so proud to represent that I joined with a strong majority of my colleagues to fight for increased funding for research at the National Institutes of Health and the Department of Defense so that we may continue to advance lifesaving treatments for breast cancer patients everywhere.

However, this is not just about research. We must also ensure that every patient has access to proper medical care. I believe that the only way to do this is through comprehensive health insurance reform.

□ 1900

Madam Speaker, Congress certainly must pass a bill that covers preventative services such as mammograms and MRIs, that eliminates discriminatory exclusions for individuals with pre-existing conditions, and ensures gender parity. I strongly believe that access to quality health care should be a fundamental right and not a privilege for the wealthy who can afford it.

I hear stories daily from friends and constituents whose lives are turned upside down due to a cancer diagnosis. Our Nation can and we must do better. Together we can make a difference in the lives of breast cancer patients everywhere.

I would like to once again acknowledge my colleagues here this evening for speaking out in the fight against breast cancer, and I look forward to my continued work with them in the future.

# CONSTITUTIONALITY OF HEALTH CARE REFORM LEGISLATION PENDING CONSIDERATION BY THE HOUSE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Georgia (Mr. DEAL) is recognized for 5 minutes.

Mr. DEAL of Georgia. Madam Speaker, I rise tonight to address this body about a document that is sometimes forgotten. A document that gives meaning and purpose to what we do in this body, that in fact is the basis upon which this body actually exists. And that is the Constitution of the United States.

For over two centuries, this document has been the foundation for our free people. It has become the model for other governments who have copied it around the world. And yet too often it appears that the very document that is the core of our liberties, the core of our existence in this representative democracy, is overlooked in this body. It's as if it were treated as a document of antiquity to be given proper respect in the Library of Congress but to be paid no attention to in our deliberations here. I think that is quite ironic.

I had a town hall meeting this weekend, and one of my constituents raised the issue of the constitutionality of one of the bills that are pending before this body. I promised him I would address that issue, and that is what I intend to do very briefly this evening.

When those 56 men met in Philadelphia, they understood the significance of trying to write a document that controlled the actions of legislative and executive bodies. And they did a very good job of it. Over these two centuries plus, there have only been some 27 amendments that have been adopted.

It used to be that when Congress would legislate on an issue that it would preface it with the constitutional basis upon which the legislation would be even authorized to be considered. That practice has, unfortunately, been abandoned. For those who are familiar with our Federal courts, it is not unlike what a party going into that court would be required to do, and that is to specify the basis on which the Federal court has jurisdiction to consider the issue that is presented to the court.

I think we should do the same thing here in this body. We should ask ourselves the question before any piece of legislation is even considered, Upon what basis of the Constitution do we even have a right to consider to legislate on this subject?

Now, this subject is not just something that I want to talk in generalities about. I think we have a concrete example of a piece of legislation where the core issue is that of its constitutionality, and that is the health care reform legislation.

Now, admittedly, Congress has, under the commerce clause of the Constitu-

tion, reached into many realms of our activity in this country. But here in this bill there is one central ingredient, and that is the mandate on an individual that they must purchase a health insurance policy. Now, I think that is where the unconstitutionality of that proposition rises to the fore. And I suggest it for this reason:

First of all, it imposes what is presumed to be a tax if you do not comply. I think it is very clear under the interpretations of our Constitution that Congress cannot impose a tax unless it first has the authority under other parts of the Constitution to regulate the activity, namely the commerce clause or some other designated ability to regulate under the enumerated powers of the Constitution. Here there is no such enumeration. And certainly buying a health insurance policy, the requisite of that is not engaging in interstate commerce. Somebody doesn't go to the doctor to engage in interstate commerce; they go for their own health care concerns.

Some would argue, well, we mandate that people have to have automobile liability insurance. I remind them that it is a quid pro quo in which the State issues a driver's license as a condition for requiring the mandate of insurance. We do not issue a license to the citizens of this country to breathe or to exist. Therefore, by what right do we have the ability to impose a personal mandate?

Now, this issue is not new. I want to quote from a report from the Congressional Budget Office back in 1993 when they were considering the Clinton health care proposal, and I quote:

"A mandate requiring all individuals to purchase health insurance would be an unprecedented form of Federal action. The government has never required people to buy any good or service as a condition of lawful residence in the United States."

## HATE CRIMES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Ms. CHU) is recognized for 5 minutes.

Ms. CHU. Madam Speaker, America has made great strides in the last century to provide rights and protections to our most disadvantaged communities. Laws were made that limited the workday and made it illegal for companies to profit from child labor. Women were given the right to vote. The Civil Rights Act codified Martin Luther King's dream by ensuring that all people of color could obtain equal rights.

But the fight is not over. People are still trying to deny Americans equal protection under the law for being who they are. Yesterday Republicans tried to block an important provision to protect gays, lesbians, transgenders, and

bisexuals from being targeted, harassed, injured, or even killed due to acts of bias and hatred. The Matthew Shepherd Hate Crimes Prevention Act would give the LGBT community the same protections already provided to other groups that have been discriminated against in our Nation's history.

Many are familiar with the hatred and bigotry perpetrated against people of different races and religions. Take the case of Kenny Chiu, a 17-year-old Asian American from Orange County, California, who was simply standing in the driveway of his own home when he was grabbed and brutally stabbed 26 times. In the last hour of his life, he was able to identify his killer. It was his 20-year-old next-door neighbor, who was a Neo-Nazi sympathizer and was looking for a minority to kill.

But members of the LGBT community face the same harassment every day just for being who they are. Larry King was a gay eighth-grader from Ventura, California, who used to come to school dressed differently. He was the subject of great harassment. Other boys made fun of him, called him names, and threw wet paper towels at him in the boys' restroom. Then one morning behind the computer lab at his junior high school, a fellow classmate shot him twice in the head. In contrast to the case of Kenny Chiu, Larry King's murder is not covered by our Federal hate crimes law. This must change.

When asked by my constituents why I support this bill, I describe my experience as Chair of the California State Assembly's Select Committee on Hate Crimes, where I held hearings on hate crimes across all the communities of the State. After hearing these horrific stories and listening to their heartbroken families, I know I cannot fight for the civil rights of one group without fighting for the civil rights of the other. Things will not change until people stand up and say we will not tolerate making anybody in America a second-class citizen. As long as intolerance exists, as long as there are people out there that turn a blind eye to hate and bigotry, then we as a human race are doomed to repeat the horrors of the past.

In California what happened to Larry King is considered a hate crime. It is one of only five States in the Nation that include sexual orientation and gender identity in the definition of a hate crime. But in the Nation many are left without such protection because Federal law leaves many States without the resources or expertise to effectively investigate and prosecute bias-motivated violent crimes in the LGBT community. That is why tomorrow we must pass the Matthew Shepherd Hate Crimes Prevention Act so that every teenager who goes to school can be who they are knowing they are protected by the United States of America.

### SAVING A MILLION JOBS AT \$787,000 PER JOB

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from North Carolina (Ms. FOXX) is recognized for 5 minutes.

Ms. FOXX. Madam Speaker, in a column last month for RealClearMarkets, businessman Bill Frezza took on the idea that the stimulus package had somehow "saved" jobs in America. He writes:

"The White House Council of Economic Advisers said Thursday the \$787 billion stimulus plan kept 1 million people working who would otherwise not have had jobs.

"You wouldn't let me stand up and make the simplistic claim that these million jobs were saved at a cost of \$787,000 per job without challenging the details of my accounting, would you? Surely reality is more complex.

"But when the White House Council of Economic Advisers calculated the number of jobs saved by our government's massive stimulus spending, how is it that they entirely neglected to account for the impact on employment of removing \$787 billion from the balance sheet of the private economy?"

He continues by discussing those from the White House Council of Economic Advisers who make these dubious claims about the so-called "saved" jobs:

"They never had to meet a payroll," Mr. Frezza writes. "They never had to raise money to fund their businesses from skeptical investors. They never bet their life savings on their own business judgment. They never had to scramble to pay off a banker who called in a loan. They never had to decide whether to take a calculated risk to expand their workforce, hoping to take market share from a fierce competitor. They never had to make a judgment call on whether or not to launch an unproven new product. They never had to manage a new reduction in force, explaining to employees that their jobs have been eliminated because the tax and regulatory burdens imposed by some new law forced them to cut costs.

"They never lost business to a government-subsidized competitor whose cost of capital was vastly lower than theirs. They never had to grease the palms of politicians offering constituent services to resolve a bureaucratic hangup caused by the labyrinthine government approvals these selfsame politicians inflict on many businesses.

"They never had to deal with a missed sales forecast caused by an economy so roiled by capricious and uncertain fiscal policy that frightened customers were holding back orders. They never had to deal with a key supplier that unexpectedly went bankrupt because their source of credit dried up as dollars got sucked out of the com-

mercial economy into government debt. They never had to negotiate with angry landlords after being forced to shut down a business destroyed by spurious mass-manufactured class-action suits. They never had to stand up in front of disappointed investors to explain why they lost money that had been entrusted to them.

"And you can be sure that none of them ever fell on their face and had to pick themselves up, dust themselves off, and decide whether it was worth going through all the joys described above to take another shot at building a business from scratch."

Then he launches into his final broadside against the assumption of the council's economists:

"All three have Ph.D.s from fancy universities," he writes. "They are prize-winning experts in macroeconomics. To have come this far, you can bet they are ambitious, articulate, well connected, and brilliant. Yet when the Council of Economic Advisers did its calculations to determine the numbers of jobs saved by the stimulus, they shamelessly counted assets and totally ignored liabilities.

"People this smart cannot be easily fooled. People so visibly in the public eye cannot remain willfully blind.

"No, these people and those who appointed them are cunningly smart. It's we who are the fools for listening to them. Long after these experts return to their sinecures in academia to train another generation of economists on the wisdom of central planning and Keynesian pump priming, it's we and our children and our grandchildren who will be paying the price."

□ 1915

### THE MACKAY FAMILY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Utah (Mr. BISHOP) is recognized for 5 minutes.

Mr. BISHOP of Utah. Yesterday I came on the floor, and I introduced this body to the Mackay family, a doctor of 30 years, a certified orthopedic surgeon in our community. Dr. Mackay, as has been alleged by the Drug Enforcement Administration, has been giving improper prescriptions to patients in a way that has caused addiction within our community.

Now, the investigation had taken apparently about a year, starting in 2007; but I wanted to pick up the story of this family on June 6 of 2008.

It was on that day that a hard knock came on the door of Dr. Mackay's home. He said it was so loud he thought that had he not answered the door quickly they would have broken the door in, but he did answer the door.

In a rush, 20 agents in full riot gear and armed, they handcuffed Dr. Mackay, took him to the front room,

sat him on a chair, and then stuck a gun in his stomach. His wife was also escorted into the front room and held at gunpoint for 4 hours. DEA did not have a search warrant at this time. They said one was coming as they were going through his office at the same time. And sure enough, after the 4-hour ransacking of his home, they finally did show Dr. Mackay and his wife the one-page search warrant.

I suppose he could have objected earlier to that, but usually when a gun is pointed at your stomach, you have a tendency not to be too talkative in those situations.

What they did in his office is take almost two-thirds of his files, hundreds of patients' files. In his personal home, they confiscated all of his personal records, his tax records, his children's personal records. They downloaded his computer, his cell phones; they took his textbooks and medical journals. They also confiscated his savings and checking account and put a hold on his retirement fund. They also took both his car and his truck.

They did not at any of this time charge him with any crime. They didn't arrest him for anything. In fact, if the issue is prescribing improperly prescription drugs, they did not take away his license to be a doctor. He could still function as a doctor, I suppose, if he could walk to work. And he did. The State of Utah never did go after his particular license.

However, with all of his money confiscated, he is relegated to a position of no money for food, which is okay because he has no vehicles to drive to the store if he needed to. For several months his family survived on the food storage that they had put away as a family for an emergency situation. And during this time, once again, there have been no charges, no arrests; but his property has been confiscated.

He was finally able to get enough money together to hire an attorney; and in November of 2008, 5 months after the initial raid, he went to court. And the courts did demand that some of his property be returned to him. He was given his pension fund back. He was allowed his car but not his truck, nor was he allowed access to his personal savings account or to his personal checking account. Nor was he allowed access to his files or to his textbooks. I have a hard time wondering why DEA, the Drug Enforcement Administration, wants his textbooks and his truck; but they kept them.

Everything he has done up until this time is in trying to meagerly pay off defense bills that he is now accumulating to try and clear his name.

Now, I don't want to give an opinion as to the element of what may or may not have been the legal situation here. I can say from my understanding of this family and the situation that is involved that I do not find Dr. Mackay or

his family to be a threat to our community. In fact, if one looks at the sworn statements from almost all of the physicians in our area, they do not find Dr. Mackay a threat to our community. If I read the letters to the editor in our local paper, the constituents' mail that I have read, no one still considers his family a threat to the community.

Nevertheless, this family, since June of 2008, has been terrorized, a profession has been destroyed, a reputation has been besmirched, property has been confiscated; and still there are no charges, there are no arrests.

Justice, as I always understood it, is supposed to work in a way in which the bad guys are accused and charged and then go before a judge and a jury of their peers. That has not been the situation.

And with that, Madam Speaker, I appreciate the time here. And what I would like to do is once again come in for installment number three, because this story of the Mackay story is not over, and tell you what has still continued to happen to this family in contradiction of what could be or should be the rule of law.

#### HEALTH CARE

The SPEAKER pro tempore. Under the Speaker's announced policy of January 6, 2009, the gentleman from Missouri (Mr. AKIN) is recognized for 60 minutes as the designee of the minority leader.

Mr. AKIN. Madam Speaker, thank you for this opportunity to once again take a look at some of the very significant questions that face our country this evening in this 1-hour. We're going to be taking a look at the subject of health care in America, something that has absorbed the attention of citizens and political leaders now for a number of months. Something that is, of course, important to every single one of us.

We each have to live inside the bodies that we have, and how health care is run in this country is not only very important from a financial and economic and policy point of view; it's very personal because it's our bodies, after all.

So what we're going to take a look at this evening once again is the question as to what are the reforms that should be made in American health care.

Now, sometimes people when we deal with this want to say that everything is wrong; we need to just burn the entire barn down and start completely over. But of course people from foreign countries that have millions and millions of dollars come to America all the time as their choice for the best health care that they can buy anywhere in this planet.

So, certainly, there are many good aspects to our health system even

though it may need some reforms in some areas.

What is being proposed here is not minor. In fact, that's one of the problems with the fact that legislation has not moved in months on the health care subject and that's because what was being attempted is to do a great, great deal. What's being attempted is the government, essentially over time, is going to take over 18 percent of the entire U.S. economy, that is, the government is going to run the health care system.

Now, this is a rather bold proposal. When Lyndon Johnson discovered hunger as an issue, he didn't propose that the government was going to take over all of the grocery stores and farms and all of the trucking in between, but rather that he would propose food stamps. This, instead, is the idea the government is going to take over everything in medicine over a period of time.

So the question is, is this a good thing. Does it really meet the problems, and what are the potential dangers of it.

When the government does too much, we have seen a pattern in the past of things that happen. We have examples of England and Canada where the government is running their health care systems but also examples in our own country of government getting involved in things that it's not very well positioned to do. And we see some inefficient allocation of resources, excessive expenses, degraded quality, and bureaucratic rationing. All of these are part of what can happen if the government does too much.

In fact, it led someone to quip, If you think health care is too expensive now, just wait until it's free.

One of the things that happens when the government does too much is they tend to make things very complicated. This is a chart that we have that tries on one chart to summarize a 1,000-plus-page bill. All of these different groups—the heart, of course, is not really a czar, but it might as well be a czar. It's either a commi-czar—we're very, very fond of czars lately. And commi-czars are I guess a sort of a form of a czar, but it's telling everybody what they're going to do in health care.

But this is an organization chart, and I've often thought we can almost turn this into a maze. And we can put the patients here and the doctors over there, and we can see and give people a crayon and do it as a doily, and they could see if they could get their patient over to the doctor. I am not sure whether it's possible to do that or not, but it would make a good maze.

This is a good chart that we have trying to depict what happens when the government takes over 18 percent of our economy.

Another aspect of that is an objection that the President has tried to respond to.

He says, Here's what you need to know. First, I will not sign a plan that adds one dime to our deficits either now or in the future. Period. Boy, that's reassuring to have the President tell us that he's not going to sign a plan that adds one dime to our deficit either now or in the future. That's reassuring, if it were true.

Well, this is what we've got going so far this year. We've got the Wall Street bailout, that's \$350 billion; economic stimulus—I don't think it's really stimulus—but whatever it was, it was mostly just increasing government programs, \$787 billion; SCHIP at \$6.6 billion. Then there's the appropriations bills at \$410 billion; and IMF bailout. And then you've got some taxes, also.

So when you put it all together, we're talking about a total of \$3.6 trillion. I don't have a lot of confidence with this level of spending that this idea about one dime, he's not going to add one dime to the deficit when we've got \$3.6 trillion that we've already done this year. Somehow this is not reassuring, this promise that he made.

Most of this plan can be paid for by finding savings within the existing health care system, a system that is currently full of waste and abuse. Of course, our health care system—I don't know of anything in our budgets that say waste and abuse. So you can just delete a line that says waste and abuse all through it.

But he says this will be paid for by savings within the existing health care system. Well, what is he talking about?

Of course, what he's talking about is taking \$500 billion out of Medicare. I don't know if that makes the older people in my district very happy to know that we're going to take all of this money out of Medicare to try to pay for the thing. In fact, what's the track records of these great big socialized programs? You've got Social Security, Medicare, and Medicaid; and if you take a look at the projected trend in these things, by the time you get up here to about 18 or 20 percent, you just can't raise taxes enough to pay for them.

What this chart is saying is when you see the growth of Medicare, Medicaid, and Social Security, they will eventually absorb the entire Federal budget.

So we've got Medicare and Medicaid, government-run socialized-type programs, and they're out of control economically.

And so the President says, Well, don't worry, but this one is not even a dime. I don't know that that really helps a lot.

I am joined by several good friends of mine, one I just found out is a Ph.D., and I didn't realize that we had a Ph.D. joining us.

But I would yield the floor to the good doctor.

Ms. FOXX. Well, I want to thank my colleague from Missouri. It's not important what credentials we have. I think it's important how we feel about serving the people that we serve, and so—if I have any accolades for myself, it's that I want to be known as a Member of Congress who cared for her constituents and worked hard to serve them. But thank you for your recognition.

I just heard tonight on the news about a study that evidently came out last week that somehow or another I missed it. And it fits into what you're talking about there. I am not sure if you've heard about it.

There's a GAO report that came out, I think September 29, and there was an article about it in USA Today: "Millions in fraud and drug abuse clogs Medicaid."

Now, I know the President has said that he expects to fund a lot of the health care bill, the government takeover of health care with weeding out waste, fraud, and abuse; but that's never happened in any kind of government plan, as you say. We don't have a line item in the budget that says we're going to reclaim X amount of money from waste, fraud, and abuse and plug that into the system. Perhaps we should do that.

□ 1930

But if we have waste, fraud and abuse now, wouldn't it make sense for us to just go ahead and go after that?

Let me tell you about that. It is a staggering study with staggering results. An audit of the government program Medicaid in five large States found 65,000 instances of beneficiaries improperly obtaining potentially addictive drugs at a cost of about \$65 million during 2006 and 2007, including thousands of prescriptions written for dead patients or by people posing as doctors.

You know, we could save millions of dollars and we should be doing that whether there is any health care plan out there or not.

Mr. AKIN. Congresswoman FOXX, how is it that dead people could be eating all of those narcotic drugs? That is kind of an interesting equation, isn't it?

Ms. FOXX. Well, I think what is happening is you have people who are addicted to drugs, and they figure out ways to get prescriptions written. What they did, the GAO looked—well, the program for low income and disabled Americans, run jointly by States and the Federal Government, underwrote, get this figure, more than \$23 billion in drug costs last year.

Mr. AKIN. \$23 billion in drug costs?

Ms. FOXX. For drugs alone in the Medicaid program.

Mr. AKIN. Drugs in the Medicaid program.

Now, just sort of seeing where you are going, if you allow me, what this

makes me think is that the government is running this program now. If the government is so efficient in running this program, what confidence does that give us that the government should take care of your personal and my personal health? Is that the direction you are going in?

Ms. FOXX. Exactly. Here is a program that has been around since 1965, I believe I am right, and yet we have millions, potentially billions of dollars of fraud, and the government hasn't been able to figure out a way to collect that money or to stop it from happening. That is my concern. And it deals only with a rather small segment of our population. Here the government wants to run health care for everybody in this country. Imagine the kind of fraud that we are going to have, because there is no incentive when you have a government-run program to knock out fraud, waste, and abuse.

People in the private sector, people either are punished or rewarded, depending on what direction they go in. That doesn't happen with a government-run program. This is just the tip of the iceberg.

Mr. AKIN. If that happens in a short period of time, what happens when the program gets older and older and gets more encrusted with bureaucracy?

We are joined here by Congressman BISHOP who has shared with us some very good insights in the past.

Mr. BISHOP of Utah. I thank the gentleman from Missouri very much.

The gentlelady from North Carolina may be by her degree and education a good doctor. I at least directed and starred in the play a couple of times, if that helps. That is as close to "The Good Doctor" as I can get. And the way I did Neil Simon's play is not a pretty sight.

Mr. AKIN. I just want to add a couple of elements to this. I had a constituent who came into my office today talking about how the Senate intends to pay for this new health care plan to try to reduce it: by adding a fee on medical devices to try and raise \$4 billion.

Now I hate to say this, we all know that companies don't pay taxes. They pass on the fees. And I find this somewhat incredible that we are in a situation here, to pay for the Senate health care plan, we are going to add to the cost of those who will be using the Senate health care plan and somehow say that is not an additional cost to anybody.

I find it difficult to figure out how this system has evolved into the way it is, but it seems very clear that we do not have a handle on what this will cost. We now are stretching and scratching and clinging for any kind of straw to try and give some reason to say this can work, when in reality we don't have a system involved that makes it work.

Part of the reason it doesn't work is I think we have missed the focus of the

problem and the issue. The issue is not insurance. The issue is the cost of health care. What we should be looking at, which is not allowed to be debated on this floor or in the Senate committees, is how to bring down cost of health care as opposed to how to make sure everyone has some kind of health care coverage.

If you have insurance, the cost is still too much. We should be looking at a different approach than what we are doing, because we are playing game after game after game on this issue.

Mr. AKIN. It strikes me, not dealing with tort reform, you can talk to any physician, that builds a lot of cost into medicine. Although the President made sort of a passing reference to it, there is no genuine interest in dealing with tort reform, which is something that Republicans do support.

We are blessed with a couple of doctors here tonight. Dr. PRICE is also joining us. Let's talk a little bit about the cost of all of these things.

Mr. PRICE of Georgia. Mr. AKIN, I appreciate your leadership on this and always bringing truth to these issues on the floor of the House.

As you mentioned, before I came to Congress, I practiced medicine. I was an orthopedic surgeon and took care of patients for over 20 years. One of the things that I recognize and certainly my patients recognize is that when the government gets involved in the practice of medicine, which is what they do when they stick their fingers in the pot, it confounds things.

You had a chart up earlier on the machinations, the diagram of the plan. There it is. This chart is astounding to me. I have shared this with my town halls back home, any number of them, and what I ask folks to look for on that chart is not whether they can figure out all of the lines and boxes and squares and triangles, but I ask them to concentrate on the colors on the chart, because every single configuration on the chart is a new bureaucrat or new bureaucratic program.

When they recognize that they say, Oh, my goodness, that is not what I want for my health care, because they know that already in place, either through the government or through the insurance companies, the bureaucrats make it incredibly difficult to get the kind of care that they desire.

The good news is we don't have to move in that direction, and I know that we are going to talk about that some tonight, the solutions. There are positive solutions that put patients in charge. I appreciate you bringing that chart because it points out the increase in bureaucracy which will increase cost and decrease the quality of care, just that diagram right there.

Mr. AKIN. Just thinking for a minute, you've grown up in the medical profession. I actually came out of engineering. I used to work for IBM

and some businesses, but I have also been a legislator for some number of years. One thing that we all experience as legislators, we have our constituents call us up and they have a problem and they want us to help them fix it.

Now I am picturing to myself, on top of everything else we have got, now we have people calling us and saying, you know, my dad needs a hip replacement and he went to the government bureaucrat and the bureaucrat told him he is too old and he can't get his hip replacement. Also, my mother needs a heart bypass. And, Congressman, won't you go to bat with this bureaucracy and get them to give medical care to my relatives? And we are supposed to take a look at this mess and say somehow we are going to get past all of the rationing for health care and bureaucracy and are supposed to get people the medical care that they need. It is asking too much of people's Congressman. Anybody who sets this system up is just creating a complete disaster.

Mr. PRICE of Georgia. I appreciate that point because we do. We get calls from our constituents all the time to help people work through the morass of government bureaucracy in whatever arena. I get calls about the passport office or the post office or the IRS when they have a challenge with them. We may talk about that in a moment. If you think about just the calls that you get on Medicare and Medicaid and the VA health system itself, and some of our colleagues on the Indian Health Services, it is astounding the challenges people have just to get through, the ability to be able to be seen by a doctor and get the kind of care that they want.

What this administration apparently wants and the Speaker wants is to turn all of us over to a bureaucracy that would increase certainly the number of folks calling our offices and trying to work through that bureaucracy because they will never figure it out because that is not the role of government to help them figure that out.

Mr. AKIN. The thing that scares me to death is my first experience as a State legislator was trying to get a left-turn signal put into a traffic light. Now, there was a lane marked in the pavement. They had a left arrow, but they didn't have a light that had a left arrow. That took me about 4 years and probably over 150 phone calls to the highway department to get them to put that little lens in there with a light that says left turn.

I am thinking, if I have trouble with that, how in the world are we going to make something like this work. This is just bizarre. Then I start to think who in the world would have the faith to want to put this system together. Let's take a look at how well our current different departments are doing.

You have the post office department known for its efficiency.

Then you have an energy department. It was created with the purpose of making sure that we weren't dependent on foreign oil. Oh, that is helpful to know that.

Then you have the people who took care of Hurricane Katrina and our emergency management services there.

Then you have the education department. They set some records, too, because a study was done of the U.S. Education Department and the conclusion was, if a foreign power had done to America what the Department of Education had done, it would be considered an act of war.

Then you have the CIA. Now, there is an interesting operation. In Gulf War I they tell us, well, Iraq is probably 10 years away from making a bomb. We get in there, they are 1 year away. Gulf War II they say they are 1 year away from making a bomb. We get in there and they are not doing it at all.

So we have all of these agencies with a great track record, and now we are saying, yeah, so let's turn our health over to the Federal Government. I mean, this takes a lot more faith.

I would yield to my good friend, Congresswoman FOXX.

Ms. FOXX. Well, I think all of these issues that you and Dr. PRICE, and he is a real doctor, he is an orthopedic surgeon and we are really glad he is around, but all of these things that you have brought up are extraordinarily important. But we might need to bring up another one that is very important, and that is that the American people have become awakened as a result of this issue of health care. I think it is the best thing that has happened to our country perhaps since the founding. People are saying we want to know what is going on and we are voicing our concern. They want to read the bills, and they are incensed that the bills are not being put online and out there for them to read and for us to read.

Mr. AKIN. Reclaiming my time, there may be some people here that have forgotten, but we took a vote saying that at least you should have a couple of days, especially on a thousand-page bill.

We have heard all kinds of promises about transparency from Speaker PELOSI, and yet the bottom line is it is not transparent at all. We do not have a chance to read bills. The spectacular one was the 300 pages of amendments passed at 3 in the morning and brought out here, and we are debating and voting on a bill on the floor and there wasn't even a copy of the thing here in the Chamber. It is almost laughable it was so silly. And the American public was going, we don't have to be very sophisticated, but we would at least like you to read the bills.

Ms. FOXX. Obviously the majority party hasn't learned any lessons because right now they have no bill in the Senate. They have been dealing with concepts.

Mr. PRICE of Georgia. Wait a minute. Are you telling me that the Senate is about to vote on a health care bill and they don't even have a bill?

Ms. FOXX. That's exactly right. They have no bill, and they are about to vote on it. They have even asked the CBO to score it, and the CBO has scored against an outline of what the Senate says it is dealing with.

Mr. PRICE of Georgia. So the Congressional Budget Office is trying to figure out how much this is going to cost, and they don't even have the text of the bill before them to figure it out; is that correct?

Ms. FOXX. That's exactly right. The American people should be up in arms.

Mr. AKIN. Jumping in here, I didn't realize that the economists who can score outlines are so smart.

□ 1945

I don't even know how I'd start scoring an outline of a bill when you don't have anything that says—that's really an amazing—I wonder if the American public is going to be impressed with the fact that we're scoring an outline of a bill?

Ms. FOXX. Well, I think the attitude of the people in the Senate is, we're smarter than the American public. We know better than the American public. That's really been the attitude of this entire Congress, and this administration, and that is, the American public doesn't need to read these bills. And, in fact, some Senators have said they're not smart enough to read them and understand them. I think even some House Members have said that. They don't expect them to read them and understand them.

But what we need is the transparency that the American people were promised. In the elections in '06 and '08, they were promised by the people in charge of this Congress, and by the administration, that we wouldn't have these kinds of shenanigans anymore, that the bills would be out there, they'd be out there for 72 hours, even 5 days before they'd be voted on. I believe the President promised 5 days after a bill was passed—he wouldn't sign it until 5 days had passed. That's not happened on any significant legislation, maybe no legislation that's passed in this entire House. We have a real need to hold people accountable in this body.

Mr. AKIN. Just reclaiming my time for a minute. You know, what has really encouraged me in the last 3 or 4 months is the American public is really engaged. They're starting to pay attention, and they're starting to make comparisons between claims and what the bill actually says, if they can get copies of it. Here's one. This is kind of an interesting deal. Again our President says, There are also those who claim that our reform effort will insure illegal immigrants. This too is false.

The reforms I'm proposing would not apply to those who are here illegally.

So I mean, this is what's being said by the President, and yet the public is starting to say, wait just a minute.

Ms. FOXX. Would the gentleman yield for just a moment?

Mr. AKIN. I do yield, lady.

Ms. FOXX. I see you have a wonderful chart here, and I want to say, isn't it true that the Republicans have put up on the Internet a section-by-section breakdown of H.R. 3200, so the public doesn't have to wonder are we telling the truth, is the President telling the truth? Are the Democrats telling the truth? They can go to the Internet or, in my case, I made these available to the libraries in my district. They can go read for themselves. Isn't that true?

Mr. AKIN. That is correct. People are starting to cross-check Congress, and they know the bills better than some of the Congressmen that are proposing them. And that's exactly what's happened. One of the things, and I don't know if it's quite as easy to catch on the Internet, lady, would be also these amendments. This is the Heller amendment, which was on that very subject of illegal immigrants. What this says: In order to utilize the public health insurance option, an individual must have his or her eligibility determined and approved under the income and eligibility verification system. In other words, what this is saying is, before you come and can get this socialized medicine and everything and tap into that that you, first of all, have to prove that you're a citizen.

So this amendment was offered in committee and the amendment failed, which doesn't give us a whole lot of room for confidence that we're really serious about cracking down on illegals who are illegally taking money out of the health care system.

Mr. PRICE of Georgia. Will the gentleman yield?

Mr. AKIN. I do yield.

Mr. PRICE of Georgia. Now, this is, again, a very interesting point. So the President is saying that none of the monies in this health care bill will go to cover medical treatment on a non-emergency basis for folks that are here illegally. That's what the President says, right?

Mr. AKIN. That's what he said.

Mr. PRICE of Georgia. And then we have an amendment proposed by Mr. HELLER from Nevada in committee that outlines the process that you'd go through to be able to make certain that that wasn't the case, and the amendment failed. And as I see on your chart there, the vote was taken on July 16. Fifteen Republicans voted in favor of it; 26 Democrats voted no. So 26–15, it failed because the Democrats apparently don't believe that you need to have any process in place to determine whether somebody's here legally. That's the only conclusion I can draw.

Mr. AKIN. That's correct. The bill has something in it that says well, illegals shouldn't access it, but there isn't any protection whatsoever in terms of the mechanics of the bill. So anybody who wants to can just walk right in and help themselves. And this amendment, I don't know if this amendment is available to the American public, but I think this pretty much says, you know, there's a huge difference between the two parties, first of all, and second of all, that this amendment really calls into question what the President is promising. And there's a whole series of other promises that we can talk about as well.

Mr. PRICE of Georgia. If the gentleman will yield, there is a spot where folks can go to look at the amendments that were offered in committee. In fact, I think there were 57 or 58 of them that failed virtually along party lines. It's at the Republican Study Committee Web site if folks were interested in doing that, colleagues were interested in going to the Republican Study Committee Web site and looking up, and there's a document there that has all of the amendments that were offered on the Republican side of the aisle in the three committees of jurisdiction, and the vote that was taken, and in fact what it shows time after time after time, as the gentleman from Missouri so well knows, is that the statements that are made by the President and by Members of the folks in charge here, the Democrat party in charge, so oftentimes are at odds with the policy that they're putting in place.

So they know what they want to tell their constituents, but in fact the policy that they put in place doesn't match what they're saying. And that's why I believe the American people have been so incredibly outraged over the past couple of months, because they don't see Congress doing what they say they're going to do or what they want them to do.

Mr. AKIN. You know, gentleman, that's exactly right. And the thing that I find perhaps encouraging at least, maybe it's a bright side to a dark cloud, and that is that the public is becoming aware of what's going on, and the mainstream media is putting this out. The President is putting this stuff out. And yet, you take a look at the polling information and the public is starting to pick up on this. And they're realizing that what the media tells them and what the President tells them just isn't true, just isn't true.

And as they start to read it, they start citing sections of the bill. And here's another one. This is perhaps—and I know we have a couple of doctors joining me on the floor here. If there's anything that as a patient is a big deal to me, if you want to boil health care down to one thing, I want the doctor and the patient to be making the deci-

sions. As a Republican, I don't like it when insurance companies stick their big nose into that relationship. The only thing I could think of that's worse than that is some government bureaucrat sticking their big nose in that relationship.

So here's another promise that the President has been saying, and this one too isn't true. First, if you're among the hundreds of millions of Americans who already have health insurance through your job, Medicare, Medicaid or VA, nothing in this plan will require you or your employer to change the coverage or the doctor you have. That's wonderful if it were true. But the trouble is, it ain't necessarily so, one more time.

Here's the first. There's a Congressional Research Service. This is an unbiased—it's very professional people that we use, count on them. Hear what they say, okay: Under this bill, this is PELOSI's bill, under H.R. 3200, a health insurance exchange would begin operation in 2013, would offer a private plan alongside a public option. And it goes on to say, it does not contain any restrictions on noncitizens. Well, this is the one about legal or illegal immigrants.

But here's another amendment that's along the same lines. This is Dr. GINGREY. Nothing in this section shall be construed to allow any Federal employee or political appointee, that means bureaucrat, to dictate how a medical provider practices medicine. This is the heart of what we believe in as Republicans, the doctor-patient relationship. This is an amendment offered. It says no bureaucrat's going to get in the way of your health care.

Mr. PRICE of Georgia. Does the gentleman yield?

Mr. AKIN. I do yield.

Mr. PRICE of Georgia. This is a remarkably important amendment that was offered in committee because, as a physician, my patients would literally bristle at the knowledge that somebody was affecting what I could do for and with them. But this amendment, which was offered in committee, this is not conjecture. This actually happened. Was offered in committee. And it said that nothing in the bill would allow any Federal employee or political appointee, these are nonmedical people, to dictate, that's the language, to dictate how a medical provider practices medicine. And the vote, as I see there, was 23 Republican and one Democrat supported it, so that was 24. And 32 Democrats voted no, which tells me, the only conclusion I can reach from that is that the Democrats want Federal employees and bureaucrats to dictate to doctors how to practice medicine. That's the only conclusion I can draw.

Mr. AKIN. You know, the thing that's scary to me about that is, the way the Federal Government's going to

go about that, they're going to start taking a look at your age and how much it costs and everything, and I'm getting to be kind of old. I mean, I just hit 62, and I'm not too encouraged by the idea of some bureaucrat saying, look you old geezer AKIN, you can't have that hip replacement that you need. I've been talking to you, Doctor, about getting some help with that because I've been limping around. We have Dr. BURGESS here, and I would just really appreciate it, as a medical doctor, if you could shed some light on the situation.

Mr. BURGESS. I thank the gentleman for yielding. I thank him for putting this hour together this evening. I think it's terribly important. Rumor mill out there is that we will have this bill next week or the week after on the floor of the House. People do need to be paying attention to this. I am on one of the committees of jurisdiction, on the committee of Energy and Commerce. We had this bill in our committee for a couple of weeks in July. I thought that it would pass along party lines and the Democrats would vote this favorably out of committee. I thought we would have it on the House floor in the month of July, and I thought that the Democratic leadership would force this bill through passage again on a party line vote in July.

It didn't happen that way. I think it's because they pushed the cap-and-trade bill through at the end of June. Many Members went home and were startled by the reactions of their constituents and said, hey, maybe we'd better study about this a little bit before we just go ahead and pass it. As a consequence, we didn't pass the bill on the floor of the House, passed it out of the three committees, and then we hit August. And what happened in August was, the same sort of anxiety that we encountered in July after cap-and-trade came back big-time in the month of August. And little sleepy town halls that I would normally do in August that might command the attention of a dozen people, maybe 50 people if there's something big going on, 2,000 people would show up. They wanted to look—

Mr. AKIN. 2,000 people?

Mr. BURGESS. On a hot Saturday morning in Denton, Texas, we had to call an audible and change it from inside to a parking lot location and, with no thought to my personal safety, I took my jacket off and my tie off, grabbed the microphone, stood under the hot sun and answered questions for an hour, 2 hours, about this bill that we had just passed.

Now, I will admit that I had a little bit of an advantage being on the committee. I could hold a copy of the bill up, because I had a copy of the bill, and say that I can truthfully say I'm one of the Members of Congress who's voted no on this bill because we had it in

committee, and that I will likely vote no every time it comes back again. And that seemed to be a reasonable approach for the people in my district.

But I've got to tell you, I was astounded, I was stunned, coming back in September, after all this angst and anxiety we encountered during the month of August, and it was like it never happened. It was like the Democratic leadership assumed that the country was in some sort of fugue state in August and they weren't really serious about the opposition to this bill because we came back to committee in September. We had a few more amendments that they said we could consider after the fact and we did. Many of us brought up the fact that boy, August was a game-changer, and really the American people want us to be more serious about and more thoughtful about our approach to this bill.

And the chairman of the committee said, no. We're not paying any attention to August. August didn't happen. It was a mirage, it was a heat-induced hallucination. It wasn't the American people speaking, it was made up.

Mr. PRICE of Georgia. Will the gentleman yield?

Mr. BURGESS. I'll be happy to yield on that point.

Mr. PRICE of Georgia. I appreciate you bringing that up because I was so astounded as well by this incredible outpouring by the American people of their concern and fear about what their government was about to do to them. And then the President seemed to just dismiss it, didn't even recognize that it had happened, and the Members of Congress, including the Speaker of the House and others, seemed to be saying, don't pay any attention to that man behind the curtain. You know, it was like they didn't even acknowledge that, in fact, the American people were concerned, which is—I appreciate you saying that because it's one of the things that has further angered my constituents and the folks that I talk to across this land, who say, is anybody listening there? Is anybody paying attention?

Mr. BURGESS. Reclaiming my time, if the gentleman will continue to yield, the fact is the American people do not trust us to do something this big. They look at this 1,000-page bill, they recognize that it will go to a Federal agency, the interpretation of those thousand pages will lead to 10,000 or 20,000 or 30,000 pages in the Federal Register, years of rulemaking, and years of rules that will be rained down upon a free society because of the actions taken on the floor of this House within the next couple of weeks.

Mr. AKIN. Well, you know, gentlemen, a number of you have raised the point that there's a whole lot of Americans that are not very thrilled with this approach of government takeover of health care. But let's just think

about it for a minute: Why it is that you had that reaction, 2,000 people come out of nowhere, and they're all hotter than hornets about how this is lousy stuff, we don't want some bureaucrat rationing our health care.

Let's talk about who might be against this bill. First of all, if you're an older guy like I am, you're going to be worried, because statistically you're at the point where they're saying it's not worth it for the government to pay for you to get your health care.

□ 2000

So if you're an older person, all they're going to give you is aspirin and some pain pills or something. And so if you're an older person—you're not going to like this—if you're an older person, you're probably also on Medicare. And you want \$500 billion taken out of Medicare? I just don't think that's going to be very popular with some of our older voters.

But let's say that you're a different person. Let's say that you have a small business. This bill is going to tax your small business a whole lot. You're saying, I'm already struggling. I'm barely making ends meet. We've got a lot of unemployment in America. If I had some money, I'd be able to add some new machines, get my small business going, and we could help the unemployment. But now you're going to tax me to death on a bunch of this socialized medicine. So the small businessman is not going to like it, the guy who is pro-life is not going to like this.

I yield.

Mr. BURGESS. I thank the gentleman for yielding, because that's a very good point. I had several roundtables with small business in my district over the summer. An 8 percent payroll tax will be the largest single tax ever levied upon small businesses in this country. Think about that for a minute. We just hit, what, 9.6, 9.7 national unemployment.

Mr. AKIN. We've got unemployment that's just running away. The statistic almost everybody knows is that I think it's pretty close to 79 percent of the jobs in America are with companies with 500 or fewer employees. So small business employs almost 80 percent of Americans. And what are we going to do? We're going to slam them with an 8 percent tax on top of things right now with unemployment already at 8 or 9 percent.

Mr. BURGESS. If the gentleman will further yield, all last month I heard from small business people either at home or who came up to Washington to see me. I heard from a lady who has a saddle manufacturing plant in Fort Worth; I heard from cardiologists; I heard from air-conditioner compressor remanufacturers in my district. I heard from literally butchers, bakers, and candlestick makers, all concerned, yeah, the economy may be doing a little bit better in north Texas. Yeah,

maybe those aren't wild leaves; maybe those are in fact green shoots.

I said, Well, are you looking to expand business or add any jobs? No, I am not, because I don't know what you're doing to me in health care. I'm scared to death about what you're going to do with this energy bill. I haven't a clue what you might do with this financial service reregulation you're going to do, and it is too uncertain.

When I look across the horizon, all I see is the abyss. I cannot possibly add a job in this environment that Congress is doing. Forget the economy; forget the worldwide situation. It is what Congress is doing; the uncertainty that Congress has now injected into the small business climate, small business environment.

They are holding back on adding jobs in a climate where, otherwise, maybe if I could find a banker to loan me some money to do something, I might do it, but not if I'm going to face an 8 percent payroll tax, not if I'm going to have to pay more for my energy or, by the way, pay some sort of premium in a carbon offset somewhere at some point in the future. And, oh yeah, who knows what this financial regulation is going to do to me if I'm a financial planner.

All kinds of businesses in my district, the multiplier effect of perhaps those one or two jobs in every small business spread out across my district, spread out across my State, spread out across the country; and is it any wonder that our unemployment rate is 9.7 percent?

Mr. AKIN. The sad thing is that, to a large degree, we're doing it to ourselves with this kind of overkill legislation. This almost looks like somebody has got a solution looking for a problem to justify it.

I notice that we're joined by my good friend, Congressman FORTENBERRY. I'd like to yield some time to you so you can be part of our discussion.

I have to say that Congressman FORTENBERRY is highly respected. He is one of these level-headed kind of decent guys. Everybody likes him.

You've got to have some people in your district talking to you about this. What are you hearing, Congressman?

Mr. FORTENBERRY. Well, first of all, thank you for your comments, and it's a pleasure to join you this evening. I didn't have the benefit of the conversation in its fullness before joining you just a moment ago, but I would like to try to make a contribution to what you're saying, if you can yield a few minutes to me.

Mr. AKIN. I yield. We're basically enjoying having a conversation here. A little bit like going to dinner with your Congressman, except the food, you have to provide that for yourself.

Proceed, please

Mr. FORTENBERRY. Thank you. I think, if I could reframe this for just a

moment, I think there's a central question we should all be asking ourselves on both sides of the aisle, and including the administration: How do we actually strengthen health care in America? How do we answer a fundamental question as to reducing cost, improving health care for all Americans, and protecting vulnerable people?

If you start to frame how we move forward on appropriate public policies that improve health care, reduce cost, and protect our vulnerable people, you begin to get actually underneath the reasons that we're in a circumstance now where you have a large section of America that is pretty happy with its health care, but generally unhappy with the rising cost. You have another section of America that has real problems with gaps of insurance coverage either because of preexisting conditions or loss of job and an inability to afford a product individually. That's a real problem.

Then you have certain vulnerable populations who, frankly, end up in the emergency room a lot of times; whereas, if there were alternative methods of care, primarily for primary care, that would reduce that cost as well. So how do you begin to answer those questions, I think.

One is—and I think there has been a certain bipartisan focus on this—and that's this positive in this overall debate—but it's the whole issue of health and wellness.

Our total health care bill in this country is about \$2.2 trillion. About 75 percent of that is actually due to the onset of chronic disease. A major portion of that could actually be prevented or better managed with significant cost reductions.

For instance, some estimates suggest that 80 percent of cardiovascular disease could actually be prevented or better managed. Can you imagine the hundreds of billions of dollars that we could be saving if we had a cultural shift in the paradigm of health that looked at incentivizing both prevention and wellness? I will give you a few examples.

In Nebraska, we have a rehabilitation hospital called Madonna Rehab Hospital, and we actually held a committee hearing, a public hearing in the field back home on putting the health back in health care. It was a subcommittee of the Agriculture Committee, which we held back in August.

Madonna Rehabilitation Hospital's principal testified they have a 1.7 percent increase in their annual health care bill over the last 5 years. Incredibly low.

Mr. AKIN. Only 1.7, gentleman? That's not very much increase. Most people's insurance jumps 20 percent a year.

Mr. FORTENBERRY. Exactly right. They have a very aggressive, progressive health and wellness program

where you're actually incentivized to watch your health, to take measures to actually engage in preventative care. The largest employer in Nebraska actually has a 50 percent lower increase—it's still increasing—in their own health care cost because they aggressively incentivize prevention as well.

A manufacturing entity in my hometown of Lincoln has a \$5,000 per employee cost for their health insurance versus \$8,000 dollars in the industry average because, again, a strong focus on health and wellness.

Right now—and, Doc, you might want to add something—we tend to pay the medical establishment, the systems, to fix or cut or prescribe. And if we incentivize wellness for persons who are in insurance plans to actually have incentives to watch their own cost, perhaps through expansion of health savings accounts and other entities that allow for the creative opportunity for families and individuals to better control their own health care as well as companies paying directly for prevention, and then incentivizing the medical establishment to be paid or to be reimbursed basically for that type of care, you'll begin to get to one of the major cost drivers that has left us in this situation. Hundreds of billions of dollars could potentially be saved.

Mr. AKIN. Gentleman, I really appreciate your approach of trying to solve problems. We have focused for some of our discussion this evening on the things that are wrong with basically having the government take the whole thing over and socialize it. But we have also been criticized by the President and others that the Republicans don't have any kind of solutions to health care, which you just showed was a tremendous amount of innovative and very kind of strategic thinking in terms of how do you approach this. I think maybe it would be worthwhile. Doctor, I ask you to join us, please.

Let's just kind of tick off some things that—just think about our Republican colleagues and friends. I'm going to just toss out a few things that I would figure get at least 90 percent, probably 95 percent from our colleagues.

One of them is that the big companies and employees of big companies get to pay for health care with pretax dollars, but the small business guy and the individual has to pay with after-tax dollars. I think most of us would say justice means that people are treated equally before the law, and that if we're going to allow people to buy their medical insurance with pretax dollars, that should be made available to everybody.

Don't you think that we'd get a 95 percent on that, probably?

Mr. FORTENBERRY. If I could speak, Doctor, real quick.

Mr. BURGESS. I think on our side of the aisle, no question, you'd get 95 percent. I can't speak for the whole House.

Mr. AKIN. I'm not speaking for the whole House because they want the government to take things over, apparently. That's just one idea. I toss out another one.

Mr. FORTENBERRY. You've made a very good point that there is an unequal tax treatment based upon your defined status in the Tax Code. And if you're an individual left out there on your own versus a multistate corporation, you have a different incentive, basically, based on the Tax Code structure. I agree with you, it's unfair.

Mr. BURGESS. Further, a multistate corporation actually has the ability to deliver their health care product over State lines. Individuals in the individual market are prohibited from buying insurance across State lines.

Mr. AKIN. Which therefore, Doctor, suggests?

Mr. BURGESS. It would suggest when the President stands up before us and says there's a place in Alabama where there's only one insurance company—sure, insurance companies tend to form natural monopolies. But if you remove the barriers rather than adding another company for competition, which is a government-run option, why not remove the barriers and open it up to the 1,200 or 1,300 companies that might like to compete for that business in Alabama.

Mr. AKIN. Fleshing that idea out a little bit, in the case of Missouri, where I'm from, you've got Kansas City; half of it's in Missouri and half of it's in Kansas. So if somebody in Missouri kind of goes over the line into Kansas and finds out, Hey, I can get a couple hundred bucks less a month on the same health policy, why can't I buy that policy from an insurance company in Kansas?

So what you're saying is, Yeah, that's okay. Allow people to shop for insurance across lines, which then reduces the monopoly problem in the insurance industry. That's something that don't you think most Republicans would support that idea?

Mr. BURGESS. The real tragedy in this debate is we've never really explored those types of ideas. Maybe it doesn't need to be throughout the entire United States. Maybe there could be regions. Maybe there can be reciprocity between States that make that agreement. But we've never even explored that.

One of the things that really concerns a lot of people when they look at this bill is you get 10 years of taxes and 6 years of benefits. Remember, none of these good things that are going to come people's way and lift the burden of health care off their shoulders, none of them happen until after the next Presidential election.

Part of that is to keep the score low on the Congressional Budget Office; part of that is because, again, it's going to take a long time to set up

those programs. We don't even have an administrator at the Centers for Medicare and Medicaid Services right now. And that's the individual who's going to be charged with setting up many of these programs.

So, in the meantime, we do need to do something to cover those individuals with preexisting conditions, those individuals who get a tough medical diagnosis, their insurance is rescinded from them. Nothing is more offensive to Americans than to think that someone has played by the rules, written that check every month, they get a tough diagnosis and the insurance company finds a reason to drop them.

If there's been outright fraud in purchasing the policy, maybe so. But in so many of those cases it is really iffy why those policies are dropped. We could fix that.

Mr. AKIN. Which, again, gets to another Republican proposal for portability. I mean, you know something isn't right with the way insurance is written when somebody does all the right things. They run for a number of years, they buy insurance, and all of a sudden their kid gets sick with juvenile diabetes or something very expensive. Then they changes jobs or something and now they're uninsurable. They fall through the cracks.

That's not the way the system should work. That would be a very admirable thing if the House were to just focus on fixing that problem. That would be very good work. No, we have to scrap everything. We've got a hundred million Americans with insurance policies and doctors and doctor-patient relationships, a hundred million of them, and we're going to scrap the whole thing and have the government take it over. That's irrational.

□ 2015

Mr. BURGESS. But even the President himself said here the other night when he addressed the joint session of Congress, because these programs won't be up and running quickly, maybe we should take the JOHN MCCAIN idea of the high-risk pools, the reinsurance and get people some immediate help now.

I would submit to you that if we would work a little harder on that, it may not be necessary to go the full strength of the government program. Why do we have to fix a program that is arguably working well for 60, 70, 80 percent of the population? Why do we have to change it for everyone to capture those 8 to 10 million people who get caught in that cycle of having a preexisting condition?

I yield to my friend from Nebraska.

Mr. FORTENBERRY. This is well stated, doctor, that the injustice of a person who has wrongly had their insurance rescinded has to be addressed by this body, another clear point of bipartisan agreement. Persons who have

preexisting conditions through no fault of their own and are caught in a cycle of not being able to find insurance for the type of problem that they're dealing with is another point of real unfairness that I think you could find appropriate solutions for in a bipartisan way and fix.

It leads to my second point that we really ought to focus on creative new risk pools for insurance affordability and innovation as well as increased access for people out there.

I got a letter from Affiliated Foods in Norfolk, Nebraska, the other day. They are a cooperative. Now in Texas, Missouri and Nebraska we are used to the concept of cooperatives. That's where we leverage our buying power to get agriculture inputs a lot less expensively and sell our grain a lot of times. This is a cooperative grocer who basically uses their group buying power to provide the products for mom-and-pop grocery stores throughout rural Nebraska and other States. They used to be able to buy their insurance through that cooperative, but because of the change of the law a few years ago, they can no longer do so. So it leaves the small business entrepreneur out in the rural community who is struggling to make it, to have to go out on the very expensive individual or small business market instead of using the group buying power.

Now this is a legitimate business. It is a group of people who have bought into a business plan and have ownership in it. They are stakeholders. They're going to be appropriately capitalized. There's no reason that they shouldn't be allowed to use that entity as a creative form of association to leverage group buying power to provide more affordable insurance for themselves.

Mr. AKIN. So what you're talking about now, just to kind of summarize what we have talked about, what you're talking about is what people call in this business associated health plans, the idea that people can create these pools and buy, on a discount rate, their health care. That's a pretty straightforward idea. That's something that Republicans have voted for dozens of times. So we have got associated health plans. We're saying people should have their tax treatment and when they buy health insurance should be the same. We're going to deal with the issue of portability so that when you own a policy you get to keep it and the insurance company can't just dump you.

The other thing we haven't, of course, talked about is tort reform which we have good support for that. That drives health care costs tremendously. And yet we are unwilling to really be serious about it. All of these ideas Republicans are supportive of. So the charge that we're not willing to deal with this debate is not true.

Go ahead, my friend.

Mr. FORTENBERRY. There's another option out there that we should actually have a creative policy discussion about in a bipartisan way which the good doctor just mentioned as well, high-risk pools is another option you have to insure or have the government basically subsidizing a market that does not exist for people who are priced out of because of preexisting conditions or other affordability problems, normal market rates through their business, through their individual policy. You could look at the expansion of those opportunities. We have a fairly good one in Nebraska. It's argued that it's a bit expensive for folks, but that's another way that the government, again, could use public dollars to ensure that people are adequately covered and pay normal rates or provide a reinsurance mechanism, and then as the doctor was saying, you will have gone a long way toward resolving the real difficult problems that exist for about 10 million Americans in providing affordable, good coverage. You'd probably have a bipartisan winner on your hands.

If I could add one more point, there are certain other options, maybe this is a little more controversial, but I think it's worth exploring, in terms of basic public health expansions like community health centers, where you actually help persons who are in more vulnerable situations avoid ending up in the emergency room for primary care treatment.

A combination of this, a focus on health and wellness incentives, new insurance risk pools for affordable innovative options and protecting those who are, because of preexisting conditions or other problems, priced out of those markets with perhaps other types of high-risk pool entities combined with other public health initiatives like that, you would have answered the question I posed initially: How do we improve the health of all America, reduce costs, particularly for families and small businesses, and protect vulnerable persons? We could all applaud and have a big bipartisan agreement and have accomplished, I think, what the people have sent us here to do.

Mr. AKIN. Except instead what we've had is apparently our Speaker has pulled together various people, ignored the recommendations that we had and decided, well, we just know what's best, that is the government is going to run it all, we want this public option, and we're charging down this aisle.

Basically people are wondering, well, why is this health care thing stalled? Well, the reason it's stalled is you don't just take over 18 percent of the economy, take \$500 billion out of Medicare, basically allow a program which is going to allow public funding for abortion and illegal immigrants getting access to this money and all that

stuff without people having something to say about it.

Mr. BURGESS. And if I may, the taxes and fees that are added on top of medical devices and insurance policies in order to pay for these programs are going to drift down to the middle class. There is no way to avoid taxing the middle class or putting a fee schedule on the middle class with the structure that has been proposed by the Senate Finance Committee.

With the gentleman's indulgence, I would just make a point that if people are interested in this debate, [healthcaucus.org](http://healthcaucus.org) has documented the debate that has gone on since January and February of this year. I would just further like to point out, we do hear the complaint that Republicans have not been involved or engaged in this process. I met with the transition team in November and offered my assistance. I was never called back. I met with the chairman of my Committee on Energy and Commerce in January and never received a call back. I submitted 50 amendments to our bill in committee and had several of them accepted toward the end.

Republicans do have ideas. They are reasonable ideas. They deserved a fair hearing and a fair airing in committee. Unfortunately we were denied that opportunity, because as the gentleman correctly points out, as the deputy President has said, "Never let a good crisis go to waste." They were determined to use this economic crisis to expand the reach and grasp of the Federal Government in health care.

Here is the reality: If the President had really wanted to do this, they could have done it in February when the Presidential approval rating was near 80 percent. No one would have been able to stop him. It could have been signed into law before the month was over.

Mr. AKIN. I would like to thank my good friend, Congressman BURGESS and also Congressman FORTENBERRY. Thank you very much.

#### BREAST CANCER AWARENESS

The SPEAKER pro tempore (Mr. MCMAHON). Under the Speaker's announced policy of January 6, 2009, the gentlewoman from Florida (Ms. WASSERMAN SCHULTZ) is recognized for 60 minutes as the designee of the majority leader.

#### GENERAL LEAVE

Ms. WASSERMAN SCHULTZ. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days to revise and extend their remarks and include extraneous material on the subject of this bipartisan Special Order on the subject of breast cancer awareness.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Florida?

There was no objection.

Ms. WASSERMAN SCHULTZ. Mr. Speaker, tonight, like so many times before, I stand with my friends and colleagues on both sides of the aisle to address an issue that is both personal and universal.

As you may know, October is National Breast Cancer Awareness Month. It is a privilege to be with fellow survivors and advocates celebrating 25 years of breast health awareness education and empowerment.

Breast cancer is the leading cause of cancer deaths in women ages 15 to 54 according to the National Cancer Institute. In 2009 alone, the American National Cancer Society estimates that there will be 194,280 new cases of breast cancer across the nation, and 40,610 of these Americans will die from the disease.

Although these statistics may seem discouraging, we have made significant progress. Steady declines in breast cancer mortality among women since 1990 have been attributed to a combination of early detection and improvements in treatment. When breast cancer is detected at early stages, the survival rate for women is 98 percent. Simply stated, many of these improvements would not have happened without Breast Cancer Awareness Month and its focus on research, education and awareness which increase early diagnoses and save lives.

On a personal level, I know the importance of early detection. Nearly 2 years ago, after I found a lump in my breast while doing a self exam in the shower, my doctor diagnosed me with breast cancer. I had just turned 41. Having been a legislator for more than 17 years and having passed breast cancer legislation, I knew a lot about breast cancer. I knew the importance of early detection, clinical exams every 3 years after age 20, every year after 40, mammograms every year after 40, and yet for all that I knew, I soon realized how much I didn't know. I knew about the BRCA1 and BRCA2 gene mutations, the so-called breast cancer genes, but I didn't know that some women were more likely to have the mutation. I didn't know that even with no immediate family history of breast cancer, as an Ashkenazi Jew I was five times more likely to have the mutation or that I would have up to an 85 percent lifetime chance of getting breast cancer and up to a 60 percent chance of getting ovarian cancer.

I knew that young women can and do get breast cancer. But like a lot of young women, I didn't know just how many of us it touches. And after talking with health care providers, survivors and advocates, it became clear that many other young women did not know these things either. Despite our seeming wealth of knowledge on breast cancer, an astounding 40 percent of young women with breast cancer said that prior to their diagnosis, they did

not know that a young woman could get breast cancer.

That's why on March 26, cancer-free and determined to be among the last young women who did not know enough about breast cancer, I introduced H.R. 1740, the Breast Cancer Education and Awareness Requires Learning Young Act, or the EARLY Act. And just this morning, the Energy and Commerce Committee's Health subcommittee held a hearing on this critical legislation as well as several other important breast cancer legislation.

The EARLY Act is designed to educate young women and their physicians about breast health and provide support for young women diagnosed with breast cancer. Young women must learn to be their own voices, to speak up for themselves and know when they need to go to their doctor, because at the end of the day the old saying rings true, "knowledge is power." And when the EARLY Act becomes law, we will fulfill the vital goals of Breast Cancer Awareness Month, increasing education, research and awareness all year long.

However, research, education and awareness are not all that we focus on when it comes to Breast Cancer Awareness Month. We must also take this opportunity to honor and recognize the people close to us who have won their fight against breast cancer, those still fighting, those we have lost, and those who are working hard every day to make sure no one else dies from breast cancer.

We honor the determination of those women and the hope that their courage gives us all. It is an honor to be here tonight, standing together in solidarity as we observe Breast Cancer Awareness Month, wholly committed to increasing early diagnoses, saving more lives and ultimately finding a cure to wipe out this deadly disease. Together, we will save more of our moms, our sisters, our grandmas, our daughters and our loved ones. We can and will empower women to learn the facts, know their bodies, speak up for their health and embrace support.

Mr. Speaker, I am particularly pleased tonight in an environment in which sometimes, in fact too recently, we struggle to do almost anything in a bipartisan fashion, and the intensity and the fervor in which we engage in debate here often prevents us from coming together. The Members of the House of Representatives truly came together today in support and in honor of Breast Cancer Awareness Month. They came together in honor of women who have passed away from breast cancer, in honor of survivors, in honor of women still fighting the disease.

It is my privilege to yield to and introduce my very good friend, fellow breast cancer survivor, someone who has been there for me even before I shared my own story publicly, Con-

gresswoman SUE MYRICK, the gentlelady from North Carolina.

Mrs. MYRICK. Thank you so much. I really appreciate Ms. WASSERMAN SCHULTZ for her efforts in organizing this Special Order tonight. I especially want to commend her for the courage that she had in being willing to share her story, because she won't have any idea of how much this is going to mean to people. There will be people that will be touched by what you did for years to come because you were willing to speak out and to do this legislation. So thank you for introducing the bill as well.

As was noted, October is the 25th anniversary of Breast Cancer Awareness Month. And we have made great strides. Just this week, it was announced that scientists in Canada have, for the first time, decoded all of the 3 billion letters in the DNA sequence of a certain type of tumor. And in the process, they found all the mutations, or the spelling mistakes, that caused the cancer to spread. We know there is a lot to be done in this fight. And I'm also particularly concerned about young women who are diagnosed with aggressive cancers. We've been concerned for some time. That's why we worked with the National Institutes of Health and the environmental people to see if there are links there to figure out why young women in their 20s and 30s are developing breast cancer. It used to be an older person's disease.

□ 2030

So there is a lot of work to be done in that area as we move forward.

But in my city of Charlotte, there was a group of young women in their twenties who were survivors of breast cancer, which they didn't expect. They really just felt so alone, and they formed a group called Breast Friends as a support group. The unfortunate part is this group is growing. It's growing a lot faster than we would like to see it grow. That's one of the challenges we're facing is that so many young women are being diagnosed with this disease. That's the reason I'm pleased to be the lead cosponsor on this bill, the EARLY Act.

Representative WASSERMAN SCHULTZ has done an excellent job, and it does address some of the needs that younger women who are breast cancer patients and survivors have because it's a unique battle. It's different than has been faced in the past when it comes to diagnosis and treatment and decisions that need to be made. It's a lot different than what those of us who are older, who are survivors have had to face and will have to face in the future.

I have always supported breast cancer research funding over these many years, and there is no doubt that it's an important piece of the puzzle, but education efforts like those in the EARLY

Act are also an important piece, because most younger women don't think they can get breast cancer and society tends to tell them, Wait until you are older to get a mammogram. Now there is even talk that self-exams aren't really the way to go. Well, I disagree with that. You are a good example of that one.

We all need to help spread the word. We have got a lot of work to do, not only in our districts, but we need to continue this fight to find a cure. So I thank all of the colleagues that have joined us tonight in this Special Order. It means a lot to everyone, and I also know that they're going to go home to their own districts and do all the advocacy work that we all do over a period of time, and hopefully we will find a cure one day.

With that, I yield back.

Ms. WASSERMAN SCHULTZ. Mr. Speaker, the gentlelady from North Carolina (Mrs. MYRICK) has been such a passionate advocate on behalf of all cancer patients. As the co-Chair of the Congressional Cancer Caucus, she has done an absolutely incredible job at raising awareness not just about breast cancer but about all types of cancer. I think, given how much cancer has touched Americans' lives in a very personal way, it's important that we have local advocates like SUE MYRICK, and it's my privilege to be side by side with you as cosponsors of the EARLY Act. Thank you so much.

It's now my privilege to yield 4 minutes to the gentlelady from California, LOIS CAPPS, who has a health care professional background as an RN, prior to her election to Congress, and has been one of the leading voices in women's health in the House of Representatives.

Mrs. CAPPS. As one of the co-Chairs of the House Cancer Caucus, along with my friend and colleague SUE MYRICK, I am so pleased to join my colleagues here tonight. I applaud you DEBBIE WASSERMAN SCHULTZ and SUE MYRICK for organizing this Special Order, this time together, and for the legislation that you have introduced. I acknowledge my own sister, a breast cancer survivor, and I acknowledge our sisterhood.

There were men and women standing on the Capitol steps today who have worn pink today in recognition. It's a lot deeper than that, but there is a sisterhood of those who have been touched by this disease, and the men who have been touched as well, some with breast cancer, also men who love people with breast cancer and have stood by them and supported them, and that network has really made all the difference.

I applaud the amazing work of the advocacy groups for all that they do on behalf of breast cancer patients and their families. It's because of them that we've really come such a long way in the fight against this disease. And

because of them, we've taken this disease out of the closet. The advocates against breast cancer and for understanding it have paved the way for many other disease entities to have survivors, and those touched by it really become vocal and become the strong voices.

When I first became a nurse—and that was many years ago—the word “cancer” was hardly ever said out loud in public, and you never said the word “breast” in public. But everyone who has worked so tirelessly over all the years to make sure that people understood that these are not words to be embarrassed by or shamed by but, rather, to be empowered by, they encourage us to know how to be more aware of how to take care of our own bodies through prevention and early detection, and that's a lot about what this legislation is about.

So now we've reached an age and a time where more and more women know the importance of self-exams, of learning about family histories and risk factors and taking advantage of early detection mechanisms like mammograms. But far too many women still face barriers. Too many women are discriminated against by insurance companies for having this disease. Whether it's the egregious practice of kicking you out of the hospital too soon after reconstructive surgery or posing barriers to accessing annual mammography, we need to put an end to these practices, and I am proud to be a cosponsor of legislation to do so.

I also applaud efforts to target populations that are still marginalized—minorities and young women. Both of these populations need better access to information and better access to quality care. We need to pass legislation to make information and quality care more accessible.

So I proudly stand with my colleagues who are championing efforts in Congress to improve breast cancer research, awareness, detection, and treatment. I do this on behalf of my constituents, my family, my friends, people who know all too well what it's like to receive the diagnosis of breast cancer.

Ms. WASSERMAN SCHULTZ. Thank you so much. Again, the gentlelady from California, LOIS CAPPS, has been just one of the most outstanding health care advocates in the Congress. I knew about her advocacy and her leadership in health care even before I arrived in Congress in 2004, and it is a privilege to serve with you. It truly is.

It's now my privilege to yield 2 minutes to a woman who has recently joined the Congress, was elected in the class of 2008, worked hard to get here and has been doing a fantastic job, served in the Nevada State Senate as the State Senate minority leader and is a good friend of mine, Congresswoman DINA TITUS from the great State of Nevada.

Ms. TITUS. Thank you so much.

As we begin Breast Cancer Awareness Month, I'm honored to stand here with my colleagues and recognize those women we know who have battled breast cancer. First let me thank DEBBIE WASSERMAN SCHULTZ for her leadership on this issue. Her personal courage and subsequent push for education and early detection are both inspiring and encouraging.

Unfortunately, everyone has a story, one of their own experiences or those of a friend or a family member who has battled cancer. Each year we lose mothers, sisters, daughters, and friends to breast cancer. In Nevada, an estimated 1,270 new cases of invasive breast cancer were diagnosed among women in 2008, and 430 of those women died of the disease. This is a tragedy, and what makes it even more tragic is that many of those deaths could have been prevented if women knew the risk factors and if researchers had what they needed to make breakthroughs in understanding and curing cancer. I believe we must empower every woman with the tools she needs to fight this deadly disease. Women should have access to the latest health information, undergo frequent health screenings, and receive preventive care.

Sadly, Nevada has one of the lowest mammogram screening rates nationally. Recent estimates are that only 54 percent of women over the age of 40 have had a mammogram in the past year. Nevada is currently ranked 48th in the Nation for percentage of women ages 40 to 69 who obtain mammograms annually. This is just unacceptable.

And unfortunately, too many younger women think that breast cancer is something that happens to older women, yet it's the leading cause of cancer deaths in women under the age of 40. So we must redouble our efforts to reach out to young women, to increase awareness of the threats and the warning signs that lead to early diagnosis. That's why I'm proud to also be a cosponsor of the EARLY Act.

Too often, women who have undergone a difficult surgery, both emotionally and physically, find themselves forced by their insurance companies to leave the hospital before they're ready. This, too, is unacceptable. Women must have the adequate support after breast cancer surgery that they need to get them on the road to recovery.

Indeed, we have all been touched by cancer. It can be a devastating disease, and those who have fought and are fighting it demonstrate a remarkable strength every day. They teach us all the lessons of life and living and the importance of family and friends. I believe they are true heroes who are role models for us when it comes to strength and courage.

While breast cancer has affected too many women in Nevada and across the country, there is also an enduring hope

that we can join together to search for a cure. Between the strength and determination of breast cancer survivors and the generous spirit of volunteers, I'm optimistic that we can defeat breast cancer if we stand together in this fight.

Ms. WASSERMAN SCHULTZ. Thank you so much, Congresswoman TITUS. Your leadership and the fact that you've joined the Congress added another woman to our ranks. Women's health and making sure that we can focus the attention and the agenda on women's health here in the United States House of Representatives is so incredibly important. We already have a sort of head cheerleader, so to speak, although I don't mean to trivialize her position. But the first woman Speaker of the House of Representatives has been a passionate advocate for women's health and has always encouraged making sure that we have more women join our ranks. You've done an incredible job since you've been here. I'm so pleased that you've joined us in the House of Representatives.

Mr. Speaker, I want to spend a couple of minutes just highlighting some unique facts that, really, most people are unaware of when it comes to breast cancer. What I've learned since my own diagnosis and since getting involved in a more personal way in trying to pass the EARLY Act is—we all hear the expression, Everyone knows someone who has breast cancer. Well, today we really can say that everyone had someone close to them that had breast cancer.

It's just amazing after I shared my own story how many—I was standing there in the well the day that I shared my story with folks, and I can't tell you how many Members came up to me and touched my arm and said, DEBBIE, my daughter had breast cancer, my mother, my sister, my wife. People stopping me on the street, on the airplane, on the ball field with my kids. It's amazing. The outpouring of people reaching out to connect with me has just been absolutely incredible, because breast cancer touches so many people and touches women in a very personal way. But what's really frustrating about breast cancer is how it strikes certain populations in a more deadly way.

Another thing that I realized is that there are higher risk populations that too often are unaware of their risk. Like me, as an Ashkenazi Jewish woman, I was not really aware of my risk of having a greater likelihood of carrying the BRCA1 or BRCA2 gene mutation. Subsequently when I was diagnosed with breast cancer, I did a genetic blood test and found out that I am a carrier of the BRCA2 gene. But in doing research for the EARLY Act, the statistics that I learned about African American women and breast cancer were really startling.

African American women have the highest breast cancer death rate among

minority women. It's 34 per 100,000 people in the population, African American women from ages 35 to 44. So younger African American women have a breast cancer death rate more than twice the rate of white women in the same age group, and they are 34 percent more likely to die of cancer than are whites, and more than twice as likely to die of cancer as are Asians or Pacific Islanders, American Indians or Hispanics.

We have got to raise awareness in higher-risk populations and minority populations, and we have to change the disparity, the disparity in the survival rate and the disparity in terms of access to health care for their populations, because we know that early detection is the key.

At this time, to talk some more about that, is a very good friend of mine, another newly elected Member from the great State of Pennsylvania, professionally a dietitian before she was elected to Congress, a small business owner, and most importantly, a mother of five. I now yield 3 minutes to the gentlelady from Pennsylvania, KATHY DAHLKEMPER.

Mrs. DAHLKEMPER. Thank you so much for asking me to join you tonight as we have this very Special Order hour to honor Breast Cancer Awareness Month and to recognize those that battle breast cancer across this country. But more than that, we're here to deliver an important message to the American people tonight.

Not only are we on your side in the fight against breast cancer, but we are one with you in the fight against breast cancer. We are one with you not simply because we believe in your cause and to share your goals, and it's not only because we empathize with your hardship, we are one with you because breast cancer is just as real for us as it is for millions of Americans across the country.

This disease, as it's been said tonight, knows no boundaries, knows no borders. It's blind to race, socioeconomic status, and age, and it certainly does not care whether you are a Member of Congress. All in all, nearly 150,000 women will be diagnosed with breast cancer this year, and more than 40,000 women will, sadly, succumb to the disease.

But what do these numbers really mean? They are certainly alarming and give us pause, but the truth behind these numbers is that 150,000 families will confront a crisis this year; 150,000 families will be subjected to the fear they may lose a mother, a sister, a daughter or a dear friend, and 40,000 families will see that fear become a reality.

□ 2045

Like so many American women, breast cancer became a real cause of concern for me, but I was one of the

lucky ones. When my doctor told me I needed a biopsy to check for breast cancer, I was scared and worried what it would mean for my family. But, thankfully, breast cancer never became a reality for me. My biopsy came back clear.

Other women I know were not as lucky as I. Numerous friends have lost their mothers to breast cancer. Witnessing our loved ones suffer is a pain that cannot be accurately described. And that's why we are here, to honor Breast Cancer Awareness Month and to show our solidarity with the hundreds of thousands of women battling breast cancer now and celebrate the more than 2½ million women who are breast cancer survivors.

I would like to share with you some stories from real women from the Third District of Pennsylvania.

Cindy Hanna of Mercer County was 38 years old when she was diagnosed with breast cancer in 2003. Cindy was one of the lucky ones. She had a mammogram on her doctor's recommendation that caught her cancer early, and she is now a breast cancer survivor.

Cindy shared her experience in the Sharon Herald paper. She quotes: "I had no symptoms. I wasn't even thinking cancer. My cancer was very close to my spine, and if I had waited until I was 40, like most doctors recommend, who knows what would have happened." Cindy is now the coordinator of the Medical Equipment Recycling Program at UPMC Horizon in Farrell. This month she is tying pink ribbons in towns across her county to help raise awareness and encourage women to get mammograms early, like she did.

Sue Kilburn of Meadville, Pennsylvania, was diagnosed with breast cancer when she was in her late 40s after an annual mammogram. Her doctor told her she had to choose between a lumpectomy and a mastectomy to treat the disease. She shared her journal with the Meadville Tribune Newspaper, and she writes:

"The words ring out unlike anything I have ever experienced before. I find no anger, just feel numb, dumbfounded and questioning how? When? It was just a routine mammogram."

She survived her battle with breast cancer, and now she works as a clinical nurse breast care educator at the Yolanda G. Barco Oncology Institute. The position is funded through a grant from the Susan G. Komen Foundation.

Cindy and Sue are heroes. They are survivors. And they are committed to helping women beat breast cancer. For Cindy and Sue and thousands like them, early detection saved their lives. Because they had regular mammograms, their cancer was detected early. When tumors are detected early, we know they are nearly 100 percent treatable.

This Breast Cancer Awareness Month, let's encourage the women in

our lives, our mothers, our sisters, our daughters, and friends, to get a mammogram. Early detection saved Cindy and Sue, and that's why I support the EARLY Act. Let's work together to make their stories the story for every woman diagnosed with breast cancer.

I thank you.

Ms. WASSERMAN SCHULTZ. Thank you so much, Congresswoman DAHLKEMPER. Again, it was a thrill to see you come to the House of Representatives and add your expertise, particularly as a dietitian, and thank you for sharing those personal stories from your district in Pennsylvania.

The important thing about Breast Cancer Awareness Month, and when we talk about breast cancer it is putting a face on it, helping people to understand, because so often statistics are really easy to just kind of glaze over and stop paying attention to.

Here tonight to help us continue to raise awareness is the gentlewoman from southern California, SUSAN DAVIS, who has made health care a signature issue during her time in both the California Assembly as well as the United States House of Representatives, a member of the Education and Labor Committee, one of the three committees in the House of Representatives that passed part of the health care reform legislation, and she has also been a leader by pushing for billions of dollars in funding for NIH.

I yield to the gentlewoman from California.

Mrs. DAVIS of California. I am so happy to join my colleagues here this evening, and I want to thank you, Congresswoman WASSERMAN SCHULTZ and Congresswoman MYRICK, for your leadership on this issue.

Some years ago I decided to participate in a 3-Day Breast Cancer Walk in my hometown of San Diego. I had had a college roommate who, with successful treatment, had survived breast cancer, and I wanted to show my support. Walking would mean being with many women and men across San Diego who, like her, had fought the disease, and I knew I'd also be supporting many organizations that have worked to heal them.

I remember thinking about how I would find the time to train for the walk, because I wanted to be certain that if I took it on that I was going to complete the walk. And with time-management skills and congressional travel schedules, I wasn't sure how that all would work out, but I was really delighted to have signed up.

Breast cancer hadn't really affected me personally. The disease hadn't struck my family. I just felt the need to walk with others.

Soon after I signed up for the event, I was looking forward to joining my sister and her husband for dinner and just catching up on our lives and sharing stories of our children. I was actually really excited to also tell her that

I had signed up for the walk. She's a marathon runner, and I thought maybe she wanted to join me since walking for 3 days would probably be really easy for her.

But my sister at that dinner had news of her own to share. She had just had a biopsy and it had come back malignant. Her diagnosis: breast cancer.

Far too many people know what it's like to sit there as I did and hear that news from someone that you love so dearly. And I know my colleagues on the floor today have expressed that as well. At that point my commitment and passion for the walk was only heightened, particularly as I spent the next 6 months or more talking with my sister about her treatment and her progress.

During the 3-day walk, I listened to so many people whose loved ones had been personally affected by breast cancer. As you know, each story is really heartbreaking and inspiring all at one time. I remember all the T-shirts with the pictures, and many of them were of loved ones who had lost their lives to breast cancer.

It's because of my sister and my roommate and my colleagues here that I have heard so much about breast cancer. And I'm so proud to work here in Congress to promote much of the legislation that we have talked about today. Legislation like the Breast Cancer Patient Protection Act, the Breast Cancer Education and Awareness Requires Learning Young Act, the EARLY Act, and other bills on this issue. I also strongly support the Department of Defense Breast Cancer Research Program, which is resulting in exciting advances to find better treatments and eventually a cure. And I know that so much has changed since that 3-day walk I took quite a few years ago.

As everyone has said, at some point in their lives, nearly every American will have a family member or friend who battles breast cancer. We must do more to ensure that women of all ages, including younger women, know how breast cancer can affect them.

My sister was fortunate to have treatment that allowed her to continue her work and take care of her family. And I am so grateful and happy to stand here and say that she has been in remission for more than 6 years.

But I know that everyone's story is not like hers. Many women, and men, lose this battle every year.

I am just proud to join with my colleagues this evening, and I want to thank them again for honoring so many who in their lives have survived breast cancer and remembering those who didn't. We need to continue to support increased education awareness and the momentum that will bring us all to a cure.

Ms. WASSERMAN SCHULTZ. Thank you very much.

It's now my privilege to introduce and yield to a gentleman who is, again, another recent addition to the House of Representatives, elected in November of 2008, someone who I have really seen exercise incredible leadership since his election to the United States Congress, and apparently the token man here tonight. So it's really especially wonderful that he has joined us.

STEVE DRIEHAUS hails from Ohio and is the former minority whip in the Ohio House of Representatives. He is also a former Peace Corps volunteer, which, to me, that kind of altruism and volunteerism is so incredibly admirable. He is the father of three young children, whom I know he is most proud of.

It's my pleasure to yield to him on behalf of Breast Cancer Awareness Month.

Mr. DRIEHAUS. I thank the gentleman for yielding. And I want to acknowledge the tremendous work of Congresswoman WASSERMAN SCHULTZ and Congresswoman MYRICK on this issue.

I hail from the great State of Ohio. We looked into the breast cancer statistics in the State of Ohio, and we learned that more than 8,000 new diagnoses occur every year for men and women in the State of Ohio with breast cancer. And nearly 2,000 breast cancer fatalities still occur every year in the State of Ohio.

While this rate has declined in recent years, in part due to the emphasis on early detection and treatment, we all know that it's still way too high.

In Southwest Ohio, we've made progress. We have the Breast Cancer Alliance of Greater Cincinnati, focusing on advocacy, education, and communication. We have the Cris Collinsworth ProScan Fund, promoting breast cancer awareness and education, providing access to early breast cancer detection services, and offering support to breast cancer patients. We've got the Breast Cancer Registry of Greater Cincinnati, housed at the University of Cincinnati College of Medicine, which is designed to obtain information from and about women and men diagnosed with breast cancer, with a purpose to support research about the causes of breast cancer.

But while all of these things lead to greater awareness and greater education around breast cancer, it's interventions like the EARLY Act and the Breast Cancer Awareness Month that help us bring national attention and national focus to young women, older women, young men, and older men about the dangers of breast cancer.

I remember when I was just a little boy my grandma's being diagnosed with breast cancer. I didn't know what it meant at the time. I knew grandma was sick. I knew she was in trouble. She eventually succumbed to cancer. And I think just like every one of us,

we have those stories. But back then when I was a little boy, we didn't have this awareness about breast cancer. We didn't have the early diagnosis that we have today. And that's why so many women lost their lives to this dreaded disease.

We are making progress in this country. We are making tremendous progress. And it's through actions like the EARLY Act, it's through actions like Breast Cancer Awareness Month that we make that progress.

So I again want to applaud my colleagues on the floor tonight and lend the voice of the men of America in support of these efforts. I am proud to be a cosponsor of the legislation. I think it's a critically important piece of legislation, and I appreciate your taking the time tonight to again educate the people in America on the issue.

Ms. WASSERMAN SCHULTZ. Thank you so much, Mr. DRIEHAUS. Again, it has absolutely been a privilege to work with you since you joined us in the House of Representatives. You've been really doing an incredible job, and I appreciate especially your taking time out of your evening, especially late in the evening, 9 o'clock at night, to help raise awareness about the importance for women to focus on their breast health and to help women and men be focused on breast cancer awareness in this month of October and all throughout the year.

It's now my privilege to introduce someone whom I have come to know over the last number of years and whose district I have traveled to on a number of occasions and whose leadership I've seen demonstrated both in her hometown of Columbus as well as here on the floor of the House. She served as a former school board member in Franklin County, a former county commissioner in Franklin County, and now serves in the United States House of Representatives with distinction.

I yield to the gentlelady from Ohio, MARY JO KILROY.

Ms. KILROY. I want to say thank you to both of my colleagues, Representative MYRICK, with whom I have the great honor of serving as one of the co-Chairs of the bipartisan Congressional Cancer Caucus, and of course the gentlewoman from Florida for your strength as cancer survivors and for leadership on this issue.

I am lucky, Representative WASSERMAN SCHULTZ, to have you as a friend, and I appreciate very much the kind comments you made just a few minutes ago about me. You have taught me so much about this Chamber and what it means to serve here as a Member of this House.

□ 2100

Last weekend, we saw some very interesting things happen on the football fields. We heard earlier from Representative CAPPS—and I remember

those days when breast cancer was something to be whispered, when my mother and her sisters or my father's sisters would whisper in the other room about somebody who had been diagnosed, and things have changed that way.

And last weekend we saw some very large athletes who are man enough to wear pink. Hundreds of NFL football players shed their dirty cleats for fresh pink and white athletic shoes to show their support for Breast Cancer Awareness Month, to show their support for their mothers or sisters or aunts or grandmothers or for the thousands of women diagnosed with breast cancer in this country.

Awareness is very important. And I think awareness helps lead to action, the kind of action that we've talked about tonight with our sponsorship of the EARLY Act, the kind of action that dedicates resources to research and to access to health care.

The pink wave was a wonderful show of solidarity for cancer survivors and for continued research funding that we in this Chamber have supported. And while professional athletes get a lot of attention, I would like to call your attention to the next generation of athletes, to some women in my district who are also drawing attention to the cause and to the fight for a cure. In fact, they are instead of running for the cure, they are volleying for the cure.

And this week I visited Hilliard Bradley High School and presented each member of the Hilliard Bradley volleyball team with a recognition certificate for their service to the community through the Volley for the Cure event that took place at their high school on September 14. The Hilliard Bradley volleyball team and their coach, RyAnne Ufferman, with the support of small businesses and the community of Hilliard, raised \$2,300 for the local affiliate of the Susan G. Komen Race for the Cure. The team had a T-shirt, a bake sale, and a raffle at their match against Fairbanks Local to raise awareness and money for the cause.

It's great that these young women recognize an issue that is facing us as women in this country, the need to raise further awareness and further resources so that we have a cure. And I was so pleased with them for their leadership. This is a new high school. These are not the seniors that are looking for something on their resume. These are freshman, sophomores, and juniors in this new high school on this new team stepping out beyond their comfort zone to go out and knock on doors and ask for money to join us in this cause to find the cause and the cure for breast cancer, a disease that affects in one way or another almost every single American. And it can only be eradicated if we all continue our efforts at the Federal level to support

and to fund important research and to continue the grassroots support that we see at important organizations like Susan G. Komen.

I cannot tell you how proud I am of the 25 young women who put this event together, as well as for their four coaches.

These young women and this 25th anniversary of Breast Cancer Awareness Month should serve as a reminder to all of us to take breast cancer screening seriously and to make sure eliminating breast cancer is a priority for our country. We hold the key to this in our incredible doctors, in our scientists; and I hope that they will continue to receive the support they need.

People will learn how to be more aware of breast cancer and the need for examinations and prevention and detection, and we'll continue to work so that all of us, all women, have access to the women's health care that they need.

Thank you very much for this opportunity.

Ms. WASSERMAN SCHULTZ. Thank you so much, Congresswoman KILROY. It is so wonderful to serve in the House of Representatives with you, and as someone who has recently shared her personal health care battle and highlighted the need for health care reform as a reflection of your own personal story, I really just admire your courage. And it's been an incredible privilege to work with you. Thank you so much.

It's now my privilege to introduce not only my friend but my next-door neighbor in Washington, D.C., a woman who has been a passionate advocate, a fighter—really you look in the dictionary and look up the word “fighter” and “passion” and SHELLEY BERKLEY is right there.

She served prior to her election to Congress in the Nevada State Assembly. And I would like some credit for pronouncing “Nevada” correctly. So I want to pat myself on the back for that. Ms. BERKLEY served on the Nevada State Community College Board of Regents as well. She is the mom of two wonderful sons, both of whom I've met and who have done her proud.

And it's my privilege to yield time to her tonight for Breast Cancer Awareness Month.

Ms. BERKLEY. Thank you, Congresswoman.

I would like to thank both Congresswoman DEBBIE WASSERMAN SCHULTZ and my dear friend Congressman SUE MYRICK for leading the charge, and a special thank you to DEBBIE. She did mention that we're next-door neighbors.

And I want to tell you, DEBBIE, I used to—you know, in the morning before I start getting ready to come to work—and I am always at work by 8 o'clock no matter where I have to be; it's usually by 8. And I would be sitting at my

dining room table having my cup of coffee and reading the newspaper, and at ungodly hours there was DEBBIE getting into her car, and I couldn't for the life of me figure out where she was going at this hour. I said, Where can this woman be going?

But then by 8 o'clock I would see her at whatever meeting we were at. And I never knew until you made that public disclosure of what you were going through and that you were going through it by yourself, with your loved ones, but not sharing with your colleagues because you wanted to keep this personal and not tell people at that time. And I cannot tell you the admiration I had for you long before that, but particularly afterwards.

And, SUE, same thing. I recall distinctly when you were going through your treatments and how brave you were during that time, and it's an inspiration for all of us.

This is a very important piece of legislation, and that's why I came to the floor at 9 o'clock in the evening. It's particularly personal to me.

There isn't a woman in my family that has not died of cancer, of breast cancer: both my grandmothers, all of my aunts, my mother. The worst day of my life is when my sister, Wendy, 47 at the time, called me up and told me that she had been diagnosed with cancer. Given the background of my family, listening to this my knees buckled because I was so fearful of her fate. But because times have changed and there's early detection and better awareness of this dreaded, horrible disease, horrible disease, she was able to get the treatment that she needed. They practically killed her to cure her, but she's alive today and doing not only very well but she just became a grandmother last Friday. And that could not have happened in my mother's generation or my grandmothers' because they weren't aware of what they needed to do in order to protect themselves.

I am hoping that when we are discussing health care in this country that we are able to change the paradigm of how we deliver health care services to the people that we represent throughout the United States of America. This is a perfect example of legislation that is important because it raises awareness for all women, young and old, but particularly younger women that need to know what to look for, what to expect, what are the signs, and what they can do when they suspect that they have the early signs of cancer.

I think the reality is with early detection, you can prevent these diseases and seek the treatment that you need so that you can go on to lead a long and wonderful life and have children and grandchildren just like my sister Wendy.

Women don't take very good care of ourselves. We're always taking care of

everyone else. And the little aches and pains we have we tend to ignore because we're too busy during the day to deal with it. We cannot afford to let that happen because sometimes it's those little pains, those little bumps, those little things that we don't pay attention to that could ultimately lead us down a path that we don't want to go.

If you have a sick mother, you have a sick family because in most cases, the mother is the linchpin of the family. And if you're going to have a woman that doesn't take care of herself, doesn't know what the early signs of cancer are, doesn't know what to look for and what to do should they suspect, then they're not going to treat themselves; they're not going to have early detection; they're not going to have prevention of this disease. And the entire family is going to be harmed, and the loss to the family is dramatic.

So I cannot thank you enough for introducing this legislation. I'm a proud cosponsor. I look forward to being on the floor and voting for this and pressing that green button.

And I thank you all, not only on behalf of the women in my family—those that have gone, those that are still here and those that are yet to be born—but for the millions of other American women and families that this legislation is going to help and to save. And I thank you both for that.

Ms. WASSERMAN SCHULTZ. Thank you, Congresswoman BERKLEY for your leadership and for your friendship and for your neighborliness.

At this time I would like to yield to the gentlelady from North Carolina who will yield to some colleagues who have joined us on her side of the aisle.

Mrs. MYRICK. I thank the gentlewoman for yielding.

I wanted to make a couple of points before I do that, and one of them is we can't spend an evening talking about breast cancer without remembering our dear friend JoAnn Davis who was a Member here. And she fought a courageous, courageous battle. She truly did. Unfortunately, she was diagnosed late. She had a very aggressive cancer and she lost that battle a couple of years ago. And it's still hard every time I think of her. She was a tremendous, tremendous person and very valiant.

The other thing I wanted to just mention was when we talk about the awareness that this bill is promoting, women still today don't want to get mammograms simply because they're afraid they will hurt. And you know, I have had so many women say that to me; and then I have other women say, Well, I really don't want to know. And you know, we really need to make women aware that they better find out sooner rather than later. And that's why this legislation is so important.

And men, too. I have two male friends in Charlotte who both have breast cancer and never had any idea—and one of them, unfortunately, because they didn't think he had breast cancer, he isn't with us any longer.

So there is a lot of work to do, and again I commend you for this.

And I have the pleasure of introducing a gentleman who is also new to Congress, and we're delighted he's here, the gentleman from Louisiana (Mr. CAO). I will yield to him 2 minutes.

Mr. CAO. Thank you very much for yielding me time.

Mr. Speaker, I stand here today to support this very important legislation to bring awareness to breast cancer. For many women in my district and all over the United States, breast cancer is a life threatening disease. It is therefore imperative that we as a Nation do all we can to work towards a cure.

The national statistics for breast cancer rates are intimidating. It is the leading cause of death in women ages 50–54. Thus, very few families are left untouched by the pain and suffering it causes.

However, thanks to the efforts of the Susan G. Komen Foundation and other breast cancer awareness groups, breast cancer has the highest survival rate of any cancer that afflicts Americans. In fact, there are 2.5 million survivors that owe their lives to these efforts and to the power of early detection.

My home district, the Second Congressional District of Louisiana, has the highest breast cancer mortality rate of any district in the United States and, unfortunately, the lowest early detection rates.

Thanks to recent medical developments, early detection means more treatment options and higher success rates. It literally saves lives.

As part of Breast Cancer Awareness Month, I want to stress the importance of having regular screenings to guarantee early detection and to improve women's chances for survival.

I would also like to acknowledge a woman from Louisiana who's currently struggling with breast cancer, Mrs. Tara Stoulig Monistere.

Mrs. Monistere is a 34-year-old wife and mother who was diagnosed with stage IV breast cancer shortly after the birth of her daughter. Her situation is unusually difficult in that breast cancer rarely strikes young women and new mothers with such intensity. Every aspect of her life is compounded with greater stress levels and hardships as a result of this disease.

However, she remains an active member of her community, maintains close relationships with family members, and fights her disease with great faith, bravery, and determination.

□ 2115

Mrs. Monistere's personal struggle with breast cancer is one of countless

examples that proves that this disease is too common for women of all ages. Breast cancer attacks a new victim every 2 minutes, and an estimated 3 million women are living with it in the United States today. I urge all women in my district and throughout the country to get tested regularly. Through continued awareness and preemptive action, we will proactively fight this disease and save more lives.

Ms. WASSERMAN SCHULTZ. Thank you very much, Mr. CAO, for joining us this evening. Again, this has been a bipartisan Special Order, as well as male, female, a combination of devotion to making sure that the women in our lives and the 1 percent of men that are diagnosed with breast cancer every year are more aware of the importance of focusing on their breast health.

It is now my privilege to yield time to the gentleman from Illinois who is celebrating a birthday today. That is particularly exciting, and we appreciate him coming down to help raise awareness about the importance of breast cancer on his birthday. He is a father of two. Prior to his election to Congress last year to fill an unexpired term of the former Speaker, he was a scientist, a very successful and learned scientist, and has added incredible expertise to the discussion and debate we have here in the House of Representatives, Mr. FOSTER from Illinois.

Mr. FOSTER. Today I rise in support of my sister, Susan Adlai Foster, a survivor of breast cancer; and in remembrance of my grandmother, Nanette Raymond, who was not. Today I also rise in strong support of Breast Cancer Awareness Month to recognize the strength of the women who have endured this terrible disease. This year alone, it is estimated that 192,000 women will be newly diagnosed with breast cancer, and it will claim the lives of over 40,000 women. However, it is a great disservice to these strong, courageous women to reduce them to statistics. They are our mothers, sisters, grandmothers, and our friends.

I lost my grandmother to breast cancer. Thankfully, my sister has survived her battle with this disease. I firmly believe that we must take all steps necessary to promote awareness and research to find a cure so my daughter and her generation do not suffer through this same experience.

It has become obvious that part of breast cancer is environmental, part of it is genetic, and a large part can be mitigated through early detection. We must press ahead on all fronts to mitigate and eventually eliminate this scourge.

I would also like to take this opportunity to applaud the efforts of the Susan G. Komen Foundation that has done so much to advance this cause and to spread the message that early testing saves lives.

I encourage all of my colleagues to cosponsor and vote for H. Res. 708, congratulating Nancy Goodman Brinker, who founded the Susan G. Komen Race for the Cure, for receiving the Presidential Medal of Freedom.

Ms. WASSERMAN SCHULTZ. Thank you so much, and happy birthday.

It is now my privilege in the last couple of minutes before we yield back, in honor of Breast Cancer Awareness Month, to yield time to the gentlewoman from northern California who is a passionate fighter on behalf of the causes that she and her constituents care about, LYNN WOOLSEY.

Ms. WOOLSEY. Mr. Speaker, I rise in support of breast cancer awareness and to honor two very brave congresswomen, Congresswoman WASSERMAN SCHULTZ and Congresswoman MYRICK.

Mr. Speaker, breast cancer is a disease that has touched the lives of far too many people. Young women are especially high risk for breast cancer. In fact, breast cancer is the leading cause of cancer death among women ages 15–45 because breast cancer tends to be more aggressive in younger women due to lack of appropriate screening, diagnostic tools, and inadequate education about the disease among young women and among the medical community.

We must give young women the tools they need to fight this disease by educating them, and we must make sure that they receive early detection, because when breast cancer is detected in the early stages, the survival rate is more than 98 percent. That is why I support H.R. 1740, the Breast Cancer Education and Awareness Requires Learning Young Act of 2009. This bill would increase awareness of risk factors for breast cancers and encourage early detection of the disease among young women through community-centered informational forums, through public service advertisements, and media campaigns.

H.R. 1740 also aims to educate health care professionals about the unique circumstances young women diagnosed with breast cancer face.

In addition to educating women, Mr. Speaker, about the risks of breast cancer, we must expand research into the causes and treatments for breast cancer, especially among young women who are excluded from breast cancer studies. Breast cancer is more difficult to diagnose in young women because screening methods that work on older women are less successful on younger women.

We also need to learn more about the long-term effects cancer treatments have on women of any age. That is why the Annie Fox Act is an act that will help us invest in prevention and in treatment.

Mr. Speaker, I am honored to stand here with my colleague from Florida and my colleague from North Carolina. I commend them both on the strength

they have shown during their personal battle with this disease, and I applaud their efforts to help all women fighting breast cancer. I pledge to work with them so we can get this behind us.

Ms. WASSERMAN SCHULTZ. Thank you so much. As Ms. WOOLSEY steps away from the podium, I really want to acknowledge her leadership, particularly on young women breast cancer issues because prior to my introduction of the EARLY Act, she was one of the leading voices on breast cancer in young women, and we can't thank her enough.

Mr. Speaker, as our hour comes to a close, I want to thank Congresswoman MYRICK for her leadership and her friendship. I think the point we want to make tonight is that although Breast Cancer Awareness Month is celebrated throughout the entire month of October, it is important for us to focus on breast cancer awareness and for women to focus on their breast health throughout the year.

Ms. ROS-LEHTINEN. Mr. Speaker, I rise today, during breast cancer awareness month, in solidarity with, and through the strength of, thousands of breast cancer survivors and victims throughout these United States.

I stand by my friend and colleague Congresswoman DEBBIE WASSERMAN SCHULTZ whose fight with this disease is an incredible story of will and perseverance;

I stand by many longtime friends in our community who have been affected by this terrible disease;

And I stand by hundreds of thousands of women whom I will never know nor meet, but whose stories we already know all too well.

And though breast cancer affects both genders, it disproportionately targets women, with men being about 100 times less likely to be stricken with the disease.

And as women, our chances of developing invasive breast cancer at some time in our lives is incredibly high, by some counts a 1 in 8 chance.

This makes breast cancer the second most common cancer among women.

Almost everyone in this country unfortunately knows someone who has suffered from breast cancer.

Whether that person is your mother, sister, partner, or friend, the story is always heart wrenching.

Through efforts such as breast cancer awareness month, all of us work to bring about greater breast cancer education, prevention, diagnosis and treatment.

But it is stories of some of the brave women with this terrible disease that I want to share today.

Linda Gayle Burrowes never expected to be a statistic.

But for her 49th birthday she received the gift that would save her life.

A friend of hers insisted on giving Linda a mammogram; and the day after Linda's birthday, she was diagnosed with breast cancer.

She is a survivor because this angel sent gift caught the disease early, and Linda was determined that other women would not be like her, leaving their life up to chance.

Three months after her mastectomy, she started the breast cancer support and educational group "Your Bosom Buddies", which has meetings the 3rd Thursday of each month at the Women's Health Center at Baptist Hospital in my community.

There is also the story of Mary Lamberts, who is a 9-year breast cancer survivor.

Mary has a history of cancers on both sides of her family, so she always prepared for the worst on her check-ups.

But 90% of women diagnosed with breast cancer have no family history of the disease.

The diagnosis came after Mary had a mammogram, followed by an ultrasound that same day after her radiologist saw something suspicious.

During the surgery to follow, her doctor found multiple tumors.

Most of the tumors were removed but she had to undergo over 30 treatments of radiation, and remain on a regimen of powerful drugs for years afterwards.

Thankfully, many men and women do survive this terrible disease.

And no one knows the simple gifts in life like a survivor.

Rosa Andreu Vila was diagnosed with breast cancer 12 years ago and went through a lumpectomy, chemotherapy, and radiation and has mercifully been in remission.

She has told me that in the 12 years since her diagnosis, due to early detection and treatment, she has been able to see both of her sons graduate from college and be married, and is now a proud first-time grandmother.

These are stories of survivors, but new cases of breast cancer happen every day.

Dr. Frank Mave, a local doctor of osteopathy, is one of the newly diagnosed males with breast cancer and just had surgery this month.

He is only just now beginning his "long and winding road" with chemo and radiation, and we pray for him and all others who are on their way to being survivors.

These stories show that there is hope, and people are increasingly surviving breast cancer.

In the United States, breast cancer is becoming one of the most survivable cancers, if the disease is detected early.

And this is the point of breast cancer awareness month.

We must remain vigilant in our efforts to educate and diagnose and treat.

With these three pillars, we can and will save lives.

Let us make sure that we educate one another on the dangers of breast cancer and the need for routine checkups.

In memory of Congresswoman Jo Ann Davis, who passed away at the age of 57 while serving last Congress after a two-year battle with breast cancer;

For all men and women in my community and throughout the United States currently battling this terrible disease;

For my daughters, and my new baby granddaughter Morgan Elizabeth, I thank my friend and colleague Congresswoman DEBBIE WASSERMAN SCHULTZ for her leadership on this issue.

Her story serves as an inspiration to all.

Let us make sure our efforts to defeat this terrible disease continue at full force.

Mrs. LOWEY. Mr. Speaker, I'd like to thank my colleagues, DEBBIE WASSERMAN SCHULTZ and SUE MYRICK for organizing this very important Special Order hour tonight.

Recognizing breast cancer awareness month is about more than issuing a proclamation or delivering a speech. It is about honoring the women who have fought bravely against breast cancer and committing to finding a cure so that they and other women can live healthy lives.

These women and their families have created a community of hope for those who struggle every day—with courage and dignity—with this terrible disease.

They are mothers, daughters, sisters, friends, and advocates whose strength and tenacity have driven us toward significant progress in treating breast cancer.

Improvements in treatments coupled with advances in early detection and screening methods have increased the survival rates for women to 98 percent when breast cancer is detected in its earliest stages.

But this remarkable achievement can not stop us from ensuring this terrible disease is cured once and for all.

Government can't cure cancer, but it can put the resources in the hands of scientists who will. That's why I have made funding biomedical research at the National Institutes of Health a top priority in Congress.

It is hard to believe, but when I was first appointed to the Appropriations Committee in 1991, the federal government was spending just \$133 million on breast cancer each year.

In the last decade, however, that investment has increased dramatically—to more than \$1.3 billion between spending at the National Institutes of Health, National Cancer Institute, and Department of Defense.

Furthermore, last year, legislation I authored with Representative SUE MYRICK to study the link between the environment and breast cancer was enacted into law.

In addition to fighting for more research into the causes and best treatments for breast cancer, I have also spearheaded the effort to substantially increase and accelerate research into early detection technologies.

Mammography screenings are a woman's best chance for detecting breast cancer early, and when coupled with new treatment options, can significantly improve a woman's chances of survival.

However, experts and scientists agree that we still have not found the 21st century early detection method we need.

I am pleased that the National Cancer Institute is spending close to \$55 million per year to research better screening methods for breast cancer spurred by my legislation, the Better Screening for Women Act.

The federal commitment to cancer research has enabled us to make enormous strides in our understanding of this complex disease.

The investment we make in research and education today will improve care for each and every cancer patient, and move us closer to the day when we eradicate cancer.

Ms. JACKSON-LEE of Texas. Mr. Speaker, I am proud to be speaking before you today about the importance of "National Breast Cancer Awareness Month." This campaign goes back a quarter of a century, starting as a

weeklong campaign in 1985, by AstraZeneca, a pharmaceutical company; its aim from the start has been to promote mammography as the most effective weapon in the fight against breast cancer. This month and throughout the year, we should all be committed to ongoing education about options for breast health and helping women become more informed so that they can make educated choices about breast health.

Breast cancer is a disease that impacts all Americans, affecting women and men of all backgrounds, races, and incomes. Women in the United States have the highest incidence rates of breast cancer in the world; 141 among white women and 122 among African American women.

Among women in my home state of Texas, breast cancer is the most common cancer, and the second-most common cause of cancer death (after lung cancer). Women in the U.S. have a 1 in 8 (12.5%) lifetime chance of developing invasive breast cancer and a 1 in 35 (3%) chance of breast cancer causing their death. There were 216,000 cases of invasive breast cancer and 40,000 deaths in 2004. In 2007, breast cancer was expected to cause 40,910 deaths in the U.S. (7% of cancer deaths; almost 2% of all deaths).

It is unacceptable enough that so many women today meet such an end. But, worse still, several studies have found that black women in the U.S. are more likely to die from breast cancer even though white women are more likely to be diagnosed with the disease. Even after diagnosis, black women are less likely to get treatment compared to white women. The journal *Cancer Causes and Control*, for instance, found in their sample that there has been no improvement in mortality from breast cancer for black women in 23 years.

Worldwide, breast cancer is by far the most common cancer amongst women, with an incidence rate more than twice that of colorectal cancer and cervical cancer and about three times that of lung cancer. However breast cancer mortality worldwide is just 25% greater than that of lung cancer in women. In 2004, breast cancer caused 519,000 deaths worldwide (7% of cancer deaths; almost 1% of all deaths). The number of cases worldwide has significantly increased since the 1970s, a phenomenon partly blamed on modern lifestyles in the Western world.

However, research has proven that by making treatment available, we can fight this horrendous disease. In my home city of Houston, the Ben Taub General Hospital and Baylor College of Medicine strive to ensure that the most advanced medical care is available to all the city's residents regardless of wealth or ability to pay. Ben Taub General Hospital is vital in providing care to the over 1.1 million Houston residents without health insurance, and millions more with little or low insurance coverage. For over 100 years, Baylor College of Medicine has firmly committed to caring for patients, regardless of their ability to pay.

That is why we all work to raise awareness and educate our fellow citizens about this horrible disease; that is why we must fight to make sure breast cancer is defeated through early detection and funding for a cure; and that is why, to make sure that women across

our nation have the treatment they need to fight this battle, we must pass real health care reform in America.

In closing, Mr. Speaker, I would like to thank everyone here for being part of this fight, and I pledge to remain by your side until breast cancer is defeated, and no American woman ever again has to fear it.

#### BREAST CANCER AWARENESS MONTH

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Minnesota (Mr. PAULSEN) is recognized for 5 minutes.

Mr. PAULSEN. Mr. Speaker, I just want to rise in support tonight and commend my colleagues from Florida and North Carolina for their support in this effort and bringing attention to this very important issue.

As I listened to the personal stories tonight, I couldn't help but think about how this has touched so many different people in so many different ways. As the father of four daughters myself, I certainly have the perspective of wanting to focus early prevention and attention on this issue.

I have staff members who have family members who have been afflicted by this terrible disease. I think it is very important to recognize that as we look at October being Breast Cancer Awareness Month, and the efforts that are going on here this evening, the more that we can do as a Congress bipartisanship and across the aisle, especially to drive attention and focus on a disease that is afflicting so many people and is something that is very preventable, as was mentioned. This is the disease that is the most commonly diagnosed cancer among women in the United States after skin cancer, and the second most common cause of cancer death, after lung cancer, among U.S. women.

Twenty-five years ago was the first observance of National Breast Cancer Awareness. We have come a long way since then, but we have a long, long way to go. We must continue to do more to raise awareness of this very serious issue.

That is the reason that I am a cosponsor of the gentlelady's legislation from Florida. It does focus the education on the prevention measures which are so critical. I mention that, having four young daughters myself. That is a bill that has 370 cosponsors. There aren't that many pieces of legislation that garner that type of support. It really is a testimony of not only the issue, but the leadership of the gentlelady from Florida. It is an honor to be part of this effort tonight and to drive focus and attention on this.

This bill really does focus important attention to early detection, which is the key to preventing and curbing this horrible disease. Studies have shown that early detection of breast cancer can and does save lives.

Mammograms performed every 1 or 2 years for women aged 40 years or older can reduce mortality by approximately 20 to 25 percent over 10 years. So it works.

I was proud last night to highlight an example of two young entrepreneurs, enterprising constituents in my district, that began their own efforts to drive attention on this deadly disease. They started their own lawn care business, but on the side they decided to dedicate a portion of their profits toward breast cancer research.

So these two young 15-year-olds have begun one of the most inspiring and philanthropic organizations throughout Minnesota, and now they are trying to drive more attention to this around the country and throughout Minnesota to raise money to focus attention on breast cancer research. It goes all the way down to the younger and youth that are trying to bring attention to this issue.

I hope this month serves as a reminder of early detection and screening and working towards a cure for breast cancer.

I thank the gentlelady for giving me some time this evening and for her leadership.

#### AMERICA'S LONG-TERM STRATEGIC POSITIONING

The SPEAKER pro tempore. Under the Speaker's announced policy of January 6, 2009, the gentleman from California (Mr. ROHRBACHER) is recognized for 60 minutes.

Mr. ROHRBACHER. Mr. Speaker, I rise tonight to discuss America's dependence on NATO, our relations with Russia, today's threat of radical Islam, and tomorrow's looming threat of an ever-more-powerful Communist China. In other words, tonight we will examine America's long-term strategic positioning in the world.

It is always valuable to look at history as well as the present before considering the future. So let's start with the North Atlantic Treaty Organization. It made sense, NATO made sense when it created it. It made sense to strengthen the NATO alliance during the 1950s while the Soviet Union was forming its Warsaw Pact and while the fall of China to Communist tyranny and the Korean war halted the vision of a peaceful world that we had been dreaming of in the aftermath of World War II. But in the 1950s, that was a threat.

But the 1950s are ancient history. The cold war is over. This is the 21st century. NATO no longer serves its purposes and is, in many ways, counterproductive. Ronald Reagan's visionary leadership, coupled with the unrelenting commitment and courage of the American people, brought an end to the Soviet Union and the Warsaw Pact. The people of Eastern Europe were

freed from a hostile occupation and puppet Marxist governments. In the 1990s, the Russians dramatically moved away from domestic tyranny and away from a belligerent foreign policy.

Freed from its Soviet shackles, Russia expected to be embraced. At least if they weren't embraced, they certainly expected to be accepted as the Russians moved their troops out of occupied nations and opened up its political and economic system. It was perhaps the greatest peaceful resolution of a hostile confrontation between major global powers in history. NATO played an important role in bringing us to that point in the late 1980s and early 1990s.

The armed might of NATO deterred aggression and Soviet adventurism that could have resulted in a world conflict. NATO, with American leadership, won for Western civilization a new chance at building a future of progress, freedom, and tranquility on a global scale.

□ 2130

In the last 20 years, there's been a change on a massive scale, most of it for good, in the former Soviet Union. Certainly, elements of this transition have been counterproductive and short of expectations and disappointing to the people of Russia, as well as peace-loving people in the West who had such high expectations. But by and large, enormous positive changes have taken place in Russia over these last 20 years.

It is in vogue now, in some circles, to suggest the current leadership in Russia is similar to the Communist thugery of those who not so long ago ruled that country with an iron fist and threatened world peace. Let this Cold Warrior shock you by suggesting that the Russian government's flaws, and they have many flaws, do not reflect a fundamental, malicious nature, as was the case under communism. And while there are examples of heavy-handedness, there is ample evidence of freedom of speech, religion and enterprise.

Within this context, the vilification of Russia by old Cold Warriors, my friends, most of them, has been unconscionable and unrelenting. The fall of communism, the restructuring of its society, and Russian forces, of course, withdrawing from Eastern Europe, this was breathtaking. These were breathtaking events. Clearly, the Russian people and the Russian government wanted to be part of the Western community if they were willing to take such dramatic steps. The door was open, and the Russians were not only willing but anxious to leave Cold War hostilities behind. They were naive and so were we about the transition. This historic opportunity has almost totally been squandered.

During the transition, rotten elements in the West allied themselves with nefarious Russian elites, and together they took advantage of their

country's weakened and vulnerable condition. Russia was looted, and much of the loot ended up in Western banks. Vast natural resources ended up in the hands of a few power brokers. Billions of dollars of Russian wealth, basically mineral wealth, was transferred to private hands for a pittance.

The Russian people, rejected and isolated when they expected to be partners in building a new world, sunk into despair. Adding to their sense of helplessness, Russia was frozen out of the world market and relegated to the fringe market, like Iran. Let us note that today we are suffering because of that effort to isolate Russia from the global economy. I remember shortly after the Communists fell in Russia, I went to my own aerospace industry leaders and said, We've got to let the Russians compete with us. This is the one area, high technology, where they can compete. And of course, the reaction with our major aerospace companies was, no way.

And for 7 years after the fall of communism, Russia, which had invested enormous resources in rocket technology, was not permitted to sell their launch services to the West. That was the one area they could have really raised some hard currency, and we denied that to them.

While, at the same time, what did our friends in Europe do? Of course, Europe, by its very nature, the European Union is a cartel, excluding other countries like Russia. But instead of utilizing Russian missile and rocket technology to launch satellites, our European allies rushed forwards to spend hundreds, maybe \$150 billion, in developing their own launch capabilities. Again, instead of letting Russia be part of the world market, they were frozen out.

And how does this relate to Iran? Their scientists were earning \$50 a month, people with Ph.D.'s, the top level of their society, the cream of the scientific crop, starving, seeing their families suffering. They were looking around, so they were relegated to the fringe, and they went to Iran, and Iran agreed to hire them to build a nuclear reactor. I remember this very well. During the Clinton administration, I went to top people in the Clinton administration and explained, This will eventually be a horrible catastrophe, a threat, a huge threat to the United States and the West if we permit this nuclear power plant in Iran to be finished.

I said, but we shouldn't be threatening the Russians, which is what we did. Our government policy was, don't do it, or you're going to suffer, instead of saying, look, we know your people are unemployed. We'll get you a contract, financed by the World Bank. It wouldn't have cost us anything to build two power plants, maybe one in Turkey, maybe one in Malaysia, maybe

one in another country that needed electric power. Instead, we just threatened them, and of course they had no other alternative. We didn't give them that alternative. And so now, we face this problem.

By the way, shortly after George W. Bush was elected, I went to see Condoleezza Rice. Made the same argument, We've got to act now—if we act now we can give the Russians an alternative in which they do not have to build this nuclear reactor for the Iranians. But let's give them the alternative.

Again, it was only threats and talk about punitive actions but no willingness to offer the Russians a positive alternative. So, of course they had to get their people employed. We're going to find out a lot about that in the months and years ahead as our own experts find themselves unemployed. And we care about them, just like the Russian people cared about their people. But we did not at that time reach out to help the Russians, and we are paying a price for that now.

It's important to look back at the end of the Cold War, and to recognize the mistakes that have been made, and it has become clear that there were many, many mistakes that were made, by the Russians, yes, but also by us and our European allies. Now, however, is not the time to just lay blame. I didn't relate that story to blame the Clinton administration or the Bush administration or anyone else. But realizing what that mistake was, we now should move forward to try to see what we can do to make up for that and to try to establish better relations. This is not the time to place blame. Now is the time to set things right.

And as President Obama has said and Secretary of State Clinton has said, this is time to push the reset button with the Russians. And I would add, probably, yes, let's push the reset button with Russia and, at the same time, we should think about pulling the plug on NATO. So let's look at the future. Let's take actions today that will overcome past mistakes and look to a future when Russia and America, which share common challenges and common enemies, will be a source of strength to each other.

We have, over the last decade, inexplicably drifted toward a renewed adversarial relationship. Let us now take a serious look at what happens and recognize Russia to be an invaluable potential ally, an alliance that would be far more significant and viable than our current NATO alliance, which costs us far more than what NATO member states contribute to the international security operations and other type of activities that are vital to our country. Reagan gave us 2 decades of peace and prosperity because he did the right thing. The consequences of our actions since Reagan, however,

are becoming more evident and more alarming each passing day.

We must have the wisdom, courage and political will to reconstruct our efforts rather than rely on diplomatic and military structures of the past. And let us note, Ronald Reagan did have the vision. I remember Ronald Reagan, I worked in the White House with Ronald Reagan. I remember him quite often making a stand on missile defense, which he believed in, but making it very clear to people that this wasn't something that should be seen by the Russians as a hostile move. Instead, he said that we should offer, if the Russians were willing to pull back their forces from their forward belligerent positions in Eastern Europe, that we should be willing to have missile defense as a joint project with the Russians. It would save us both money, and it would cover security for both of our countries.

Ronald Reagan believed in that. That was not rhetoric. That was something he thought we could do. Instead, what we have done is move forward with missile defense and put it on Russia's border, not as something in cooperation with the Russians, but instead, something that the Russians naturally view as a hostile act towards them. Now, this is not the way we should go. Ronald Reagan understood that. Ronald Reagan stood firm, but he stood firm with a dictatorship in Russia, not with a Russia that was longing to be part of the Western world as it is today, and at least as it was 10 years ago.

We are confronted today with enormous foreign policy challenges and tasked with prevailing over those forces which will, if they can, destroy America and our way of life and murder our countrymen on a massive scale in the process. 9/11 was only a taste of the potential mayhem radical Islamists can and are willing to commit. By the way, we lost 3,000 civilians on 9/11, 3,000 people slaughtered before our eyes. That wasn't the intent. The intent was to murder everybody in those buildings and perhaps in all of the nearby buildings, as the World Trade Center buildings were going to collapse into a busy New York.

Yes, this was a plot to kill tens of thousands of Americans, and we'd better realize that that is the type of evil force we are up against. The national security threats before us are real and did not materialize out of thin air. But contrary to the dominant paradigm of our era, our ongoing relationship with NATO, since the end of the Cold War, has not worked to our benefit, nor has it made peace, stability, or our Nation's security more likely. NATO has recently engaged in a number of operations around the world, from fighting the Taliban to combating pirates. But whether one views these missions as relatively successful or a failure, one

can hardly look at them and not realize that the cost of our continued involvement in NATO certainly outweighs the benefits.

In Afghanistan, the other 27 NATO countries sent a combined force of fewer than 5,000 troops, many in non-combatant positions. These 5,000 troops are there as part of a coalition. While a certain number of these fighters from our NATO partners are heroic, and we salute them and they are helpful, yes, and many of them do take risks, they are dwarfed in comparison to the number of American boots on the ground. 68,000 Americans serve in Afghanistan, and the number is rising. All of our allies in NATO: 5,000. And it has not escaped our attention that many of our NATO partners don't permit their troops to be placed where they might see combat.

So this contribution, while appreciated, in no way justifies the tens of billions of dollars that we pour into the NATO alliance. And now, as NATO expands to such countries as Albania, Croatia and Bulgaria, it raises other serious questions. One of the primary tenets of NATO and a NATO membership is that any member will come to the defense of another member if that member is being attacked. But realistically, is the United States going to come to the aid of these other countries at any time, these slew of small countries, each of whom might have a border dispute with another country? And, is the reverse proposition, the reverse of that proposition worth the cost to us? Do we really need Albania and Croatia to come to our aid if we're attacked?

The answer is obviously, no. NATO's existence may be unnecessary for our interests. Let's also admit that NATO can be counterproductive. It's counterproductive to the peace at times. For example, by convincing the governments of new or potential member countries to aggressively and uncompromisingly deal with territorial disputes, we must realize that those disputes won't be settled by diplomatic negotiation.

The government of Georgia is a perfect example. The United States' discussion about NATO with the government of Georgia made it less willing to make compromises that were absolutely necessary for peace and stability in that region. Not only did Georgia not make the compromises, these talks about NATO emboldened them to take aggressive action. Breaking a 7-year truce with its regional adversaries, the Georgians launched a brash, ill-conceived military attack on the two breakaway provinces of Abkhazia and Ossetia. The Georgians started it. They attacked first. All the while, the people of the United States were told over and over again, using the most sinister words, that Russia was the aggressor. It was the Russians' fault. We heard

that over and over again. "We are all Georgians today," Senator MCCAIN proclaimed.

Again and again we were told that Russia was doing something evil and villainous. However, in a detailed second look at what happened in Georgia, a recent NATO report confirmed that it was Georgian troops that broke the truce. It was the Georgian troops that started this fight and brought on the confrontation. The point is that the Georgian government was emboldened by talks with them about NATO.

□ 2145

They were the ones that broke the agreement that had kept the peace in that area after we talked to them about NATO. They invaded those two breakaway regions, which resulted in a considerable loss of life in Osetia and Abkhazia, and it also brought on a counterattack from Russia, who had made agreements to maintain the peace with the people of Osetia and Abkhazia. And the counterattack that was what? A reaction to the Georgian invasion. NATO's role was counter-productive, clearly.

Furthermore, do we believe that the American military forces should have been involved in that distant conflict? Should they have been involved as part of a NATO commitment to Georgia? My goodness, that doesn't make any sense to me. That's all the way across the world. Yes, it's in Russia's backyard so you know that they would be very involved and interested. But the United States is going to engage in a military confrontation with a power like Russia over a dispute, territorial dispute, between Georgia and some regional governments that don't want to be part of Georgia?

By the way, the people of Georgia, I think they didn't have to be part of the Russian federation. I sympathize with their demand after the end of the Cold War to be an independent country. They have a right to self-determination. But so do the people of Abkhazia and Osetia. These two peoples had never been part of Georgia. Joseph Stalin, in his dictatorship, put them as part of Georgia.

Well, does it make sense for us to use our armed might in an agreement with the Georgian Government to make sure that we enforce their vision of what the world should look like?

It doesn't make sense also to sour a relationship with Russia, which is a country concerned, just as we would be in Mexico or Central America or in Canada. It doesn't make any sense to sour a relationship with Russia by implementing a NATO alliance with little countries all around it. In contrast, treating Russia as a friend would be enormously valuable to the security of both of our countries.

By expanding NATO with tiny countries and, of course, we are; these are

countries that are right around Russia. How can that not look like we have a military alliance, which is what NATO is, threatening Russia? Of course, we would think same way.

Instead of an alliance with Russia, we are seeking an alliance with weaklings and Lilliputians rather than forging a strategic relationship with a giant. So if Georgia and the other countries like Albania and Croatia, countries that I'm very sympathetic with—and, as I say, I'm sympathetic with Georgia. I want it to be independent of Russia because that's what they want. But if they want to be in NATO, let's let them in. But if they're getting into NATO, we should be getting out. Because it is not in our interest to commit our military forces to battle all over the world in disputes that have nothing to do with our security or the overall global stability of the world.

I'm not suggesting, however, isolationism. That's what people say: oh, well, you're an isolationist. Nowhere am I suggesting that we should not have bilateral defense-related agreements. I certainly believe in involvement and in bilateral defense agreements as well as bilateral trade agreements.

At the outset of the Cold War we saw a clear and present threat in the Soviet Union, and we went to work strengthening our existing relationships with friendly countries and building new relationships with other countries. Well, we should do that today. We should create alliances, but we need to be realistic and honest in our assessment of the challenges we face and the factors that are in play.

There are serious challenges to be overcome in the world today, and even more serious threats in the future. Radical Islam today, China soon. What we built to deter a Soviet invasion of Western Europe will not meet our needs of today. And I suggest that structure is, in many ways, counter-productive in dealing with today's threats.

In short, an alliance with Russia and a few other powerful nations is in our interest more than a continuance of an obsolete coalition or expanding that coalition to a large number of small countries.

Twenty years ago, I journeyed to Afghanistan. I stood alongside Afghan warriors, the mujahadeen, who were engaged in battle against the Soviet Army, which was then occupying their country. I was personally engaged in combat operations against Soviet troops during the Cold War. Very few people can say that.

My chest swelled with pride every time Ronald Reagan proclaimed our goal to be freedom for all subjugated people, including the Russian people. I was Ronald Reagan's speech writer, one of them, for 7 years. And when the

President of the United States, Ronald Reagan, pleaded with Gorbachev to tear down the Wall, I was part of the team that broke through the foreign policy establishment's blockade that would have neutered that great historic statement even before Ronald Reagan gave it. And I cried with joy in retrospect when that wall finally came crashing down, hammered and chiseled down by freedom-loving people on both sides of that grotesquely evil barrier.

I despised the Soviet Union because I loved freedom, freedom for all people, including the Russian people. The Communist government in Russia was our worst enemy. Times have changed. We need the Russians as trusted allies, if not our best friends.

I recently visited Russia, and over dinner with a counterpart I explained, as I just did, that I had been his worst enemy during the Cold War, and he stopped me right in the middle of the sentence. No, no, you weren't the Russian people's worst enemy. You were the enemy of Communist tyranny. And thank God for that. That's what he said.

There are many Russians today that fully understand that they have left Communist tyranny behind, but when they look around them and look forward, they see hostility and they hear Russia vilified for acts of natural self-interest. How many times have we heard Russia vilified for charging the market price for its resources, namely, natural gas? Over and over again, as if charging the world price instead of subsidizing the price for the countries around it was a hostile act.

Would we be expected, our country be expected, to charge well below the market price to other countries for our natural resources? Over and over again, Russia was described as committing a hostile act when it did that. And after all the reform, all the military and strategic withdrawals, that hasn't made any difference to us that Russia has done this.

We have kept them isolated and we have magnified every shortcoming that we could find in the new Russian Government. And all governments have shortcomings. Look, Turkey has human rights and democracy problems on par with Russia. In terms of the actual level of human rights problems, Turkey and Russia are probably at about the same level.

Yes, we should stay vigilant in our insistence on an accounting and correction of violation of human rights. And that's whether it's Russia or Turkey or any other country. But does anyone really want us to treat Turkey as a hostile power, try to make them into an enemy just because they do have imperfections? And are there some examples of heavy-handed use of power and some really questionable incidents there in Turkey? Well, yes, there are.

That doesn't mean we're going to turn them into our enemy and vilify

everything they do. The Turkish people are wonderful people. They've been our friends for so long. But so are the Russians. The Russians are wonderful and creative people. They share many personal values with us: their sense of humor, love of children, of fun, of drink, and dance and, yes, their reverence for God and faith that was never beaten out of them by the decades that they suffered under atheistic communism.

There was openness and vulnerability of these people as the Soviet Communist system collapsed. They made mistakes and had societal and governmental problems, no doubt about it. All of those mistakes and all of these problems weren't all corrected. They needed support. They were vulnerable. And even as we applauded the implosion of the Communist Government, we did not do what was right by the Russian people. Even as they chaotically implemented massive changes and reforms, they were forced to, for example, forced to pay off the debt that was built up during the Communist dictatorship.

What country could develop with that huge millstone around their neck? In fact, how ironic it was. We went to the Russians and asked them to forgive the debt of Iraq that Saddam Hussein had run up when that dictatorship controlled Iraq. How ironic we went to the Russians to ask them to do what we had pressured policy not to permit them to do.

With that millstone around their neck of that debt, no wonder there was economic chaos. How could they have pulled together and averted such mass suffering with having to pay the entire debt of a dictatorship they did not vote for?

In the years since, we have been growing apart from Russia, into hostile camps, even though our cooperation is paramount to the future of both of our countries. As I say, the Russians and the Americans share more than cultural traits. We now share some very real common threats. And those are radical Islam, which is upon us, and a totalitarian China, which is rapidly becoming a negative and tremendously powerful force in the world.

As we have continued to treat Russia as unworthy and with suspicion—even as they have reformed, we have done this—how is it that we have treated China, which has had no political reform, no liberalization, with such generosity?

The totalitarian Government of China is the world's worst human rights abuser. Those Chinese Communists in power in Beijing see us as their natural enemy. They unmistakably are also a threat to Russia. Yet, we still embrace that Chinese Government, the world's worst human rights abuser.

We fueled their economy, the Chinese economy. We have built their manufac-

turing base. We have enhanced their technological capabilities, even while simultaneously finding ways to continue hostility and noncooperation with Russia with one-way free trade policies with China and credits and investment in technology transfers. We have run up a massive trade deficit with China. A trillion dollars has shifted from the American economy into Chinese coffers, and all this while there hasn't been one opportunity for us to even get done the smallest bit of reform with our economic relationship with Russia. We weren't even able to bring ourselves to officially end the Jackson-Vanik restrictions which were placed on Russia during the Cold War—the Cold War, 30 or 40 years ago.

It is an insult and a sign of our own incompetence that we have not been able to lift the Jackson-Vanik restrictions on Russia, much less giving a reformed Russia a free trade agreement or Most Favored Nation status, which we bestowed upon the world's worst human rights abuser, China. Again, restrictions and hostility on Russia, all of this while we give China every benefit: Most Favored Nation status, tech transfers, capital investments.

Well, this relationship with Russia, as well as our relationship with China, has been wrongheaded, and gravely so. China, in stark contrast to the great changes in Russia, where there's been very visible political reform, where religion is not suppressed, where there are opposition political parties.

And, yes, there are imperfections in Russia and shortcomings and some heavy-handedness. But you go there and you hear talk radio shows complaining about the leadership in Russia. In Russia, you have opposition parties. There were two elections. And even the most critical of people who criticize Russia concede that those two major elections represented the inclination of the Russian people. Others were on the ballot, but they weren't elected. They lost.

□ 2200

Well, there has been reform in Russia. And although it's far from perfect, great progress has been made, and it is evident. Otherwise, I would not suggest drawing closer to that country. There has been reform. That gives us a reason to try to work closer with them rather than holding them off.

But remember, while we hold them off and we treat them in a hostile way, there has been no political liberalization at all in China. We've let them profit from one-way free trade that has drained our financial resources and destroyed our manufacturing base even as we built their manufacturing base.

When President Obama spoke here a short time ago, he noted as of late, we've been losing 750,000 jobs a month. We've been losing 750,000 jobs a month, millions of jobs have been lost, and

where did they go? They went to China, which is perfectly understandable when you look at our policies which created that type of outflow of capital and jobs as a small corporate elite—yeah, a very small corporate elite—benefited from this China trade and how it was structured.

But the American people lost, and it's going to get worse. Remember who has been paying for months and years now the price for the crazy policies that were not in the interest of our people in China. How did that come about? I've been in Congress now for 20 years. I was very proud to have led the floor fight with NANCY PELOSI on the other side of the aisle with me, leading the floor fight on that side of the aisle to oppose most favored nation status for China. Look back, find out who was behind most favored nation status for China. Who was it? It was during the Clinton administration that provided China should have permanent most favored nation status, so we didn't even get a chance to vote on it every year.

Now, it was a bipartisan betrayal of American interests here. Who was watching out for the American people? Instead, we established a trading system with China. I can tell you how it works. I represent the Ports of Los Angeles and Long Beach. You go right down there, and you can see it. Of all the containers, the massive numbers of containers that come in every day, tens of thousands, 90 percent are coming in and only 10 percent are going out, and almost all the ones coming in are coming from China.

Well, China is not an economic partner. It's exploited us. It's taken advantage of our weaknesses. It's not a partner for peace nor is it a partner for world stability. China has no reform and has not made reform of its political structure, and it is, unfortunately, our most likely future enemy. Those words are very hard for me to say. They are not our enemy now. They are our adversary. But it is clear that unless there is a significant political reform in China, a liberalization of their system, a recognition of fundamental rights, the dictatorship will continue in power and grow stronger.

America's most likely future enemy we treat with special privileges. The Russians we treat like a pariah, even as they reach out to us even after they have had incredible reforms and restructuring in their country. China is already a deadly economic competitor of our people and is openly hostile to the basic values which make us Americans: a respect for human rights, religious freedom, the environmental stewardship that we have taken upon ourselves in recent years.

Our current relationship with China has resulted in an economic and security disaster for the United States of America. It is time to have the courage to admit this fact, and it is time to reverse poor decisions and bad policies. If

the policies that have led us to this point are not reversed, the result will be national and, yes, global catastrophe. A world dominated by an authoritarian-controlled China will be a far different world than the one we live in today.

Again, we are talking about the Government of China, a specific regime, not the Chinese people themselves. The Chinese people are hardworking, family-oriented people. I have tremendous sympathy and respect for them. They are, in fact, freedom's greatest ally, our greatest hope, potentially our greatest friends who can help us avert a conflict between our countries.

The Chinese Government, however, is a loathsome tyranny, a dictatorship, a dictatorial clique that has enslaved their own population, intent not just in controlling China but also in dominating the rest of the planet. It is a government that, as I speak, is shooting down Muslim Uyghurs in East Turkistan, which is in the far regions of western provinces of China. Similarly, they are conducting a slow motion genocide on the people of Tibet. It's a government that arrests and murders Falun Gong religious practitioners.

And who are they? Who are the Falun Gong? Pay attention, America. Who are the Falun Gong? The Falun Gong want nothing more than religious freedom that they hold so dear. They are pacifists. What do they believe in? They believe in yoga and meditation. Yet thousands of them have been picked up by the Chinese Communist dictatorship and thrown into prisons, and oftentimes, they never come out of those prisons. And too often we find that what is coming out of those prisons—the prisons where the Falun Gong members have been deposited—what do we see coming out of those prisons? Body parts. Body parts sold to Americans and other people as organs to be transplanted; kidneys and other organs of the body that have been extracted from people who are put in jail for their religious convictions, and then they were murdered. That is the type of ghoulish regime that now controls the country of China and the Chinese people.

In China, there are no unions, no workers' rights, no democratically elected environmental standards. There are no concerns about human rights or consideration for the inherent dignity of all humankind. There is no liberty, no independent judiciary, no freedom of the press, no rule of law, no opposition parties, no right to criticize the nature of their government or to criticize the clique that rules their country.

A billion people are being held in bondage so that goods can be manufactured cheaply in China in an unholy relationship between very wealthy American and western capitalists and the

ghoulish dictators that control China. And with one-way free trade that we've established, to which we have acquiesced, and the short-term profit desired by America's corporate elite, our country has been a partner.

Considering those factors, our country has been a factor in building the Chinese economy into a monstrous threat while at the same time weakening and destroying our own manufacturing base. Millions of our people are being put out of work. We're going through a huge financial crisis.

One of the major elements that has brought us to this financial crisis has been a one-way free trade policy with Communist China. The fact that they now have \$1 trillion worth of our wealth and our manufacturing base has been destroyed should be of no surprise. It was predictable.

Those of us who fought most favored nation status and said we've got to have some political reform, liberalization before we give such enormous economic power to a government, we were just bypassed and treated as if we didn't matter because the business elite of our country wanted to have those massive short-term profits. Then they could give themselves bonuses, and they could retire here, leaving the stockholders and leaving their own employees far worse off in an intolerable situation, and now the whole country is in a horrible situation.

Over the last two decades, we have built China from a relatively backwards economy into a Frankenstein monster. When I say "we," I mean the policies of the United States Government have lifted the economic capabilities of a country that has had no political liberalization, no political reform of their dictatorial system, and a country, yes, that is also engaged in rebuilding its military.

Now this Frankenstein monster is slowly turning on its creator, turning on us. Well, there is a China-related issue that is emerging. Not all bad decisions were made in the past. We're about to make another bad decision by reversing one of the good decisions that we made that has really saved us from an incredible potential harm. The issue that is surfacing in Washington is both symbolic and a very real threat to America's security and our economic viability. What is the issue? It is whether or not America should loosen its controls on the exports of our technology. The issue, which will be determined shortly, deals specifically with U.S. space technology, satellites, and Chinese rocketry.

About 15 years ago, the Clinton administration and American satellite manufacturers were permitted to launch their satellites on Chinese rockets. It was a position that they hadn't been permitted before. At the time, I talked to our aerospace industry. They thought it might be a good idea. This,

of course, after being assured by the Clinton administration there would be no possibility of a technology transfer. Controls and security walls, I was promised, would prevent the Chinese from obtaining any space technology that had been paid for by the American taxpayers. Of course, American taxpayers had paid billions of dollars to develop space technology, like gyroscopes on a chip and all kinds of things that permitted rockets to be successful.

□ 2210

Well, I have to admit I accepted the Clinton administration's word. I swallowed it hook, line, and sinker. But within a very short period of time after that policy was opened up, I recognized the horrendous results of permitting that business relationship with Chinese rocket companies, which, I might add, those Chinese rocket companies then and are now owned by the People's Liberation Army. The Long March Rocket Company is a People's Liberation Army company. In short, American aerospace companies ended up perfecting Chinese rockets in order to send up our satellites at a cheaper rate.

By the way, what's the difference between a missile and a rocket? The difference between a missile and a rocket is the color of the paint on the outside of the projectile. So if it's in camouflage, it must be a missile, and if it's white or a different color, it must be a peaceful rocket.

In the end, after we were launching our satellites at that cheaper rate, in the end the viability of our own missile and rocket industry was undermined. Our own aerospace base, the base of our economy, our aerospace jobs and expertise were put in jeopardy. And at the same time we improved the Chinese rockets and missiles, we improved their ability to launch military as well as civilian payloads. Our transfer of technology and know-how thus enabled the People's Liberation Army rockets to carry more than one nuclear warhead. They couldn't do that before. Our technology. Our people went over there, and now they have the technology of having three warheads instead of one warhead, which means obliterating all of southern California instead of one part of southern California. We provided them the ability to MERVE. That's what it's called.

It was insane then, but now the issue is coming back. And without even blushing, the China lobby, the Big Business community that has been making all kinds of money off the China trade even as it has hurt our own economy, are pushing for us to open up the China rocket industry again.

To make this clear, I am part of the team that is trying to move forward legislation to permit our high-tech industries to export to and to cooperate with friendly democratic countries. I

believe in free trade between free people. But I have personally insisted on legislation opening up that free trade with free countries, and we have worked with other Members of Congress to ensure that this tech trade legislation will not loosen the restrictions on using Chinese rockets to launch American satellites. We know that launching American satellites on Chinese rockets will result in technology transfer and the upgrading of those Chinese rockets. It happened before; it will happen again. If we open up to the use of Chinese rockets, it helps them and it hurts us.

What will it do to our aerospace industry, like Boeing and Northrop Grumman, who are already hard pressed in the production of their own rockets and missiles? How about SeaLaunch, a Boeing partnership with the Ukraine which launches things into space from a floating platform which is based in southern California?

Well, it recently declared bankruptcy, but if we allow the Chinese to undercut everybody's price, it will be permanently out of business. It will be permanently out of business, of course, if the People's Liberation Army is permitted to sell rocket launchers on the cheap until all of our companies go bankrupt. Space X and other entrepreneurial U.S. space transportation companies that have invested hundreds of millions of dollars of private capital in creating a private U.S. launch industry will be mortally wounded if we permit the Chinese to come in with their subsidized system and their controlled economy and undercut the price until our guys go out of business. And then, of course, they'll be in complete control of what gets into space.

The whole debate on this issue and the maneuvering on Capitol Hill reflects an insidious manipulation of our system by a foreign power and, yes, the total absence of any type of moral consideration or patriotic consideration on the part of America's financial and corporate elite. They have had one-way free trade and a multitude of economic building concessions, and it has been American policy to give it to them.

Over the years we have been told over and over again to justify such a power that we were giving this monstrous regime, and we were saying, if we just get involved with them, let's get more involved with these people, let's uplift the economy of the Chinese people, and their government will come around. By making their country more profitable and making sure their country is more prosperous, we will actually bring forces about that will liberalize that country. That's what we were told all this time. And has that happened? There has been no liberalization in China.

I call this theory that's been foisted upon us by America's economic elite, which are making profit from that

thuggery and that dictatorship and the control of the Chinese people—yes, those people gave us that ideal, that if we just keep going, keep making China more prosperous, they will come around and become more peaceful—I call that the “Hug a Nazi, Make a Liberal” theory, and obviously it has not worked.

So why have we had this bad policy? I would draw the people's attention to this. They are unapologetically trying to implement the same policy that failed 15 years ago, the same policy that was a tremendous detriment not only to our economy and to our high-tech industry but to the security of our country. These same forces now are trying to make sure that the legislation going through Congress takes out the language that I and other congressmen have put in it to make sure that we do not loosen the restrictions that we have on American satellites being used in Chinese rockets for launch.

By the way, what we see in Washington today is perhaps, as I say, some of the most insidious examples of some of our own weaknesses. What we've got here is tens of millions of dollars being pumped in by China and some very elite financial interests in our country to lobby Congress to try to change the rules of the game so that what was so severely damaging to us 15 years ago, as we improved Chinese rockets, which are now capable of launching nuclear weapons into our cities, because of what we did for them, they want to go back to those policies which nobody can deny will most likely result in even more improving the Chinese rocket system and the destruction of America's own homegrown rocket and missile industry.

Yet our corporate elites have enormous influence on policy. They have hired the best lobbyists in town, former Members of Congress, former Members of the Senate, people who have been inside and outside of government. These people have signed on. One Senator who was high up in the committees overseeing the Department of Defense, overseeing the security of our country, who opposed permitting Chinese rockets to launch American satellites over the years, now has been hired by the Chinese. To do what? To make sure that the rules and the regulations restricting that are lifted so that they can accomplish what he was opposing.

It doesn't get any lower than that, does it? Americans willing to accept large financial gains for themselves even as they put the rest of us and their children's children in jeopardy.

Today this isn't going to be turned around unless we have the courage to make some very strong choices and tough choices. One is to make sure that we call those people to task that are willing to sell out the long-term interests of their country for the al-

mighty buck, and especially when that buck is coming from the world's worst human rights abuser.

□ 2220

And then finally we need the courage to walk away from the past and try to restructure our position in the world. We need to make friends and make sure that Russia is our friend because China and that radical Islam threaten both of us. There are other countries in the world that share our values and share this common threat: Russia, India—and how about Japan? Japan, which has been targeted by China, and they know they're targeted by China.

An alliance between the United States, Russia, India, and Japan would soon be joined by most of the other free countries of the world. This is a type of relationship that will bring about a more peaceful world.

And if we are going to succeed and our country is to be prosperous, if we're going to turn around this economic crisis, we have to have a long-run view, and we can't leave the decisionmaking of policies up to the financial elite in our country that only has short-term profit in mind. That is our biggest vulnerability, and the Chinese have played us like a fiddle. They know that the American corporate leaders have no loyalty to the long-term interests of the United States of America.

We must make the policy, and we cannot let China and this business elite manipulate these votes in the House of Representatives and the Senate of the United States so that policies are put in place that will not serve our interest.

We have not been diligent in the past, and that is why we are suffering today. We are suffering because of bad judgment, but also because the American people expected us to stand up and fight and we did not. We instead let these powerful interests run all over us.

And as I say, this is a bipartisan talk. I remember NANCY PELOSI here, and DANA ROHRBACHER here, I remember BARNEY FRANK there, and Chris Cox over here fighting Most Favored Nation Status for China, saying that we would regret the day when these economic policies come back and hurt our country, and they have come back and hurt us dramatically.

And they are now moving on our satellite and our rocket industry to make us even more vulnerable and to take away even those advantages, that technology advantage that we have.

Mr. Speaker, I would hope that the American people and my colleagues pay close attention to the overwhelmingly financed, heavily financed lobbying campaign that is going to try to change the rules that are now protecting our launch rocket and missile launch industries from being destroyed by cheap Chinese rockets that will in

the end destroy our industry. And only then when they have us at their mercy will we feel the repercussions of the decisions we're making and the repercussions of allowing the financial elite with short-term profit in mind to make the policies for the United States of America.

America, we are the only hope in the world. We must stand strong. Democracy works if we work at it. We must stand together, and this has been the way it has been for 250 years. There would be no hope for anyone in the world today or in the past 150 years who longed for freedom, who suffered under tyranny. They would have no hope except for the courage and conviction of the United States of America. We marched out and defeated Japanese militarism and communism. We fought the Nazis.

Well, since the end of the Cold War, we've made some very bad mistakes after the fall of communism. Let's look at our decisions. Let's have the courage to recognize some bad decisions, correct them; and let's create a new alliance in this world that will serve the interest of peace, prosperity, and freedom for our people and all the peoples of the world.

#### RESTORING JOB CREATION AND NATIONAL SECURITY

The SPEAKER pro tempore (Mr. FOSTER). Under the Speaker's announced policy of January 6, 2009, the gentleman from Washington (Mr. INSLEE) is recognized for 60 minutes.

Mr. INSLEE. Mr. Speaker, this evening I come to the floor to talk about a very important issue both to our efforts to restore job creation in America and to our national security, and that is the ongoing efforts to replace our air tankers in the U.S. Air Force fleet, which are so vital to our national security, that form the backbone of our Air Force fleet, and everyone knows that our military security depends on our dominant Air Force, air cover for operations. And the ability to have that depends on having a very robust air tanker fleet to provide fuel for our jets in the air.

We now obviously need a new tanker because we relied upon the KC-135 now for decades, and they are now reaching the end of their work life, and we need to replace them for air tankers. But, Mr. Speaker, we have a real problem right now in that the proposal on how to do that is seriously unfair to American workers and seriously jeopardizes our national security interest in maintaining a very strong industrial base to be able to manufacture these aircraft.

What has happened to date is that the U.S. Air Force in its third effort to replace these air tankers with a contract has issued a request asking for proposals to provide air tankers to the Air Force. And two bidders have ex-

pressed an interest. The Boeing consortium domestic company and the Airbus consortium, a largely European content product, are proposed bidders on this contract. There will be rigorous bidding, and there is a very extensive set of rules that the Air Force has set forth on how to run that bidding process so that we can select the most efficient, most effective, and most cost-effective aircraft for the Air Force.

But we are very concerned for two reasons about the current status of that proposal: one, this existing proposal, as the Air Force has proposed to handle the bidding, is extremely unfair to the United States worker and extremely unfair to the United States taxpayer and extremely prejudicial to the United States economy because at the moment, the Air Force has proposed to ignore clearly illegal subsidies that one of the bidders, the Airbus, largely European bidder, has received from the European Union because it is a clear fact that against clear treaties that we have and laws that we have to regulate fair trade, Airbus bidder has received billions of dollars in illegal launch aids. These are subsidies given to the company by the European Union. It is not available to Boeing; it is not available to domestic manufacturers.

Now, this is uncontested. There is no question but that the Airbus Company has received the subsidies. It is called launch aid, and launch aid is, as it would suggest, it is a clear, unbridled, clear on its face subsidy of cash essentially guaranteed by the European government to the Airbus Company.

Now, the problem with that is those subsidies are illegal under our trade agreements. They're illegal because we need trade agreements to allow our economies to act efficiently, which don't happen when their illegal subsidies and these illegal subsidies are against our mutual trade rules.

Nonetheless, the Airbus Company took them. They launched an airframe, the Airbus 330, which is the airframe that is now being suggested for this proposal by the Airbus Company.

And in the bidding process by the Air Force, the Air Force intends at the moment, unless something changes, to ignore these illegal subsidies, to not pay any attention to it whatsoever, to blind their eyes and just act as if these illegal subsidies had never happened.

Now, this is very surprising because the extent and existence of these subsidies are so well known. In fact, there is a preliminary ruling by the World Trade Organization—this is the arbitrary, the referee, if you will, of trade issues—a preliminary ruling that there has been a violation in the billions of dollars—and some have suggested an excess of \$5 billion of illegal launch aid—to the Airbus consortium, or the Airbus Company, to launch this particular air tanker. And that ruling

could be subject to appeal, but the facts are quite obvious. It's not like there's any mystery that we need fingerprints. The fingerprints are clear.

The European Union governments essentially guaranteed billions of dollars to Airbus, and this contravenes our treaties, and there's been a preliminary finding in that regard.

□ 2230

Nonetheless, the Air Force has proposed to go forward and to ignore this clear fact. This simply will not stand and cannot stand, to ignore this clear violation, for a variety of reasons.

Number one, it clearly violates our international treaties and rights that we have and the law that has now been incorporated into our American domestic law.

Number two, it is hugely damaging to our ability to try to start growing jobs again in this country. All of us know the pain that our fellow Americans are suffering tonight in unemployment. We know how desperate people are in unemployment lines tonight. While we have millions of people unemployed, we can't have one agency of the Federal Government, which is our United States Trade Representative, conclude that Airbus has received illegal subsidies and sued to enforce sanctions against these illegal subsidies, and another agency of the Federal Government, the U.S. Air Force, turn around and give a contract worth billions of dollars for tankers for the next several decades to ship jobs to Europe by the thousands. And it would be in the thousands that would be lost if, in fact, this contract is lost.

So we find it, frankly, incredible that the Federal Government at this moment could contemplate running a procurement process that would ignore the obvious, which is there have been subsidies that have skewed the playing field. We have suggested that this is not only bad for our economy and not only takes jobs away from hard-working Americans, a couple of thousand of whom work in Washington and probably 6,000 of whom work across the country, but it hurts our national security because we have a national security interest in having a strong military infrastructure and ability to produce airplanes.

When we send our ability to produce airplanes over to Europe, our intellectual capital, our engineering ability, our machinists, our tooling, our transportation infrastructure, that is weakened. So for several reasons it is simply wrong for the U.S. Government to contemplate buying a significantly foreign airplane when these illegal subsidies have taken place.

Now we have the ability to make this right in a way that is consistent with our international treaty obligations. We want to follow the laws. We want to have a good relationship with our trading partners. We want to sell some of

our products to Europe and around the world, and that is why we don't just allow American bidders, exclusively American bidders, in this contract.

But what we expect is that the rules will be followed and fairness will prevail in this multibillion dollar issue, and right now it is not. So we have the ability and, I believe, the obligation to change this procurement formula so that we take into consideration this massive illegality.

And the way we have suggested of doing it is, rather than to ignore these clearly illegal subsidies, is to take account of these clearly illegal subsidies and adjust the bids of one of the bidders to reflect that illegal subsidy. Frankly, what we should do is use the most astute, the fairest, the most well-respected manner of determining the amount of these illegal subsidies and add it on, adjust it on to the bid of the Airbus consortium, and then consider the bids and let the chips fall where they may.

We have a way actually to do this. We have a process in this country called the countervailing tariff system that operates through the Department of Commerce, and we have a group whose job it is to go out when there is an illegal subsidy and figure out how much that illegal subsidy was.

So we need to get the Department of Commerce to crank up that system, run the process through, adjudicate what that illegal subsidy was, and add that amount to the bid of the Airbus consortium, broken down per plane of the amount those illegal subsidies held.

Now if we do this, we will be fair to the American worker. We will be fair to our need to maintain a national infrastructure. We will be fair to our trading partners, because it is in our treaty rights to act because this is a national security matter. And we will be fair because, frankly, it is consistent with at least a preliminary ruling out of the World Trade Organization.

So given all of these facts, that we have the ability to act because it is in our national security interest under the exemption of the World Trade Organization, given that it is in our ability to act because fixed wing aircraft are actually exempt from the procurement agreements we have with the European Union and other countries, given those facts, we are calling upon a fair bidding process which will take into consideration both bidders, but adjusting the price of one of them to take into account the clear, obviously inarguable fact that subsidies have been received by the Airbus consortium and we will not and should not yield on this point. Too much is at stake. Too many jobs are at stake and too obvious a violation of trade laws have occurred.

We have expressed this to the good people at the Air Force. We hope that they are considering it. We will be call-

ing on the President to act in this regard. It is the right thing to do and we are fully capable of doing it, and we should make sure that it is part of this process.

So I would close, Mr. Speaker, by saying that we will be working—and by the way, we want to compliment the Air Force personnel who have been working diligently. We have tried to run a bidding process twice. They now have worked and made very significant improvements in the bidding process to make sure both bidders can understand what the rules are. But we think this issue of a subsidy needs an improvement in the process.

There are some other things that we need improvement in the process to take into consideration the true value and price of gasoline because we need to figure that in when we make that procurement, and right now the Air Force, frankly, hasn't, I don't think, looked at the real price of gasoline going forward.

But with these improvements, we look forward to an honest, fair, and robust bidding process. Let the best bidder win. We believe it will be a Boeing product. It is good for America and it is good for the world to follow these rules.

#### LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. NEUGEBAUER (at the request of Mr. BOEHNER) for today on account of medical reasons.

Mr. CRENSHAW (at the request of Mr. BOEHNER) for today before 2 p.m. on account of a family medical emergency.

#### SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Ms. CHU) to revise and extend their remarks and include extraneous material:)

Ms. SUTTON, for 5 minutes, today.

Ms. WOOLSEY, for 5 minutes, today.

Ms. KAPTUR, for 5 minutes, today.

Mr. DEFAZIO, for 5 minutes, today.

Mr. GRAYSON, for 5 minutes, today.

Ms. CHU, for 5 minutes, today.

Mr. LANGEVIN, for 5 minutes, today.

(The following Members (at the request of Mr. DANIEL E. LUNGREN of California) to revise and extend their remarks and include extraneous material:)

Mr. POE of Texas, for 5 minutes, October 14.

Mr. POSEY, for 5 minutes, October 8.

Mr. JONES, for 5 minutes, October 14.

Mr. DEAL of Georgia, for 5 minutes, today.

Mr. MORAN of Kansas, for 5 minutes, today and October 14.

Mr. INGLIS, for 5 minutes, today.

Ms. FOXX, for 5 minutes, today.

Mr. PENCE, for 5 minutes, October 8.

Mr. BISHOP of Utah, for 5 minutes, today.

Mr. GARRETT of New Jersey, for 5 minutes, today.

Mr. INGLIS, for 5 minutes, October 13.

(The following Member (at his request) to revise and extend his remarks and include extraneous material:)

Mr. PAULSEN, for 5 minutes, today.

#### SENATE CONCURRENT RESOLUTION REFERRED

A concurrent resolution of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S. Con. Res. 45. Concurrent resolution encouraging the Government of Iran to allow Joshua Fattal, Shane Bauer, and Sarah Shourd to reunite with their families in the United States as soon as possible; to the Committee on Foreign Affairs.

#### BILLS PRESENTED TO THE PRESIDENT

Lorraine C. Miller, Clerk of the House reports that on October 7, 2009 she presented to the President of the United States, for his approval, the following bills.

H.R. 3663. To amend title XVIII of the Social Security Act to delay the date on which the accreditation requirement under the Medicare Program applies to suppliers of durable medical equipment that are pharmacies.

H.R. 2498. To designate the Federal building located at 844 North Rush Street in Chicago, Illinois, as the "William O. Lipinski Federal Building."

H.R. 2913. To designate the United States courthouse located at 301 Simonton Street in Key West, Florida, as the "Sidney M. Aronovitz United States Courthouse."

H.R. 2053. To designate the United States courthouse located at 525 Magoffin Avenue in El Paso, Texas, as the "Albert Armendariz, Sr., United States Courthouse."

H.R. 2121. To authorize the Administrator of General Services to convey a parcel of real property in Galveston, Texas, to the Galveston Historical Foundation.

H.R. 1687. To designate the federally occupied building located at McKinley Avenue and Third Street, SW., Canton, Ohio, as the "Ralph Regula Federal Building and United States Courthouse."

#### ADJOURNMENT

Mr. INSLEE. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 10 o'clock and 38 minutes p.m.), the House adjourned until tomorrow, Thursday, October 8, 2009, at 10 a.m.

#### EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

3992. A letter from the Director, Regulatory Review Group, Department of Agriculture, transmitting the Department's final "Major" rule — Livestock Forage Disaster Program and Emergency Assistance for Livestock, Honeybees, and Farm-Raised Fish; Supplemental Agricultural Disaster Assistance (RIN: 0560-AH94) received September 30, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Agriculture.

3993. A letter from the Director, Regulatory Management Agency, Environmental Protection Agency, transmitting the Agency's final rule — Thiamethoxam; Pesticide Tolerances [EPA-HQ-OPP-2008-0814; FRL-8436-5] received September 28, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Agriculture.

3994. A letter from the Director, Regulatory Management Division, Environmental Protection Agency, transmitting the Agency's final rule — Halosulfuron-methyl; Pesticide Tolerances [EPA-HQ-OPP-2009-0003; FRL-8436-7] received September 18, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Agriculture.

3995. A letter from the Director, Regulatory Management Division, Environmental Protection Agency, transmitting the Agency's final rule — Metolachlor, S-Metolachlor, Bifenazate, Buprofezin, and 2,4-D; Tolerance Actions [EPA-HQ-OPP-2009-0239; FRL-8438-9] received September 18, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Agriculture.

3996. A letter from the General Counsel, Department of the Defense, transmitting proposal for Congress to implement provisions of the Roadmap Agreement between the United States Government and the Government of Japan to establish a Special Purpose Entity to support utilities necessary for the realignment of approximately 8,000 Marine Corps personnel and their associated dependents from Okinawa to Guam; to the Committee on Armed Services.

3997. A letter from the Director, Regulatory Management Division, Environmental Protection Agency, transmitting the Agency's final rule — Approval and Promulgation of Air Quality Implementation Plans; Missouri; Update to Materials Incorporated by Reference [FRL 8952-8] received September 28, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

3998. A letter from the Director, Regulatory Management Division, Environmental Protection Agency, transmitting the Agency's final rule — Approval and Promulgation of Air Quality Implementation Plans; Revised Format for Materials Being Incorporated by Reference for New Hampshire [NH-041-7013a; A-1-FRL-8955-9] received September 28, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

3999. A letter from the Director, Regulatory Management Division, Environmental Protection Agency, transmitting the Agency's final "Major" rule — Mandatory Reporting of Greenhouse Gases [EPA-HQ-OAR-2008-0508; FRL-8963-5] (RIN: 2060-A079) received September 28, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

4000. A letter from the Director, Regulatory Management Division, Environmental Protection Agency, transmitting the Agency's final rule — Prevention of Significant Deterioration (PSD) and Nonattainment New Source Review (NSR): Reconsideration of Inclusion of Fugitive Emissions [EPA-HQ-OAR-2004-0014; FRL-8937-8] received September 28, 2009, pursuant to 5 U.S.C.

801(a)(1)(A); to the Committee on Energy and Commerce.

4001. A letter from the Director, Regulatory Management Division, Environmental Protection Agency, transmitting the Agency's final rule — Approval and Promulgation of Air Quality Implementation Plans; Indiana; Lead (Pb) Maintenance Plan Update for Marion County [EPA-R05-OAR-2009-0293; FRL-8961-6] received September 18, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

4002. A letter from the Director, Regulatory Management Division, Environmental Protection Agency, transmitting the Department's final rule — Approval and Promulgation of Implementation Plans; Revisions to the Alabama State Implementation Plan; Birmingham and Jackson County; Correction Notice [EPA-R04-OAR-2007-0359-200915(c); FRL-8960-1] received September 18, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

4003. A letter from the Director, Regulatory Management Agency, Environmental Protection Agency, transmitting the Agency's final rule — Implementation of the New Source Review (NSR) Program for Particulate Matter Less Than 2.5 Micrometers (PM<sub>2.5</sub>); Final Rule to Stay the Grandfathering Provision for PM<sub>2.5</sub> [EPA-HQ-OAR-2003-0062; FRL-8961-5] received September 18, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

4004. A letter from the Director, Regulatory Management Division, Environmental Protection Agency, transmitting the Agency's final rule — National Priorities List, Final Rule No. 47 [EPA-HQ-SFUND-2008-0547, EPA-HQ-SFUND-2009-0071, EPA-HQ-SFUND-2009-0074, EPA-HQ-SFUND-2009-0075, EPA-HQ-SFUND-2009-0068, EPA-HQ-SFUND-2009-0069, EPA-HQ-SFUND-2008-0579, EPA-HQ-SFUND-2009-0072, EPA-HQ-SFUND-2009-0064, EPA-HQ-SFUND-2009-0073, EPA-HQ-SFUND-1997-0009; FRL-8961-3] (RIN: 2050-AD75) received September 18, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

4005. A letter from the Director, Regulatory Management Division, Environmental Protection Agency, transmitting the Agency's final rule — Standard of Performance for New Stationary Sources and Emissions Guidelines for Existing Sources: Hospital/Medical/Infectious Waste Incinerators [EPA-HQ-OAR-2006-0534; FRL-8959-9] received September 18, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

4006. A letter from the Chairman, Federal Energy Regulatory Commission, transmitting the Commission's assessment of Demand Response and Advance Metering, pursuant to Section 1252 of the Energy Policy Act of 2005; to the Committee on Energy and Commerce.

4007. A letter from the Chairman, Federal Energy Regulatory Commission, transmitting the Commission's report describing the progress made in licensing and constructing the Alaska natural gas pipeline and describing any issue impeding that progress; to the Committee on Energy and Commerce.

4008. A letter from the Director, Defense Security Cooperation Agency, transmitting pursuant to Section 62(a) of the Arms Export Control Act (AECA), notification concerning the Department of the Army's proposed extension of a lease of defense articles to the Government of Canada (Transmittal No. 04-09); to the Committee on Foreign Affairs.

4009. A letter from the Director, Defense Security Cooperation Agency, transmitting

pursuant to Section 62(a) of the Arms Export Control Act (AECA), notification concerning the Department of the Army's proposed extension of a lease of defense articles to the Government of Canada (Transmittal No. 03-09); to the Committee on Foreign Affairs.

4010. A letter from the General Counsel, Department of Defense, transmitting a draft of proposed legislation to authorize the transfer of naval vessels by grant and by sale to certain foreign countries; to the Committee on Foreign Affairs.

4011. A letter from the Acting Assistant Secretary, Legislative Affairs, Department of State, transmitting the President's bi-monthly report on progress toward a negotiated solution of the Cyprus question covering the period June 1, 2009 through July 31, 2009, pursuant to Section 620C(c) of the Foreign Assistance Act of 1961, as amended and in accordance with Section 1(a)(6) of Executive Order 13313; to the Committee on Foreign Affairs.

4012. A letter from the Secretary, Department of the Treasury, transmitting as required by section 401(c) of the National Emergency Act, 50 U.S.C. 1641(c), and section 204(c) of the International Emergency Economic Powers Act, 50 U.S.C. 1703(c), section 505(c) of the International Security and Development Cooperation Act of 1985, 22 U.S.C. 2349aa-9(c), and pursuant to Executive Order 13313 of July 31, 2003, a six-month periodic report on the national emergency with respect to Iran that was declared in Executive Order 12957 of March 15, 1995; to the Committee on Foreign Affairs.

4013. A letter from the Secretary, Department of the Treasury, transmitting the semiannual report detailing payments made to Cuba as a result of the provision of telecommunications services pursuant to Department of the Treasury specific licenses as required by section 1705(e)(6) of the Cuban Democracy Act of 1992, as amended by Section 102(g) of the Cuban Liberty and Democratic Solidarity (LIBERTAD) Act of 1996, 22 U.S.C. 6004(e)(6), and pursuant to Executive Order 13313 of July 31, 2003; to the Committee on Foreign Affairs.

4014. A letter from the Director, International Cooperation, Office of the Under Secretary Department of Defense, transmitting Pursuant to Section 27(f) of the Arms Export Control Act and Section 1(f) of Executive Order 11958, Transmittal No. 11-09 informing of an intent to sign a Project Arrangement; to the Committee on Foreign Affairs.

4015. A letter from the District of Columbia Auditor, Office of the District of Columbia Auditor, transmitting copy of the report entitled "Letter Report: Responses to Questions Regarding the Ballpark Revenue Fund", pursuant to D.C. Code section 47-117(d); to the Committee on Oversight and Government Reform.

4016. A letter from the District of Columbia Auditor, Office of the District of Columbia Auditor, transmitting copy of the report entitled "Letter Report: Responses to Specific Questions Regarding the Department of Housing and Community Development's Home Purchase Assistance Program", pursuant to D.C. Code section 47-117(d); to the Committee on Oversight and Government Reform.

4017. A letter from the District of Columbia Auditor, Office of the District of Columbia Auditor, transmitting copy of the report entitled "Audit of Advisory Neighborhood Commission 8C for Fiscal Years 2007 Through 2009, as of March 31, 2009", pursuant to D.C. Code section 47-117(d); to the Committee on Oversight and Government Reform.

4018. A letter from the District of Columbia Auditor, Office of the District of Columbia Auditor, transmitting copy of the report entitled "Audit of Advisory Neighborhood Commission 7E for Fiscal Years 2007 Through 2009, as of March 31, 2009", pursuant to D.C. Code section 47-117(d); to the Committee on Oversight and Government Reform.

4019. A letter from the District of Columbia Auditor, Office of the District of Columbia Auditor, transmitting copy of the report entitled "Audit of Advisory Neighborhood Commission 8E for Fiscal Years 2007 Through 2009, as of March 31, 2009", pursuant to D.C. Code section 47-117(d); to the Committee on Oversight and Government Reform.

4020. A letter from the District of Columbia Auditor, Office of the District of Columbia Auditor, transmitting copy of the report entitled "Audit of Advisory Neighborhood Commission 2A for Fiscal Years 2007 Through 2009, as of March 31, 2009", pursuant to D.C. Code section 47-117(d); to the Committee on Oversight and Government Reform.

4021. A letter from the District of Columbia Auditor, Office of the District of Columbia Auditor, transmitting copy of the report entitled "Audit of Advisory Neighborhood Commission 3F for Fiscal Years 2007 Through 2009, as of March 31, 2009", pursuant to D.C. Code section 47-117(d); to the Committee on Oversight and Government Reform.

4022. A letter from the Director, Executive Office Of The President Office of National Drug Control Policy, transmitting final addendum to the Fiscal Year 2008 Performance Summary Report transmitted in April 2009, pursuant to Public Law 105-277, Div. C-Title VII, section 705(d); to the Committee on Oversight and Government Reform.

4023. A letter from the Chairman and CEO, Farm Credit Administration, transmitting in accordance with Pub. L. 105-270, the Federal Activities Inventory Reform Act of 1998 (FAIR Act), the Administration's inventory of commercial activities for calendar year 2009; to the Committee on Oversight and Government Reform.

4024. A letter from the Acting Senior Procurement Executive, General Services Administration, transmitting the Administration's final rule — Federal Acquisition Regulation; Federal Acquisition Circular 2005-36; Small Entity Compliance Guide [Docket FAR 2009-0002, Sequence 7] received August 25, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Oversight and Government Reform.

4025. A letter from the Acting Senior Procurement Executive, General Services Administration, transmitting the Administration's final rule — Federal Acquisition Regulation; FAR Case 2007-002, Cost Accounting Standards (CAS) Administration and Associated Federal Acquisition Regulation Clauses [FAC 2005-36; FAR Case 2007-002; Item IV; Docket 2008-0001, Sequence 22] received August 25, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Oversight and Government Reform.

4026. A letter from the Inspector General, Nuclear Regulatory Commission, transmitting the Commission's Fiscal Year 2008 Commercial and Inherently Governmental Activities Inventories the Commission's Fiscal Year 2009 Commercial and Inherently Governmental Activities Inventories, pursuant to Federal Activities Inventory Reform Act of 1988; to the Committee on Oversight and Government Reform.

4027. A letter from the Assistant Attorney General, Office of Legislative Affairs Department of Justice, transmitting the activities

of the Department of Justice regarding prison rape abatement for the preceding year, pursuant to 42 U.S.C. 15604 Public Law 108-79, section 5(b)(1); to the Committee on the Judiciary.

4028. A letter from the Assistant Attorney General, Office of Legislative Affairs Department of Justice, transmitting Prison Rape Elimination Act (PREA) Data Collection Activities, 2009, pursuant to Public Law 108-79, section 4(c)(1) (117 Stat. 977); to the Committee on the Judiciary.

4029. A letter from the Assistant Attorney General, Office of Legislative Affairs Department of Justice, transmitting the semi-annual report of the Attorney General concerning enforcement actions taken by the Department under the Lobbying Disclosure Act, Public Law 104-65, as amended by Public Law 110-81, codified at 2 U.S.C. Sec. 1605(b)(1) for the semi-annual period beginning on July 1, 2008, pursuant to 2 U.S.C. section 1605(b)(1); to the Committee on the Judiciary.

4030. A letter from the Chairman, National Transportation Safety Board, transmitting a copy of the National Transportation Safety Board's response to OMB's request for views on H.R. 3371, the "Airline Safety and Pilot Training Improvement Act of 2009"; to the Committee on Transportation and Infrastructure.

4031. A letter from the Acting Administrator, Transportation Security Administration Department of Homeland Security, transmitting the Administration's certification that the level of screening services and protection provided at 7 Montana airports will be equal to or greater than the level that would be provided at the airport by TSA Transportation Security Officers and that the screening company is owned and controlled by citizens of the United States, pursuant to 49 U.S.C. 44920(d); to the Committee on Homeland Security.

4032. A letter from the Director, Executive Office Of The President Office Of National Drug Control Policy, transmitting a response to GAO-09-339R Counterdrug Technology Assessment Center, pursuant to 31 U.S.C. 270; jointly to the Committees on Energy and Commerce and Oversight and Government Reform.

#### REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. SKELTON: Committee of Conference. Conference report on H.R. 2647. A bill to authorize appropriations for fiscal year 2010 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe military personnel strengths for such fiscal year, to provide special pays and allowances to certain members of the Armed Forces, expand concurrent receipt of military retirement and VA disability benefits to disabled military retirees, and for other purposes (Rept. 111-288). Ordered to be printed.

#### PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XII, public bills and resolutions of the following titles were introduced and severally referred, as follows:

By Mr. ISSA:

H.R. 3736. A bill to reform the Minerals Management Service by establishing it as an

independent Federal agency; to the Committee on Natural Resources.

By Mr. ELLSWORTH:

H.R. 3737. A bill to amend the Small Business Act to improve the Microloan Program, and for other purposes; to the Committee on Small Business.

By Mr. NYE:

H.R. 3738. A bill to amend the Small Business Investment Act of 1958 to establish a program for the Small Business Administration to provide financing to support early-stage small businesses in targeted industries, and for other purposes; to the Committee on Small Business.

By Mr. BUCHANAN:

H.R. 3739. A bill to amend title V of the Small Business Investment Act of 1958 to provide for improved long-term financing to small business concerns, and for other purposes; to the Committee on Small Business.

By Mr. LUETKEMEYER:

H.R. 3740. A bill to amend the Small Business Investment Act of 1958 with respect to small business investment companies, and for other purposes; to the Committee on Small Business.

By Mr. HOEKSTRA:

H.R. 3741. A bill to provide Federal matching funding for State insurance expenditures for high risk pools; to the Committee on Energy and Commerce.

By Mr. KILDEE:

H.R. 3742. A bill to amend the Act of June 18, 1934, to reaffirm the authority of the Secretary of the Interior to take land into trust for Indian tribes; to the Committee on Natural Resources.

By Mr. GRIFFITH:

H.R. 3743. A bill to amend the Small Business Act to improve the disaster relief programs of the Small Business Administration, and for other purposes; to the Committee on Small Business.

By Mr. ARCURI (for himself and Mr. LEE of New York):

H.R. 3744. A bill to amend the Immigration and Nationality Act to provide a special rule for the period of admission of H-2A non-immigrants employed as dairy workers and shepherders, and for other purposes; to the Committee on the Judiciary, and in addition to the Committee on Education and Labor, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Ms. BALDWIN:

H.R. 3745. A bill to amend the Communications Act of 1934 to provide for carriage and display of public, educational, and government channels in a manner consistent with commercial channels, and for other purposes; to the Committee on Energy and Commerce.

By Ms. BERKLEY (for herself and Ms. TITUS):

H.R. 3746. A bill to amend the Internal Revenue Code of 1986 to provide tax incentives for making homes more water-efficient, for building new water-efficient homes, for public water conservation, and for other purposes; to the Committee on Ways and Means.

By Ms. BERKLEY (for herself and Ms. TITUS):

H.R. 3747. A bill to promote water efficiency, conservation, and adaptation, and for other purposes; to the Committee on Energy and Commerce, and in addition to the Committees on Transportation and Infrastructure, and Natural Resources, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Ms. BERKLEY (for herself and Ms. TITUS):

## DELETIONS OF SPONSORS FROM PUBLIC BILLS AND RESOLUTIONS

Under clause 7 of rule XII, sponsors were deleted from public bills and resolutions as follows:

H. Res. 701: Mr. BOREN.

## EXTENSIONS OF REMARKS

## SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Meetings scheduled for Thursday, October 8, 2009 may be found in the Daily Digest of today's RECORD.

## MEETINGS SCHEDULED

## OCTOBER 9

9:30 a.m.  
Banking, Housing, and Urban Affairs  
Economic Policy Subcommittee  
To hold hearings to examine restoring credit to manufacturers.  
SD-538

## OCTOBER 14

10 a.m.  
Energy and Natural Resources  
To hold hearings to examine energy and related economic effects of global climate change legislation.  
SD-366  
Health, Education, Labor, and Pensions  
Business meeting to consider any pending nominations.  
SD-430  
Homeland Security and Governmental Affairs  
To hold hearings to examine the past, present, and future of policy czars.  
SD-342  
Judiciary  
To hold hearings to examine prohibiting price fixing and other anticompetitive conduct in the health insurance industry.  
SD-226  
Commission on Security and Cooperation in Europe  
To hold hearings to examine promoting tolerance and understanding in the Organization for Security and Coopera-

tion in Europe (OSCE) region, focusing on the role of the personal representatives.

SVC-208/209

2:30 p.m.  
Banking, Housing, and Urban Affairs  
Financial Institutions Subcommittee  
To hold hearings to examine the state of the banking industry.  
SD-538

Aging  
Homeland Security and Governmental Affairs

## HOUSE OF REPRESENTATIVES—Thursday, October 8, 2009

The House met at 10 a.m. and was called to order by the Speaker pro tempore (Mr. SERRANO).

### DESIGNATION OF THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, DC,  
October 8, 2009.

I hereby appoint the Honorable JOSÉ E. SERRANO to act as Speaker pro tempore on this day.

NANCY PELOSI,  
*Speaker of the House of Representatives.*

### PRAYER

Rev. Todd Jones, First Presbyterian Church, Nashville, Tennessee, offered the following prayer:

Eternal God, before Whom generations rise and pass away, we give thanks today for this Nation, "conceived in liberty and dedicated to the proposition that all men are created equal," that all bear some mark of the Divine image. So bless this body of legislators with wisdom and a passion "to do justice, to love kindness and to walk humbly with Thee."

Guide and direct their work, O Lord, that it may bring blessing and honor to this land and lead to an increase of freedom, a deepening of joy, and enrich the health and welfare of all her citizens. Grant that a large-hearted and clear-minded spirit may prevail and that our Nation's common good may be served and strengthened by the actions of this body.

Establish this Nation in righteousness, O God, and grant that we may be makers of peace, artisans of goodness, and keepers of the bright light of freedom.

We pray this in the name of the Living God, the Creator and Redeemer of all that is or ever shall be.

Amen.

### THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

### PLEDGE OF ALLEGIANCE

The SPEAKER pro tempore. Will the gentleman from Alabama (Mr. GRIF-

FITH) come forward and lead the House in the Pledge of Allegiance.

Mr. GRIFFITH led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

### MESSAGE FROM THE SENATE

A message from the Senate by Ms. Curtis, one of its clerks, announced that the Senate has passed with an amendment in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 1037. An act direct the Secretary of Veterans Affairs to conduct a five-year pilot project to test the feasibility and advisability of expanding the scope of certain qualifying work-study activities under title 38, United States Code.

The message also announced that the Senate has passed a bill of the following title in which the concurrence of the House is requested:

S. 942. An act to prevent abuse of Government charge cards.

### WELCOMING REV. TODD JONES, FIRST PRESBYTERIAN CHURCH, NASHVILLE, TENNESSEE

The SPEAKER pro tempore. Without objection, the gentleman from Tennessee, Congressman COOPER, is recognized for 1 minute.

There was no objection.

Mr. COOPER. Mr. Speaker, I would like to welcome to the Chamber today Rev. Dr. Todd Jones and his wife, Connie. Dr. Jones is the reverend at the First Presbyterian Church in Nashville, Tennessee. He has led that congregation since 2002. He is a native of Pennsylvania who was educated at the University of Pittsburgh and went on to get his degree from Princeton Theological Seminary. After that, he did a 1-year fellowship in Scotland at the University of Edinburgh.

He first pastored at churches in South Carolina, where he had attended Presbyterian College. We feel very graced to have his presence in Nashville, Tennessee. He does a superb job, and he is very active in the community.

For example, he is on the board of the Boy Scouts as well as Goodwill Industries. So we are very thankful for his leading this body in prayer today.

### ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The Chair will entertain up to five further requests for 1-minute speeches on each side of the aisle.

### MISSILE DEFENSE DECISIONS

(Mr. GRIFFITH asked and was given permission to address the House for 1 minute.)

Mr. GRIFFITH. Mr. Speaker, I rise today to address the American people about the current situation in the Middle East. On September 28, Iran launched and tested a Shahab-3 missile which has a range of 1,200 kilometers and puts American soldiers and our allies in the Middle East in danger. These tests must be met with stern opposition.

Having recently returned from Israel and Egypt, I had the opportunity to meet with officials and members of the defense community who are directly involved in their missile defense decisions. I was able to see firsthand the stability and security that American missile systems provide for our allies. Recently, the administration announced a change of plans, eliminating missile silos in Poland and radar in the Czech Republic, which raised concerns both in our missile defense community and among our international allies. Clearly this logic must be questioned as a successful launch of the long-range Shahab-3 missile shows that we must protect our allies in the region and, most importantly, the eastern United States.

These Iranian tests demonstrate a need for ground-based interceptors, if not on Poland, then on the eastern coast of the United States. American safety and security is essential to our soldiers abroad and citizens at home. Because national defense is a non-partisan issue, we in Congress will work together to make sure our decisions are well thought out and executed.

### OPEN UP THE OUTER CONTINENTAL SHELF

(Mr. SMITH of Nebraska asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SMITH. Mr. Speaker, in October 2008, just a year ago, Congress lifted the decades-long ban on energy exploration off America's coasts, clearing the way for expanded

domestic oil and gas exploration. Unfortunately, instead of moving forward with a plan to explore the Outer Continental Shelf, this administration has stopped progress by instituting an extended 6-month public comment period.

Now the Obama administration has indicated offshore exploration may not happen until 2012, meaning what was a mere 6-month delay for comments has now become 3-year ban or could become a 3-year ban on offshore drilling.

Mr. Speaker, Americans are still waiting for expanded oil and gas exploration. With unemployment nearing 10 percent and our Nation's deficit topping \$9 trillion, it is simply irresponsible to continue this de facto ban on American energy protection. We need to take an all-of-the-above approach when it comes to our energy portfolio, an approach which includes developing American offshore energy resources.

#### HEALTH CARE STATUS QUO IS UNAFFORDABLE

(Ms. SCHWARTZ asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. SCHWARTZ. Since 2000, families in Pennsylvania have seen a 100 percent increase in their health premiums. Nearly one in five Pennsylvania families pay more than 10 percent of their income on health care. This is simply unaffordable for middle class Americans.

As we advance health care reform, we must ensure that Americans have access to meaningful, affordable health coverage, and we can do that by expanding private and public insurance options available to individuals and small groups so meaningful coverage is more affordable; by establishing consumer protections, including ending preexisting condition exclusions; setting commonsense policies to expand options for insurance coverage, including allowing young adults to stay on their parents' insurance policy; ensuring that Americans know what their insurance coverage truly means, by eliminating confusing terminology which results in consumers paying for expenses that they thought were covered, and putting a reasonable limit on insurer overhead and profits so that more of our premium dollars are used on health care.

The status quo is unaffordable. That is why the President and Congress are committed to passing a health care reform that benefits all of us.

#### ROBERT CLENNEY—TEXAS LAWMAN

(Mr. POE of Texas asked and was given permission to address the House for 1 minute.)

Mr. POE of Texas. Mr. Speaker, Highlands, Texas, lost a lawman to a tragic

traffic collision last Saturday night. Harris County Precinct 3 Deputy Constable Robert Clenney was hit by a car from behind and spun into oncoming traffic where he again was hit head-on by a pickup truck. He was 38 years of age. To make matters worse, the driver who hit Deputy Clenney's SUV from behind fled the scene. Police are now searching for the hit-and-run scoundrel.

Deputy Clenney was a beloved husband and father of two young daughters. His wife, Denise, says her husband had always wanted to be a lawman. It was his dream, and he achieved that dream. He had been a deputy constable for 11 months when he lost his life.

Lawmen are a special breed of people. They run toward trouble when others are running to safety. They protect people, property and the community. These first responders hold evildoers accountable to our laws. Deputy Clenney will be buried this Saturday in Texas. We will always be grateful for folks like Deputy Clenney, grateful for his service and his sacrifice. We pray God's peace to his family after their loss of this Texas lawman.

And that's just the way it is.

#### YOUNG ADULT HEALTH CARE COVERAGE ACT

(Mrs. DAHLKEMPER asked and was given permission to address the House for 1 minute.)

Mrs. DAHLKEMPER. Mr. Speaker, today I rise to speak on behalf of the age group that boasts the highest uninsured rate in our country, our young adults. Young adults, those between 19 and 29 years old, are more frequently without insurance than any other age group. At 31 percent uninsured, nearly one in three 18- to 29-year-olds are without health insurance. This gap in coverage occurs when young people graduate from school or reach an age limit imposed by insurance companies that do not allow them access to their parents' health insurance plans.

Young adults entering the workforce often take jobs that lack benefits or cannot afford them on their own. The Young Adult Health Care Coverage Act would give these young adults access to their parents' health insurance during these transition years when it is so difficult to maintain coverage on their own. This bill is a no-cost bipartisan solution to the problem of young adults without health insurance.

I urge my colleagues to support this bill and to support health care reform to provide quality health care for all Americans.

#### FANG ZHENG

(Mr. PITTS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PITTS. Mr. Speaker, yesterday I had the honor to celebrate with Fang Zheng, a man from China who recently walked for the first time in 20 years. Twenty years ago, I remember the whole world was watching on TV with such hope as peaceful demonstrators poured into Tiananmen Square in China, calling for freedom. Fang was among those brave activists. When the tanks rolled in to break up the demonstration, one of them rolled over him, causing him to lose both of his legs. This young man, who had been an Olympic hopeful, was now wheelchair-bound.

Last year he finally was able to travel to the United States and seek asylum. Moved by his story, the owners of a prosthesis center that worked with wounded war veterans offered to design him new legs; and yesterday here in the Capitol, these new legs allowed him to dance with his wife for the first time ever.

That celebration was a powerful symbol that the American people have not forgotten the Chinese struggle for freedom and the courage of people like Fang Zheng who speak out and who long to enjoy the same freedoms we hold so dear. You can see his story on YouTube.

#### THE NEED FOR A HEALTH CARE PUBLIC OPTION

(Mr. SARBANES asked and was given permission to address the House for 1 minute.)

Mr. SARBANES. Mr. Speaker, I just wanted to congratulate the American people on how savvy and smart they are when it comes to this health care reform effort. A survey was done recently, and the question was asked, Do you support an individual mandate, which is the requirement that people purchase insurance coverage? In answer to that, there was some ambivalence. People weren't so sure. Then they asked the question this way, they said, What if we give you a public option, would you support an individual mandate? And a clear majority said, Absolutely, we would.

Now let's think about that for a minute. What they were saying was, Don't force us to go purchase insurance coverage if we have to buy it from the same old cast of characters that's been jerking us around for decades. But if you give us a real option, then it absolutely makes common sense to require that.

So once again Americans have demonstrated they understand this problem. They understand why we need to have a public option in the mix, and that's what we're going to push forward with in this legislation.

# FIX GOVERNMENT-RUN HEALTH CARE BEFORE ENACTING ANY NEW REFORMS

(Mr. TIM MURPHY of Pennsylvania asked and was given permission to address the House for 1 minute.)

Mr. TIM MURPHY of Pennsylvania. Mr. Speaker, as we discuss the issue of health care, one thing that's brought up often is, Why not let the government run health care? After all, we already have Medicaid, Medicaid, TRICARE and the VA.

Here is a true story: a gentleman in his eighties needs a motorized wheelchair, so he gets a medical exam. A few dozen pages of paperwork are filled out, and 3 or 4 months go by, waiting for the wheelchair to arrive. Unfortunately, during that time, the medical exam expired after 60 days and has to be repeated. Again, more billing, a couple dozen pages of that, and he gets his \$25,000 wheelchair. Unfortunately, by that time, he is in hospice care and can barely use it. And here is the other tragedy: it goes into storage. It can't be used. It cannot be returned, and it's a big waste of money in many ways.

It's not atypical for issues with Medicare and Medicaid. They, quite frankly, will pay for this sort of expense but will not pay for the care it takes to prevent these sorts of problems. Before we take on more health care and \$1 trillion more spending, shouldn't we fix those things we are already responsible for? I think that would save a lot of money, make a lot of sense, and save a lot of lives.

## WE NEED HEALTH CARE IN AMERICA

(Mr. COHEN asked and was given permission to address the House for 1 minute.)

Mr. COHEN. Mr. Speaker, on Monday in my office in Memphis, I had citizens come visit me. Two parents had children with spina bifida. They explained the love they had for their child, but the expenses it is causing them because our system of Medicaid is not sufficient in Tennessee to really give them the benefits they need, and how much it costs them.

Another person came to my office to tell me that I had saved her life. Well, I hadn't saved her life, but she would have been cut off of TennCare, our Medicaid system. And but for 10 days when we got them back on, she wouldn't have got the transplant that did save her life.

Do we need health care in America? I think those stories and stories like them say we do. I was gratified last night doing a teletown hall meeting in my district where 83 percent of the respondents said they supported President Obama's health care plan. The Ninth Congressional District of Tennessee gets it. I hope America gets it.

□ 1015

# MASSIVE MEDICARE CUTS IN THE BAUCUS HEALTH CARE REFORM BILL

(Mr. KIRK asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KIRK. Mr. Speaker, Senator BAUCUS's health care bill is out, and the nonpartisan Congressional Budget Office has reported it has 15 major surprises in it. Massive cuts to Medicare.

You can see here that the bill cuts \$133 billion out of Medicare Advantage, forcing 3 million seniors out of their choices; \$128 billion is going to be cut for Medicare for hospitals; home health is cut, part D; skilled nursing is cut; hospice is cut; medical imaging, wheelchairs are cut.

So we now see how this is so-called paid for, on the back of senior health care.

I urge seniors to read this Baucus bill and learn about its massive Medicare cuts.

## PROVIDING FOR CONSIDERATION OF CONFERENCE REPORT ON H.R. 2647, NATIONAL DEFENSE AUTHORIZATION ACT FOR FISCAL YEAR 2010

Ms. SLAUGHTER. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 808 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 808

*Resolved*, That upon adoption of this resolution it shall be in order to consider the conference report to accompany the bill (H.R. 2647) to authorize appropriations for fiscal year 2010 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe military personnel strengths for such fiscal year, to provide special pays and allowances to certain members of the Armed Forces, expand concurrent receipt of military retirement and VA disability benefits to disabled military retirees, and for other purposes. All points of order against the conference report and against its consideration are waived. The conference report shall be considered as read. The previous question shall be considered as ordered on the conference report to its adoption without intervening motion except: (1) one hour of debate; and (2) one motion to recommit if applicable.

The SPEAKER pro tempore. The gentleman from New York is recognized for 1 hour.

Ms. SLAUGHTER. Mr. Speaker, for the purpose of debate only, I yield the customary 30 minutes to the gentleman from Florida (Mr. LINCOLN DIAZ-BALART). All time yielded during consideration of the rule is for debate only.

GENERAL LEAVE

Ms. SLAUGHTER. I ask unanimous consent that all Members have 5 legis-

lative days within which to revise and extend their remarks and insert extraneous materials into the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Ms. SLAUGHTER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the rule provides for consideration of the conference report to accompany H.R. 2647, the National Defense Authorization Act for Fiscal Year 2010. The rule waives all points of order against the conference report and against its consideration. The rule provides that the previous question shall be considered as ordered without any intervening motion except 1 hour of debate and, if applicable, one motion to recommit.

The bill was introduced on June 2, 2009, by Chairman IKE SKELTON and referred to the Committee on Armed Services. The committee marked up the bill on June 16, 2009, and ordered it favorably reported, as amended, by voice vote June 16, 2009.

The Committee on Rules reported a structured rule making in order 69 amendments, which then passed the floor 222-202. And today we have the conference report that we have now concurred with the Senate.

Despite any differences about our ongoing missions in Afghanistan or Iraq, we all agree that funds that have already been approved as part of the annual spending plans should not be held up for any reason, not with our troops in harm's way.

The bill authorizes \$550.2 billion in budget authority for the Department of Defense and the national security programs of the Department of Energy and also authorizes \$130 billion for overseas contingency operations for fiscal year 2010.

For our service men and women, it authorizes a pay raise of 3.4 percent for the military, expands TRICARE health coverage for Reserve members, bars fee increases on TRICARE inpatient care for 1 year, and provides \$2.2 billion for housing programs to improve the quality of life for our servicepersons' families.

On Afghanistan, the bill responds to concerns raised by Members of both parties and requires an assessment of progress in Afghanistan and Pakistan toward security and stability. It also bans permanent bases in Afghanistan and provides funds to train and equip the Afghan National Security Forces, the ANSF.

There is also language in the bill that requires a reporting system to register and track all the U.S. defense items that are provided to Afghanistan and Pakistan, to help combat waste and fraud. This is especially important in light of recent news stories showing that millions of dollars destined for

Pakistan to battle militants in al Qaeda have been diverted to either the domestic economy or "for other purposes." In fact, between 2002 and 2008, while al Qaeda regrouped, only \$500 million of the \$6.6 billion in American aid actually made it to the Pakistani military, according to two Army generals quoted in an Associated Press story from earlier this week. I will insert that story into the RECORD.

BILLIONS IN U.S. AID NEVER REACHED  
PAKISTAN ARMY  
(By Kathy Gannon)

ISLAMABAD, PAKISTAN.—The United States has long suspected that much of the billions of dollars it has sent Pakistan to battle militants has been diverted to the domestic economy and other causes, such as fighting India.

Now the scope and longevity of the misuse is becoming clear: Between 2002 and 2008, while al-Qaida regrouped, only \$500 million of the \$6.6 billion in American aid actually made it to the Pakistani military, two army generals tell The Associated Press.

The account of the generals, who asked to remain anonymous because military rules forbid them from speaking publicly, was backed up by other retired and active generals, former bureaucrats and government ministers.

At the time of the siphoning, Pervez Musharraf, a Washington ally, served as both chief of staff and president, making it easier to divert money intended for the military to bolster his sagging image at home through economic subsidies.

"The army itself got very little," said retired Gen. Mahmud Durrani, who was Pakistan's ambassador to the U.S. under Musharraf. "It went to things like subsidies, which is why everything looked hunky-dory. The military was financing the war on terror out of its own budget."

Generals and ministers say the diversion of the money hurt the military in very real ways:

Helicopters critical to the battle in rugged border regions were not available. At one point in 2007, more than 200 soldiers were trapped by insurgents in the tribal regions without a helicopter lift to rescue them.

The limited night vision equipment given to the army was taken away every three months for inventory and returned three weeks later.

Equipment was broken, and training was lacking. It was not until 2007 that money was given to the Frontier Corps, the front-line force, for training.

The details on misuse of American aid come as Washington again promises Pakistan money. Legislation to triple general aid to Pakistan cleared Congress last week. The legislation also authorizes "such sums as are necessary" for military assistance to Pakistan, upon several conditions. The conditions include certification that Pakistan is cooperating in stopping the proliferation of nuclear weapons, that Pakistan is making a sustained commitment to combating terrorist groups and that Pakistan security forces are not subverting the country's political or judicial processes.

The U.S. is also insisting on more accountability for reimbursing money spent. For example, Pakistan is still waiting for \$1.7 billion for which it has billed the United States under a Coalition Support Fund to reimburse allies for money spent on the war on terror.

But the U.S. still can't follow what happens to the money it doles out.

"We don't have a mechanism for tracking the money after we have given it to them," Pentagon spokesman Lt. Col. Mark Wright said in a telephone interview.

Musharraf's spokesman, retired Gen. Rashid Qureshi, flatly denied that his former boss had shortchanged the army. He did not address the specific charges. "He has answered these questions. He has answered all the questions," the spokesman said. Musharraf took power in a bloodless coup in 1999 and resigned in August 2008.

The misuse of funding helps to explain how al-Qaida, dismantled in Afghanistan in 2001, was able to regroup, grow and take on the weak Pakistani army. Even today, the army complains of inadequate equipment to battle Taliban entrenched in tribal regions.

For its part, Washington did not ask many questions of a leader, Musharraf, whom it considered an ally, according to a U.S. Government Accountability Office report released last year.

Pakistan has received more money from the fund than any other nation. It is also the least expensive war front. The amount the U.S. spends per soldier per month is just \$928, compared with \$76,870 in Afghanistan and \$85,640 in Iraq.

Yet by 2008, the United States had provided Pakistan with \$8.6 billion in military money, and more than \$12 billion in all.

"The army was sending in the bills," said one general who asked not to be identified because it is against military rules to speak publicly. "The army was taking from its coffers to pay for the war effort—the access roads construction, the fuel, everything. . . . This is the reality—the army got peanuts."

Some of the money from the U.S. even went to buying weapons from the United States better suited to fighting India than in the border regions of Afghanistan—armor-piercing tow missiles, sophisticated surveillance equipment, air-to-air missiles, maritime patrol aircraft, anti-ship missiles and F-16 fighter aircraft.

"Pakistan insisted and America agreed. Pakistan said we also have a threat from other sources," Durrani said, referring to India, "and we have to strengthen our overall capacity. 'The money was used to buy and support capability against India.'"

The army also suffered from mismanagement, Durrani said. As an example, he cited Pakistani attempts to buy badly needed attack helicopters.

Pakistan asked for Cobra helicopters because it knows how to maintain them, he said. But the helicopters were old, and to make them battle-ready, the Pentagon sent them to a company that had no experience with Cobras and took two years, he said.

As a result, in 2007, Pakistan had only one working helicopter—a debilitating handicap in the battle against insurgents who hide, train and attack from the hulking mountains that run like a seam along the Afghan-Pakistani border.

The army was also frustrated about not getting more money. Military spokesman Gen. Athar Abbas said the U.S. gave nothing to offset the cost of Pakistan's dead and wounded in the war on terror. He estimated 1,800 Pakistani soldiers had been killed since 2003 and 4,800 more wounded, most of them seriously.

The hospital and rehabilitation costs for the wounded have come to more than \$25 million, Abbas said. Pakistan's military also gives land to the widows of the dead, educates their children and provides health care.

"These costs do not appear anywhere," he said. "There is no U.S. compensation for the

casualties, assistance with aid to the grieving families."

Even while money was being siphoned off for other purposes on Pakistan's end, the U.S. imposed little control over or even had specific knowledge of what went where, according to reports by the U.S. Government Accountability Office. The reports covered 2002 through 2008.

The reports found that the Pentagon often ignored its own oversight rules, didn't get adequate documents and doled out money without asking for an explanation.

For more than a year, the Pentagon paid Pakistan's navy \$19,000 a month per vehicle just for repair costs on a fleet of fewer than 20 vehicles. Monthly food bills doubled for no apparent reason, and for a year the Pentagon paid the bills without checking, according to the report.

Daniyal Aziz, a minister in Musharraf's government, said he warned U.S. officials that the money they were giving his government was being misused, but to no avail.

"They both deserved each other, Musharraf and the Americans," he said.

Within this bill is authorization for 30 F-35 Joint Strike Fighter aircraft and the continued development and procurement of the F136 Joint Strike Fighter competitive engine but does not authorize the advance procurement of F-22 aircraft.

It authorizes \$6.7 billion for Mine Resistant Ambush Protected, MRAP, vehicles and fully funds the new MRAP all-terrain variant requirement for Afghanistan. We've seen far too many reports of our troops dying because their vehicles are ripped apart by roadside bombs. We can and will do better to protect them from these risks.

Under the provisions of this bill, the military will increase by 30,000 Army troops, 8,100 marines, 14,650 Air Force personnel, and 2,477 Navy sailors in 2010. It also authorizes an additional 30,000 Army troops in fiscal years 2011 and 2012.

The bill provides support for the plan to increase the size of our civilian workforce so that we can reduce DOD's reliance on contractors for core acquisition functions. This is also a most important point to cut down on fraud and waste. The bill also provides DOD with the needed flexibility to reform the DOD hiring process to reduce the fraud and abuse through enhanced contractor oversight, which is long overdue.

The bill speaks to vessels carrying DOD cargo in high piracy risk areas by requiring that they be equipped with appropriate nonlethal defense measures. And it strengthens the DOD's ability to face threats and vulnerabilities by improving research and promoting military and civilian cyber workforce development.

It improves accountability and oversight in awarding defense contracts by providing the Defense Department the authority to require return of award and incentive fees. The bill prohibits a company from being awarded future contracts if its action leads to a servicemember's death or severe injury.

This, of course, is in response to the number of soldiers who were electrocuted by bad plumbing work.

To address concerns about the treatment of detainees, the bill bans interrogation of detainees by contractors and requires the Department of Defense to give the International Committee of the Red Cross prompt access to detainees held at the Bagram Theater Internment Facility in Afghanistan.

In addition, the bill reforms the Military Commissions Act to clarify rules and improve trial procedures to make military commissions fair and effective, and puts new revisions into place that would forbid the use of statements alleged to have been secured through cruel, inhuman, or degrading treatment.

Finally, the bill provides the accused with the enhanced ability to select his own counsel and to make hearsay evidence harder to use in court. It improves procedures for the handling of classified information while also permitting military commissions to continue existing cases for 90 days or until revisions have been made to supporting court manuals and handbooks.

The bill matches the administration's request for \$9.3 billion for missile defense programs and provides the resources necessary to meet threats facing the United States, our deployed forces, and our friends and allies, and provides \$2.2 billion to support the Department of Energy's nonproliferation programs. It strengthens the Stockpile Stewardship Program to ensure that the nuclear weapons stockpile is safe, secure, and reliable without the use of underground testing.

Further, the bill provides technical and financial support to local law enforcement and prosecutors that they can more aggressively try violent crimes which are motivated by the victim's race, color, religion, national origin, gender, sexual orientation, gender identity, or disability; expands the ability of Federal prosecutors to try similar types of cases in Federal court if State or local officials are unable or unwilling to prosecute these cases; and criminalizes attacks against U.S. servicemembers because of their service to their country.

I want to address one last point. The bill includes new hate crimes legislation that will prohibit offenses based on the actual or perceived race, color, religion, national origin, gender, sexual orientation, gender identity, or disability of any person. This kind of far-reaching protection is important for America, and I am proud to support it.

There are still far too many incidences of violence in and around our schools and churches. During the last 10 years, 69 persons have been killed or injured at church and another 122 children have died in or around their school. The numbers are dev-

astating. One has only to look at the beating death of Chicago teenager Derrion Albert outside his high school, an honor student, to see how devastating it is to see violence in our schools. I hope this bill can help bring an end to that sorrow.

Mr. Speaker, I reserve the balance of my time.

Mr. LINCOLN DIAZ-BALART of Florida. I thank my friend, the distinguished chairwoman, Ms. SLAUGHTER, for the time, and I yield myself such time as I may consume.

Today the House will consider the bipartisan conference report for the 2010 National Defense Authorization legislation. With this important legislation, I think we are sending the message to our men and women in uniform that we support them and that we deeply appreciate their service.

The conference report authorizes over \$550 billion for the activities of the Department of Defense. It also provides approximately \$130 billion to support our combat operations in Afghanistan, in Iraq, and other fronts of the war on international terrorism.

I wish to commend both the Armed Services Committee chairman, Mr. SKELTON, and the ranking member, Mr. McKEON, both good friends and admired colleagues, for their commitment that they have demonstrated in this legislation to put partisanship aside in order to get this important legislation to the President.

While I support the conference report, I know it is not perfect. No human endeavor is. But I believe that the conference report will strengthen our national security and help modernize our military. It will provide servicemembers and their families with improved health care, support, and quality-of-life programs. I'm pleased that it includes the House-passed 3.4 percent pay raise for our troops instead of the lower request that had come from the President.

Furthering our commitment to our troops, the bill extends TRICARE eligibility to Reserve members so they can receive full TRICARE coverage 180 days before they go on active duty and will prevent increases in copayments for inpatient care at civilian hospitals under TRICARE. The bill provides over \$2 billion for family housing programs to expand and improve the quality of military housing.

The legislation authorizes the expansion of our military by 30,000 Army troops, 8,100 marines, and over 14,000 Air Force personnel and approximately 2,500 members of the Navy.

□ 1030

I would like to thank the members of the conference committee for including my request for authorization for funding for the finalization of construction of a new permanent headquarters for the United States Southern Command

that is located in the congressional district that I am honored to represent. Currently, the Department of Defense is leasing the land for SOUTHCOM from a private individual. The funds authorized in this legislation will be used to complete construction of the new headquarters on land adjacent to the current location and lease it from the State of Florida for the sum of \$1 per year.

This provision is extremely important to my community because SOUTHCOM personnel and supporting services have contributed over \$1.2 billion and over 20,000 jobs to south Florida's economy.

As a supporter of the Matthew Shepard Hate Crimes Prevention Act, I am pleased to see that it was included in the underlying legislation, though I wish that the provision would have been expanded to include also more serious penalties for crimes against members of the armed services and their families. There are people who hate our armed services for what they symbolize, and our armed services, I think, deserve the additional protection from crimes of violence.

There are aspects of this legislation, obviously, with which I disagree, Mr. Speaker. Since the beginning of military aviation, the United States has very wisely invested in our military air superiority. In recent military operations, we've clearly seen that our investments pay off. Our military air superiority saves the lives of our men and women in uniform, and it saves the lives of countless civilians. That's why I am very disappointed that the underlying legislation fails to include funding for the F-22, the world's most advanced fighter plane and one that we may very well need in future operations. Obviously not against ragtag terrorists, but against the superpowers of the future.

I hope and pray that this short-sighted decision will not hurt the long-term safety of our Nation and our men and women in uniform.

I also have deep reservations about the decision to block full funding restoration for missile defense. This unwise decision, in my opinion, comes at a time when the demented despot of North Korea continues to mock global condemnation of his nuclear program and threatens the United States and our friends and allies with destruction.

The Iranian tyranny, while it continues to massacre its people in the streets perhaps today in a less public manner than a few months ago, nevertheless continues to massacre its people. It also threatens to wipe Israel off the face of the map. It's clear to me that the world faces a grave and I believe imminent threat from the dictatorships in North Korea and Iran, and now is not the time to cut missile defense. Unfortunately, because of the request from the executive branch and

acquiescence here on the part of the leadership, it is occurring, and I think it is a mistake.

I would have liked to have seen included in this legislation section 1226 of the Senate version of the bill, which would have required a report to Congress on the Republic of China's—that's free China, Taiwan—defense capabilities. That report would have greatly enhanced the ability of Congress and the administration to assess their obligations to sell defense articles as required under the Taiwan Relations Act, "as may be necessary to enable Taiwan to maintain a sufficient self-defense capability."

The peace in that area has been maintained because this Congress, throughout the decades ever since the betrayal of Taiwan, this Congress has insisted on the United States selling, making available for purchase by the Republic of China, the military equipment and technology necessary to deter an armed attack. So I am sorry that that provision that was in the Senate legislation is not included in the final conference report.

Again, despite the aspects of the legislation with which I do not agree, I feel that overall this legislation is necessary and that we pass it. Obviously although it's not perfect, it helps modernize and it supports our military forces. It provides our men and women in uniform with support they need and deserve.

So I would ask my colleagues, as I have done, to look further than the aspects with which one may disagree within the legislation and pass it.

I reserve the balance of my time

Ms. SLAUGHTER. Mr. Speaker, I am pleased to yield 3 minutes to the gentleman from Colorado, a member of the Rules Committee, Mr. POLIS.

Mr. POLIS. Mr. Speaker, I rise today in support of the rule and the bill. I would like to thank Chairwoman SLAUGHTER for the time on the rule as well as House Armed Services Chairman SKELTON and Ranking Member MCKEON for their tireless work on this bill. Their job is not easy.

Our Nation faces a war on two fronts and growing threats to our security here and abroad. As our economy struggles to recover from a meltdown, the resources we have available to devote to these problems are under increasing pressure.

It's time we bring our troops home from both Iraq and Afghanistan. I commend President Obama and his efforts to end our military presence in Iraq and look forward to helping him achieve this goal soon.

I am concerned, however, about the possible increase of troops in Afghanistan. We cannot achieve peace through the occupation of an entire country. The occupation of Afghanistan will not help us defeat the very real threat of al Qaeda. We need to take a new look at

our policy, moving towards targeted operations against al Qaeda rather than the occupation of an entire country. And this can only come about through discussion and debate.

We need an exit strategy for Afghanistan, a plan for peace. This bill promotes such a plan by requiring assessment of goals in Afghanistan with timelines and by increasing numbers in the Afghan National Security Forces to prepare for the transition.

Recognizing, however, that this authorization will inevitably continue war efforts inherited from the previous administration, I take great pause in deciding to support it. But at its heart, this authorization is about more than our policy towards Iraq and Afghanistan.

Mr. Speaker, I strongly support this authorization today because, in doing so, Congress finally—after nearly a decade of debate—has the opportunity to pass historic hate crimes legislation. My home State of Colorado has long had hate crimes legislation on the books, including gays and lesbians, and I am proud to stand before you as a representative of the Second Congressional District and as an original cosponsor of the Local Law Enforcement Hate Crimes Prevention Act of 2009 which is included in this Defense authorization bill.

Our hate crimes legislation expands Federal jurisdiction to investigate and prosecute hate crimes and provides law enforcement with another means of ensuring that the safety and rights of all Americans are protected. It offers Federal protection for victims of hate crimes targeted because of their race, color, religion, national origin, sexual orientation, gender, gender identity, or disability, as well as protecting men and women who proudly wear the uniform of the United States from hate crimes. It also provides assistance to State and local law enforcement agencies and amends Federal law to aid in the prosecution of bias-motivated crimes.

Hate crimes are not limited to the LGBT community. They occur every day in every State and perpetuate a climate of fear throughout minority communities. What makes these crimes so odious is that they are not just crimes against individuals; they're crimes against entire communities and create environments of fear in entire communities.

There is a difference between burning a cross on the lawn of an African American family and an act of simple arson. This legislation clarifies that our country has zero tolerance for hate crimes.

The SPEAKER pro tempore. The time of the gentleman has expired.

Ms. SLAUGHTER. I yield the gentleman 20 additional seconds.

Mr. POLIS. I rise in support today—despite my opposition to the war—of

the 2009 reauthorization bill. And I thank Chairman SKELTON and Ranking Member MCKEON for including the hate crimes bill and bringing this historic legislation to the floor of the House and to the desk of the President of the United States of America.

Mr. LINCOLN DIAZ-BALART of Florida. Mr. Speaker, I yield 2 minutes to the distinguished leader from Missouri, Mr. BLUNT.

Mr. BLUNT. Mr. Speaker, I thank the gentleman for yielding.

I rise in strong opposition to this rule. This rule, for the first time that I am aware of, allows the Defense authorization bill to become a vehicle where other social legislation is finalized, where the country's laws are changed, where those of us who have always voted for the Defense authorization bill now have a choice of voting for a bill that includes something that we've always voted against. And even if it was something that I was for, I don't think this rule should move forward in a way that changes the law so that we would, in the future, have two classifications of criminals and two classifications of victims.

Criminals should be prosecuted to the fullest extent of the law. Victims should be protected to the fullest extent of the law, and it should not, Mr. Speaker, happen in the Defense authorization bill. To use this bill in this way is a step in the wrong direction, and I am afraid it's the first step in that wrong direction where every bill to defend the country, every bill to find out what our enemies are up to, every bill to fund our troops, every bill to take care of their families will become a vehicle for other social legislation that has nothing to do with defense. That should not be in this bill.

This rule should allow a vote that takes it out of the bill, at the very least, and it sets a very terrible preference, Mr. Speaker.

I urge this rule be rejected so we can move forward with a Defense authorization bill like every Defense authorization bill for at least a decade that dealt with defense and those who defend our country.

Ms. SLAUGHTER. Mr. Speaker, I yield 2 minutes to the gentleman from Massachusetts (Mr. LYNCH).

Mr. LYNCH. I thank the gentlelady for her courtesy and the time.

Mr. Speaker, I rise in support of the rule for H.R. 2647, the National Defense Authorization Act for Fiscal Year 2010.

In addition to the bill's robust support of our national defense and national security programs, H.R. 2647 includes several key Federal employee initiatives which will come under my jurisdiction as the chairman of the Federal Workforce, Postal Service, and District of Columbia Subcommittee. I am pleased to report that the bill significantly enhances the Federal Government's recruitment and retention

capabilities, as well as further bolstering agency management and worker productivity.

The underlying bill will now allow the Federal Employees Retirement System to provide employees with retirement credit for unused sick time. Under the current system, we have half of our employees that are allowed to get credit for unused sick time, and the others are encouraged to use their sick time whether they need it or not.

Under this new bill, Federal workers, managers, and agencies will have the flexibility they have long called for. This is a great change in our personnel management system.

Additionally, this legislation fixes a civil service retirement annuity calculation problem for those employees who wish to phase down to part-time at the end of their working careers. Under the existing system, senior employees—many times our most valuable senior employees—are forced to simply retire and not work part-time at the end of their career in order to train their successors, because the calculation would hurt their pension if they work part-time at the end of their career. This change will obviously correct that inequity.

The Office of Personnel Management supports that as a way to retain the skill-set and knowledge of employees who are nearing the end of their careers and who want to work part time to help train future agency leaders.

The SPEAKER pro tempore. The time of the gentleman has expired.

Ms. SLAUGHTER. Mr. Speaker, I will yield 1 minute to the gentleman.

Mr. LYNCH. Also included is a provision that allows D.C. court employees to be compensated for lost retirement credits when those workers were involuntarily transferred to Federal service.

H.R. 2647 will also terminate DOD's disastrous so-called pay-for-performance personnel system.

I would like to extend my gratitude to IKE SKELTON, chairman of the Armed Services Committee, and BUCK McKEON, the ranking member, as well as Members JIM MORAN from Virginia, Mr. CONNOLLY from Virginia, Mr. VAN HOLLEN from Maryland, and Congresswoman ELEANOR HOLMES NORTON from the District of Columbia, and Majority Leader STENY HOYER for their efforts on behalf of the Federal workforce.

Mr. Speaker, I conclude my remarks by thanking Chairwoman SLAUGHTER for the time and restating my support for the rule.

□ 1045

Mr. LINCOLN DIAZ-BALART of Florida. Mr. Speaker, I yield 5 minutes to my friend, the great Texan, Judge CARTER.

Mr. CARTER. Mr. Speaker, I have the distinct honor and privilege to represent 52,000 fighting American soldiers, men and women. As we stand

here on the floor of this House today, 25,000 of my soldiers that I represent from Fort Hood, Texas, are engaged in combat against an enemy of the United States. And we have lost hundreds of soldiers from Fort Hood; and we have had thousands of soldiers, men and women, injured from Fort Hood fighting for freedom and doing their duty and accomplishing their mission.

I have always supported the United States military in every form or fashion, and I have always been a crusader for the authorization bill that gives those tools that gives my fighting men and women that fight for Fort Hood and fight for Texas and fight for America the opportunity to do their mission, accomplish their goals and maintain freedom.

But I'm in a dilemma today, as are many, many of my colleagues because we seem to be following a code of secrecy that seems to be the new mode in this Congress. When you have something you don't want to talk about out in public, you hide it somewhere. And so we're looking today on the fact that we've added to the bill that's designed to protect the men and women of the United States military and keep them safe, we've added a criminal justice issue having to do with hate crimes.

In 20 years on the bench as a criminal judge, at a felony level in Texas, I've spent an inordinate amount of time protecting the rights of the individual and protecting the rights of the defendant. I believe that we have created a justice system in America that blindly treats everyone equally. There are those who disagree, and I understand that debate.

But that debate should be resolved in a one-on-one confrontation between those who think the justice system treats all fairly and those who do not, and if hate crimes is the solution to that bill, if we thought crimes are what we want in America, then I think we should go forward independently on a hate crimes bill. And I think those who support hate crimes should have the courage to come out from underneath the cover of the United States serviceman and step up and say, this is a problem in America and it needs to be solved, and here's how we solve it.

Let us discuss it as men and women who represent the American people, and let us vote as our constituents would have us vote on the issue before us, hate crimes. Let's not hide that issue behind that American soldier who, at this very moment, is patrolling over in Iraq and putting his life on the line. This is an awful thing to do to the American soldier because it is taking him and having his Representative have to be in a quandary to support the military because someone is plugging in a bill that they might disagree with.

I believe every victim is entitled to be protected by the law. No matter who they are or what they do, they are enti-

tled, as a victim, to be protected under the law and their rights to be part of the criminal justice system. And I believe the sentencing process that we give to our judges and our juries it is very important that they have choices to make and they can take into consideration evidence of why the event occurred, whatever that why may be.

But I think, to stick in here a controversial issue, which goes farther than just what the crime is, but what was that person thinking, or what are we going to presume that person was thinking, and if anybody ever talked to him on this subject, do we presume that they shall be considered aiding and abetting in this criminal offense. And it has issues that affect the religious freedom of the United States.

These are issues that should be talked about independently. It's time for the United States Congress to address this type of thing and other things openly and forthwith, and not hide them in another bill and force people to vote against their conscience. I'm ashamed of what we're doing here today, Mr. Speaker. I think we can protect these innocents that we're talking about using the fact that our Constitution tells us to and demand that kind of behavior from our justice system without going into thought crimes, hate crimes, and infringement upon States' rights.

Ms. SLAUGHTER. Mr. Speaker, I am pleased to yield 2 minutes to the gentlewoman from California (Ms. RICHARDSON).

Ms. RICHARDSON. Mr. Speaker, as one of the House conferees of this report, I have no confusion in terms of why I'm here and what we're doing to support the troops. I rise in strong support of this rule and the conference report of H.R. 2647, and I will submit my full statement for the RECORD.

I thank Chairman SKELTON for his continued skillful leadership, for the Speaker appointing me as a conferee, and Mr. OBERSTAR for recommending me. What is the report about? There's no covers here. The report is clear. It's about restoring and enhancing the readiness of our troops and the equipment. It's about taking care of our military personnel, and it also authorizes needed investments to keep our Nation strong.

So let's talk about what that means. Troops, enabling that the Department of Defense would have 213 C-17s so we can support our men and women; that our military families would not have to wait on a 3.4 percent military raise that they've long deserved. But let me focus my final moment on why and what my specialty is and what I think is so important in this bill, talking about port security as national security.

When we consider the provision that is in this bill, port security, infrastructure, development program, it will enable our ports to finally come up to

speed where we can be competitive, as well as the economic engine that we reside in.

Now, let's talk about the ports. The role of our ports is not just economics. It's to connect the ports. That's the point. And when you look at 14 commercial ports currently in the United States, two of which are in my area, they are called strategic ports for that very reason. When you look at Operation Enduring Freedom, that was the largest area where we had the sealift tonnage and troops that were moved through the ports to enable us to respond.

So when we talk about this Defense authorization bill, it's quite clear why we're here today. We're here to talk about our troops, to prepare them and to give them the resources that they so richly deserve. Currently, our ports are struggling without enough money for the Army Corps to do the proper dredging.

I urge my colleagues to support this, and I stand in support of Ms. SLAUGHTER as we move forward on this rule.

Mr. Speaker, as one of the House conferees on this report, I rise in strong support of the rule and the underlying Conference Report on H.R. 2647, the National Defense Authorization Act for Fiscal Year 2010, which provides \$550.2 billion in budget authority for the Department of Defense and the national security programs of the Department of Energy.

I thank Chairman SKELTON for his skillful leadership in shepherding this legislation to the floor. I also wish to express my appreciation to Speaker PELOSI for appointing me as a conferee. And I cannot say how much it means to me to have the confidence of my chairman, Mr. OBERSTAR, who recommended me to the Speaker. Mr. Speaker, I support the conference report for three reasons: (1) it restores and enhances the readiness of our troops, equipment, and defense infrastructure; (2) it takes care of our military personnel and their families; and (3) it authorizes the needed investments to keep our nation strong, safe, and respected in the world.

Let me briefly highlight some of the key provisions. This legislation:

#### TROOP AND EQUIPMENT READINESS

Increases the size of our overstretched military by 30,000 Army troops, 8,100 Marines, 14,650 Air Force personnel, and 2,477 Navy sailors as requested by the President and Commander-in-Chief;

Provides \$6.9 billion to address equipment shortfalls in the National Guard and Reserves;

Provides \$4.7 billion for training opportunities for the Army;

Adds \$350 million for Army trainee barracks construction and \$200 million to support National Guard and Reserve military construction projects;

Requires DoD to maintain a strategic airlift fleet of 316 aircraft, an increase of 24 over previous requirement, which should help bring us closer to the goal of maintaining the full complement—at least 213—of C-17's, the incomparable and irreplaceable air transport that is assembled in my congressional district.

#### HELP FOR MILITARY FAMILIES

Provides a 3.4 percent military pay raise;

Prohibits fee increases on TRICARE inpatient care for 1 year;

Provides \$2.2 billion for family housing programs;

Adds \$276 million to support the Housing Assistance Program that helps service members forced to sell their homes at a significant loss;

Provides travel and transportation for three designated persons, including non-family members, to visit hospitalized service members.

#### IRAQ, AFGHANISTAN, AND PAKISTAN

Bans permanent bases in Iraq and prohibits U.S. control of Iraqi oil;

Requires report on responsible redeployment of U.S. forces from Iraq;

Bans permanent bases in Afghanistan;

Requires reports to assess progress toward security and stability in Afghanistan and in Pakistan;

Requires a system to register and track all U.S. defense articles provided to Afghanistan and Pakistan;

Directs GAO to provide separate reports assessing the strategic plans for Iraq and Afghanistan.

#### PORT SECURITY AND NATIONAL SECURITY

Mr. Speaker, in my remaining time let me discuss an additional reason why I support the conference report. Working together constructively, the conferees were able to reach agreement and included in the Conference Report provisions establishing a port infrastructure development program. Let me explain why this is a significant, constructive, and necessary enhancement to the bill. The subject is very important but I will be brief.

#### ECONOMIC SIGNIFICANCE OF AMERICAN PORTS

Our Nation's ports are vital to the economic health and prosperity of our Nation. According to the International Trade Administration, last year U.S. exports of goods and services grew by 12 percent to \$1.84 trillion, while imports increased by 7.4 percent to \$2.52 trillion. Exports accounted for 13.1 percent of U.S. Gross Domestic Product in 2008. To put that in historical context, in 2003, exports were 9.5 percent of GDP; in 1969 they were only 5.3 percent.

The Port of Long Beach and Los Angeles is the busiest container port in the United States. This port complex is the fifth busiest port in the world, moving \$260 billion in total trade and handling 14.33 million 20-foot containers in 2009. This represents approximately 40 percent of all the containers entering the United States. More than 886,000 jobs in California are directly or indirectly related to the international trade activities at the ports.

According to the U.S. Coast Guard, there are 360 commercial ports that provide approximately 3,200 cargo and passenger handling facilities. The importance of our ports is only going to continue to grow. The Department of Transportation estimates that by 2035, the volume of freight shipped on the U.S. transportation system will increase more than 48 percent—and much of this freight enters the U.S. through our ports.

#### NATIONAL SECURITY CONSIDERATIONS

While it is undeniable that the international trade handled by the Nation's ports is a major engine driving our economy, public and com-

mercial ports serve another critical function that is vital to our national security. Mr. Speaker, it is an understatement to say that in times of war, "the role of ports is to connect the forts."

During wartime and national emergencies, the Defense Department designates two dozen ports to support the mobilization, deployment, and resupply of U.S. forces during major conflicts. Commercial port facilities routinely ship military cargo and many U.S. ports host major naval installations. Indeed, 14 commercial ports—including the Port of Long Beach and Los Angeles—are deemed so critical to the defense and security of the Nation that they have been designated as "strategic ports." The others are: Tacoma, Wash.; Oakland, Calif.; San Diego, Calif.; Corpus Christi, Texas; Beaumont, Texas; Jacksonville, Fla.; Savannah, Ga.; Charleston, S.C.; Wilmington, N.C.; Morehead City, N.C.; Hampton Roads Area Ports, Va.; Philadelphia, Pa. and the New York/New Jersey Port Complex.

U.S. public and commercial ports have been indispensable in the deployment of troops and material for Operations Enduring Freedom and Iraqi Freedom since the conflicts began there in early 2001. The Military Sealift Command, MSC, and the Military Traffic Management Command, MTMC, use public ports to preposition mobility forces and assets and provide global surface deployment command, together with control and distribution operations, to meet national security objectives in peace and war.

According to the Department of Defense, the total sealift tonnage moved in the first 6 months of Operation Iraqi Freedom and the deployment and redeployment of approximately 240,000 troops and their equipment was part of the largest troop rotation since World War II. Sealift tonnage passing through the Nation's ports accounted for approximately 84 percent of the total Operation Iraqi Freedom cargo shipped during this period.

#### THE CRITICAL ROLE OF PORT INFRASTRUCTURE TO NATIONAL SECURITY

Commercial ports are a linchpin of the economy and a critical component of our national defense. But Mr. Speaker, there is a problem. It is simple and it is stark: Our ports are increasingly less capable of fulfilling their vital functions because we have not invested sufficient resources to maintain and modernize them. Port infrastructure is rapidly falling into a dangerous state of disrepair.

For too long we have neglected to make the critical investments necessary to ensure the United States remains the world leader in goods movement. Consequently, today in Long Beach and other ports around the country we find growing congestion, dangerous roads and safety hazards, increasing levels of pollution and other environmental problems in our communities, especially those near freight corridors like the Alameda Corridor in my home district.

The situation is not much better when it comes to the dredging of our ports and harbors. Global competition has led to the deployment of larger vessels capable of carrying increased tonnage but requiring deeper ports and harbors. That means frequent and better dredging.

However, according to the Army Corps of Engineers only 160 dredging contracts were

awarded last year to dredge 146,747,977 cubic yards of sediment. This is not nearly enough. According to the Department of Transportation, in several strategic ports dredging must be increased as much as 45 to 50 feet to accommodate the larger commercial vessels dominating the shipping industry.

Instead of using funds to maintain and dredge our harbors, we have used more than half the funds collected for that purpose by the Harbor Maintenance Fund to support the budget deficit instead of eliminating the port infrastructure deficit. Currently, the HMT Fund has a surplus of approximately \$4,600,000,000. In fiscal year 2009, more than \$1.6 billion was collected by only \$710 million, 43.7 percent, was appropriated for dredging operations.

Mr. Speaker, when it comes to port infrastructure the current states of affairs is simply intolerable. We are placing our commercial enterprises at a competitive disadvantage in the global economy. Worse, we are putting our national security at risk.

That is why I have been working to correct this problem since I have been in the Congress. Recently, I introduced three bills:

1. H.R. 3447, "Harbor Maintenance Trust Fund Reform Act," which would provide a reliable and guaranteed source of funding for harbor dredging;

2. H.R. 3446, the "Clean Low-Emission Authorization Nationwide (CLEAN) Ports Act of 2009," which will lead to a reduction in pollution levels plaguing port communities by establishing a grant program to assist port authorities to acquire fuel efficient and low-emission vehicles, equipment and systems; and

3. H.R. 2355, the "Making Opportunity via Efficient and More Effective National Transportation Act of 2009" ("Movement Act"), which provides funding for infrastructure projects that will improve the movement of goods, mitigate environmental damage caused by the movement of goods, and enhance the security of transported goods.

I will discuss these proposals in more detail at another time. But it suffices for now to say that what each of my bills has in common with the provision we have included in the Conference Report is that they all recognize the critical importance of making the necessary investments in port infrastructure to ensure that ports are capable of moving goods efficiently, absorbing new capacity, remaining competitive, and fulfilling its national defense function.

#### CONCLUSION

In conclusion, Mr. Speaker, I support the Conference Report because it restores and enhances the readiness of our troops, equipment, and defense infrastructure. It takes care of our military personnel and their families. And it authorizes the needed investments to keep our Nation strong, safe, and respected in the world. That is why I was proud to have been selected as a member of the Conference and to have signed the Conference Report. I urge my colleagues to join me in supporting the rule and in voting for the bill on final passage.

Mr. LINCOLN DIAZ-BALART of Florida. Mr. Speaker, I yield 7 minutes to my friend, the great leader from Indiana, Mr. PENCE.

Mr. PENCE. Mr. Speaker, I rise in opposition to this rule and in opposition

to the hate crimes provisions and the balance of the National Defense Authorization Act for Fiscal Year 2010.

Throughout my nearly 9 years in Congress, I've been down range with our troops every year, in Afghanistan and Iraq. I've also supported every Defense authorization bill that has come before this body, and so I rise with a heavy heart today to say that I will break that personal tradition in opposing this bill.

Now, no one doubts that the National Defense Authorization Act for Fiscal Year 2010 is an important piece of legislation whose essential elements will provide for our troops the critical resources they need to accomplish their mission. However, the majority in this Congress has cynically included hate crimes provisions in this legislation that threaten the very freedoms of speech and religion that draw our soldiers into the uniform of this Nation.

Men and women throughout our history have put on the uniform for a variety of reasons, some out of a sense of patriotism, some out of a sense of love for their families, love for their country, a sense of duty; but in every single case, I would offer that, from the American Revolution forward, every American who has put on the uniform of this country has done so to defend freedom. Therefore, the very idea that we would erode the freedoms for which our soldiers wear the uniform in a bill that is designed to provide resources those soldiers need to get the job done and come home safe is unconscionable.

It is simply inappropriate to use the Defense bill as a vehicle for divisive liberal social policies wholly unrelated to our country's national security. Here, the Democrats in the majority, with the assent of this administration, are piling liberal social priorities on to the backs of our soldiers. This is disturbing, I suspect, to millions of Americans and counterproductive to the legislative process.

But on to the substance of hate crimes. I find myself in strong agreement this day with Thomas Jefferson who said, and I quote, "Legislative powers of government reach actions only, not opinions." And he actually connected that very principle with the foundation and rationale for the First Amendment. The hate crimes provisions in this legislation, as before, are antithetical to those First Amendment traditions and unnecessary. Violent attacks on people are already illegal, regardless of the motive behind them. And there's no evidence that the underlying violent crimes at issue here are not being fully and aggressively prosecuted under current law.

Therefore, in a practical sense, hate crimes serve no purpose. But they instead penalize people for thoughts, beliefs and attitude and send us down that very slope that Thomas Jefferson warned against. Now, some of these

thoughts and beliefs and attitudes, racism, sexism, bias against people because of their sexual preferences, I find abhorrent. I disdain discrimination. I disdain bigotry. But these hate crimes provisions, including those that will be added to Federal law today, are broad enough to encompass legitimate beliefs, and protecting the rights of freedom and speech and religion must be first and foremost and paramount on the floor of this chamber.

To put it quite simply, adding hate crimes provisions in this Defense bill puts us on a slippery slope of deeming particular groups as more important than others under our system of justice. Singling out particular groups of victims erodes our longstanding legal principle of equal protection under the law as well. The First Amendment of the Constitution provides that Congress shall make no law respecting an establishment of religion or prohibiting the free exercise thereof. America was founded on the notion that the government should not interfere with the religious practices or expressions of our people.

But there is a real possibility that these provisions in this Defense bill having to do with hate crimes and sexual preference could have that effect. These provisions, as written, could result in a chilling effect against religious leaders in this country. As has been previously stated by Judge CARTER of Texas, under section two of title 18 of the U.S. Code today, an individual may be held criminally liable who aids, abets, counsels, commands or induces or procures in the commission of a Federal crime.

Therefore, to put a fine point on it, any pastor, preacher, priest, rabbi, or imam who may give a sermon out of their moral traditions about sexual practices could presumably, under this legislation, be found to have aided, abetted or induced in the commission of a Federal crime. This will have a chilling effect on religious expression from the pulpits, in our temples, in our mosques and in our churches; and it must be undone.

So let me say, as I close, the provisions added to this legislation threaten religious freedom by criminalizing thought. It is simply wrong to further criminalize thought and chill religious expressions of Americans. But let me also say, as I said before, a Defense authorization bill ought to be about the national defense. And here we have, in this majority, in an effort, presumably, any effort to move liberal social policies at home, a willingness to pile unrelated liberal priorities on the backs of an effort to advance our national security. And that's unconscionable.

□ 1100

Let's remember what our soldiers are fighting for. Let's remember why they put on the uniform. They wear the uniform to defend freedom. So let's take a

stand for freedom today and let's take a stand for a legislative process that has genuine integrity to purpose.

I urge my colleagues to vote against the rule, and I sadly urge my colleagues to vote against the Defense authorization bill.

Ms. SLAUGHTER. Mr. Speaker, I yield 2 minutes to the gentleman from Florida (Mr. KLEIN).

Mr. KLEIN of Florida. Thank you to the gentlelady from New York. I rise today to strongly support the rule and the underlying bill, the conference report on the National Defense Authorization Act. I'm grateful to Chairwoman SLAUGHTER for the time to speak, and Chairman SKELTON and the ranking member for crafting a bill that protects our national security in a fiscally responsible way.

This morning, I would like to focus on section 1077, which allows the Department of Veterans Affairs to provide veterans with service dogs that can facilitate treatment of their physical and mental disabilities.

I first introduced the bipartisan Wounded Warrior K-9 Corps Act in July, and I'm proud to have worked out this language in this bill to help keep America's promise to our disabled veterans. The men and women who have served this country and are injured deserve our full and complete support when they return home, and that means doing everything we can to improve their quality of life after their service.

I have seen these programs where they provide service dogs in action. I have witnessed the growth of disabled veterans after working with a guide dog or an animal that can assist them with physical therapy, their mental health, and even their job. These programs succeed, and they're another important way we can strongly stand behind our veterans and their families.

I'd like to thank Senator AL FRANKEN of Minnesota and ED WHITFIELD of Kentucky, who were my indispensable partners in this bipartisan effort. I'd like to also acknowledge David Kildee of the House Armed Services Committee staff, and the Armed Services Committee staff, whose assistance proved crucial in this effort.

Finally, this effort would not be possible without Irwin Stovroff, former World War II POW and someone who's a personal friend and my constituent. He is a guardian angel to many disabled veterans and wounded warriors who depend on him for their service dogs and their quality of life.

I urge my colleagues to support this measure, the conference report, and the rule.

Mr. LINCOLN DIAZ-BALART of Florida. Mr. Speaker, I yield 2 minutes to the gentleman from Arizona (Mr. FLAKE).

Mr. FLAKE. I thank the gentleman for yielding. I do not plan to support

the rule or the underlying legislation. I have some of the concerns that were raised earlier about adding items that don't belong in a Defense bill. We simply shouldn't do that.

But I do rise in support of a provision contained in the Defense authorization conference report that will hopefully shed some light on the process by which earmarks are competitively awarded by the Department of Defense.

Section 1062 of the report represents a compromise between language in the Senate's version of the bill and an amendment dealing with earmarks that I was able to successfully offer in the House bill.

The practice of earmarking, as we all know, has come under significant scrutiny in the media with the advent of the PMA Group scandal when it was revealed earlier this year. Yet, since that time, Congress has taken very little action to actually deal with the root cause of this problem.

The Defense authorization bill, the Defense appropriation bill each contain hundreds of—in one case more than a thousand—individual earmarks, many of which—in fact, in the Defense appropriation bill, more than half of the earmarks are going to for-profit entities. We simply cannot continue to do that.

No Member of Congress should have the ability to provide a sole-source or no-bid contract to their campaign contractors. Until we address the root of that problem, we're going to have problems like this.

A while ago, I worked with the Department of Defense—or, in fact, I've been working with them for several months now—to try to see where these earmarks are going and to see what process they have by which they are competitively bid. I should note that I'm skeptical that this language will do very much good because the Department of Defense tells us now that they follow a process by which earmarks are competitively bid; yet, I provided the Department with a subset of roughly 160 earmarks in the FY 2008 legislation and asked for information regarding the competitive practices used to award these earmarks.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. LINCOLN DIAZ-BALART of Florida. I yield the gentleman an additional 20 seconds.

Mr. FLAKE. After an initial review, though apparently consistent with competitive requirements, it was found that, with uncanny alignment, these earmarks actually went to their intended recipients.

So we have much more work here to do, and I hope in the coming months we can fix this problem completely. Members of Congress shouldn't have the ability to award no-bid contracts to their campaign contributors.

Ms. SLAUGHTER. Mr. Speaker, I yield 2 minutes to the gentlewoman

from New Hampshire (Ms. SHEA-PORTER).

Ms. SHEA-PORTER. I rise in strong support of the conference report on the National Defense Authorization Act. This bill is what Americans have been waiting for. There's a military pay raise of 3.4 percent to say thank you to our troops. We prohibit fee increases on TRICARE patients for 1 year, something many of my constituents have worried about; increases the size of the military and relieves the burden on so many of our troops. It provides money for the National Guard and for Reserve construction projects, saying thank you to the National Guard and recognizing their hard work. It prevents permanent bases in Afghanistan and Iraq.

I'm also pleased that my amendment to repeal the National Security Personnel System has been included in the conference report. The Department of Defense employees will be returned to the previous system, the one that 80 percent of them liked and approved because it was a fairer system.

Mr. LINCOLN DIAZ-BALART of Florida. I yield 2 minutes to my distinguished friend from Virginia (Mr. FORBES).

Mr. FORBES. Mr. Speaker, I rise in opposition to both this rule and the underlying conference report. The American people need to understand the sea change that's taking place with this rule and this conference report. It's the first time we have allowed social policy and the budget to drive our defense posture instead of our defense posture driving the budget. We have men today that are fighting and dying in Afghanistan, and they have no plan.

Now, the law doesn't require that the administration have a plan. Common sense does. Fairness does. But what the law did require was on this report they have a shipbuilding plan so America knows what we're doing with their ships, how they're building, and that they certify that this budget, this authorization bill will meet. And this administration just refused to do it.

The law also requires that they have an aviation plan that just makes sense. But the law requires them to give us a plan to say what they're going to do with our planes and the certification that this conference report does it. They just refuse to do it.

When they sent the report over, they issued a gag order to members in the Pentagon where they couldn't even talk to Congress to tell them where they were putting dollars and which programs they were cutting, and that was just wrong. And then they have labeled their social agenda and overlaid it into a Defense authorization bill.

Mr. Speaker, the American people deserve better, and I hope we will defeat this rule and defeat the underlying conference report.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The Chair will remind all persons in the

gallery that they are here as guests of the House and that any manifestation of approval or disapproval of proceedings or other audible conversation is in violation of the rules of the House.

Ms. SLAUGHTER. I yield 2 minutes to the gentlewoman from Nevada (Ms. BERKLEY).

Ms. BERKLEY. I thank the gentlewoman and I thank her for her hard work on this and every other piece of legislation that this body votes on.

Mr. Speaker, I rise today in support of the conference report of the National Defense Authorization Act. I'm pleased to see that the conference report includes an important provision which would require a study on providing Federal retirement benefits to former Air America employees.

From 1950 to 1976, Air America was a government corporation owned and operated by the CIA that supported America's missions during the cold war. The corporation conducted flight operations in various countries, including China, Korea, and Vietnam, on behalf of the Department of Defense and the CIA.

The CIA conducted Air America operations in secret and did not acknowledge that Air America was a government corporation. Therefore, those Air America employees have never received their government retirement benefits.

This noncontroversial Air America provision included in section 1057 of the conference report simply requires a report from the Director of National Intelligence on the visibility of correcting this oversight and retroactively giving these employees Civil Service Retirement System benefits. It is only right. It is only fair. Air America employees served their country with distinction, often at great risk to themselves. They earned these benefits.

This, in addition to so many other parts of this bill, make it well worth voting for, and I urge my colleagues to support this legislation.

Mr. LINCOLN DIAZ-BALART of Florida. I yield myself such time as I may consume.

Over the last few months, the American people have written and called their Members of Congress or they've made their opinions known at town hall meetings to ask their Congressmen whether they will pledge to read bills before they vote on them. The reason is that the people really were outraged, often finding out the majority leadership forced Congress to vote on a number of sweeping and very expensive bills without giving Members time to understand or really even to read the bills.

For example, we were forced to vote on the final so-called "stimulus" bill, on the omnibus appropriations bill, and on cap-and-trade with less than 24

hours to read the bills; in some instances, much less than 24 hours. And that's no way to run this House. Our constituents are rightly upset.

A recent survey found that 83 percent of Americans believe legislation should be posted online in final form and available for everyone to read before Congress votes on legislation.

You would think, Mr. Speaker, this would not be an issue, as the distinguished Speaker is on record as saying, "Members should have at least 24 hours to examine bills and conference reports before floor consideration." It's even on her Web site; yet, time and time again, the distinguished Speaker and majority leadership have refused to live up to their pledge. That is why a bipartisan group of 182 Members have signed a discharge petition to consider a bill that would require that all legislation and conference reports be made available to Members of Congress and the general public for 72 hours before they be brought to the House floor for a vote.

That's why today I will be asking for a "no" vote on the previous question so that we can amend this rule and allow the House to consider that legislation, H. Res. 544, a bipartisan bill by my colleagues, Representatives BAIRD and CULBERSON.

I know that Members are concerned that this motion may jeopardize the Department of Defense Authorization Act. But I want to make clear, the motion I am making provides for separate consideration of the Baird-Culberson bill within 3 days. So we can pass the Defense authorization bill today and then, once we are done, consider H. Res. 544.

Mr. Speaker, I ask unanimous consent to insert the text of the amendment and the extraneous materials immediately prior to the vote on the previous question.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. LINCOLN DIAZ-BALART of Florida. I yield back the balance of my time.

AMENDMENT OFFERED BY MS. SLAUGHTER

Ms. SLAUGHTER. Mr. Speaker, I have an amendment to the rule at the desk.

The SPEAKER pro tempore. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Ms. SLAUGHTER:

At the end of the resolution, add the following:

"SEC. 2. Upon the adoption of the conference report the House shall be considered to have adopted the concurrent resolution (H. Con. Res. 196) making corrections in the enrollment of the bill H.R. 2647."

The material previously referred to by Mr. LINCOLN DIAZ-BALART of Florida is as follows:

AMENDMENT TO H. RES. 808

OFFERED BY MR. LINCOLN DIAZ-BALART OF FLORIDA

At the end of the resolution, insert the following new section:

SEC. 3. On the third legislative day after the adoption of this resolution, immediately after the third daily order of business under clause 1 of rule XIV and without intervention of any point of order, the House shall proceed to the consideration of the resolution (H. Res. 554) amending the Rules of the House of Representatives to require that legislation and conference reports be available on the Internet for 72 hours before consideration by the House, and for other purposes. The resolution shall be considered as read. The previous question shall be considered as ordered on the resolution and any amendment thereto to final adoption without intervening motion or demand for division of the question except: (1) one hour of debate equally divided and controlled by the chair and ranking minority member of the Committee on Rules; (2) an amendment, if offered by the Minority Leader or his designee and if printed in that portion of the Congressional Record designated for that purpose in clause 8 of rule XVIII at least one legislative day prior to its consideration, which shall be in order without intervention of any point of order or demand for division of the question, shall be considered as read and shall be separately debatable for twenty minutes equally divided and controlled by the proponent and an opponent; and (3) one motion to recommit which shall not contain instructions. Clause 1(c) of rule XIX shall not apply to the consideration of House Resolution 554.

(The information contained herein was provided by Democratic Minority on multiple occasions throughout the 109th Congress.)

THE VOTE ON THE PREVIOUS QUESTION: WHAT IT REALLY MEANS

This vote, the vote on whether to order the previous question on a special rule, is not merely a procedural vote. A vote against ordering the previous question is a vote against the Democratic majority agenda and a vote to allow the opposition, at least for the moment, to offer an alternative plan. It is a vote about what the House should be debating.

Mr. Clarence Cannon's *Precedents of the House of Representatives*, (VI, 308-311) describes the vote on the previous question on the rule as "a motion to direct or control the consideration of the subject before the House being made by the Member in charge." To defeat the previous question is to give the opposition a chance to decide the subject before the House. Cannon cites the Speaker's ruling of January 13, 1920, to the effect that "the refusal of the House to sustain the demand for the previous question passes the control of the resolution to the opposition" in order to offer an amendment. On March 15, 1909, a member of the majority party offered a rule resolution. The House defeated the previous question and a member of the opposition rose to a parliamentary inquiry, asking who was entitled to recognition. Speaker Joseph G. Cannon (R-Illinois) said: "The previous question having been refused, the gentleman from New York, Mr. Fitzgerald, who had asked the gentleman to yield to him for an amendment, is entitled to the first recognition."

Because the vote today may look bad for the Democratic majority they will say "the vote on the previous question is simply a

vote on whether to proceed to an immediate vote on adopting the resolution . . . [and] has no substantive legislative or policy implications whatsoever." But that is not what they have always said. Listen to the definition of the previous question used in the Floor Procedures Manual published by the Rules Committee in the 109th Congress, (page 56). Here's how the Rules Committee described the rule using information from Congressional Quarterly's "American Congressional Dictionary": "If the previous question is defeated, control of debate shifts to the leading opposition member (usually the minority Floor Manager) who then manages an hour of debate and may offer a germane amendment to the pending business."

Deschler's Procedure in the U.S. House of Representatives, the subchapter titled "Amending Special Rules" states: "a refusal to order the previous question on such a rule [a special rule reported from the Committee on Rules] opens the resolution to amendment and further debate." (Chapter 21, section 21.2) Section 21.3 continues: Upon rejection of the motion for the previous question on a resolution reported from the Committee on Rules, control shifts to the Member leading the opposition to the previous question, who may offer a proper amendment or motion and who controls the time for debate thereon."

Clearly, the vote on the previous question on a rule does have substantive policy implications. It is one of the only available tools for those who oppose the Democratic majority's agenda and allows those with alternative views the opportunity to offer an alternative plan.

Ms. SLAUGHTER. Mr. Speaker, I yield back the balance of my time, and I move the previous question on the amendment and the resolution and ask for a "yes" vote.

The SPEAKER pro tempore. The question is on ordering the previous question on the amendment and the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. LINCOLN DIAZ-BALART of Florida. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 and clause 9 of rule XX, this 15-minute vote on ordering the previous question on the amendment and the resolution will be followed by 5-minute votes on the amendment to H. Res. 808, if ordered; adoption of H. Res. 808; motion to suspend the rules on H. Res. 650, H.J. Res. 26, and H.R. 3590.

The vote was taken by electronic device, and there were—yeas 237, nays 187, not voting 8, as follows:

□ 1146

Messrs. BOREN, CASTLE, KUCINICH and Ms. GRANGER changed their vote from "yea" to "nay."

Mr. PASCARELL changed his vote from "nay" to "yea."

So the previous question was ordered.

The result of the vote was announced as above recorded.

The SPEAKER pro tempore. The question is on the amendment offered by the gentlewoman from New York (Ms. SLAUGHTER).

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the resolution, as amended.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

RECORDED VOTE

Mr. LINCOLN DIAZ-BALART of Florida. Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The SPEAKER pro tempore. This will be a 5-minute vote.

The vote was taken by electronic device, and there were—ayes 234, noes 188, not voting 10, as follows:

[Roll No. 765]

## NOT VOTING—10

□ 1153

So the resolution, as amended, was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

# RECOGNIZING THE CONTRIBUTION OF COUNTRY MUSIC TO AMERICAN LIFE AND CULTURE

The SPEAKER pro tempore. The unfinished business is the vote on the motion to suspend the rules and agree to the resolution, H. Res. 650, on which the yeas and nays were ordered.

The Clerk read the title of the resolution.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Colorado (Mr. POLIS) that the House suspend the rules and agree to the resolution, H. Res. 650.

This will be a 5-minute vote.

The vote was taken by electronic device, and there were—yeas 421, nays 0, not voting 11, as follows:

[Roll No. 766]

## NOT VOTING—16

Marshall Radanovich  
McCarthy (NY) Smith (TX)  
Moran (VA) Speier  
Murtha Tsongas  
Neugebauer  
Pingree (ME)

□ 1215

So (two-thirds being in the affirmative) the rules were suspended and the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Stated for:

Mr. CUELLAR. Mr. Speaker, on rollcall No. 768, had I been present, I would have voted "yea."

# CONFERENCE REPORT ON H.R. 2647, NATIONAL DEFENSE AUTHORIZATION ACT FOR FISCAL YEAR 2010

Mr. SKELTON. Mr. Speaker, pursuant to House Resolution 808, I call up the conference report on the bill (H.R. 2647) to authorize appropriations for fiscal year 2010 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe military personnel strengths for such fiscal year, to provide special pays and allowances to certain members of the Armed Forces, expand concurrent receipt of military retirement and VA disability benefits to disabled military retirees, and for other purposes, and ask for its immediate consideration.

The Clerk read the title of the bill.

□ 1215

## POINT OF ORDER

Mr. PRICE of Georgia. Mr. Speaker, I raise a point of order against H.R. 2647.

The SPEAKER pro tempore. The gentleman will state his point of order.

Mr. PRICE of Georgia. Pursuant to clause 10 of rule XXII that states that nongermane items may not be included in conference reports and that this bill contains a nongermane item in the hate crimes legislation that was included in it, I raise a point of order against H.R. 2647.

The SPEAKER pro tempore. Pursuant to House Resolution 808, all points of order against the conference report are waived.

## PARLIAMENTARY INQUIRY

Mr. PRICE of Georgia. Mr. Speaker, parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state his parliamentary inquiry.

Mr. PRICE of Georgia. Mr. Speaker, many Members have grave concerns about the thought-crimes legislation that's included in H.R. 2647. Is there any way for any Member to gain a separate vote on the thought-crimes legislation included in H.R. 2647 under the rule?

The SPEAKER pro tempore. A conference report is considered as a whole.

Mr. PRICE of Georgia. Mr. Speaker, further parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state his parliamentary inquiry.

Mr. PRICE of Georgia. Mr. Speaker, because thought-crimes legislation is included in H.R. 2647, is there any remedy that a Member of the House has for gaining access to have a separate vote on the thought-crimes legislation?

The SPEAKER pro tempore. A conference report is considered as a whole.

Mr. PRICE of Georgia. I thank the Speaker.

The SPEAKER pro tempore. Pursuant to House Resolution 808, the conference report is considered read.

(For conference report and statement, see proceedings of the House of October 7, 2009, at page 23796.)

The gentleman from Missouri (Mr. SKELTON) and the gentleman from California (Mr. MCKEON) each will control 30 minutes.

The Chair recognizes the gentleman from Missouri.

## GENERAL LEAVE

Mr. SKELTON. Mr. Speaker, I ask unanimous consent that all Members have 5 legislative days in which to revise and extend their remarks on the conference report currently under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. SKELTON. I yield myself such time as I may consume.

Mr. Speaker, I am pleased to bring before the House the conference report on H.R. 2647, the National Defense Authorization Act for fiscal year 2010. I especially want to thank my ranking member, my good friend, BUCK McKEON, the gentleman from California, our partners in the Senate, Senator CARL LEVIN and Senator JOHN MCCAIN, and all the conferees from the Armed Services and 13 other committees who have made this conference report a reality.

Mr. McKEON, brand new as ranking member of our committee, hit the ground running and has done yeoman's work, and I particularly wish to single him out and express my appreciation for the work he has done to help bring this to the floor.

Mr. Speaker, this bill has a base of \$550 billion for the United States military. This has \$130 billion for the wars in Afghanistan and in Iraq, which total \$680 billion.

Mr. Speaker, we are at war. This is a deadly serious moment in this body. This bill is critical for national security, and I am pleased to say this bill gets it right.

The conference report provides several major victories for our troops and their families, and the bill strikes a right balance between our focus on the immediate fights in Afghanistan and Iraq and the long-term needs of our military.

The vast majority of this bill has bipartisan support. The bill provides almost \$20 billion combined for Army and Marine Corps reset and equipment shortfalls in the Guard and Reserves. It has \$550 million for Army barracks and Guard and Reserve infrastructure. To boost readiness and reduce the strain on our forces, the bill increases the size of the military all across four services and authorizes an additional 30,000 Army troops in fiscal years 2011 and 2012.

This bill reflects our effort to recognize 2009 as the Year of the Military Family by providing a 3.4 percent pay raise for all servicemembers. The bill also extends the authority of the Defense Department to offer bonuses and incentive pay. It expands TRICARE health coverage. It prohibits fee increases on TRICARE inpatient care for a year, provides for \$2.2 billion for family housing programs and improves the benefits available to wounded warriors.

To ensure our strategy in Afghanistan and neighboring Pakistan is effective, this bill requires the President to assess U.S. efforts and report on the progress. The bill authorizes funds to train and equip the Afghan National Security Forces and authorize the Pakistan Counterinsurgency Fund. The bill improves accountability and oversight of U.S. assistance. The bill also requires the Secretary of Defense to submit a report on the responsible redeployment of U.S. forces out of Iraq.

On acquisition reform, the conference report supports the plan to increase the size of the acquisition workforce and reduce reliance on contractors for acquisition functions.

It eliminates waste, fraud, and abuse through better contract oversight. The bill also repeals the National Security Personnel System, returning employees to the general schedule over 2 years while providing additional flexibility for hiring and personnel management.

The conference agreement prohibits the release of Guantanamo Bay detainees into the United States, its territories and possessions, and restricts detainee transfers until after the President has submitted a plan to Congress.

The conference report revises the Military Commissions Act to make military commissions fair and effective and ensure that convictions stick.

Let me briefly address two difficult aspects of the conference report.

First, I am disappointed, and so very disappointed, that we were not able to retain the House's provision implementing the President's proposal on concurrent receipt for disabled military retirees. The Armed Services Committee fought hard with the assistance of our leadership and many other committees to pay for that proposal. The Senate's budget rules, however, would not support a solution. And I urge the President to work with us in a way to pay for this, which will meet the budgetary rules of both the House and the Senate.

Finally, regarding the Hate Crimes Prevention Act, I have said several times that I would have preferred it to have been enacted as a stand-alone bill, not on this Defense bill. But it's important to note that the conferees included important sentencing guidelines for crimes against military service-members and added protections for the first amendment rights of preachers and ministers to that bill.

I might add, Mr. Speaker, that the Senate passed its version of the bill with the hate crimes provision by a vote of 87-7, which is a strong bipartisan vote in the United States Senate.

Whatever one's position on hate crimes, I believe that the enormous good done in this legislation merits its support by every Member of the House.

Mr. Speaker, we are at war. We should support the troops. We should support their families. We should make sure that they have the finest equipment and training possible. That's what this bill does. This bill will support our troops in the field and their families at home and meet our Nation's immediate military requirements and preserve the ability to deter and respond to future threats.

I urge the House to vote for this conference report and move it to the President's desk as soon as possible.

I reserve the balance of my time.

Mr. McKEON. Mr. Speaker, as legislators, we meet once again to address a

wide range of important national security activities undertaken by the Departments of Defense and Energy.

We all take our legislative responsibilities very seriously. This is especially true during a time of war, and it's always true of my good friend and colleague, Armed Services Committee Chairman IKE SKELTON, the gentleman from Missouri. I commend Chairman SKELTON for shepherding this bill through the conference process. IKE, you've done a remarkable job.

As most of you in the Chamber know, this conference report contains hate crimes legislation. This is anathema to me. I am opposed to hate crimes legislation, and I am especially opposed to the procedure of putting it on a Defense bill—especially in time of war, using our troops to get this legislation passed. It's not germane to the work of the committee and needlessly introduces a partisan matter in an otherwise bipartisan bill.

I've consistently opposed the passage of hate crimes legislation personally, and I continue to oppose it today. Unfortunately, congressional Democrats made the political decision to attach the hate crimes legislation to this bill. I oppose, as I said, using the men and women of the military as a leverage to pass this partisan legislation.

What should have been included in the bill is concurrent receipts. The House bill included a one-year expansion of concurrent receipts of military disability retired pay and veterans' disability compensation for our medically retired veterans. The House provision should have prevailed over the Senate procedural hurdles. We owe this to our veterans.

Though flawed, this bill has my support.

This conference report authorizes over \$550 billion in budget authority for the Department of Defense and the national security programs of the Department of Energy. Additionally, the legislation authorizes over \$129 billion in supplemental funding to support operations in Iraq, Afghanistan, and elsewhere in the global war on terror.

This bill rightfully acknowledges that the United States has a vital national security interest in ensuring that Afghanistan does not once again become a safe haven for terrorists and supports a comprehensive counterinsurgency strategy that is adequately resourced and funded by Congress.

The conference report supports our strategy in Afghanistan in a number of ways. The bill authorizes \$1.3 billion for the Commander's Emergency Response Program, which is unique authority critical to implementing General McChrystal's counterinsurgency operations. Additionally, the conference report authorizes \$7.4 billion for the Afghan Security Forces Fund. These funds are the key to increasing the size and professionalism of the Afghan National Security Forces.

Finally, this bill reauthorizes expired DOD contingency construction authority to rapidly authorize and build facilities needed to support the war in Afghanistan.

With respect to Iraq, the report ensures that the Congress will support the President's plan to redeploy combat forces while providing our commanders on the ground the flexibility to hold hard-fought security gains and to ensure the safety of our forces.

Mr. Speaker, as Members of Congress, we owe our soldiers, sailors, airmen, and marines the very best available equipment, training, and support in order to provide them with the best possible tools to undertake their mission. The provisions in this bill go a considerable way in demonstrating this support. In particular, the House provision prevailed in a couple of critical areas.

This bill funds the alternate engine for the Joint Strike Fighter, provides \$430 million in RDT&E for continued development of the F136 engine, and provides \$130 million for F136 engine procurement. Finally, the conference report includes a multi-year procurement contract for additional F-18s.

As a Nation, we owe more than our gratitude to the brave men and women in uniform and their families, past and present, for the sacrifices they make to protect our freedom. I am pleased that this legislation includes a 3.4 percent pay raise, which is a half percentage point above the President's request. We also increase active duty end strength by 55,227 over fiscal year 2009 levels. This is essential for easing the burden on our current forces.

□ 1230

I'm pleased that this conference report prohibits any increases to TRICARE Prime and TRICARE Standard health care fees. Finally, the bill increases from \$500 to \$1,100 the maximum monthly supplemental subsistence allowance paid by DOD to low-income members with dependents, so that military members need not rely on food stamps.

In closing, Mr. Speaker, I want to say to my fellow Republicans, I understand your opposition to the inclusion of hate crimes in the Defense authorization bill. I committed to each of you that this vote should be a vote of conscience, and I understand you're on the horns of a dilemma. I understand your opposition to hate crimes, and I understand this terrible position you've been put in. But I know that if you vote against this bill because of the hate crimes legislation, it does not diminish in any way your support of the troops and the men and women in our Armed Forces.

When I became ranking member of the Armed Services Committee, I made a commitment to each of you and our men and women in uniform and their

families that I would do everything in my power to provide our soldiers, sailors, airmen and marines with the support they desperately need and deserve. As the ranking member of the Armed Services Committee, so long as America's sons and daughters are under fire in combat, fighting for our country, I have the obligation to support them first above everything else.

Mr. Speaker, I reserve the balance of my time.

Mr. SKELTON. Mr. Speaker, I commend the gentleman from California (Mr. McKEON) for his straightforward commitment to the young men and women in American uniform. At this time I yield 3 minutes to my colleague, my friend, the chairman of the Subcommittee on Readiness, the gentleman from Texas (Mr. ORTIZ).

Mr. ORTIZ. Mr. Speaker, I rise in support of the conference report for H.R. 2647, the National Defense Authorization Act for Fiscal Year 2010. This is, my friends, a very, very good bill; and we cannot ignore the fact that we are fighting two wars. We're fighting a war in Afghanistan and a war in Iraq. The conference report before us today reflects our efforts to strengthen the readiness posture of our Armed Forces. It authorizes a total of \$244.5 billion for operations and maintenance, including \$4.7 billion for Army training, \$13 billion for Army and Marine Corps equipment reset, and \$255.3 million for pre-positioned stocks.

The conference report adds \$70 million to address Navy aviation depot maintenance. It provides \$350 million to replace rundown Army barracks, and adds \$200 million for National Guard and Reserve construction projects. It funds the 2005 BRAC account at \$7.4 billion and adds \$100 million to address the environmental issues at bases closed prior to 2005.

The conference report expands the Homeowners Assistance Program and provides \$300 million to help ensure that servicemembers who were forced to move during the real estate downturn are not severely affected financially. The conference report supports energy security by authorizing \$12.3 million for energy conservation projects on military installations and programs that enable the Defense Department to reduce energy used during times of peak demand.

The conference report repeals the NSPS and transitions DOD civilian employees back to the General Schedule by January 1, 2012. At the same time, it provides the Department flexibilities to ensure efficient hiring and effective personnel management. The conference report allows FERS employees to receive credit for unused sick leave toward their retirement annuity. It provides locality pay for Federal workers in Hawaii, Alaska and the United States territories.

My friends, this is a good conference report that reflects our bipartisan de-

sire to improve readiness and balance the many priorities of our military around the world and domestically. My friends, I urge you to support this bill. It is a good bill and it gives our troops what they deserve and they need.

Mr. McKEON. I am happy to yield, at this time, to the gentleman from Maryland, ranking member on the Air, Land Subcommittee, Mr. BARTLETT, such time as he may consume.

Mr. BARTLETT. Mr. Speaker, I want to thank my subcommittee chairman, Mr. ABERCROMBIE, as well as HASC chairman IKE SKELTON and Ranking Member BUCK McKEON for their collaborative leadership drafting this vital bill. I also thank the staff members who serve us so well. Thank you, thank you.

Overall, this is an excellent conference report. That is why I'm appalled that my colleagues would violate House rules and pervert this annual national military strategy bill by including the totally unrelated partisan Senate amendment. With deep regret, I resolutely urge my colleagues to vote "no" on this conference report. I've dedicated almost 40 years to protecting the lives of the men and women who serve in our military. For 20 years I invented and worked on defense projects to provide them lifesaving equipment, including 19 military patents.

I've been honored to serve for 17 years on the Armed Services Committee with colleagues who have worked tirelessly to achieve our bipartisan goals of providing rules and equipment so that our soldiers, airmen, marines, sailors, and the civilians who support them will succeed in their missions and return home safe.

There isn't time to review all provisions, but highlights of the Air and Land Forces portions which I worked on so hard with Chairman ABERCROMBIE include 30 F-35 aircraft and an increase of \$430 million in research and development for continued F136 engine development and \$130 million for F136 engine procurement; an additional \$600 million, for a total of \$6.9 billion to reduce equipment shortfalls in our National Guard and Reserves; inclusion of my proposed requirements for DOD to establish specific budget line items within the procurement and research, development, test and evaluation accounts for body armor.

This will improve accountability, increase transparency, as well as facilitate the advancement of lighter weight technologies. \$6.7 billion for Mine Resistant Ambush Protected vehicles, \$1.2 billion above the President's request. \$2.45 billion for the President's request for Future Combat Systems communications network and spin-out equipment sets expected to continue as separate programs in fiscal year 2010.

I would like to especially thank Chairman ABERCROMBIE for his leadership and relentless efforts to ensure

continued funding for the F-35 alternate engine program. My unavoidable and regrettable "no" vote is due solely to the inclusion of this extraneous amendment. It violates House rules. It sets a dangerous precedent by including an extraneous and nongermane bill in Congress' annual national defense strategy and policy bill.

Mr. SKELTON. Mr. Speaker, I yield 3½ minutes to my friend, the chairwoman of the Subcommittee on Military Personnel, the gentlelady from California (Mrs. DAVIS).

Mrs. DAVIS of California. Mr. Speaker, I rise in support of H.R. 2647, the National Defense Authorization Act of Fiscal Year 2010. As the chairwoman of the Military Personnel Subcommittee, I'm proud to speak for this bill which continues our commitment to our men and women in uniform and their dedicated families. I want to recognize the ranking member on the subcommittee, Representative JOE WILSON, for his support and assistance.

Mr. Speaker, I would also like to recognize the chairman of the House Armed Services Committee, IKE SKELTON, and the ranking member, BUCK McKEON, for their leadership. These gentlemen exercised extraordinary direction in order to complete another solid Defense authorization bill. I urge my colleagues in the House to vote for this conference report as it provides vital, and I mean vital, support for the armed services during this time of conflict and especially for their families, their families, who face the daily stress and strains of 8 years of war.

Let me highlight a few of the important programs and policies in the conference report which reflect that this has been deemed the year of the military family. The bill provides for a 3.4 percent pay raise. It makes mandatory face-to-face mental health screening for all returning servicemembers. To help schools with large enrollments of military children, it provides \$30 million for Impact Aid, as well as funds to assist military children with severe disabilities.

To that end, it also establishes an Office of Community Support for Military Families with Special Needs. The report expands TRICARE eligibility when it comes to dental programs and provides TRICARE for Reservists called to duty 180 days before they reactivate. It also allows Reserve retirees and their families to buy into TRICARE Standard coverage, and it prohibits an increase in TRICARE fees for inpatient care for 1 year.

To reduce the strain on our forces, the conference report authorizes an additional end-strength increase for the Army for 2010 and makes further increases possible. It also sets up a program to account for missing persons from conflicts beginning with World War II.

Mr. Speaker, we have a moral and constitutional responsibility to ensure

that those who volunteer to defend our Nation have the training and equipment they need to successfully execute their mission. The bill before us recognizes the sacrifices that those in uniform, survivors, retirees and their families are making on behalf of our Nation.

Mr. Speaker, before I yield back, I would also like to express my support for the inclusion of language to strengthen our Federal hate crime laws in this conference report. Hate crimes perpetuate and reinforce historic discrimination and persecution against particular groups. They are committed not simply to harm one particular victim, but to send a message of threat and intimidation to others. Left unchecked, crimes of this kind threaten to unravel the very fabric of American society that our servicemembers fight to protect.

Mr. McKEON. Mr. Speaker, I am happy now to yield to the gentleman from Missouri (Mr. AKIN), ranking member on the Sea Power Subcommittee, 2 minutes.

Mr. AKIN. Mr. Speaker, the bill that's before us today is a product of hundreds and hundreds of hours of hearings, all kinds of work by Members and staff, and by and large it's a good product. It's a political product. It has trade-offs here and there to try to balance one requirement against the other; and it is, once again, a reflection of a committee that I have been honored to be able to serve on for 9 years, a committee that has been largely bipartisan, a committee that has focused on solving problems, defending our Nation, and supporting our troops.

And in all of those regards, this bill is fine, except for there is an elephant in the room. The elephant in the room was an invention of the Senate. They decided to put onto a bill that is focused on supporting our troops their own liberal social agenda of hate crimes legislation. Now, they claim they have the votes to pass that so why don't they pass it somewhere else? Instead, they put it on the backs of our service men and women and expect to use a blackmail kind of approach to have us, to dare us to vote against adding something that's totally extraneous to defense of this Nation on the backs of our service people.

A number of us are saying, as much as we support our troops, as much as we support the hard work of this committee, we believe that this is a poison pill, poisonous enough in fact that we refuse to be blackmailed into voting for a piece of social agenda that has no place in this bill. This is the kind of shenanigans that makes the American public irate. This is the kind of thing, like passing 300 pages of amendments at 3 in the morning, that makes the public nauseous.

And I, for one, as much as I support our troops, indeed, I even have a son

going to Afghanistan in 3 weeks, as much as I support him and the rest of our troops, I will not allow us to be blackmailed into voting for something totally extraneous on this bill; and that's the reason why I will not support the bill.

Mr. SKELTON. I wish to remind my fellow Missourian that the United States Senate voted for the Defense bill with the inclusion of the section that he objects to by 87 votes to 7, a strong bipartisan vote.

I now yield 3 minutes to my friend, the chairman of the subcommittee on Strategic Forces, Mr. LANGEVIN.

□ 1245

Mr. LANGEVIN. I thank the gentleman for yielding. Mr. Speaker, I rise in strong support of the conference agreement on H.R. 2647, the 2010 National Defense Authorization Act. I'd like to personally thank Chairman SKELTON for his outstanding leadership in bringing this bill to the floor and always looking out for our troops, as he always has in the course of his career. I also want to recognize the leadership of Ranking Member McKEON.

As chairman of the Strategic Forces Subcommittee, I'm proud of the provisions this legislation includes to sustain and modernize our strategic weapons systems.

In the area of nuclear weapons, the conference agreement increases funding for the Stockpile Stewardship Program by \$48.7 million and establishes important new guidelines for nuclear weapons stewardship, including a new Stockpile Management Program. The program clarifies that changes to the U.S. nuclear weapons stockpile must be limited to sustaining current capabilities and requires that any changes use weapons components that can be certified without nuclear testing.

Now, regarding ballistic missile defense, this Congress has made this program a priority. The conference agreement fully funds the administration's request of \$9.3 billion for missile defense programs. It authorizes \$1.8 billion for Aegis Ballistic Missile Defense, adding \$23 million for additional SM-3 missiles, and authorizes \$1.1 billion for the Theater High Altitude Area Defense system, or THAAD. These amounts reflect an increase in the funding for these proven systems by \$900 million over the FY 2009 levels.

The bill also authorizes up to \$309 million for the recently announced European missile defense plan if the Secretary of Defense certifies that the system is operationally effective and cost effective in providing protection for Europe and the United States.

Further, the bill includes over \$1 billion to test, sustain, and improve the existing Ground-based Midcourse Defense system, and includes a provision requiring the Department to establish a plan to maintain its operational effectiveness of the system over the course of its service life.

Within the strategic intelligence programs, the conference agreement requires the Department of Energy to develop a plan to ensure that our national security laboratories have sufficient funding and technical abilities to monitor, analyze, and evaluate foreign nuclear weapons activities and requires the Department of Defense to assess gaps in U.S. intelligence for foreign ballistic missile programs and prepare a plan to ensure our intelligence centers can sufficiently address these shortfalls.

Lastly, in addition to our national security priorities, I am pleased that the Federal hate crimes legislation is included in this bill to allow law enforcement to more aggressively pursue individuals who commit violent crimes that are motivated by a person's religion, disability, or sexual orientation.

Finally, I urge my colleagues to support this important legislation. I, again, thank Chairman SKELTON for his outstanding leadership on bringing this bill to the floor and shepherding it through the process. It clearly shows that this Congress is clearly behind our Nation's military and our warfighters.

Mr. McKEON. I'm happy to yield, at this time, 1½ minutes to our conference chairman, the gentleman from Indiana (Mr. PENCE).

Mr. PENCE. I thank the ranking member for yielding, and I thank the ranking member and the distinguished chairman of this committee for their work on the defense elements of this legislation, but I rise with a heavy heart to express my opposition to the National Defense Authorization Act because today's vote isn't just all about providing for the national defense.

Because of actions taken in the United States Senate, unrelated, divisive, liberal social policies have been added to this legislation in the form of hate crimes. For that reason, I must oppose it.

The majority in this Congress and in the Senate has included hate crimes provisions in this legislation that have nothing to do with our national defense and will threaten the very freedoms of speech and freedom of religion that draws the American soldier into the uniform in the first place. Thomas Jefferson said it best: "Legislative powers should reach actions only and not opinions."

The reality is that by expanding the Federal definition of hate crimes, as this legislation does, we will generate a chilling effect on religious leaders in this country. Pastors, preachers, rabbis, and imams will now hesitate to speak about the sexual traditions and teachings of their faith for fear of being found culpable under the aiding, abetting, or inducing provisions of current law, and that must not be. It is just simply wrong to use a bill that's designed to support our troops to erode the very freedoms for which they fight.

As a result, I urge my colleagues to oppose this bill.

Mr. SKELTON. Mr. Speaker, I yield 1 minute to my friend, a member of the Committee on Armed Services, the gentlewoman from Guam (Ms. BORDALLO).

Ms. BORDALLO. Mr. Speaker, I rise today to express my views on the final conference report on the National Defense Authorization Act for Fiscal Year 2010. I want to thank Chairman SKELTON and Ranking Member McKEON for working so closely with me on a compromise to H.R. 44, the Guam World War II Loyalty Recognition Act. I also want to thank Erin Conaton, Paul Arcangeli, Dave Sienicki, Eryn Robinson, Vickie Plunkett, Julie Unmacht, and Andrew Hunter.

Unfortunately, I was disappointed that H.R. 44 was not included in the final Defense authorization bill, but I'm confident that the commitments made by the House and the Senate conferees to hold hearings and to readdress war claims in next year's Defense bill will be honored and that further debate on this important legislation will bring us closer to finally passing this bill.

I, again, want to thank my colleagues in the House who have supported including H.R. 44: Speaker PELOSI, Majority Leader HOYER, Congressman LARSON of our caucus, Members across the aisle, and many others.

Finally, Mr. Speaker, the conference committee report has significant funding commitments for the military buildup, and I thank the committee for this.

Mr. McKEON. I'm happy to yield, at this time, 2 minutes to the Republican whip, the gentleman from Virginia (Mr. CANTOR).

Mr. CANTOR. I thank the gentleman from California and also salute the gentleman from Missouri.

Mr. Speaker, today could have been and should have been marked by bipartisan support for our troops, but instead has become something very different.

The sole purpose of the Department of Defense authorization legislation is to authorize funds to ensure a strong national defense, but today it is being used as a vehicle to force hate crimes legislation through the House, and it is with deep regret that I'm left with no choice but to oppose it.

This legislation and this vote is a political ploy and symbolic of everything that is wrong with Washington. Those who support the Federal criminalization of hate crimes should demand that it be removed from this legislation and be considered solely upon its own merit, not that of our national defense.

I believe that all Americans should be protected from violent crime and viewed equally under the law, and the truth of the matter is that all violent crimes are hateful. Thought crimes are no different.

Our message is simple: All Republicans support our troops, and the issue of hate crimes has nothing to do with our national defense.

One must really question the priorities of this majority. We must not, should not treat our service men and women as political pawns in their effort to force a social agenda upon the court system and the American people.

Mr. SKELTON. I yield 3 minutes to my friend, my colleague, the chairman of the Subcommittee on Seapower and Expeditionary Forces, the gentleman from Mississippi (Mr. TAYLOR).

Mr. TAYLOR. Let me begin by thanking our chairman and ranking member for the phenomenal job they've done.

Let me begin by telling the gentleman from Virginia that I agree with much of what he said. I would also remind the gentleman from Virginia that, like him, I voted to send those young men and women to Iraq and Afghanistan. With that vote came my commitment to equip them, to pay them, to take care of their families should something bad happen to them, to provide them with the very best equipment.

The one thing that every American can agree on is we have the world's best Army. We have the world's best Navy. We have the world's best Marine Corps. We have the world's best Air Force. This bill keeps it that way.

I regret that the other body, by a vote of 87-7, put some language in there that should never be in this bill. But the bottom line is, come November, sometime between Thanksgiving and Christmas, I'm going to be visiting at least 7,000 Mississippians, to the best of my ability trying to see every one of them that I voted to send there. And when I look them in the eye, I want them to know that I voted in support of them over the reservations of one small part of this bill.

The bill does a lot of good things for our Navy. It pays for seven new ships: a DDG-51 class destroyer, the best Destroyer in the world, one that we're going to build for at least another decade; two Littoral Combat Ships; two T-AKE dry cargo ships; a Joint High Speed Vessel; and a *Virginia* class submarine.

It includes language to see to it that our next generation of carrier, with the all-important electromagnetic launch system, will have the proper oversight so that it is delivered on time and on budget. It includes language to see that the Littoral Combat system that, to date, has been poorly handled will be done better in the future with a 10-ship buy, followed by a 5-ship buy, at the best price for whoever is willing to make that ship.

It funds the F-18E/F program, the world's best fighter, except for the F-22, and, quite frankly, a lot more affordable fighter than the F-22.

Lastly, it includes \$6 billion for the most important weapon in our inventory at the moment, and that is the next generation of mine resistant vehicles. Look at the casualty list from Afghanistan. Almost every casualty is a result of an improvised explosive device on a vehicle that is not mine resistant.

The magnificent vehicles that we have built that work so well in Iraq and have saved so many lives in Iraq were, unfortunately, too big and too bulky for the terrain in Afghanistan. That's why we have to come up with a second-generation vehicle. This bill funds 5,000 of those vehicles that when they are delivered, from day one, will start saving lives and bring our friends and our family members back home with their limbs.

So, Mr. Speaker, again, like many of you, I have very, very, very deep concerns and, in fact, anger over some language that was included in this bill. But that is not enough to keep me from voting for funding the troops that serve our Nation so well, giving them the equipment they deserve.

Mr. MCKEON. Mr. Speaker, I'm happy to yield at this time 1½ minutes to the ranking member on the Terrorism, Unconventional Threats and Capabilities Subcommittee, the gentleman from Florida (Mr. MILLER).

Mr. MILLER of Florida. I thank the gentleman for yielding.

Mr. Speaker, it is with great disappointment and, really, sadness today that I rise to inform my colleagues that I, too, will be voting against the Defense authorization conference report.

As the ranking member of the Terrorism, Unconventional Threats and Capabilities Subcommittee, the underlying bill does, in fact, carry a tremendous amount of good things that will help our troops and our Armed Forces, providing what they need as a warfighter to better face today's security challenges.

We have extended to the Secretary of Defense the authority to offer rewards for those individuals who provide information and nonlethal assistance in support of the Department's combating terrorism efforts. We increased the authorization level for Special Operations Command's 1208 authority.

But this is a big thing to many of us. The hate crimes bill is not at all germane to this piece of legislation. The House passed it as a standalone piece of legislation. Our authorization bill, I believe, should not be used as a vehicle to forward this controversial and unconstitutional—and I think unconstitutional—piece of legislation that attacks our First Amendment rights.

□ 1300

The fiscal year 2010 National Defense bill started off as a bipartisan bill. Unfortunately, it has ended up in an ex-

tremely partisan fashion. The outstanding work of this committee, I think, is being belittled.

Mr. SKELTON. Mr. Speaker, I yield 1 minute to my friend, the gentleman from New Jersey (Mr. ANDREWS), a member of the Armed Services Committee.

Mr. ANDREWS. Mr. Speaker, there is not a word in this bill that silences a religious voice or a voice of conscience because of the hate crimes legislation. What there is in this bill is a very important choice that my friend, Mr. TAYLOR, just talked about a minute ago. A few years ago, we discovered to our horror that when vehicles drove over roadside bombs, the floors of the vehicles were not capable of stopping the explosion from killing the troops inside. That problem has manifested itself again in Afghanistan on rugged terrain. This bill funds 5,000 vehicles that will protect the lives of the young Americans who travel that rough terrain.

The choice is not about House procedure or civil rights arguments. The choice is yes or no. For those 5,000 vehicles, for those troops who travel that rough terrain, yes or no. The right vote is "yes." The way to honor our commitment is "yes." I would urge both Republicans and Democrats to vote "yes."

Mr. WILSON of South Carolina. Mr. Speaker, I yield myself 2 minutes.

Mr. Speaker, the conference report increases active and reserve component end-strengths; provides a 3.4 percent pay raise; prohibits increases in TRICARE Prime and Standard cost shares; improves the ability of servicemembers to vote and have their votes counted; and provides numerous improvements to assist wounded warriors.

As a veteran myself and father of four sons serving in the military, I know this is an important bill. However, this conference report falls short of what should be done on behalf of our military and our military families. I am disappointed that the conference report fails to adopt a House provision to allow for concurrent receipt of military disability retired pay and veterans' disability compensation for all disability retirees regardless of disability rating percentage or years of service.

There are numerous explanations for why we did not adopt this paid-for provision, including that the President did not provide the proper offsets, or that the Senate objected to the proposed offsets for the mandatory spending.

In my view, these reasons do not justify inaction on this issue. It sends the wrong message to our military and veterans that this provision was kept out of the conference report.

It is past time we stop talking about support for concurrent receipt and repeals of the offset in the Survivor Benefit Plan-Dependency Indemnity Com-

pensation SBP-DIC offset, the tragic widow's tax. It is time for action to do the right thing now to remove these unfair burdens on widows and disabled military veterans. Sadly, billions of dollars for Cash for Clunkers but lack of consideration for widows and disabled veterans.

Mr. Speaker, the conference report on H.R. 2647, the National Defense Authorization Act for Fiscal Year 2010, has many provisions that improve the strengths and quality of life of active duty and reserve personnel and their families. It increases active and reserve component end-strengths; provides a 3.4% pay raise; prohibits increases in TRICARE Prime and Standard cost shares; improves the ability of service members to vote and have their votes be counted; and provides numerous improvements to assist wounded service members. As a veteran myself, and a father of four sons today in the military, I know this is an important bill. I am the ranking Republican serving on the Military Personnel Subcommittee led by Chairwoman SUSAN DAVIS who I know is devoted to our troops and families.

There are, however, areas where this conference report falls short of what should be done on behalf of our military and their families. I am disappointed that the conference report fails to adopt a House provision, based on the President's proposal, to allow for concurrent receipt of military disability retired pay and veterans' disability compensation for all Chapter 61 disability retirees regardless of disability rating percentage or years of service.

There are numerous explanations for why we did not adopt this paid-for provision, including that the President did not provide the proper offsets, or that the Senate objected to the proposed offsets for the mandatory spending. There are also concerns that the Senate could not muster enough votes on this veterans' issue to overcome a budget point of order against the provision on the floor.

In my view, all these reasons do not justify inaction on this issue. It appears that if this provision had been given the level of priority it demands, leadership both in the House and in the Senate would have found a way to adopt it in the conference report. Just as they found \$3 billion of borrowed money for cash for clunkers in a matter of hours.

The House proposal, based on President Obama's budget request, was paid for, even though it was a flawed proposal to start with. It provided only nine months of concurrent receipt benefits which means they would have expired before the House and Senate could have completed another defense authorization bill to extend the benefit.

If the House Democratic leadership had wanted to, it could have found the funding necessary to offset a fully funded benefit (\$5.2B over 10 years), or, as a minimum, to fund at least 12 to 18 months of benefit to ensure Congress had time to act again.

It sends the wrong message to our military and veterans that this provision was kept out of the conference report. It sends the wrong message in particular when the objection is a procedural matter—a budgetary point of order—that has been ignored by the Senate in previous instances. In fact, the last time it did arise was when we passed TRICARE for Life

and there were votes necessary to defeat the budget point of order.

It should be noted that we had avenues that could have been pursued to address this budgetary concern—namely allowing House repeal of the deepwater drilling to stand as a spending offset. Unfortunately, that option and this opportunity to take action on this issue were not supported.

The bottom line is this. The failure to adopt this provision sends the wrong message to our disabled military veterans that we would not take a modest first step in providing concurrent receipt for all disabled military personnel.

It is past time we stop talking about support for concurrent receipt and repeals of these offset in the Survivor Benefit Plan—Dependency Indemnity Compensation, (SBP–DIC offset) the so-called tragic widow's tax. It is time for action to do the right thing to remove these unfair burdens on widows and disabled military veterans. Sadly, billions for cash for clunkers, but lack of consideration for widows.

I reserve the balance of my time.

Mr. SKELTON. Mr. Speaker, I yield 2 minutes to my friend, my colleague, a member of the Armed Services Committee, the gentleman from Georgia (Mr. MARSHALL).

Mr. MARSHALL. Thank you, Mr. Chairman.

Mr. Speaker, I want to second what the gentleman from New Jersey said just a minute ago. I'm not going to get into the details of the Armed Services authorization part of this bill except to simply say that we do an awful lot of very important good things for our soldiers, their families and for the defense of this country in this bill. It would take an awful lot, an awful lot for me to vote against the bill because something that is nongermane has been included in the bill.

Now I did vote to keep hate crimes out of the bill. That didn't work. I can't tell you how often in this Chamber I have had to vote on bills that included things I didn't want in the bill. It is rare that we have a bill, a large bill, that doesn't include all kinds of things I would prefer to not be in the bill.

There is something that I think is very important to point out about the hate crimes legislation that is in the bill. It's language that was added by Senator SAM BROWNBACK on the Senate side, and it's language which addresses the principal concern that I hear from my constituents about hate crimes legislation. My constituents don't mind putting people in jail for being violent with other folks. They don't have a problem with that at all. They don't have a problem with increasing sentences, not one whit. The longer the better. If you're a criminal, you do the time, and as far as my folks are concerned, you can do more time.

The worry was that somehow the right of individuals, of pastors and others to criticize behavior, to talk about sin, that somehow that right would be infringed upon, that free speech would

be chilled. And I have to thank Senator BROWNBACK because in the bill we have language that takes care of that issue.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. SKELTON. I yield the gentleman 1 additional minute.

Mr. MARSHALL. Thank you, Mr. Chairman.

On pages 1366 and 1367 of the bill, it states:

Nothing in this division, or an amendment made by this division, shall be construed or applied in a manner that infringes any rights under the First Amendment to the Constitution of the United States. Nor shall anything in this division, or an amendment made by this division, be construed or applied in a manner that substantially burdens a person's exercise of religion (regardless of whether compelled by, or central to, a system of religious belief), speech, expression, or association, unless the Government demonstrates that application of the burden to the person is in furtherance of a compelling governmental interest and is the least restrictive means of furthering that compelling governmental interest, if such exercise of religion, speech, expression, or association was not intended to plan or prepare for an act of physical violence; or incite an imminent act of physical violence against another.

My folks don't want people planning or preparing for physical violence. They don't want people inciting physical violence against other folks. They want people to be free to criticize, to argue, to speak and to condemn sin. I think Senator BROWNBACK has hit it exactly right.

Mr. WILSON of South Carolina. Mr. Speaker, I yield 2 minutes to the gentleman from Ohio (Mr. TURNER), the former mayor of Dayton, Ohio.

Mr. TURNER. Mr. Speaker, I would like to thank Chairman SKELTON and Ranking Member McKEON for their leadership and their steadfast support for our men and women in uniform.

The portion of this bill that relates to our strategic forces legislation reflects broad bipartisan agreement. The conference report retains a provision to establish the stockpile management program, strengthen the stockpile stewardship program and preserve the intellectual infrastructure.

I am pleased that the report includes a provision on the START follow-on treaty, which makes it clear that the treaty should not include limitations on missile defense or advanced conventional weapons; and that the enhanced safety, security and reliability of the nuclear weapons stockpile and modernization of the nuclear weapons complex are key to enabling further stockpile reductions.

I am disappointed that the conference sustains the President's cut of \$1.2 billion to our missile defense sys-

tems. These cuts come despite significant activity in Iran and North Korea's ballistic missile and nuclear weapons programs.

I introduced a provision which would have increased funds for the European missile defense sites in Poland and the Czech Republic and open the door to an alternative only if the Secretary of Defense certified that it was at least as cost effective and operationally available as the Czech and Polish-based system. Unfortunately, my amendment was diluted as the Defense bill passed. However, I still expect the administration to address its intent.

In missile defense, I am pleased that the report authorizes an increase of \$20 million to sustain the GMD industrial base and \$23 million for additional SM-3 interceptors.

In another area, I am concerned that this report does not include the House-passed language protecting child custody arrangements for servicemembers. I want to thank Chairman SKELTON for his bipartisan support on this issue. The language which I offered has consistently been opposed by the Senate and the Department of Defense, although it has passed the House four times.

While the report includes a study to be undertaken by March 31, 2010, studying this issue and waiting for States to enact custody protections is not a strategy to solve this problem. Our men and women in uniform serve in a Federal military and deserve Federal action on this issue.

I appreciate the work that has been done on this bill.

Mr. SKELTON. May I inquire as to the amount of time remaining.

The SPEAKER pro tempore. The gentleman from Missouri has 5½ minutes remaining. The gentleman from South Carolina has 11 minutes remaining.

Mr. SKELTON. I yield 1 minute to my friend, the gentleman from New York (Mr. NADLER).

Mr. NADLER of New York. I thank the gentleman.

Mr. Speaker, I rise in support of this conference report with some serious reservations. This legislation will finally enact the Local Law Enforcement Hate Crimes Prevention Act. That is a historic, albeit long overdue, accomplishment.

I am concerned, however, about the section dealing with military commissions. President Obama's goal, which I share, is a system that is fair, legitimate and effective. But we already have that in the Uniform Code of Military Justice and our Article III courts. We should use these existing tools and stop insisting on a new and inevitably second-class military commissions system. But given the existing Military Commissions Act of 2006, which allows

for the admission of statements obtained through the use of cruel, inhuman and degrading interrogation methods, we should support the improvements in this bill—placing further limits on the use of coerced testimony and hearsay; expanding the scope of appellate review to include review of facts and not just law; and taking greater account of the need for adequate defense counsel and resources. These changes do not go far enough, and additional changes suggested by the Judiciary Committee—including a sunset provision, a voluntariness requirement for all statements, a different appeals structure, and a prohibition on the trial of child soldiers by military commission—should have been adopted. Nonetheless, I support the improvements made by this conference report with the hope that we can make further progress in the future.

I urge my colleagues to vote for this conference report.

Mr. Speaker, whether it is because of the actual or perceived race, color, religion, national origin, sexual orientation, gender, gender identity, or disability of the victim, these violent acts causing death or bodily injury target not just an individual but an entire group. These crimes do, and are often intended to, spread terror among all members of the group.

Today, we have the opportunity to do the right thing. I hope we can agree to do so.

I am concerned, however, about the section dealing with military commissions. It makes some important improvements, but in some key ways the system will remain at odds with our best traditions.

When President Obama initially suspended use of military commissions, I was optimistic that we had seen the end of this flawed system. President Obama has since signaled his intent to revive the commissions, and has called for reforms that would bring them in line with the rule of law. President Obama's goal which I share, is a system that is fair, legitimate, and effective. But we already have that in the Uniform Code of Military Justice and our Article III courts. We should use these existing tools and stop insisting on a new and inevitably second-class military commission system.

But, given the existing Military Commissions Act of 2006, which can be used to try detainees and allows for the admission of statements obtained through the use of cruel, inhuman, and degrading interrogation methods, we should support the improvements in this bill. This bill improves existing law by placing further limits on the use of coerced testimony and hearsay, expanding the scope of appellate review to include review of facts and not just law, and taking greater account of the need for adequate defense counsel and resources. These changes do not go far enough, and additional changes suggested by the Judiciary Committee—including a sunset provision, a limitation on the use of military commissions for Guantanamo detainees, a voluntariness requirement for all statements, a different appeals structure, and a prohibition on the trial of child soldiers by military com-

mission—should have been adopted. Nonetheless, I support the improvements made by this conference report, with the hope that we can make further progress in the future.

So I will support this conference report, mindful that our work is not done. I urge my colleagues to do the same.

Mr. WILSON of South Carolina. Mr. Speaker, I yield 2 minutes to Congressman WITTMAN who represents America's historic First District of Virginia.

Mr. WITTMAN. Mr. Speaker, I rise today to speak on the conference report for H.R. 2647, the National Defense Authorization Act.

The members of the House Armed Services Committee are dedicated to supporting our servicemembers and their families, and as such, this bill includes an appropriate increase in military pay and improves veterans care.

I am pleased to see that the bill makes progress towards strengthening our naval presence on the high seas. We must continue to develop the industrial base and promote shipbuilding to establish a floor, not a ceiling, of 313 ships in our Navy.

I do, though, remain troubled by the absence of a 30-year shipbuilding plan and a 30-year military aviation plan. Without these, critical perspective is lost. The bill provides a temporary waiver for the number of carriers to dip below 11, but my reservations remain. Maintaining 11 aircraft carriers is essential to maintaining our long-term naval superiority.

The strategic risk we accept in this Defense authorization bill is also of particular importance. As we consider strategic threats urgently facing our country today, it is troubling that the bill reduces missile defense funding by \$1.2 billion.

This bill also includes \$46 million for channel dredging at Naval Station Mayport, Florida. It is fiscally irresponsible to spend money on dredging and preparing to homeport a nuclear aircraft carrier prior to the conclusion of the Quadrennial Defense Review.

Unfortunately, the Senate also added a provision to expand the Federal jurisdiction over hate crimes. Proponents of this provision are using this national security bill to get this legislation to the President's desk through the back door, a tactic we have seen repeated over the last 9 months. This bill is about national security, not social legislation. To use the circumstances of our sons and daughters in harm's way to legislate on social issues is unconscionable. We should not use a bill in support of our servicemembers to promote social legislation. I urge my colleagues to continue in the future to work towards a better alternative.

I would like to thank my colleagues, Ranking Member MCKEON and Chairman SKELTON, for their work in bringing this bill to the floor. But we can do better, and we must.

Mr. SKELTON. I yield 1½ minutes to my friend and chairman of the com-

mittee on Oversight and Government Reform, the gentleman from New York (Mr. TOWNS).

Mr. TOWNS. Thank you very much, Chairman SKELTON.

As chairman of the Oversight and Government Reform Committee, I rise in support of the conference agreement on the National Defense Authorization Act for Fiscal Year 2010. Title 19 of the bill makes important updates to the retirement system for Federal employees.

□ 1315

These changes will improve the retirement system's effectiveness as a recruiting and management tool at a time when we need to attract the best and the brightest of the Federal workforce. The reforms eliminate inconsistency in the way part-time service, breaks in service, and unused sick leave are considered in calculating retirement benefits. It helps civilian workers at the Department of Defense, the largest employer in the Federal Government.

I also support the repeal of the National Security Personnel System. This system implemented by DOD has been a near-total failure, and I support making a fresh start.

I also support the report's continued funding for programs at historically black colleges, universities, and minority-serving institutions to ensure that students are trained to meet our Nation's defense research and technological needs.

I thank Chairman SKELTON and the other conferees for their support. I urge all Members to support this conference report. Again, I want to thank all of the staff members who made this possible.

Mr. WILSON of South Carolina. Mr. Speaker, I yield 1 minute to the gentleman from Texas (Mr. GOHMERT).

Mr. GOHMERT. Mr. Speaker, I do appreciate our dear chairman from Missouri, Chairman SKELTON. He commented that we are at war, this is deadly serious, and he is right. Our troops need our support, and having been in the Army at Fort Benning at a time when we were being cut in the late 1970s, I am very sensitive to that. But our troops are fighting for freedom as well.

Bringing a hate crimes bill that is based on two false premises and putting it on the backs of our soldiers is wrong. It should not be done. We have heard from a majority Member that if we vote this down, the hate crimes will be pulled off, and then we can vote for the pay raise that these people justly deserve. There is no escalation in hate crime numbers. The FBI statistics show they have been continually going down. This would not change the outcome of the Matthew Shepard case. They got life; the maximum here is life. In the James Byrd case, the two

most culpable got the death penalty; the maximum here is life. All this would do is bring that penalty down.

This is based on false assumptions. It should not be added to our soldiers' backs. Let's get a clean bill.

Mr. SKELTON. Mr. Speaker, I reserve the balance of my time.

Mr. WILSON of South Carolina. Mr. Speaker, I yield 1 minute to the gentleman from Indiana (Mr. BURTON).

Mr. BURTON of Indiana. Mr. Speaker, we all support our troops. I don't think anybody doubts that. So why are we adding a hate crimes amendment to this bill? Why are we doing social engineering on the backs of our troops on a defense bill? I think it is being done for political purposes. I think that there are people on the other side that want to put Republicans in a political trick bag in the next election, and I think that is very unfortunate.

We should be worrying about the defense of this Nation and the men and women fighting in Afghanistan and Iraq today. We should not be doing social engineering on this bill. It is just wrong. I think it is being done for political purposes. I just say to my colleagues on the other side who are doing it, shame on you.

Mr. SKELTON. I continue to reserve my time.

Mr. WILSON of South Carolina. Mr. Speaker, I respectfully reserve my time on behalf of the Republican leader who will be here shortly.

Mr. SKELTON. Mr. Speaker, I yield 1 minute to my friend, my colleague, the distinguished majority leader, the gentleman from Maryland (Mr. HOYER).

Mr. HOYER. I thank the chairman for yielding. I thank the ranking member for his leadership.

I want to say particularly as I start that the distinguished chairman of this committee does America a great service. This is a critical bill for our Nation and for our men and women in uniform. There is no greater advocate of America's readiness or the quality of life of our service personnel than the gentleman from Missouri (Mr. SKELTON). I want to thank him for his leadership.

Mr. Speaker, I rise to support the conference report on this vital bill for fiscal year 2010, which takes important steps to enhance our military readiness, our national security, and the well-being of our military families, and I might add our Federal employees, our civilian personnel as well.

I particularly want to thank Chairman SKELTON, the Armed Services Committee and staff for their months of hard work to bring this legislation close to enactment. I know on the staff, this has been tough. The conference was tough.

In sum, the conference report authorizes \$550.2 billion in budget authority for the Department of Defense and the national security programs at the Department of Energy, as well as \$130 bil-

lion for overseas contingency operations. It is a serious response to the real, immediate, and rapidly changing threats our Nation and our troops face.

Among its most important provisions are those that help to rebuild our Armed Forces, which are worn down after years of war.

It provides \$11 billion and \$2 billion to re-equip the Army and Marine Corps respectively, as well as \$6.9 billion to meet equipment shortfalls in the National Guard and Reserve.

In line with President Obama's request, it also adds an additional 30,000 troops to the Army, 14,650 to the Air Force, 8,100 to the Marines, and 2,477 to the Navy. I believe these are critical provisions. We are asking our men and women to serve long tours at great risk. The trauma that they are experiencing is very substantial. The ops tempo, as we call it, is such that if we do not increase our forces, we will not be able to give the proper rest that our troops need. So I congratulate the committee for attending to that issue.

It authorizes 30,000 more Army troops in fiscal years 2011 and 2012. Our Nation has made the proper decision to confront those who would cause us risk. But if we are going to do so, we must properly resource our services with the proper number of personnel.

To ensure safety and dignified living standards for those troops, it commits \$350 million to construct new Army training barracks and \$200 million for facilities in the National Guard and Reserve.

This conference report also orients our country in the direction of the new national security strategy put forward by the Obama administration, which includes redeployment from Iraq and a commitment to the stability of Afghanistan and Pakistan. The conference report reflects those priorities.

Mr. Speaker, I have other matters that I could speak to, but I think everyone on this floor knows the importance of this bill. I note the presence on the floor of, like Mr. SKELTON, one of the great leaders in supporting our Armed Forces on the floor with me, my good and dear friend BILL YOUNG from the State of Florida, as the ranking Republican on the Appropriations Subcommittee. I want to thank him for his leadership. Mr. YOUNG has been here, IKE, longer than either one of us has been here, and he has served his country very well. It is appropriate that he is on the floor as we consider this important bill.

In closing, Mr. Speaker, I would urge every Member in this House to support this bill which supports our troops, to support this bill which authorizes the funds necessary to respond to the needs and the policies of the United States of America in protecting our citizens and our homeland from those who would undermine our security and safety, who would attack our property and persons. That's what this bill is about.

This bill has many items in it, some more controversial than others. But at heart, this bill is about our troops and about America's security. I would hope and urge every one of my colleagues, when the roll is called, to vote "aye" on this critically important bill for the security of the United States of America.

Mr. SKELTON. I congratulate you for your leadership. You are one of America's great patriots and leaders, and I am proud to be your colleague.

Mr. WILSON of South Carolina. Mr. Speaker, I reserve the balance of my time for the gentleman from Ohio (Mr. BOEHNER), the Republican leader, for when he arrives.

Mr. SKELTON. Does the gentleman from South Carolina have any additional speakers?

Mr. WILSON of South Carolina. We are reserving our full time for the gentleman from Ohio (Mr. BOEHNER) as soon as he arrives.

Mr. SKELTON. I prefer to close, Mr. Speaker, after the gentleman from Ohio speaks.

Mr. WILSON of South Carolina. Mr. Speaker, as we close on the Republican side, indeed, this is such an important bill for the military of our country. As has been indicated by so many of my colleagues, with the highest regard that we have for the chairman of the House Armed Services Committee, there is great distress over the additional language that should not have been added to this bill.

Mr. Speaker, I yield back the balance of my time.

Mr. SKELTON. Mr. Speaker, in your mind's eye picture a young Army corporal preparing to drive down a road in his security vehicle to help in an ongoing firefight in the mountains of Afghanistan. Picture in your mind this young corporal dressed in the Army fatigue uniform, an M16A2 standard-issue rifle in his hand with bullets made in America for that M16A2, wearing body armor furnished him and in the latest security vehicle provided by the United States Army.

□ 1330

That M16A2 rifle was furnished by the Congress of the United States. The ammunition for that rifle was furnished by the Congress of the United States. The body armor on that soldier was furnished by the Congress of the United States, and the vehicle in which he rides, that security vehicle was furnished by the Congress of the United States.

As a young soldier, this young corporal goes down the road, look at that soldier and answer the question, Did you vote to support me as a Member of Congress of the United States?

Ms. LEE of California. Mr. Speaker, for the first time in my tenure I rise today in support of the conference report on H.R. 2647, the National Defense Authorization Act for FY 2010.

I still believe that we must bring common sense to our runaway defense spending and end support for outdated cold war era weapons systems that are costing taxpayers over \$60 billion a year without any appreciable benefit to our national security.

While I am pleased to see that H.R. 2647 includes language prohibiting the establishment of permanent military bases in Iraq or Afghanistan, I continue to have serious concerns that the authorization for overseas operations included in this bill threatens to further entrench the United States in conflict and continue us down a path to war without end.

Mr. Speaker, I will continue to oppose a military-first foreign policy strategy which endangers our troops and our national security, and undermines our ability to meet the needs of the American people.

But today, I will be supporting this bill in the interest of all past, present, and potential victims of hate crimes and discrimination.

It is long past time that we protect Americans against hate violence by ensuring hate crimes are fully prosecuted under the law, as provided for in this bill.

No individual should face discrimination, fear, or violence on the basis of race, color, religion, national origin, gender, sexual orientation, gender identity, or disability.

Mr. POSEY. Mr. Speaker, this is a sad day in the House of Representatives. The Majority chose to add to the defense bill a totally unrelated and highly controversial bill, commonly called the Thought Crimes Bill or the Hate Crimes bill. There are serious concerns that religious leaders promoting traditional morality may be subject to potential criminal liability under this bill as prosecutors blur the line between what constitutes a "hate crime" and what they deem hate speech. Last minute changes to the Thought Crimes bill stripped important religious freedom protections and constitute further abuse of power. While no one should condone acts of hatred toward others, this bill goes far beyond its stated purpose.

To airdrop this totally unrelated legislation onto a bill that authorizes our national defense budget is a travesty and abuse of power in the highest degree.

Adding vague unrelated provisions that are likely to be proven unconstitutional to the defense bill is more than inappropriate. I have joined many of my colleagues in sending a letter to the President expressing our concerns, stating "Each of us takes very seriously the responsibility to ensure the men and women who volunteer to serve in our Armed Forces have the resources they need to defend this nation. Using our troops to pass divisive social policy does a profound disservice to them, this institution, and the constituents we serve."

Fortunately, this bill is not the last word on national defense this year, and we will soon have before us the Defense Appropriations bill—the bill that actually provides funding for our troops. Congressional leaders should resist the urge to again engage in such abuses of power.

I am introducing legislation today that will block the House from engaging in such behaviors in the future. My bill will bring some common sense to this place by ending the practice of merging totally unrelated bills in secret con-

ference committees. Separate issues should be kept separate.

It is also troubling that once again, the Majority failed to give Members of Congress and the public at least 72 hours to understand how \$680 billion in taxpayer dollars are being spent. What last minute earmarks were included in the 2,200 page bill? No one knows!

I am also disappointed with several shortcomings in the bill. The bill fails to include provisions to guarantee that Guantanamo Bay terrorist detainees will not be sent to the United States. At a time when Iran is advancing its nuclear and missile technology programs, the bill unwisely cuts over \$1.2 billion from our national Missile Defense program. While there is also much good in this bill, I am glad that we will still have an opportunity to vote on the actual spending bill in the next few weeks. I would urge the Majority to resist the temptation to lard up that bill with last minute airdropped earmarks or play politics with our troops by adding extraneous liberal social policies.

Mr. MORAN of Virginia. Mr. Speaker, I rise to support the conference report on H.R. 2647, the National Defense Authorization Act for Fiscal Year 2010. In particular, I would like to thank Chairman SKELTON and Ranking Member McKEON for their leadership in negotiating this piece of legislation.

As others have attested, this bill will provide more than \$600 billion for our troops, so that they will be ready to confront today's adversaries and prepared to prosecute tomorrow's conflicts, all while knowing that the U.S. public stands ready to support their needs at home and abroad.

Also included in the Defense Authorization are three provisions that will greatly benefit the federal employees that not only support the warfighter, but often serve alongside our men and women in uniform.

The first is known as the Federal Employee Retirement Service (FERS) Sick Leave provision. This piece will allow FERS-enrolled employees to use their accumulated, unexpended sick leave towards the computation of their annuities upon retirement. This provision puts FERS employees on par with those in the Civil Service Retirement System, CSRS, which includes employees who joined the civil service prior to 1984.

The second provision important to so many federal employees is known as the CSRS Part-Time Fix. It allows CSRS workers to phase-down to part-time status at the end of their careers without reducing their final annuities and pensions. Today, under CSRS, part-time service occurring during the final years of federal service negatively impacts the high-three annuity calculation, leading to earlier full-time service being calculated as part-time. This flaw often pushes out the most experienced and knowledgeable federal employees just at the time when this nation needs their service and expertise.

The final federal employee provision contained in this bill is known as FERS Redeposit. This provision allows returning FERS employees, who earlier left federal service, to repay a deposit to the civil service trust fund, with interest, in order to be able to combine their past and new federal service for future annuity credit purposes. Like the other two

federal employee provisions, the FERS Redeposit will help the federal government better recruit and retain the skilled men and women that are critically vital to our armed services.

Though I have championed these provisions in the past, I must take some time to personally thank Chairman SKELTON, Ranking Member McKEON, Chairman TOWNS, and Chairman LYNCH for their tremendous efforts to ensure that these provisions survived conference. Without the effort of these esteemed Congressmen, hundreds of thousands of federal employees would not be the beneficiaries of such provisions.

Lastly, I strongly support the inclusion of The Matthew Shepard and James Byrd, Jr. Hate Crimes Prevention Act in this legislation. This provision, which has passed Congress several times over the past few years, would extend federal hate crimes law to protect individuals targeted because of their sexual orientation, gender, gender identity, or disability. In addition to expanding the categories of hate crimes, it would allow the Justice Department to aid in the investigation and prosecution of hate crimes at the local level through technical assistance and supplemental funding.

Hate crimes have a chilling effect beyond a particular victim, spreading fear of future attacks among the targeted group. Congress cannot prevent hate from motivating individuals to commit violence, but we can ensure that the proper laws and resources are available to prosecute these cases to the fullest extent of the law. Enactment of this legislation is a long overdue step in combating all forms of hate-based violence that impact communities across the country.

Mr. Speaker, I once again thank Chairman SKELTON for his leadership.

Mr. KUCINICH. Mr. Speaker, I rise in strong opposition to H.R. 2647. Throughout my time in Congress I have been a champion for human rights. My opposition to the wars in Iraq and Afghanistan, and by extension, the inclusion of an authorization for an additional \$130 billion to fund these wars, is in part predicated on an understanding that war violates the human rights of the affected populations.

The war and occupation in Iraq has taken the lives of over one million people. Thousands more innocent lives have been lost due to military operations in Afghanistan. These lives are often referred to as "collateral damage." But in reality these lives represent innocent children, mothers, sisters, brothers, and fathers, among others, that were killed because a war and occupation has been imposed on them. Military operations have caused their homes to be invaded, their communities to be bombed and their resources, including food and water, to be increasingly scarce.

Unemployment in both Iraq and Afghanistan is devastatingly high; access to humanitarian aid is limited; medical care and education are difficult to obtain or completely unavailable. The wars in Iraq and Afghanistan have clearly violated the human rights of the civilian populations in which they are being waged.

The people of Afghanistan are suffering horribly from 8 years of war. During that time the Afghan central government has become increasingly corrupt and has failed to meet the

needs of the Afghan people. Iraq has been decimated during more than six years of war and occupation. The people of Iraq continue to wonder when the killing of the innocent will be enough to satisfy the U.S. and question when the U.S. will end the occupation of their country.

The majority of the Iraqi and Afghan people are not extremists or insurgents, but they are the victims of the global war on terror whose daily lives now entail little more than struggling to feed their families and survive the violence of the war. Furthermore, the war in Iraq was based on false intelligence and an inaccurate, government sponsored, propaganda campaign.

I ask this body: Where is our dedication to the human rights of the innocent people around the world who will be killed, maimed or displaced by the bombs, weapons and death machines that this bill funds?

As a staunch supporter of human rights I have consistently supported, voted in favor of, and advocated for passage of hate crimes legislation. I am fully committed to ensuring that the human rights of all individuals are protected. Therefore, I believe that passage of hate crimes legislation is essential to ensuring strong human rights protections for the victims of violent crimes that are perpetrated based on the actual or perceived race, color, religion, national origin, sexual orientation, gender, gender identity or disability of the victim.

But there is a deep-seated irony in including a human rights provision in a funding bill that will inevitably ensure the continuation of human rights violations in parts of the world. I believe that, as a Nation and a part of the global community, we cannot fully ensure the protection of our own human rights here in the United States without being equally diligent in ensuring the human rights of our global society. I cannot trade the human rights of some for the human rights of others.

Ms. CORRIE BROWN of Florida. Mr. Speaker, I rise today to support the National Defense Authorization Act for Fiscal Year 2010. I want to thank Chairman SKELTON for his hard work and leadership on working with all members and the Senate in passing an important bill to authorize the funding for our entire armed forces.

I am especially grateful for the provision to authorize funding to dredge the St. Johns River at Mayport Naval Station. It is important for our Navy to have the flexibility to station all of our vessels where they can be safe and provide the maximum amount of protection for national security.

I am proud of the men and women of our military who, every day and every night, protect the freedoms we hold so dear. Congress determined the mission and it is up to us to make sure our soldiers have the proper resources to carry out that mission.

The Navy and the President determined that part of that mission included making the harbor at Mayport Naval Station suitable for all the ships in our fleet. They included that requirement in the budget submitted to the Congress. And it is included in the conference report. This is a key military construction and force protection project.

The U.S. Navy has an alternative docking location for every ship in the Navy except for

aircraft carriers stationed on the East Coast. In order to provide this emergency docking location, the Navy requested funding in the Fiscal Year 2010 Budget for Channel Dredging at Naval Station Mayport.

Right now, the channel to Naval Station Mayport is dredged to 42 feet plus a 2 foot overdraft. For a full loaded nuclear aircraft carrier to pull into Mayport without tide restrictions, the channel must be dredged to 50 feet plus a 2 foot overdraft.

I was pleased to speak with Secretary of Defense Robert Gates earlier this year and he expressed his commitment to make the Mayport Naval Station a viable option for all naval ships in the event of emergency.

This provision to allow the dredging to continue represents a huge victory not only for the First Coast community, but also for the brave men and women of the U.S. Navy, whose vulnerability to attack is decreased by avoiding consolidation of carriers in any single location. The attack on Pearl Harbor in 1941 highlighted the danger associated with docking large naval fleets in only one location. I am thrilled that the Department of Defense has decided to take advantage of the Jacksonville port in order to increase the safety of our men and women in uniform.

This is about national security and ensuring we provide our Navy leaders with operational flexibility they need. Our aircraft carriers are too valuable of assets not to provide a backup docking location.

I am pleased at the support of the entire Florida delegation for working in a bipartisan matter to support the men and women of our military who, every day and every night, protect the freedoms we hold so dear. Congress determined the mission and it is up to us to make sure our soldiers have the proper resources to carry out that mission.

I support this provision and the entire bill and urge my colleagues to support this bill as well.

Mr. JORDAN of Ohio. Mr. Speaker, I am disappointed to have to vote today in opposition to the conference report on H.R. 2647, the 2010 National Defense Authorization Act. For House Democrats to bring it to the Floor in its current form shows that they are not above playing politics with our troops.

I commend the House Armed Services Committee and House conferees on the bill for their good work in support of our military. The conference report provides much-needed funding for our operations in Iraq and Afghanistan at a time when the Administration's commitment to those missions is in question. We must continue to do everything in our power to give our troops the resources they need to succeed, and also to support their loved ones at home.

I applaud the important provisions of this conference report that authorize funding for equipment acquisition, research and development, and reset. I am pleased that the legislation increases the size of the Army, Navy, Air Force, and Marine Corps to address current and future threats.

The conference report bars the transfer of detainees at Guantanamo Bay to the United States pending a review on the threats they would pose to Americans. I find it unconscionable that the Obama Administration is still con-

templating bringing terrorists to American soil after this Congress and the American people have gone on the record against such a reckless move.

Most importantly, the conference report authorizes an across-the-board military pay raise above what President Obama's defense budget requested. I was proud to vote to fund this pay raise in July when it was included in the 2010 defense appropriations bill, and look forward to quick action on a final version of that bill to provide this well-deserved increase.

The extraordinary sacrifices of our men and women in uniform make it of utmost importance that we give them the equipment and the support they need to complete their mission. They deserve far more than they are getting today from Congress, which is cynically using this bill to advance social policies favored by the Left. Attached to the bill by Senate Democrats is a wholly unrelated and unconstitutional so-called hate crimes bill.

This hate crimes bill represents an unprecedented departure from the deeply rooted American principle of equal justice under law. Justice should be blind, rendered through a criminal justice system that does not take into consideration such issues as race, gender, and religion.

Mr. Speaker, all violent crime is rooted in hatred. All violent crime is deplorable and should be punished to the fullest extent. Crimes not aimed at certain classes of people are just as reprehensible as those committed for other reasons. Crimes committed against one citizen should not be punished any more or any less than crimes committed against another.

But this hate crimes bill treats senseless, random violence less harshly than other, less "random" crimes. Justice will depend on whether a victim is a member of a category deemed worthy of protection under this bill—a list, for the record, that does not include the unborn, pregnant women, the elderly, and others who are among society's most vulnerable.

In fact, when the hate crimes bill was considered in the Judiciary Committee earlier this year, I offered an amendment to add the unborn to this list. The amendment was ruled non-germane on the outrageous grounds that the unborn are not "persons." So much for defending our most defenseless.

I find it intriguing that a provision offered by Republicans but opposed by Democrats in committee—heightening penalties for attacks on servicemembers—is now hailed by Democrats as a vital part of this legislation.

The hate crimes bill raises the very real possibility that religious teachers of every faith could be prosecuted based on the sermons they give. By permitting legal action against anyone who "willfully causes" action by another person, it is not hard to imagine charges being filed against a pastor if a misguided parishioner claimed that the pastor's message caused him to commit a violent act. Subjecting pastors' sermons to prosecutorial scrutiny would prove a chilling effect on the rights of all individuals to freely practice their religion.

It is beyond shameful that these hate crimes provisions have been stapled onto the defense authorization. They are completely irrelevant to the protection of our troops, and provide yet another example of how terrified the Democrat

majority is of free and open debate. Just as the hate crimes bill was originally debated in the House under a closed rule allowing for no amendments, it is now being presented to the House for only one hour of debate with no opportunity to amend it.

Mr. Speaker, defense authorization bills have traditionally been free of politics, almost always garnering widespread bipartisan support. The actual defense provisions in this authorization bill are good. I would be proud to support this bill, absent the unrelated and unconstitutional hate crimes provisions included in it.

The American people have a right to be ashamed of the poisoned process that forces pro-defense members of Congress to vote against what might otherwise be a good defense bill.

Mr. HOLT. Mr. Speaker, I feel strongly that all men and women must be treated equally, regardless of their race, religion, gender, sexual orientation, gender identity or disability. That is why I am an original cosponsor of the Matthew Shepard and James Byrd, Jr. Hate Crimes Prevention Act.

Hate crimes are real. They spread fear and intimidation among entire communities. This bill would strengthen local law enforcement's ability to prosecute hate crimes based on race, color, religion, national origin, gender, sexual orientation, gender identity and disability to the victim. It's long past time for Congress to pass this important legislation to help prosecute those who would commit these heinous acts.

Some have opposed this bill by saying it would legislate "thought crimes." It is patently false to say that we're criminalizing thought. We are criminalizing the brutality that results when these thoughts lead to the death and serious injury of an innocent victim. This is no more about criminalizing thought than the antilynching laws were about criminalizing knot tying.

The Matthew Shepard and James Byrd, Jr. Hate Crimes Prevention Act authorizes the Attorney General to provide technical, forensic and prosecutorial assistance in the criminal investigation or prosecution of any crime of violence that is motivated by prejudice based on race, color, religion, national origin, gender, sexual orientation, gender identity or disability of the victim. It also authorizes the Department of Justice to award grants to state and local law enforcement to assist in hate crime prevention.

This bill is about hate crimes and giving law enforcement the tools they need to prosecute them. This bill has strong support from over 300 civil rights, religious, LGBT, law enforcement and civic organizations, and I'm particularly pleased to identify the support of the Garden State Equality, a group that has fought tirelessly to fight discrimination against all Americans, including discrimination based on gender identity.

The bill has in the past been approved by the House and the Senate only to fail to reach the president's desk. Yet, today we will finally pass the Matthew Shepard and James Byrd, Jr. Hate Crimes Prevention Act into law.

Mr. BILIRAKIS. Mr. Speaker, I want to explain my vote in opposition to the Conference Report to H.R. 2647, the National Defense Authorization Act for Fiscal Year 2010.

I absolutely support ensuring that our brave men and women serving in the Armed Forces have the necessary and best possible training, equipment, and other resources to accomplish their missions as quickly and safely as possible.

I sought a seat on the House Committee on Veterans Affairs in my first term so I could in some small measure help repay our debt to past soldiers and their families by protecting and strengthening their health, disability, and retirement benefits.

I have introduced legislation to increase the pay of members of the military, provide tax cuts to active duty military personnel, give tax credits to our military to help them purchase homes, allow for concurrent receipt of military retired pay and disability compensation, and encourage employers to hire members of the Reserve and National Guard.

I have also traveled to Iraq and Afghanistan to visit with our troops and let them know that I understand and appreciate what they are doing and will do whatever I can to support them.

Very simply, I believe our brave warriors who are standing in harm's way to keep us safe are the true heroes in our society and deserve our complete and unfettered support. That is why I supported the House-passed defense authorization bill earlier this year. I am terribly disappointed that I cannot vote for this conference report, however, because it includes several misguided provisions that should not become law.

This bill is shamelessly being used to enact unrelated and controversial hate crimes legislation, to which many, including me, strongly object. The inclusion of this language in a bill to ensure our national security and meet our commitment to the troops is unconscionable.

I believe that all crimes should be vigorously prosecuted and the convicted should be swiftly and appropriately punished. I do not believe that the federal government should be in the business of criminalizing thought and creating classes of people who supposedly are more deserving of protection than others.

The bill cuts funds for missile defense by more than a billion dollars from last year's level and permanently prohibits the deployment of long-range missile defense interceptors in Europe; unless a lengthy certification process occurs, effectively shutting down a system that would protect us and our European allies from nuclear attack.

The bill also strikes funding included in the House-passed bill for the production of additional F-22 fighters. These provisions leave us more vulnerable to attack from nuclear nations and those countries developing more advanced air assets.

Mr. Speaker, I will not play along with this political charade and allow our men and women in uniform to be used as cover to pass controversial social policies that cannot be enacted on their own. My constituents know how strongly I support our troops and our military efforts to prevent terrorists from striking in this country again like they did on 9/11.

I hope the next time we consider a defense authorization bill we do so in a manner that reflects and upholds the very ideals that our troops are fighting for, unlike the shameful process that brought us to this point today.

Mr. WOLF. Mr. Speaker, I cannot support the Conference Report for H.R. 2647, the National Defense Authorization Act for Fiscal Year 2010 because it includes more than just the comprehensive annual defense policies and budget authority for the Department of Defense, which is the intended purpose of the bill.

I continue to fully support the efforts of our troops on the ground, but have serious concerns about controversial hate crimes legislation added by the Senate. When the House voted on this legislation in June, I voted yes, because I supported the policies laid out in the House version of the bill. But the Senate's addition has no place in this bill.

I was also disappointed to see that provisions to fix Concurrent Receipt that were included in the House version of the bill were removed in conference. This is a well deserved and long overdue benefit for our nation's veterans.

I want to express my support for the provisions in this legislation which will improve the quality of life for military personnel and their families, strengthen commitments to military retirees, and bolster our national security. Without the hate crimes provision, this bill in total is good legislation for our troops and veterans. In addition to the pay raise for our military, it includes important TRICARE provisions that I continue to support. I have a long history of supporting our troops and veterans and will continue to work to support policies that benefit our military and hope that future defense related legislation can be considered without the inclusion of extraneous and inappropriate provisions.

I also strongly support provisions included in this legislation with regard to federal employees that will improve the efficacy of the federal workforce and remedy historic inequalities in federal retirement benefits. These improvements will strengthen our national security workforce, including more than 700,000 civilians employed worldwide by the Department of Defense.

I am particularly pleased that legislation I have introduced with Representative JIM MORAN, which would credit unused sick leave for federal employees, has been included in this bill. According to a Congressional Research Service report, current inequities in sick leave policy result in a loss of productivity costing taxpayers more than \$68 million each year. This will remedy this and result in a more productive and cost-effective workforce.

The other important federal workforce provisions included in this legislation will: change the computation of certain annuities based on part-time service; expand the class of individuals eligible to receive an actuarially reduced annuity under the Civil Service Retirement System; authorize the re-deposit of retirement funds under the Federal Employee Retirement System; change the retirement credit for service of certain employees transferred from the District of Columbia service to the federal service; alter the retirement treatment of Secret Service employees; and phase in the use of locality-based comparability payments to replace cost-of-living adjustments for certain federal employees, and include a provision from the Senate-passed bill allowing for the re-employment of federal retirees on a limited, part-

time basis without offsetting their annuity from salary.

I have worked with colleagues on both sides of the aisle over the last several months to advocate for the inclusion of these provisions from the House and Senate bills and I am pleased that they have been maintained in the conference agreement. Although I am disappointed that I cannot support this bill, I strongly support the inclusion of these provisions strengthening the federal workforce.

Mr. STARK. Mr. Speaker, I rise in opposition to the Defense Authorization bill. As we focus on slowing the rising cost of health care, we should be just as vigilant about ever higher levels of defense spending.

No one on the international stage comes close to our military spending. The United States accounted for 41.5 percent of the entire world's military spending in 2008—the next closest country was China at 5.8 percent. To put this in perspective, if we spent only six times as much as the next closest country, instead of seven times as much, we would have more than enough money to completely pay for health care reform.

I urge my colleagues to join me in voting against the Defense Authorization bill. That said, there is an important provision in the bill that I support, extending hate crimes laws to cover sexual orientation, gender, gender identity, and disability. I have supported hate crimes legislation throughout my career in Congress, including as a co-sponsor of this legislation when it was approved by the House in April, and I am glad that the hate crimes provision in this bill will finally become law.

Ms. FOXX. Mr. Speaker, I rise today to voice my opposition to the recently enacted policies rammed through Congress in this defense bill.

The so-called “Hate crimes” language in this bill contradicts Americans’ First Amendment rights and sets a very dangerous precedent.

We can all agree that any form of bigotry in America is unacceptable. Unfortunately, the “hate crimes” provisions in this defense bill not only have no business in this unrelated legislation, they are also so sweeping and broad that they may very well encompass legitimate religious beliefs.

As a result, under this legislation, any pastor, preacher, priest, rabbi or imam who gives a sermon out of their moral traditions about sexual practices could be found guilty of a federal crime. This is far outside of the current of American freedom that flows through our history.

These “hate crimes” provisions will have a negative effect on the ability of people of deep religious convictions to express those convictions freely. They will inevitably have a “chilling effect” on religious expression from churches, temples and mosques. The most responsible thing for Congress to do is to take steps to rein in this infringement on Americans’ First Amendment rights.

Mr. THORNBERRY. Mr. Speaker, this is a sad day—a day in which a domestic social agenda has hijacked the Defense Authorization bill. The men and women in our armed services should be the first and foremost priority of this bill. Instead, this domestic social agenda is being strapped on the backs of our troops. We should not do it.

Creating new “hate crimes” is controversial. A stand-alone bill has passed the House, but apparently its advocates do not believe they can get it through the Senate. So they have attached it to the Defense Authorization Bill.

However one feels about hate crimes, it is wrong to include that provision in this bill. The hate crimes provisions have nothing to do with the Defense Authorization Bill, and it should not be here.

There are a number of good things in this bill—provisions I support and issues I have worked on. But I cannot condone forcing a domestic political issue into a national security bill.

And I worry that doing this makes it less likely than ever that national security will stay above domestic politics.

We are faced with a serious situation in Afghanistan which requires our best efforts and our concentrated focus. Mr. Speaker, our troops and our nation expect better of us than this.

Mr. CONYERS. Mr. Speaker, I rise in support of the rule on the National Defense Authorization Act. While this legislation addresses many important defense related matters, such as military readiness and pay raises for our troops. It also includes other provisions like reform of the Federal Employee Retirement System. Most important, from the perspective of my Chairmanship of the Judiciary Committee and as author of the House legislation, it also touches on the issue of hate crimes by including the Matthew Shepard and James Byrd, Jr. Hate Crimes Prevention Act.

Some have objected loudly to the inclusion of hate crimes legislation in a defense authorization bill. However, hate crimes legislation is of critical importance to this nation and has passed with broad bipartisan support in the House for the last three (3) Congresses, only to fail in the other body by being stripped out at Conference. I hope that this year is different.

As the names in the title of this provision demonstrate, hate crimes are a blight on this nation. Despite what some would claim, the number of hate crimes each year demonstrate that federal action is crucial to bringing these offenses under control. Since 1991, the FBI has documented over 118,000 hate crimes. In the year 2007, the most current data available, the FBI compiled reports from law enforcement agencies across the country identifying 7,624 bias-motivated criminal incidents that were directed against an individual because of their personal characteristics. These offenses range from assaults to murder.

This legislation will provide assistance to state and local law enforcement and amend federal law to streamline the investigation and prosecution of hate crimes. It is important to note that states will retain primary responsibility for prosecuting these offenses, but with aid of the Federal government.

In the cases of James Byrd and Matthew Shepard local prosecutors acknowledge the crucial role of federal investigative assistance in obtaining prosecutions. In the Shepard case in particular, the local officials could have used a key provision of the bill to help defray the costs of the prosecutions and thus avoid the furlough of law enforcement personnel.

The key element of the bill is its expansion of federal jurisdiction to cover crimes moti-

vated by bias against the victim's perceived sexual orientation, gender, gender identity or disability. I believe that the expansion of jurisdiction to cover additional groups is the key issue to those opposing this legislation. After all, our first hate crimes statute was enacted in 1968 and there has been no move to repeal that law (18 U.S.C.A. Section 245).

At the core of this bill is its protection of First Amendment rights, while protecting communities from bias-based violence. The bill contains a provision that protects the First Amendment rights of the accused at trial and provisions that protect freedom of speech and conduct generally. Despite argument to the contrary, no person can be prosecuted under this act for mere speech or belief. This legislation sanctions violent conduct and the Constitution does not protect speech, conduct or activities consisting of planning for, conspiring to commit, or committing an act of violence.

These hate crimes prevention provisions are supported by a long list of groups (more than 300), including law enforcement groups, religious groups, civil rights groups, disability groups, and numerous other organizations. Behind each of the statistics is an individual or community targeted for violence for no other reason than race, religion, ethnicity, sexual orientation, gender, gender identity, or disability. Law enforcement authorities and civic leaders have learned that a failure to address the problem of bias crime can cause a seemingly isolated incident to fester into wide spread tension that can damage the social fabric of the wider community.

After more than a decade, it is time to send hate crimes legislation to the President.

While I strongly support certain provisions of the bill, I remain concerned about the military commission system despite the reforms that are included in Title XVIII of the Conference Report. Those changes undoubtedly improve existing law in several important ways. For example, the bill prohibits the admission of statements that have been obtained through cruel, inhuman, and degrading interrogation methods. It also expands the scope of appellate review of military commission trial decisions to allow the reviewing court to consider issues of fact as well as law. Congress previously restricted all appeals to issues of law only, an unprecedented departure from how our existing military justice and Article III courts operate. So these changes are positive. In many respects, however, the reforms simply do not go far enough. Several recommendations made by the Judiciary Committee—including a sunset provision for the law, limiting the use of military commissions for trial of detainees held at Guantanamo Bay, Cuba; requiring a voluntariness standard for all statements; adopting a different appeals structure; and prohibiting the trial of child soldiers in military commissions—should also have been adopted.

In July, the Judiciary Committee's Subcommittee on the Constitution, Civil Rights, and Civil Liberties held two hearings on military commissions and possible reforms. Though I voted against the Military Commission Act of 2006, I participated in those hearings with an open mind to determine why military commissions are necessary and whether we can create a system that complies with our laws and our Constitution. After hearing from

several witnesses, including representatives from the Departments of Justice and Defense, I am not convinced that we need military commissions or that, even with these reforms, the military commission system is lawful. The last administration seemed to believe that military commissions were desirable because they made it easier to obtain convictions, regardless of the evidence. President Obama has assured us that he seeks a system that is fair, legitimate, and effective. We have just that in our existing Article III courts and courts-martial system. Our efforts to create an alternative system already have proven unwise and unconstitutional. We should work toward retiring, not reforming, this system. In the meantime, however, I cannot in good conscience oppose changes that will improve the existing system.

I urge a vote in support of the rule.

Mr. WAMP. Mr. Speaker, I rise today to oppose the inclusion of hate crimes legislation within the National Defense Authorization Act (H.R. 2647). Throughout my 15 years in Congress, I have always been a passionate supporter of our military and their families. I stand on my strong record of support for our brave service men and women. Regrettably, however I cannot, in good conscience, vote for the National Defense Authorization Act for Fiscal Year 2010.

Using the broad admiration for our military, the majority has hijacked this Defense Authorization bill to pass a hate crimes provision that could not pass on its own merits.

Every jurisdiction in the United States prohibits battery and murder. If we prioritize crimes based on the victim's status, we threaten the very notion of equal protection under the law that is the foundation of our legal system. Instead, all violations of the law should be dealt with in a manner that delivers justice on behalf of victims and their families. As a society, we must do what we can to prevent all crimes.

The use of violence against any innocent person is wrong, regardless of that individual's race, religion, nationality, or sexual orientation. Crimes of violence should be prosecuted to the fullest extent of the law.

With two wars waging overseas, now is not the time to be playing politics with the lives of our brave service men and women. They deserve a clean defense bill, but today's vote sends the wrong message to all those who stand in defense of our Nation.

Mr. HOLT. Mr. Speaker, I rise in support of this bill.

Every year, this bill provides us with an opportunity to make sure we are doing right by the men and women who serve our Nation in uniform. The National Defense Authorization Act for Fiscal Year 2010 (H.R. 2647) would provide a 3.4-percent pay raise for our troops. It also would expand TRICARE health coverage for reserve component members and their families for 180 days prior to mobilization and prohibit fee increases on TRICARE inpatient care for one year. To help our wounded warriors with their recovery, the bill authorizes funding for travel and transportation for three designated persons, including non-family members, to visit hospitalized service members. It also authorizes funding to allow seriously injured service members to use a non-medical attendant for help with daily living or during travel for medical treatment.

H.R. 2647 also contains provisions designed to improve and rationalize our policy on detainees. I am especially pleased that the bill contains a provision I wrote that requires the videorecording of interrogations of detainees held at theater-level detention facilities in Iraq and Afghanistan. For the first time, the Defense Department will have a uniform standard for collecting videorecorded intelligence from detainees through this mandatory program. Law enforcement organizations across our country use this technique routinely in interrogations, and it is past time the Defense Department adopted a common standard for videorecording interrogations to maximize intelligence collection and protect both the interrogators and the detainees.

I'm pleased that this bill contains strong hate crimes prevention provisions that I have supported for years. The Local Law Enforcement Hate Crimes Prevention Act, which is included in this bill, would provide technical and financial support to local law enforcement and prosecutors so that they can more aggressively try violent crimes which are motivated by a victim's race, color, religion, national origin, gender, sexual orientation, gender identity, or disability and expands Federal jurisdiction to cover such crimes. Additionally, the bill would make it a Federal crime to attack U.S. servicemembers or their property on account of their service to country. The bill also includes stronger protections for freedom of speech and association, including religious speech and association, than the House passed version of this legislation. These changes will ensure that religious leaders will not have to change the expression of their beliefs or how they serve their congregations, as a result of the enactment of hate crimes legislation.

I am also pleased to see that the Conference Report includes most of Senator SCHUMER's Military and Overseas Voter Empowerment Act, which had been attached to the Senate-passed bill. That bill would facilitate the ability of military and overseas voters to request voter registration and absentee ballot applications by mail and electronically, the ability of election officials to transmit blank absentee ballots to military and overseas voters, and the ability of military voters to return their completed paper ballots safely, securely and free of charge by express mail, with generous pick-up and delivery time-frames. The latter provisions are similar to my own legislation on that topic, the Military and Overseas Voting Enhancement Act, which was the very first election reform bill I introduced in the House this session.

I would also like to commend my colleague Ms. MALONEY, who I was pleased to collaborate with on her Overseas Voting Practical Amendments Act, which included provisions to facilitate the use of electronic transmission for outgoing applications and ballots similar to those in the Schumer bill that were not covered by my bill. I agree with Senator SCHUMER that facilitating the ability of our service men and women to vote conveniently, expeditiously, securely, and—to say the least—for free—should be our top priority. They put their lives on the line for us every day, and the electoral process should recognize their sacrifice accordingly.

However, whatever we do to facilitate the ability of our military personnel to vote, we must never do it at the expense of the security or privacy of their votes. The strong language included in the conference report requires that the privacy of our military and overseas voters be protected. And in providing only for the express mail return of completed hard copy ballots, it also recognizes that return of completed ballots by electronic means presents security risks. However, the bill calls for the study of "new election technology" to facilitate the ability of our military and overseas voters to vote. We must remember that "new" does not necessarily mean better, and that too often technology has been adopted before being properly evaluated for the potential unintended consequences it may cause.

Chlorofluorocarbons were hailed as an innovation in refrigeration; we've since discovered that they damaged the ozone layer, so they are now banned. Asbestos was hailed for its insulation properties; we've since discovered that it causes lung disease, so it is now banned. DDT was hailed as a disease-fighting pesticide and its inventor was awarded the Nobel Prize; we've since discovered it causes serious harm to living organisms, so it is now banned. Electronic voting machines were hailed as making voting easier and more accessible; we've since learned that in most cases their results cannot be reliably and consistently verified. Whatever we do to enhance the ability of our military and overseas voters to vote, we must never implement anything that could compromise the accuracy, integrity, and security of the vote count.

One key provision in the House version of the bill that is not in this conference report is a requirement that the Secretary of Defense conduct suicide prevention outreach to every Individual Ready Reserve member who has done at least one tour in Iraq or Afghanistan. I was astonished to learn that some in the Senate objected to this provision on the grounds of costs. How much would it cost the Defense Department to task the Assistant Secretary of Defense for Health Affairs to have his staff make phone calls to check up on IRR members who might be at risk of taking their own lives? If we can find tens of millions of dollars to buy extra engines for the F-35 fighter that the Pentagon doesn't want, there is no excuse for the Congress not to find the money to help prevent combat veterans from killing themselves.

Finally, this bill requires the Government Accountability Office (GAO) to "submit to the congressional defense committees separate reports containing assessments of the extent to which the campaign plan for Iraq and the campaign plan for Afghanistan (including the supporting and implementing documents for each such plan) each adhere to military doctrine." Unfortunately, we need far more than a simple assessment as to whether our armed forces are fighting according to established doctrine. What we need is a critical examination of whether they should be fighting in Afghanistan at all. Some of us have asked for a plan of success or a plan of withdrawal before sending another wave of soldiers. We have received no such plan.

As I've stated previously, I will not support an endless military commitment in this region.

If a year from now I do not see unambiguous indicators of success—fewer civilian casualties, Afghan and Pakistani security forces in the lead on the security mission, genuine progress in rebuilding Afghanistan's devastated infrastructure and civil institutions—I will not support further funding for operations and will support only measures that will bring our forces home, and quickly.

On balance, this is a good bill and I urge my colleagues to join me in supporting it.

Mr. BUYER. Mr. Speaker, I am very disappointed that I must vote against the conference report for H.R. 2647, the FY2010 National Defense Authorization Act, because it includes "hate crimes" provisions of H.R. 1913. The provisions were added by the Senate in an effort to facilitate the social engineering and partisan political agenda of the Democrat leadership in Congress. The "hate crimes" language has absolutely nothing to do with the funding and equipping of our servicemembers, and it is especially unfortunate that such a blatant partisan action would be taken during a time of war when our nation's sons and daughters are in harm's way. My no vote supports the values, goals, and mission of the United States military.

Mr. VAN HOLLEN. Mr. Speaker, I rise in support of the 2010 Defense Authorization Conference Report.

This conference agreement reflects our commitment to the national security objectives of the country and demonstrates our support for our servicemembers and their families.

The bill authorizes \$680 billion for military personnel, equipment and global operations. To improve the quality of life for our troops and their families the report provides a 3.9 percent military pay raise for personnel and preserves important health benefits including prohibiting fee increases in TRICARE and the TRICARE pharmacy program and creating new preventive health care initiatives.

The National Defense Authorization Act covers a large number of federal employees and this conference report includes important benefit improvements for many of them. The report includes a provision to allow employees under the FERS system to use unused sick leave when computing their annuities upon retirement; a provision to allow CSRS workers to phase-down to part-time status at the ends of their careers without reducing their final annuities; and a provision I introduced that permits a small number of returned CSRS employees to receive a reduced annuity rather than being forced to repay interest on their required deposit to the civil service trust fund.

This FY10 Defense Authorization Conference Report promotes our national security priorities, provides for our troops and their families, and improves oversight, and accountability.

I encourage my colleagues to join me in supporting the bill.

Mr. BLUMENAUER. Mr. Speaker, providing for the common defense is one of the federal government's most important duties. I take my duty to rigorously review the Defense budget very seriously, supporting defense spending that is smart and sustainable and speaking out against funding that is wasteful or misdirected. As such, I support the National Defense Authorization Act for Fiscal Year 2010.

My first priority remains the protection of our forces already on the ground, including the Oregon National Guard's 41st Combat Brigade, and equipping our military to face current threats. I have been pleased with the Obama administration's willingness to begin a tough review of the U.S. military, requesting additional equipment and healthcare support for our service-men and -women—especially our Guard and Reserve, while requesting cutbacks on outdated programs. Although difficult in the short-term, cutting unnecessary programs to orient our military to face today's threats is the right thing to do and keeps us safer in the long run.

Part of this also involves empowering the military to clean up its widespread environmental legacy. In every state, communities must deal with former training grounds contaminated with live bombs, leftover shells, and leaking chemicals. I'm frankly disappointed that in the past there has been a distinct lack of political will needed to clean up our backyards within our lifetime, and I will continue to support increased Environmental Restoration funding. However, I'm pleased that two bipartisan amendments I offered with my colleague GINNY BROWN-WAITE remain in this bill. These provisions will increase the transparency of programs responsible for clean-up and require the Department to start thinking strategically about ways to lessen the longer-term health and environmental consequences of war and training. I thank the Chairman and the Committee staff for working with me on these points.

In addition, I am proud to support the inclusion of the Matthew Shepard and James Byrd, Jr. Hate Crimes Prevention provision in this bill. This bipartisan, long-awaited legislation will help prevent violence and ensure that justice is served for perpetrators of these hateful acts, chipping away at violent intolerance and protecting all our citizens.

I am continually mindful of the fact that today's threats—extremism, economic upheaval, pandemics, and environmental devastation—cannot be addressed by military force alone. In addition to supporting this legislation, I will continue to advocate for national security strategies that also address issues of poverty, intolerance, and mismanagement.

Ms. WOOLSEY. Mr. Speaker, I am proud that H.R. 2647 contains provisions of H.R. 3403, the Supporting Military Families Act, a bill that I introduced in the House earlier this year.

In the 110th Congress, we passed and the President signed into law the first-ever changes to the Family Medical Leave Act, FMLA, permitting "next of kin" of seriously injured and ill servicemembers to take up to twenty-six weeks of unpaid leave to care for these injured and ill servicemembers. In addition, the legislation provides up to twelve weeks of leave to workers when their family servicemembers are about to be deployed overseas to attend to certain "exigencies" relating to deployment, such as arranging for alternate child care or going to a lawyer for a will.

The legislation passed in the 110th Congress was a good start, however, it has some gaps in coverage, which H.R. 2647 addresses. Under these new provisions, a next of kin can

take up to twenty-six weeks of unpaid leave to care for a seriously injured or ill veteran, so long as that veteran incurred the injury or illness while on active duty and the injury or illness manifests itself within five years of the veteran's discharge from active duty. In addition, the twelve weeks of leave for "exigencies" relating to deployment includes not only leave for families of National Guard or Reservists in support of a contingency operation, but also leave for: (1) families of regular active duty servicemembers; and (2) families of those who have been deployed overseas.

The FMLA is intended to help individuals balance their family and work obligations. So far, working people have used FMLA more than 100 million times to care for themselves and their family members. When the Act was first passed in 1993, it was a giant step and, while we need to pass legislation to provide paid leave, FMLA is still of great importance to working families.

Since a majority of military spouses work, they too must balance work and family. They work to put food on the table and support their families. But they face additional challenges because their lives are disrupted by multiple deployments, involving not only active servicemembers but those in the National Guard and Reserves as well.

Over 35,000 servicemembers have been injured—many seriously—in the conflicts in Iraq and Afghanistan. These injured warriors need substantial support and care from their families, often for long periods of time, and some permanently.

In addition, veterans of both conflicts are developing serious illnesses and injuries after they are discharged from active service. Brain injuries such as traumatic brain injury and post-traumatic stress syndrome are disabling conditions but often do not materialize until well after servicemembers have been discharged from active duty. A recent study by the Department of Defense estimates that 11 percent of Iraq veterans and 20 percent of Afghanistan veterans suffer from post-traumatic stress syndrome as a result of their service.

No matter where we come down on the merits of these conflicts, we must support families whose loved ones put their lives and their futures on the line for our nation. The provisions of H.R. 2647 will certainly help.

Mr. SKELTON. I yield back the balance of my time.

The SPEAKER pro tempore. All time for debate has expired. Pursuant to House Resolution 808, the previous question is ordered.

Pursuant to clause 1(c) of rule XIX, further proceedings on the conference report are postponed.

## RECESS

The SPEAKER pro tempore. Pursuant to clause 12(a) of rule I, the Chair declares the House in recess subject to the call of the Chair.

Accordingly (at 1 o'clock and 31 minutes p.m.), the House stood in recess subject to the call of the Chair.

AFTER RECESS

MOTION TO RECOMMIT

The Clerk read as follows:

Mr. McKeon moves to recommit the conference report on the bill H.R. 2647 to the committee of conference with instructions to the managers on the part of the House as follows:

(1) To not accept any provision that would provide for the transfer or release of individuals detained at United States Naval Station, Guantanamo Bay, Cuba, as described in section 1023(d) of the bill as passed by the House, into the United States or its territories or possessions.

(2) To insist on section 121 of division D of the bill as passed by the House (regarding expansion of eligibility for concurrent receipt of military retired pay and veterans' disability compensation).

The SPEAKER pro tempore. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER pro tempore. The question is on the motion to recommit.

The question was taken; and the Speaker pro tempore announced that the yeas appeared to have it.

Mr. McKEON. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 and clause 9 of rule XX, this 15-minute vote on the motion to recommit will be followed by 5-minute votes on adoption of the conference report, if ordered; and motion to suspend the rules on H. Res. 804.

The vote was taken by electronic device, and there were—yeas 208, nays 216, answered “present” 2, not voting 7, as follows:

ANSWERED "PRESENT"—2

NOT VOTING—7

Campbell	Maloney	Watt
Carney	Slaughter	
Johnson, Sam	Tsongas	

□ 1517

Messrs. SCOTT of Georgia, BRALEY of Iowa, ROTHMAN of New Jersey, EDWARDS of Texas, RANGEL, PASCRELL, SCHIFF, GUTIERREZ, ISRAEL, Mrs. DAVIS of California, Messrs. PASTOR of Arizona, LYNCH, OLVER, Ms. DELAURO and Mr. MEEK of Florida changed their vote from "yea" to "nay."

Messrs. McINTYRE, HALL of New York, NYE and BOCCIERI changed their vote from "nay" to "yea."

So the motion to recommit was rejected.

The result of the vote was announced as above recorded.

The SPEAKER pro tempore. The question is on the conference report.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

RECORDED VOTE

Mr. SKELTON. Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The SPEAKER pro tempore. This will be a 5-minute vote.

The vote was taken by electronic device, and there were—ayes 281, noes 146, not voting 6, as follows:

## ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (during the vote). There are 30 seconds left in this vote.

□ 1524

So the conference report was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

The SPEAKER pro tempore. Pursuant to section 2 of House Resolution 808, House Concurrent Resolution 196 is hereby adopted.

The text of the concurrent resolution is as follows:

## H. CON RES. 196

*Resolved by the House of Representatives (the Senate concurring).* That, in the enrollment of the bill H.R. 2647, the Clerk of the House of Representatives shall make the following corrections in section 2823(b):

(1) Strike "PROPERTY AND LEASE OF NON-EXCESS PROPERTY" and all that follows through "(1) in subsection (e)," and insert "PROPERTY.—Subsection (e) of such section is amended".

(2) Strike ";; and;" at the end of paragraph (1) and insert a period.

(3) Strike paragraph (2) and the amendment made by that paragraph.

## ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Without objection, 5-minute voting will continue.

There was no objection.

## PROVIDING FOR CONCURRENCE BY HOUSE WITH AMENDMENT IN SENATE AMENDMENT TO H.R. 1016, VETERANS HEALTH CARE BUDGET REFORM AND TRANSPARENCY ACT OF 2009

The SPEAKER pro tempore. The unfinished business is the vote on the motion to suspend the rules and agree to the resolution, H. Res. 804, on which the yeas and nays were ordered.

The Clerk read the title of the resolution.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr. FILNER) that the House suspend the rules and agree to the resolution, H. Res. 804.

This will be a 5-minute vote.

The vote was taken by electronic device, and there were—yeas 419, nays 1, not voting 12, as follows:

□ 1531

So (two-thirds being in the affirmative) the rules were suspended and the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

## PERSONAL EXPLANATION

Ms. SLAUGHTER. Mr. Speaker, I was unavoidably detained and missed rollcall vote Nos. 769, 770, and 771. Had I been present, I would have voted "nay" on rollcall vote 769, "aye" on 770 and "yea" on 771.

## PERSONAL EXPLANATION

Ms. TSONGAS. Mr. Speaker, due to my daughter's wedding I was absent from the House of Representatives on October 7th and October 8th. As a result, I was unable to cast a vote on rollcall votes Nos. 756 to 771.

Had I been present, I would have voted "yea" on the following rollcall votes: Nos. 756, 757, 758, 759, 760, 761, 762, 763, 764, 765, 766, 767, 768, 770, and 771, and "nay" on rollcall vote No. 769.

## MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mrs. Wanda Evans, one of his secretaries.

## CERTIFICATION OF APPLICABLE WAIVER WITHIN THE MEANING OF THE CLEAN DIAMOND TRADE ACT—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 111-67)

The SPEAKER pro tempore (Mr. POLIS) laid before the House the following message from the President of the United States; which was read and referred to the Committee on Ways and Means and the Committee on Foreign Affairs and ordered to be printed:

*To the Congress of the United States:*

The Clean Diamond Trade Act (Public Law 108-19) (the "Act") authorizes the President to "prohibit the importation into, or exportation from, the United States of any rough diamond, from whatever source, that has not been controlled through the Kimberley Process Certification Scheme." The Act takes effect on the date that the President certifies to the Congress that (1) an applicable waiver that has been granted by the World Trade Organization (WTO) is in effect, or (2) an applicable decision in a resolution adopted by the United Nations Security Council pursuant to Chapter VII of the Charter of the United Nations is in effect. The

Act remains in effect during those periods in which, as certified by the President to the Congress, such an applicable waiver or decision is in effect.

On July 29, 2003, the President certified that the WTO General Council had adopted a decision granting a waiver pursuant to Article IX of the Marrakesh Agreement Establishing the World Trade Organization concerning the Kimberley Process Certification Scheme for rough diamonds. The waiver applies to the United States and other WTO members that requested the waiver and to any WTO member that notifies the WTO of its desire to be covered by the waiver. The waiver was scheduled to have effect from January 1, 2003, through December 31, 2006. On December 19, 2006, the WTO General Council adopted a decision to extend the waiver through December 31, 2012.

I hereby certify that an applicable waiver, within the meaning of the Act, granted by the World Trade Organization has been in effect since January 1, 2003, and will remain in effect through December 31, 2012.

BARACK OBAMA.

THE WHITE HOUSE, October 8, 2009.

## LEGISLATIVE PROGRAM

(Mr. CANTOR asked and was given permission to address the House for 1 minute.)

Mr. CANTOR. Mr. Speaker, I yield to the gentleman from Maryland, the majority leader, for the purpose of announcing next week's schedule.

Mr. HOYER. I thank the gentleman for yielding.

On Monday, the House will not be in session. On Tuesday, the House will meet at 12:30 p.m. for morning-hour debate and 2 p.m. for legislative business with votes postponed until 6:30 p.m. On Wednesday and Thursday, the House will meet at 10 a.m. for legislative business. On Friday, the House will meet at 9 a.m. for legislative business.

We will consider several bills under suspension of the rules. The complete list of suspension bills will be announced by the close of business tomorrow, as is the custom.

In addition, we will consider H.R. 2442, the Bay Area Regional Water Recycling Program Expansion Act of 2009; the conference report on H.R. 2892, the Department of Homeland Security Appropriations Act of 2010; and quite possibly, assuming the conference is completed, the conference report on H.R. 2996, the Department of the Interior, Environment, and Related Agencies Appropriations Act.

Mr. CANTOR. I thank the gentleman. I would also like to thank the gentleman for his courtesy and his time in meeting with me earlier today in the discussion of health care, and I'm hopeful that that discussion was fruitful and that we could see a dialogue continue towards some type of working relationship in the areas that we can agree on. So I do thank the gentleman.

NAYS—1

Buyer

At this time, Mr. Speaker, I would like to ask the gentleman some of the things we didn't cover in the meeting, and that is, first off, the timing of any kind of health care bill reaching the floor of this House and whether he could provide any clarity on that.

I yield.

Mr. HOYER. I thank the gentleman for yielding, and I thank him for coming by my office and spending time in discussion.

As the gentleman knows, health care has been the focus of this Congress for much of our present session; three committees have completed their work, ongoing discussions about how to put the work product of the three individual committees together. The Senate Finance Committee is, we think, going to vote on theirs next week. The Senate Health, Education, Labor, and Pensions Committee has reported out a bill. So we have five committees that have essentially completed their work. There will be, obviously, once the bills are put together and all the suggestions are incorporated, a necessity to get a score from CBO. We expect that to take at least a week, 7 days, maybe more.

In addition to that, the Speaker and I have both indicated that there will be 72 hours' notice of the bill and a manager's amendment. I want to clarify that. If they both come out at the same time, it will be one 72-hour period. If for any reason they come out separately, then we will make sure that the last issued will have 72 hours before we put the bill out on the floor.

In light of that, my expectation is certainly the bill will not be on the floor either the next week or early in the following week. The earliest, in my opinion, the bill could be on the floor would be the latter part of the second week from now.

Mr. CANTOR. I thank the gentleman.

So if I hear correctly, we're talking about the final week of this month at the earliest.

Mr. HOYER. I think that would be the earliest, as a practical matter, that we could put the bill on the floor with the notice that we have indicated we're going to give and, of course, with the CBO score.

Mr. CANTOR. I thank the gentleman for that.

I would ask the gentleman, Mr. Speaker, about some statement that the Speaker made indicating how the reimbursement rates would work and whether there is clarity on that or not yet. I think the Speaker had asked the question rhetorically whether Medicare rates would be the reimbursement rates in the bill, and any kind of enlightenment that he can shed on that, I'd appreciate it.

I yield.

Mr. HOYER. At this point in time, these are still under discussion, and, therefore, I don't have a specific an-

swer for the gentleman. But the Speaker's comments, I think, spoke to the fact that they are still under discussion.

Mr. CANTOR. Mr. Speaker, I would say, again, the gentleman and I had discussed in general the opposition to the public option that we have on this side, and I would just like to ask the gentleman again, given the Speaker's comments about reimbursement rates, Medicare rates, whether the public option is still where the Speaker and he are in terms of what a House bill would look like given where the Senate is.

I yield.

Mr. HOYER. I thank the gentleman for yielding.

In terms of where the Speaker and I are, we have been consistently for, as you know, a public option. The Speaker and I continue to be for a public option, as is the President, and we believe the majority of the House is for that.

I will tell the gentleman that I think that in terms of the reimbursement rates, as I said, that's still under discussion, but I think there is consensus that a public option is something, as the President has indicated, as we have indicated, that will provide a competitive model to both bring prices down and to protect consumers. So I think the answer is that that's certainly still part of our plan.

Mr. CANTOR. I thank the gentleman for that. And again, he and I have discussed the differences that the sides have philosophically and about Medicare rates being the prevailing rate in terms of required coverage, which would essentially mean, in our opinion, that we will be on a path to a single-payer system, something that certainly our Members would not want to see.

But I thank the gentleman for sharing, and we look forward to perhaps working on those parts or, if we could, just items that we can agree on, again, if the public option begins to have trouble. So, again, I thank the gentleman.

If I could, Mr. Speaker, turn to the question of foreign policy and where we are in terms of the bill coming from the Foreign Affairs and Financial Services Committees.

Last week, Mr. Speaker, the gentleman had said that the White House was engaging in discussions with China and Russia, that perhaps that was why the bill would not be moving forward. This, again, is the Iran Refined Petroleum Sanctions Act. And to paraphrase the gentleman, Mr. Speaker, I would say that the gentleman indicated that Mr. BERMAN will be talking to the White House about timing.

I yield to find out whether we have any clarity on that and when that bill will be coming to the floor.

Mr. HOYER. I thank the gentleman for yielding.

I have talked to Mr. BERMAN. He is in discussions with the White House. Both

you and I are strong supporters of the legislation, as is Mr. BERMAN. My expectation is he has indicated that he wants to consider this bill and bring it to the floor, and I have told him that as soon as it's ready to come to the floor, I will schedule it for the floor.

In addition, I will tell the gentleman that it is possible that we will have the sanctions bill out of the Financial Services Committee. As you know, there are two different bills. The Berman bill is the stronger of the two. But we may well move next week, on the Financial Services sanction bill, which deals with, obviously, financial transactions.

□ 1545

My expectation is Mr. BERMAN is looking at this and does hope and expect to bring this bill out either at the very latter part of a couple weeks from now or perhaps the first week in November. But I know he's very much engaged in this, and we very much support moving on this.

Mr. CANTOR. I thank the gentleman for that.

Mr. Speaker, the gentleman has noticed that the Homeland Security appropriations bill is coming to the floor next week. Reports have indicated that perhaps some of the trouble surrounding bringing that bill to the floor deals with the language of dealing with the detainees at Guantanamo Bay and their transfer. And as the gentleman knows, Republican-sponsored language that was adopted by the House is something that we would very much like to see included in the conference report.

I do know, Mr. Speaker, that the Senate just adopted in the Defense appropriations bill that they are deliberating upon that no funds would be allocated or appropriated for the transfer of those detainees, by an overwhelming vote.

So I would ask the gentleman, should we expect that language, the House-passed language, to be in the conference report that would come to the floor?

Mr. HOYER. Of course, the conference hasn't been held so I don't want to predict what's going to be in there or not. I will tell the gentleman, as the gentleman knows, the authorization bill, the conference report that we just passed does have within it, as you know, a prohibition on the release of Guantanamo detainees in the United States, territories, and possessions. In addition, it restricts detainee transfers to the United States or its territories or possessions until 45 days after the President has submitted a plan to Congress certifying that the detainees will pose little or no threat or risk to the United States if transferred. That language we just passed.

Now, I can't predict whether the appropriations conference will track that language or will have different language such as the language to which

you just referred. But I expect there to be language on that issue.

Mr. CANTOR. I thank the gentleman.

I would just note as well that the House-passed language in the Homeland Security bill also had a provision lacking in the bill we just passed which had to do with States' ability to veto a decision to transfer detainees—something very much, I would say to the gentleman, our Members would like to see in the bill that comes to the floor next week on the Homeland Security appropriations bill.

I would just like to lastly turn to the issue of the remainder of the year and the calendar and what Members can expect as far as November is concerned.

Today is October 8. The House is scheduled to adjourn at the end of this month on October 30, and I was hoping that the gentleman could give us a better sense of the session that we will expect in November.

And I yield.

Mr. HOYER. I thank the gentleman for yielding.

As I have said before, my expectation is that Members ought to be planning on at least 4-day weeks in the first week in November and the third week in November. As the gentleman knows, Veterans Day falls in the middle of the second week of November, and my belief is it's going to be very difficult to get Members back for a day and a half—and very impractical and costly—then to have to go back for Veterans Day and then probably not come back doesn't seem to be a very useful use of time.

But I have caveated that with the issue of health care. Health care is, as I said, the major issue that we're focused on. We think it's critically important for the American people to have access to affordable, quality health care, which is our objective. As a result, that second week we haven't given it away yet, but my expectation is that we probably will not be meeting that week. My expectation is also—and my plan will be—not to meet Thanksgiving week. I think people ought to be home during Thanksgiving week and, again, I make the caveat as to where we may be on health care.

Now of course if we can get unanimous consent to put it on a consent calendar and pass it, maybe we can shorten the time. But absent that, I want to make sure that we all understand that if health care, for instance, was being considered that third week and we had to move into Saturday or Monday to pass it, we might do that.

But again, I reiterate that for November, my expectation is first and third week probably here at least Tuesday through Friday of each week, and with respect to the second week, probably not here and the fourth week probably not here.

Having said that, you asked for the balance of the year.

Again, it will depend upon whether we can complete our work within those 2 months. If we can't, we will clearly be here in December. Again, as someone who has served here a long time and has seen us meet as late as December 23 or 24, I think that's not good for our families, it's not good for the Members, and I certainly am not one that looks forward to that, and I am going to do everything I can to make sure that we get our work done no later than the end of the second week of December.

Mr. CANTOR. Mr. Speaker, I thank the gentleman for his time, and I yield back the balance of my time.

#### --- **HOURLY OF MEETING ON TOMORROW**

Mr. HOYER. Mr. Speaker, I ask unanimous consent that when the House adjourns today, it adjourn to meet at 10 a.m. tomorrow, and further, when the House adjourns on that day, it adjourn to meet at 12:30 p.m. on Tuesday next for morning-hour debate.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Maryland?

There was no objection.

#### --- **HONORING CAPTAIN BENJAMIN A. SKLAVER**

(Ms. DELAURO asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. DELAURO. Mr. Speaker, I rise to commemorate the life and mourn together with his family the death of Captain Benjamin A. Sklaver of Hamden, Connecticut, who served his country and the neediest people of the world honorably.

Captain Sklaver was killed in an ambush last Friday while on patrol in Afghanistan. Struck down at the age of 32, he leaves behind a legacy of humanitarian works and honorable deeds that would do any man or woman proud. Before serving in Afghanistan as an Army reservist, Ben had worked for the Centers for Disease Control as an international emergency and refugee health analyst. And he was the cofounder and director of ClearWater Initiative, an organization which aspired to provide clean drinking water to refugees displaced by an international emergency. In the past 2 years, his leadership at ClearWater had managed to provide over 6,500 people in Uganda with clean drinking wells.

To the thousands of lives he changed in Uganda, Ben was known as "Moses Ben." But to his grieving family—his parents, Gary and Laura; his siblings, Anna and Samuel; his fiancée, Beth; her son, Danny; and her parents, Barbara and Jimmy Segaloff—he was simply Ben, a warm, kind, generous, and loving young man with so much life ahead of him taken from all of us too soon.

Connecticut mourns and America mourns this family's loss today.

#### --- **FACTS ABOUT THE DEMOCRATS' HEALTH CARE PLANS**

(Mr. SMITH of Texas asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SMITH of Texas. Mr. Speaker, here are some facts about the Democrats' health care bills: They reduce benefits for seniors, according to the Congressional Budget Office; young people, and perhaps most others, pay higher premiums for health insurance, according to nonpartisan analysts; just because you like your health care insurance does not mean you can keep it, according to the Congressional Budget Office; if you don't buy the insurance policy the government requires, you pay an excise tax of almost \$2,000, according to legislative language; and the cost of health care increases—not decreases—according to the Congressional Budget Office. And none of the plans contains language, known as "tort reform," to reduce frivolous lawsuits against medical personnel.

Mr. Speaker, let's give the American people the facts about the Democrats' health care proposals. If we do, they will insist that we start over and get it right.

#### --- **IT IS TIME TO REPEAL "DON'T ASK, DON'T TELL"**

(Mr. SESTAK asked and was given permission to address the House for 1 minute.)

Mr. SESTAK. Mr. Speaker, the President correctly addressed the cratering of our economy at the beginning of his administration. And while it's intense, it's no longer intensifying, and we're on the road to economic recovery.

He then took on health care reform, which was correct, with 14,000 Americans losing their health care every day, to provide them affordable, accessible health care in the future.

It's time to address an issue of our ideals, and that is the repeal of "don't ask, don't tell" in the military that discriminates against gays.

I served 31 years in the military and rose to be a three-star admiral. I went to war, and we knew by public survey that those who went with me, a certain percentage, were gay. How could I, or anyone, come home and say they don't now deserve equal rights? It's time, Mr. President and this Congress, to hold up a national mirror and say that's not who we are; we are better than that, and repeal "don't ask, don't tell" this year.

#### --- **THREE DAYS**

(Mrs. BACHMANN asked and was given permission to address the House for 1 minute.)

Mrs. BACHMANN. Mr. Speaker, today the majority leader just committed himself and the Speaker of the House to giving the public and Members of Congress 72 hours—or 3 days—to read the bill that will require the government takeover of health care. Three days. How magnanimous of them. A bill that will destroy America's health care system, and doctors, nurses, hospitals, clinics, insurance companies, families, and individuals will have 3 whole days to read this bill and then call their Member of Congress to weigh in. Three months to read this bill would be an abbreviated amount of time.

This bill will soon become Medicare for all. Medicare, as we know, will be bankrupt inside of 8 years, and as the ship is taking on water and sinking, this Congress wants to pour more water into the boat. And they think it's magnanimous to give us 3 days to read the bill? Please. Three months would be a minimum.

#### HEALTH INSURANCE REFORM WILL HELP SENIORS

(Mr. TONKO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TONKO. Mr. Speaker, I would like to take a moment to talk about how the health insurance reform will help our Nation's seniors.

We have all heard about the dreaded Medicare part D doughnut hole—the gap in prescription drug coverage that 7,300 seniors a year in my congressional district alone face. Seniors who fall in the doughnut hole must cover the full cost of their prescription drugs, forcing many to cut back on their prescription use.

H.R. 3200 fills in the doughnut hole, shrinking it over several years until there is no interruption in prescription drug coverage for our seniors. Until the doughnut whole is completely filled, H.R. 3200 also offers discounts on brand-name prescription drugs to seniors who fall into that doughnut hole.

H.R. 3200 also makes great strides in improving the care Medicare patients receive. It includes provisions that encourage doctors to spend more time with their patients and to check up with them more frequently. Accountable care organizations and medical homes in the bill will promote coordination of care amongst the different health care professionals and result in better health care outcomes for Medicare patients.

I am proud to support this bill and encourage my colleagues to do the same.

#### FLAWED HEALTH CARE REFORM

(Mr. GINGREY of Georgia asked and was given permission to address the

House for 1 minute and to revise and extend his remarks.)

Mr. GINGREY of Georgia. Mr. Speaker, I appreciate Secretary Sebelius coming to the Capitol yesterday to meet with the Republican Study Committee. And I asked the Secretary if the President intended to keep the promises he made on health care, specifically if he will stick by his pledge not to sign a reform plan that would add a dime to the deficit; ease access to taxpayer funds for illegal immigrants; reduce Medicare benefits to our seniors; or cause anyone who is happy with the coverage they currently have to lose it.

Secretary Sebelius gave no response regarding the first three pledges but on the fourth, she said it is impossible to guarantee Americans can keep the health coverage they now have.

Mr. Speaker, this underscores how flawed this reform plan is. The vast majority of Americans are happy with the health care coverage they currently have. Certainly we need reform for those Americans for whom the system is not working, but we shouldn't force as many as a hundred million persons into a government-run health care plan. H.R. 3200 would do exactly that.

We can do better.

□ 1600

#### HEALTH CARE REFORM AND BALANCING THE BUDGET

(Mr. BURTON of Indiana asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BURTON of Indiana. Madam Speaker, I ran into one of my constituents last week, a fellow named Jim Byers, and he said, You know, if you guys could balance the budget, I'll bet you could reach an agreement on health care. And he said, Why don't you talk to your Democrat colleagues about giving a guarantee that they'll balance the budget in a reasonable length of time? And if they'll do that then you'll probably be able to work out the health care differences that you have.

And so I got today the figures on the Baucus bill coming out of the Senate, \$487 billion in new taxes, and probably a couple of trillion dollars over the next 10 years. So I'd just like to say to my colleagues on the Democrat side of the aisle, let's get together and figure out a way to balance the budget. And if we can do that, then we could solve the problem of health care.

All of us who are privileged to serve in this Chamber are deeply involved in the nationwide debate on health care.

Currently, the Democrat Majority in Congress is trying to craft a single health insurance reform bill from the bits and pieces of four competing alternatives not to mention President Obama's "plan" which has never been put on paper.

At the moment we do not know what, if anything, the House of Representatives will vote on. I have made my views clear. I have said over and over on this Floor and in my town hall meetings that I will not support, and I will strongly work to defeat the House Democrats' government take-over.

Here are some straightforward reasons why I oppose the bill:

Health care costs will go up for the government and everyone else.

As many as 2 out of 3 Americans will lose their current health coverage and be forced into the government-run plan.

Raising taxes on small businesses is the wrong solution for an economy in a recession.

The new government run plan will lead to fewer choices and rationing.

I support health care reform that would expand opportunities for small businesses to band together to purchase high-quality health care for their employees at more affordable prices, and medical liability reform legislation to eliminate expensive defensive medicine.

Unfortunately these proposals have been blocked. If either of these two proposals were law today, we would be starting at a very different place with health reform.

What the House Democrats are proposing goes far beyond fixing the problems we all know need to be addressed. The House bill is a complete upheaval of our current system. That is why the bill lacks bipartisan support.

As the Democrats in Congress choose to focus the debate about health care reform on creating a government run health plan, they are ignoring another important issue that directly relates to health care reform.

That is the issue of balancing the budget, which has not been given much attention in this debate by the Democrat Majority. This has not gone unnoticed in my Congressional District.

Earlier this week, one of my constituents named Jim Byers stopped me to talk about what we are doing here in Congress to balance the budget.

Sadly, I did not have an answer for him. For now, it looks as if this Congress has decided to take the issue of balancing the budget off the table.

The non-partisan Congressional Budget Office on Wednesday said that the deficit for fiscal year 2009 totaled about \$1.4 trillion, a \$950 billion increase over the shortfall posted in fiscal year 2008.

The deficit now represents 9.9 percent of the gross domestic product.

While revenues were down nearly \$420 billion (17%) below receipts in fiscal year 2008, outlays increased by over \$530 billion (18%), in fiscal year 2009. About \$245 billion of the spending increase resulted from outlays for TARP.

Since the fall of 2008, Congress has spent: TARP—Original Cost: \$700 Billion.

Democrat Stimulus: Base Cost = \$787 billion; Stimulus: Cost with Interest = \$1.1 trillion. FY 2009 Omnibus: Total Spending: \$410 billion.

FY 2009 Defense Supplemental: \$105.9 Billion.

State Children's Health Insurance (SCHIP) Reauthorization: \$73.3 Billion.

This time around, the Majority is trying to ram through a health care reform bill that—by

some estimates will cost upwards of \$1 trillion over the next 10 years. How does this level of spending square with the goal of balancing the budget?

It can't be done, unless of course, we are prepared to raise taxes or cut Medicare to the tune of \$500 billion.

I agree with Mr. BYERS. We have to start taking concrete steps to balance the budget. I sincerely believe that if the Democrats commit to balancing the budget then a bipartisan agreement on health care reform can be achieved.

If not, and they continue to walk down the path of dismantling our Nation's current health insurance system without any regard to the Federal budget and future deficits, I will fight them every step of the way.

We need to start talking about the other half of the health care debate—the budget. If we move forward on health care reform without any solid commitment to balancing the budget we are most certainly doomed to a future of uncontrollable deficits.

#### GAY RIGHTS AGENDA

(Mr. GOHMERT asked and was given permission to address the House for 1 minute.)

Mr. GOHMERT. Well, we've done it. Today was a landmark day. This body took the body of our military and attached to that body, as they were fighting, a gay rights agenda. I say "gay rights agenda" about this hate crimes bill because there is already a hate crimes bill. It was part of the 1968 Civil Rights Act. It included things like race, creed, color, national origin. So that was there already.

So what we have done indicates this body has no shame. You know, we will take our military fighting for us, and attach a gay rights agenda to get it accomplished. You know, what's next? Where else do we go? What shame is there left? I guess there's more to be seen.

#### SPECIAL ORDERS

The SPEAKER pro tempore (Ms. MARKEY of Colorado). Under the Speaker's announced policy of January 6, 2009, and under a previous order of the House, the following Members will be recognized for 5 minutes each.

#### HOMEBUYER TAX CREDIT PROGRAM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Washington (Mr. McDERMOTT) is recognized for 5 minutes.

Mr. McDERMOTT. Madam Speaker, my hometown newspaper, The Seattle Times, published a front page story the other day under the headline, "First-time Buyers Ignite Home Sales." The bottom line is that the \$8,000 tax credit for first-time homebuyers is working

and should, at a minimum, be extended before it expires at the end of November. Some experts even suggest expanding the program to anyone buying a home. And that's worth considering.

The tax credit was included in the American Recovery and Reinvestment Act that the President signed into law in February. It had an almost immediate and positive impact on the U.S. housing market, and the data proves it. This chart shows that in March, the housing was still in free fall. But in April, when the tax credit began to take hold, we see the beginning of a steady increase in home sales through August, the last month for which figures are available. The tax credit has made homeownership a reality for thousands of decent, hardworking Americans. Extending it makes financial sense, economic sense, and it especially makes middle class sense.

Across America, prices are stabilizing, and the inventory of homes for sale is trending downward toward a point where market forces do not favor either the buyer or the seller. When people buy homes, they purchase appliances and curtains and a whole list of durable goods, so the positive impact of the local economy is more than just the actual purchase. It supports other jobs.

The program is working for America's families and for America. During the Congressional debate last winter the National Association of Realtors forecast that the first-time homebuyer tax credit would generate a half a million homes. The actual number is 1.4 million homes. And that benefits local governments too because of real estate and other local taxes that help pay for vital community services like police and fire.

If the program is extended and possibly expanded, there is new forecast of the impact, and it's very impressive. The second chart shows what can happen if we keep going a little longer and jobs and wages across the country, including my State, and the congressional district, the U.S. would expect 347,000 jobs with wages of \$16 billion; Washington State, 8,000 jobs, with \$375 million in wages.

The first-time homebuyer credit has nurtured a fragile housing market to better health in just 6 months. Even if you're not buying a house, you benefit because the housing market is one of the underpinnings of our entire economy and is the largest asset for families. So rebuilding the housing market helps us rebuild the economy.

As you can see, there are pending home sales. In this last chart you can clearly see that the tax credit is taking the housing market and America in the right direction. But this positive news will be threatened if we don't take action now. If it takes 60 days for a mortgage application to be processed, we are nearing the end by November 30.

The tax credit is the foundation of the fragile housing market recovery that we are expecting to see across this country.

Now is not the time to mess with success. The homebuyer tax credit works, and it keeps it working by extending the program into the next year. The Congress should act immediately on this because the slow-down is just around the corner if we don't keep the tax credit there.

#### AMERICAN CREDIBILITY, POLAND AND MISSILE DEFENSE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. POE) is recognized for 5 minutes.

Mr. POE of Texas. Madam Speaker, the United States Government plans to abandon our current missile defense plan in Europe. That will leave this country more vulnerable. Why would we want to do that? With Iran in a race to get the nuclear bomb and testing long-range missiles, America and Europe are at risk.

But the American Government decided to abandon the current missile defense shield to be installed in Poland and the accompanying radar system in the Czech Republic. This system was to protect Europe and the United States from a missile launch from Iran. The whole world knows that the little man from the desert, Ahmadinejad, is building nuclear weapons and intercontinental ballistic missiles that could send nukes to the Middle East, Europe, and the United States. We have agreements with Poland and the Czech Republic for defensive missile systems. Don't we have an obligation to protect America from the threats of tyrants like Ahmadinejad? We should not break our word with our allies. America loses its credibility with our allies by failing to live up to our commitments.

Madam Speaker, America and Poland have a special relationship. This body just voted to grant honorary U.S. citizenship to Casimir Pulaski, the Father of the American Cavalry. He was born in Poland, and he was essential to our victory in the American War for Independence. Congress commissioned this Polish individual, Pulaski, as a brigadier general with the command of all the American Cavalry; and after training American troops for a year, Washington approved the formation of an independent corps of cavalry, and Pulaski's Legion became the training ground for American Cavalry officers like "Light Horse" Harry Lee, the father of Robert E. Lee. Once a British officer called Pulaski's Legion simply, "the best damn cavalry the rebels ever had."

Then later, when World War II began, Hitler first invaded Poland. That happened 70 years ago this past September.

Poland was occupied by the tyranny of Nazism. The horror that was Auschwitz was in Poland at a place where Jews, musicians, writers, Poles and other peoples died horrible deaths. There were many concentration camps in Poland, Auschwitz being the largest and most infamous of these extermination camps. Jews and others were worked to death. This policy was called the Vernichtung durch Arbeit, or as we say in English, the annihilation through work. My father was one of the Americans to liberate the concentration camps in Europe at the end of World War II. He was a teenager and still recounts the inhumane treatment of humans by tyrants.

As America celebrated the end of World War II in 1945, Poland then was occupied by the tyranny of communism and for decades the people of Poland lived under the tyrants of communism.

So the Polish people understand more than anyone the terrors of living under tyranny. They have a special love for freedom and liberty, and they have a special love for America. Now Poland has partnered with the United States to put a missile defense system in their nation, and we must not desert them, Madam Speaker. They even stand with us in fighting terrorists in Afghanistan, and I got to meet numerous Polish soldiers at Camp Bagram in Afghanistan earlier this year. They are our friends and our partners and our allies. We stand shoulder to shoulder in this fight against the war on terror.

I also had the opportunity to meet with the Polish people in Poland earlier to discuss missile defense and other matters, and they are friends to America. They have shown their dedication to independence and loyalty to the United States since the American War for Independence. They heeded our call when we needed them with their General Pulaski, and we showed Poland our loyalty in World War II and the Cold War. Now, when liberty and freedom are in danger once more, it is unwise to abandon them and our missile defense system in Europe. After all, Madam Speaker, tyrants still roam the globe looking for the opportunity to snuff out freedom.

And that's just the way it is.

#### ONE TEAM—ONE FIGHT—ONE NAME

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Mr. JONES) is recognized for 5 minutes.

Mr. JONES. Madam Speaker, in each Congress since 2001, I have introduced legislation aimed at giving the Marine Corps the recognition it deserves as one of the official branches of the military. This year I introduced H.R. 24, a bill to redesignate the Department of the Navy as the Department of the Navy and Marine Corps. With much

support, 309 Members of the House joined me in this effort. The language was passed earlier this year by the House as part of the House version of H.R. 2647, this year's National Defense Authorization Act.

I must say that I am very pleased and honored by the group of people that have supported this legislation. The Fleet Reserve Association, the VFW, the National Marine League and the Marine Corps Parents have been so busy urging their Senators to support this bill, and I want to thank them for their hard work.

Madam Speaker, I have been contacted by many members of the Marine Corps and Navy that support this bill and agree that this is all about the fighting team, the team named the Navy and Marine Corps. In this year's conference with the Senate, I had a Senator say to me that he had never received a letter from a marine supporting this bill.

Madam Speaker, I would like to read you a letter that a former Marine Corps general wrote to this particular Senator at the beginning of this month: "I am writing to ask for your support in passing H.R. 24 and S.R. 501, which have been referred to the Committee on Armed Services and would redesignate the Department of the Navy as the Department of the Navy and Marine Corps.

"For many years I have been an advocate of the Navy and Marine Corps team and believe this team is without parallel in any of the Armed Forces in the world. I proudly served alongside my Navy brothers-in-arms in both peace and conflict for 40 years. I would not recommend any action that I feel would belittle either partner of the team.

"Changing the name of the Department as proposed by this legislation would not demean the Navy, but would recognize marines as full partners in this team and would be a strong boost to their morale. In fact, the Department and the Secretary represent both services, the Navy and the Marine Corps, and this legislation would provide a name that mirrors the fact.

"Thank you for your consideration and for your continued and valuable service to our Nation."

□ 1615

After 8 disappointing years, I hope one day the Senate will join me in supporting and bringing proper respect and acknowledgment to the fighting team of the Navy and Marine Corps. I want the supporters of this bill to know that there will be a tomorrow. I'm not going anywhere. And I will continue to fight until the Marine Corps gets the acknowledgment it deserves.

In closing, I want to thank the many House Members who have supported this legislation for 8 years, and I want

to close by asking God to please bless our men and women in uniform. I want to ask God to bless the families of our men and women in uniform. I want to ask God in his loving arms to hold the families who have given a child dying for freedom in Iraq and Afghanistan. And I close by three times and most sincerely asking God: God please, God please, God please continue to bless America.

#### AMERICA WANTS HEALTH REFORM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. GRAYSON) is recognized for 5 minutes.

Mr. GRAYSON. Madam Speaker, I have words for both Democrats and Republicans tonight. Let's start with the Democrats. We, as a party, have spent the last 6 months, the greatest minds of our party, dwelling on the question, the unbelievably consuming question, of how to get OLYMPIA SNOWE to vote for health care reform.

I want to remind us all, OLYMPIA SNOWE was not elected President last year. OLYMPIA SNOWE has no veto power in the Senate. OLYMPIA SNOWE represents a State with one-half of 1 percent of America's population.

What America wants is health care reform. America doesn't care if it gets 51 votes in the Senate or 60 votes in the Senate or 83 votes in the Senate. In fact, America doesn't even care about that. It doesn't care about that at all.

What America cares about is this: There are over 1 million Americans who go broke every single year trying to pay their health care bills. America cares a lot about that.

America cares about the fact that there are 44,780 Americans who die every single year on account of not having health care. That's 11 every day. America sure cares a lot about that.

America cares about the fact that if you have a preexisting condition, even if you have health insurance, it's not covered. America cares about that a lot.

America cares about the fact that you can get all the health care you need as long as you don't need any. America cares about that a lot.

But America does not care about procedures, processes, personalities. America doesn't care about that at all. So we have to remember that as Democrats. We have to remember what's at stake here is life and death, enormous amounts of money, and people are counting upon us to move ahead.

America understands what's good for America. America cares about health care. America cares about jobs. America cares about education and energy independence. America does not care about process or politicians, or personalities, or anything like that.

And I have a few words for my Republican friends tonight as well. I

guess I do have some Republican friends.

Let me say this. Last week, I held up this report here and I pointed out that in America there's 44,789 Americans who die every year, according to this Harvard report published in a peer review journal, because they have no health insurance. That's an extra 44,789 Americans who die, whose lives could be saved, and their response was to ask me for an apology. To ask me for an apology. That's right, to ask me for an apology.

Well, I'm telling you this. I will not apologize. I will not apologize. I will not apologize for a simple reason. America doesn't care about your feelings. I violated no rules by bringing this report to America's attention. I think a lot of people didn't know about it beforehand.

But America does care about health care in America. And if you're against it, then get out of the way, just get out of the way. You can lead, you can follow, or you can get out of the way. And I'm telling you now to get out of the way.

America understands that there's one party in this country that's in favor of health care reform and one party that's against it, and they know why. They understand that if Barack Obama were somehow able to cure hunger in the world, the Republicans would blame him for overpopulation. They understand that if Barack Obama could somehow bring about world peace, they'd blame him for destroying the defense industry. In fact, they understand that if Barack Obama has a BLT sandwich tomorrow for lunch, they will try to ban bacon.

But that's not what America wants. America wants solutions to its problems, and that begins with health care, and that's what I'm speaking for tonight.

#### NASA TECHNOLOGY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. POSEY) is recognized for 5 minutes.

Mr. POSEY. As we face the risk of ceding our leadership in space to Russia, China, and other countries, I want to take a moment to review many of the benefits of space exploration that everyone enjoys, even though many of them may take it for granted.

The typical American home contains dozens and dozens of inventions from America's investment in space. That flat-screen TV was developed from NASA technology. The furniture or drapes that are fire-resistant material, that may be attributed to NASA's fire safety research. If your home security system uses a push-button panel and intrusion detectors in the windows, you benefited from space exploration.

If your home is equipped with carbon monoxide sensors and fire detectors,

then you've benefited from America's space program. If you enjoy using scratch-resistant lenses in your glasses, then—you've guessed it—you've benefited from the space program.

Chances are you enjoy using batteries, cell phones, laptops, calculators, even Velcro. If so, you've benefited from our space exploration. If you appreciate the clean, crisp water in your glass, you may be interested to know that every home water filter came about thanks to America's space program.

That cooler used on a trip to the beach, a picnic, or a camping trip relies on space-based technology to keep your food and drinks cool. Solar technology used to power your hot water heaters and other home appliances owe their existence to America's space exploration. And if you're keeping an eye on time by looking at your quartz-based watch, you will want to credit the space program for that, too.

If you plan on enjoying some golf or other sports this weekend, remember that our space program gave rise to the plastics and the graphites used most commonly in sports and safety equipment.

These are but a few of the many contributions that have arisen from our Nation's space program. If we want to keep America strong economically and maintain the military high ground, we must not cede our leadership in space to our competitors.

As most of us know, the President promised that he would close the gap between our space shuttle program and our constellation program. We all need to be committed to helping the President of the United States keep his word.

He also promised that he would see that America remained first in space. And we must also do our level best to help the President keep that promise, too.

#### AFGHANISTAN: IN TO WIN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. McCOTTER) is recognized for 5 minutes.

Mr. McCOTTER. Madam Speaker, right now, people are fighting and dying for a free Afghanistan. They deserve an answer to the crux of the matter: Are we in to win? I believe we must be.

My answer stems from a broad strategic vision focused by three fundamental principles: One, America's security is from strength, not surrender; two, our greatest strength rests in expanding liberty to the oppressed to ensure freedom for ourselves; and three, we are targets of tyrants and terrorists not because of our actions but because of our existence.

Helping the Afghans free themselves from the Taliban's tyranny and al

Qaeda's terrorism is a moral good unto itself. To retreat from or compromise this noble goal in the cause of human freedom will not only be a betrayal of the Afghans, it will endanger our own birth right as a free people.

Our allies, our rivals, and especially our enemies will witness our lack of conviction; and, by so dishonoring ourselves, we will squander our allies' trust, lose our rivals' respect, and incur our enemy's emboldened depravities.

Our primary nation-state enemy, Iran, imperviously continues its pursuit of nuclear weapons and the means to wield them. A defeat in Afghanistan will condemn generations yet born to the capricious terrorism of an Iranian regime protected by a nuclear umbrella. Alternately, victory in Afghanistan will further Iran's necessary containment by democracies opposed to terrorism.

Unable to expand its sway, Iran's ability to coax our rivals into opposing sanctions and, worse, aiding its nuclear pursuits, will ebb and end; and, within its own borders, the regime will falter and, like the Soviet Union, ultimately implode between the weight of its own oppressed people's aspirations for freedom.

Regarding Afghanistan particularly, General Stanley McChrystal has affirmed victory remains within reach. What form will it take? My view is the richly diversified people of Afghanistan desire a decentralized democracy that is opposed to terrorism and is engaged with their neighbors and allies.

To this end, America, NATO, and the U.N. must renounce the recent fraudulent election and schedule a scrupulously monitored, honest election. This is essential to reassuring the Afghans that their nascent representative government and the coalition's intentions in their homeland are legitimate and benevolent.

As this process proceeds at pace, we must make clear the new democracy's governing principle is local control. Every Nation, especially one as tribal as Afghanistan, has traditional roots of order springing from and connecting the individual and family to the local community and larger country. Without an enduring history of or trust in a centralized, bureaucratized rule from Kabul, only an explicit, enduring commitment to local control will soothe Afghans' resistance to their federal government's existence. Moreover, local control also intermeshes with coalition forces' counterinsurgency operation.

Emulating General David Petraeus' brilliant counterinsurgency strategy in Iraq, coalition forces must be increased to provide the force necessary to defeat the enemy's violence and intimidation of Afghans. As the security situation is stabilized, coalition forces and steadily increasing Afghan national police and

army personnel must live amongst the people to facilitate sustainable local economic developments and democratic institutions. In sum, the coalition will separate Afghans from the enemy by concretely proving the moral and practical superiority of locally rooted democracy over nihilistic terrorism and tyranny.

Importantly, reconstruction efforts must not be limited to Afghanistan. With the enemy infesting western tribal regions of Pakistan, the coalition must also engage with that nation's people and government in "preemptive reconstruction." Rolling blackouts, food shortages, and other persistent problems affecting Pakistanis must be ameliorated at the national and, critically, the local levels. This will stop Pakistanis from viewing themselves as unwilling conscripts into a "proxy army" being used by the coalition; it will stabilize Pakistan's Government; it will demonstrate the coalition's commitment to the well-being of Pakistani citizens; and will empower the Pakistani army to more actively and effectively coordinate with coalition forces to eradicate the enemy's safe havens in their Nation—safe havens which, I note, constitute an existential threat to democracy in Afghanistan and Pakistan. Surrounded by free Afghans and coalition forces, the enemy will be uprooted from its havens with nowhere to hide and will be crushed.

This is the synopsis of the broader strategic context and immediate recommendations of those who support victory in Afghanistan. May we all ever remember America's greatest security as liberty, and let us pray the Obama administration supports General McChrystal's plan for victory so that we and future generations in this world never confront the prospect of a wider war and endless threat from abandoning Afghanistan.

#### THE MACKAY FAMILY: PART III

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Utah (Mr. BISHOP) is recognized for 5 minutes.

Mr. BISHOP of Utah. I think I do tonight the end of what is a trilogy. I have been here on three nights talking about a family in my community. Two nights ago, I introduced this body to the Mackay family; a doctor, respected, board-certified orthopedic surgeon of 30 years in the community, who has been alleged by the Drug Enforcement Administration of having given improper prescriptions to his patients.

Last night, I explained what happened to this family, as 20 members, armed, in uniform, came in and held him at bay for 4 hours as they searched his home and office and took all his records, his books, his car, his truck, all his cash, his savings, and even his retirement account.

□ 1630

I told how his family had nothing and lived on their food storage for a while until 5 months later they finally went to court and had some of their property returned. But the Federal Government still has the truck and all his books, as well as his savings and checking account, and has yet to make a charge or arrest this individual. It is now 15 months later.

Today I finish the story. The Drug Enforcement Agency did offer a deal to this good doctor saying they would drop everything and it would all go away if he would simply surrender his license to practice medicine. Thinking he has done nothing wrong, he refused that offer. In March, the DEA started the procedures to remove his license from him.

The administrative law judge, a judge of the executive branch, hired by and working for the Drug Enforcement Agency to make quasi-judicial decisions on the actions of that agency, decided to hold a hearing on his license and insisted that everyone had to come from Utah back here to Washington, D.C. A local court said that was silly and ordered the hearing to take place in Utah. The judge, somewhat piqued at that, should have, to make sure there was no element of antagonism or question about it, recused himself as he was requested. Nonetheless, he did preside over that hearing.

The doctor, because he still has the chance of judicial action hanging over his head, was advised by his attorney to answer all questions by taking the Fifth Amendment. Now I don't want to say what I think should be the case on his license. That is still being reviewed and is yet to be officially decided by the DEA. Nor do I think I have the competence to make a lot of these decisions. What I do know is that, in my opinion, this doctor is no threat to the community. That opinion is backed up by the majority of the physicians in the community whose sworn depositions say the same thing.

I do know that this family, since June of 2008, has been terrorized, his profession destroyed, reputation besmirched and his property confiscated. Yes, he went back to court to get some of it back, but why did he have to do that? Yes, if the DEA decides to take his license, he can go to court to have that overturned as well, but why should he have to do that? Justice, if it is to be there, should be a justice that works quickly so that he is charged, he goes before a jury of his peers and a conviction or an acquittal takes place. This nightmare of delay is nothing more than that for this poor family.

Now the good part of this message is this is an isolated case. This is not the way most things happen. The bad part of this message is this is not a unique case. Other times this same thing has happened. Citizens should not be treat-

ed in this way. It's simply the wrong way to do it. The Mackay family deserves all of his resources returned to him until such time as a conviction does take place. He also deserves some kind of an apology, neither of which I have the power to do. But I do have the power to at least express my sympathies for one of my constituents whom I do not think has been treated well. And if as a representative of my constituents I cannot at least do that, I have no more value in this particular body.

This ends the trilogy of this particular family. It does not end the nightmare of this family. I hope it can end soon for their benefit.

#### MOVE THE VIETNAM HUMAN RIGHTS BILL NOW

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Louisiana (Mr. CAO) is recognized for 5 minutes.

Mr. CAO. Madam Speaker, in 1620, 102 Pilgrims and a crew of approximately 25 people left England on the Mayflower to escape religious oppression. After an arduous 66-day journey plagued by disease, they landed on the shore of Plymouth and founded this great Nation.

The story of the Mayflower is a symbol of the struggle against religious oppression, and the symbol still resonates in the hearts and minds of the American people today. But this struggle for religious freedom did not end with the Mayflower. The struggle continues today worldwide in countries such as Tibet, China, the Sudan and Vietnam. Two days ago, I had the great honor of speaking to His Holiness the Dalai Lama. He encouraged the U.S. Congress to continue speaking out against religious oppression and to stand up and defend the values that founded our great Nation. This is what I'm doing today.

Madam Speaker, the country that I would like to challenge today, and have done many times previously, is Vietnam. Vietnam, for decades, has exemplified religious and human rights oppression. And this image today has not changed. Since receiving its preferred status and being selected a member of the World Trade Organization, Vietnam's record on human rights and religious freedom has gotten worse rather than better. This regression is well documented by Human Rights Watch as well as by the Commission on Religious Freedom.

Madam Speaker, let me briefly outline for you what the Vietnamese Government has done. Ten years ago, the Vietnamese Ministry of Labor, War Invalids, and Social Affairs directly oversaw and operated two state-owned labor companies that were involved in the largest human trafficking case ever prosecuted by the U.S. Department of

Justice. The High Court of American Samoa rendered a judgment against the Vietnamese Government in the amount of \$3.5 million, and they have yet to pay.

Recently, the Vietnamese Government assaulted, arrested and imprisoned dozens of Catholics in the Diocese of Vinh for erecting a temporary place of worship on Tam Toa Parish Church that was destroyed during the Vietnam war. They attacked the parishioners of Thai Ha Parish as they were conducting a prayer service. They then arrested and wrongfully prosecuted church members for inciting riot. They imprisoned Father Nguyen Van Ly, put the Venerable Thich Quang Do under house arrest, and forced members of Protestant churches to renounce their faith. They arrested and imprisoned human rights activists such as Le Cong Dinh, Le Thi Cong Nhan, and Nguyen Van Dai for criticizing the government. They forcefully evicted 400 Buddhist monks and nuns from Bat Nha Temple and shut down the monastery without just cause.

These are just a few examples of the outrageous and egregious actions taken by the Vietnamese Government recently in violation of every principle of justice and fairness. If these examples are not sufficient to draw our attention and condemnation, I do not know what will.

Unfortunately for these oppressed people, our world today does not allow them to simply leave their country to establish a country of freedom elsewhere. That is why they need the assistance of a country like ours, the most powerful democratic country in the world, to speak on their behalf.

We must speak loudly by passing the Vietnam Human Rights Bill. The longer we wait, the longer people like Venerable Thich Quang Do, Father Nguyen Van Ly, Mr. Le Cong Dinh and countless others like them will continue to suffer.

#### HEALTH CARE REFORM—ONE GIRL'S TESTIMONY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Minnesota (Mrs. BACHMANN) is recognized for 5 minutes.

Mrs. BACHMANN. Thank you, Madam Speaker.

The House bill to have government take over health care contains section 2511 which would put clinics in our schools. Minnesota has experience with these clinics.

Here is one girl's testimony:

"Hi. My name is Jamie. I hope my personal story and experience with the West Suburban Teen Clinic will convince you that bringing this clinic into the school campus will endanger the health of many students.

"At age 14, I was what you could describe as a rebellious teen. My parents

had rules, like all parents, and tried their best to instill moral values in my life they hoped would guide me down the right road. But I chose a path that led to the West Suburban Teen Clinic. It was there I learned how easy it was to get birth control, morning-after pills, exams, condoms, or whatever else I needed to have sex and not tell my parents. I didn't even have to go to a real doctor.

"At the clinic, I was told my parents didn't have to know about any of my visits or what birth control the school clinic was giving me. The clinic made it so easy for me to have sex. They made it so easy to hide things from my mom and dad. After all, since it was my right not to tell them about birth control, they didn't need to know anything else about my life either. The teen clinic opened the door for me to lie and supported me in my deception. Looking back, I can see that their counseling affirmed a continuous pattern of lying, secrets, and cover-up. This destroyed any mutual trust between my parents and me.

"The West Suburban Teen Clinic convinced me I was doing a good thing by going there because I was practicing safe sex. Was it safe to break the trust with the only people who really truly protected and cared about me? Was it safe when the clinic jumped at the chance to give the morning-after pill to a 14-year-old without revealing to me any of the negative health-risking side effects?

"They didn't even care who I was having sex with. Imagine, a 14-year-old. I could have been having sex with an older man. It could have been rape. Anything. They never once took the time to ask me. I was so young. All I thought was, oh, I won't be getting pregnant if I take this morning-after pill. I was never given the facts about side effects.

"I went to the West Suburban Teen Clinic multiple times to get the morning-after pill. They would ask me if I needed a couple of back-up pills to keep in a friend's house just in case, or to hide at my own house so I wouldn't have to ride all the back way back to the clinic.

"I can honestly say that the clinic visits also had a very negative effect on my education. As I became more involved sexually and had more visits to the clinic, I would sit in class thinking about what courses and classes I could miss so I could make my school clinic visit for more pills and condoms before the end of the school day. It made it difficult for me to focus on my class assignments when I was thinking about a pelvic exam or the thought of having an STD or being pregnant.

"Now I'm 20 years old. I'm very concerned about the long-term damage to my health thanks to this so-called safe-sex clinic. They not only helped me hide things from my mom and dad,

they hid the truth from me. The West Suburban Teen Clinic didn't care that I was a minor teen. They didn't care what the side effects of these pills would do to my reproductive system. And my body is messed up. They gave me pills and condoms and they left it to my parents to pick up the pieces.

"If only I knew what I know now, how the West Suburban Teen Clinic's advice and pills damaged me physically and emotionally, I could have prevented so many of the problems with my parents and my family. If only I had never gone there. And now you are bringing these clinics to all the high schools?

"You need to protect kids. You need to uphold the desires of parents, not the wishes of clinics that make money off kids' mistakes. My parents tried to protect me. The clinic took that right away. They took over the role that my parents were intended to have and they hid everything from them, the people who loved me the most.

"Please stop this clinic from coming in and ruining more kids' lives. I wish I could warn all the students at high schools about these clinics. They need to know about the physical and emotional damage that can be done by a pattern of pills and promiscuity. I wish I could tell them. I know the West Suburban Clinic won't."

Madam Speaker, this is a story of tragedy by one girl in Minnesota. Minnesota has experience with the school-based sex clinics that are being proposed in the bill that would have government take over health care in this country. Surely we can do better by our children than encouraging them to gain experience in a lifestyle that will bring them only heartache and perhaps physical devastation.

#### THE PROGRESSIVE MESSAGE—HEALTH CARE REFORM

The SPEAKER pro tempore. Under the Speaker's announced policy of January 6, 2009, the gentleman from Minnesota (Mr. ELLISON) is recognized for 60 minutes as the designee of the majority leader.

Mr. ELLISON. Madam Speaker, we are here again for another evening with the progressive message, the message that comes to the House floor Thursday night to talk about a vision of America not based on fear, not based on things that are not true, but a vision of an America where we stand up and we include everybody within this vision. No matter what color, what culture, or what faith you belong to, America is a place for you. We bring people from all parts of the world who bring and make up this great American vision that we're talking about, a progressive vision where middle-class and working-class people can actually have policies that help them, a progressive vision which says we can have health

care for all. We can have true health care reform which allows Americans to partake of the great wealth of this country for the benefit of their health. A progressive vision says that America can live at peace. We don't have to be in war after war. We can have a policy of peace which develops our relationship with the rest of the world based on diplomacy, development and things of mutual benefit.

Today this is the progressive message, and we are glad to be here with the progressive message sponsored by the Progressive Caucus.

□ 1645

Tonight, what is the topic? Guess what, surprise, health care. Today we have two great advocates and leaders, and I am so honored to be on the House floor today with two good friends and leaders, the gentleman from Michigan (Mr. CONYERS), the chairman of the Judiciary Committee, and also the gentleman from Washington (Mr. McDERMOTT) of the Ways and Means Committee who is also a physician, both with us today. I want to invite both of them to offer some remarks as we get started on the Progressive message today, focusing on health care reform, patients before profits.

Congressman, Doctor, what are your thoughts?

Mr. McDERMOTT. Mr. ELLISON, it is a pleasure to be here today. In the caucus the other day we were talking about health care, and one thing that is very clear in this country is that the medical-industrial complex doesn't want to change. They want things as they are. They would be glad to take additional money to cover people, but they want to go through the private sector. Let's just keep grinding out the profits, never mind what happens to the patients.

This effort that is being made in the House, and I hope to have a bill out here in 10 days or so, is an effort to make sure that what you just suggested happens. That is, that everybody in this country has health care that is adequate, that takes care of the needs they have, no matter how much money they have, no matter what they look like, no matter where they live. They should have the same kind of health care in this country no matter what their circumstances are.

I told the story, I said one of the things that people tell me: Everybody in this country gets health care. What are you talking about?

What I said to my colleague when he said that to me, you know, the difference between Members of Congress and ordinary folks in this society is, we live a somewhat different life. If you call up and say, This is Dr. McDERMOTT or Congressman McDERMOTT, I have a pain in my stomach, they will tell me to come into the office tomorrow morning. Everybody else goes through

this little drill. When you call the doctor's office and say, I have a pain in my stomach, the first question is, What kind of insurance do you have?

Now if you have private insurance, you will be in the office tomorrow morning. If you have Medicare, well some doctors don't take Medicare, so it may be a week before you get taken care of. God forbid if you have Medicaid, you will never get taken care of. Or it will be a month or a month and a half. And if you don't have health insurance, they have an offer for you: If you will come in and pay \$25 or \$30 upfront, we will have an appointment for you in 2 weeks.

People say that isn't true. Well, let me tell you, there are very well-documented studies, and they put people on two phones sitting right next to each other, they would call the same doctor's office, give the same story about a pain in their stomach, and find out what the relationship there was between what kind of insurance they had and when they got seen.

Now, it shouldn't be that way in this country. If you are sick and you have pain in your stomach, you ought to be able to get in and see a doctor.

What clearly happens in that case, for those people who have to wait 2 weeks or a month or whatever, they go along with that pain in their stomach waiting for their appointment, waiting for their appointment. When they can't stand it any longer, they go to the emergency room. That is why emergency rooms are flooded with things that ought to be seen in a doctor's office, but people can't find a way, they can't find a doctor that will accept them.

Well, I told this story, and one of my colleagues came up to me and said, You know what, you are absolutely right. He said, I just had my knee replaced. He said, I got talking to the doctor about it, and the doctor and I were talking about how he would get paid. The doctor said, Oh, you're perfect. You've got private insurance. We all have Blue Cross-Blue Shield here in the Congress. He said that is good insurance and that pays for it and that is good.

My friend said what if I had Medicare?

The doctor said, I would have said, Why don't you wait for a couple of months?

And my friend asked, If I had Medicaid? The doctor said, I would never see you. I don't accept Medicaid patients for knee replacements.

So there is rationing in this society today, and it depends on what kind of plastic you have in your pocket. Now to simply pass out more plastic cards in the insurance industry today will not work, and that's why we have to have a good public option. We have to have an option that functions the same as it does if you have a private insurance card.

If you meet a Canadian some time, ask a Canadian to show you their provincial health care card. In Ontario, they are orange. In New Brunswick, they are blue-green. In Quebec, they are kind of a greenish color. They have a card no matter where they go in the province. In Canada, they hand in that card and they get taken care of. That's what ought to happen in this country, and the public option is the only way we are going to get people who don't have health insurance today the opportunity to access the health care system and actually have an opportunity to see a doctor.

Now it is clear that the President has said not only does he want to have access, but he wants to have a plan that controls cost. The fight now in here is the fight between—giving people access is going to cost more money in some ways, although there is lots of money to be saved in the present system, but the providers and the drug companies and the insurance companies and all the other people who are involved in the medical industrial complex don't want to have anybody put any control on their costs. That's what the fight is that is going on right now as this bill comes to the floor.

JOHN CONYERS has worked as long as I have trying to get what we know would be the best system, which is the single-payer system. Now the President said we are not going to go that route, we are going to go a little different route. We are helping him to get there. It is not the perfect system, but it will get people the access and the cost control that is necessary.

I listened to my colleague from Minnesota just a moment ago telling us this story about this clinic and what is in the bill. I believe that bill has been out on the floor and up on the Web site. Anybody who can read could have read it in the last 30 days, in the last 60 days, and there are no such clinics in that bill.

Mr. ELLISON. Are there death panels? I yield back.

Mr. McDERMOTT. Absolutely not.

Mr. ELLISON. Are there school sex clinics?

Mr. McDERMOTT. No; that is scare tactics. You know better than that, KEITH. Why are you asking those questions?

Mr. ELLISON. It is part of what has been going on. You saw August. You try to have a civil conversation, and then some people would show up and try to disrupt the meeting. Why would they want to disrupt the meeting when all we are trying to do is have a civil dialogue about the future of our country and the future of health care.

Why are we hearing about death panels? To scare seniors.

Why are we hearing about sex clinics? To scare parents.

Why all this stuff?

Let's get Chairman CONYERS in the conversation. He looks like he is

digging out some facts. I just want to pose the question to you gentlemen: Why, why, why are we hearing about all of this fanciful, made-up stuff that is on the Web and anybody can look up the bill and say, that ain't so? Why are we hearing all this stuff?

Mr. McDERMOTT. You know, there is sort of a political axiom that if you can make people afraid, you can get them to do exactly what you want them to do. In this case, they want people to say no, we don't want the government to take over our health care.

Now the government pays for military health care. The government pays for veterans' health care. The government pays for seniors' health care in this country and poor people's health care in this country. And they want government to go away? Come on.

Sixty cents out of every health care dollar in this country is coming from the government through all of those programs. And the people are saying that they don't want the government. I have had older folks come to me and say, I don't want the government to get into my Medicare. Folks, Medicare is a government program. They simply are scaring people to the point where they are not thinking clearly about what is going on in this country.

Mr. ELLISON. Scare tactics.

I yield to Chairman CONYERS. Welcome to the Progressive hour, the Progressive message, patients before profits tonight.

Mr. CONYERS. I am so glad we are doing this, and I am glad to be with both of you.

Dr. McDERMOTT has been working on this for so long, and he brings a clear voice of experience, not congressional but medical. That's what makes this so important. Of course you, Mr. ELLISON, are a young person who has jumped into this in a way that makes me very proud that you grew up in Detroit, probably in my district.

I have something that just came in from the 14th Congressional District in northwest Detroit.

We had an examination of how many seniors in my congressional district hit the doughnut hole in the bill, the current legislation. There were 5,400 seniors that were forced when they hit that doughnut hole to pay their full drug costs, despite the fact that they had part D medical coverage.

And the current bill before us that we are working on, H.R. 3200, it would cut brand-name drug costs in the doughnut hole by half and ultimately eliminate the doughnut hole. That is very important, especially in this day and age.

We found that there were 2,230 health care related bankruptcies in my congressional district alone. At our next Special Order, I am going to have these same numbers for the whole State of Michigan. So 2,230 people in the 14th

Congressional District had to go into bankruptcy court in the year of 2008, primarily caused by the costs of health care not covered by their insurance.

In 2008, health care providers in the district were provided \$31 million worth of uncompensated care, care that was provided to individuals who lacked insurance coverage and who were unable to pay their bills.

How many people don't have insurance, my colleagues, in the 14th District, have no health care coverage at all. This is last year's figures, which have undoubtedly gone up since 2008: 1,300 people in my district are uninsured. How many are uninsured, my colleagues, in your districts? That is 17 percent of all of the people in the district that are uninsured, and the Congressional Budget Office estimates that 97 percent of all Americans will have insurance coverage if H.R. 3200 takes effect.

□ 1700

Now, if this benchmark is reached in the district, 85,000 people who currently do not have health insurance will receive coverage. There is another factor I would like to introduce. I haven't discussed it with you, but this as good a time as any to do it.

There is a stress factor coming into this whole discussion of health coverage in America because of all of the people that are losing their jobs, especially in Michigan and Ohio, industrial States that are hit the hardest. We have the highest unemployment rates. But there is something else that kicks in. When you lose your job, you, of course, lose your income; and, frequently, if you have a mortgage payment, you could end up losing your house.

One of the things, Dr. McDERMOTT, I was in a shelter in midtown Detroit off Woodward Avenue at Peterboro, and both of you have been there. I went into the shelter in the morning, and they were having breakfast. I was astounded by this one visual picture I got. These were not people that were homeless, wandering around or were disheveled. These were well-dressed people being fed in a shelter who had just recently lost everything. When you get hit, you lose your house, your car, your job, your insurance, your pension. So you come into a shelter, you're dressed like we are, but you don't have anywhere to eat, you don't have anywhere to stay. I have never experienced that phenomenon before in my life.

One other factor that is up to date and in real-time is that with all the people suffering under this economic—well, it's called a severe recession, but I call it a depression—there are people now that are working who have jobs, who have health insurance, but there is a little something beginning to bother them: Maybe this could happen to me too. We all know people who were

going along quite well; and all of a sudden their company announced at 3 p.m. on Friday that, You don't have to come back anymore, or, We're closing down in 2 weeks. Sorry about that. We can't explain it now, but this is it.

There are people now—and you may be able to comment on the stress factor—there are people that are working. Nobody said they were going to close their job down. Nobody has heard any rumors about anything. But they can't help but think about all the other people that were going along smoothly, and they lost their jobs. People are beginning to worry about the fact that—I know it's not me. I know I'm working. I know I've got insurance, but it could be me next month. It could be me in December. It could be me in January. What about that?

Mr. McDERMOTT. Well, you know, JOHN, you are talking about the fundamental thing the President is trying to do, and that is to give people security, health security, that they know that if they get sick or they have an accident, they'll be taken care of. The fundamental weakness of our system forever has been that your health insurance has been tied to who you were employed by. When the economy's rolling along, and when the economy's going up, that's not too bad. It works pretty well. In fact, the difference between right now and what was going on in 1993–1994, as you remember when Mrs. Clinton tried to do this—everybody says, What's the difference between then and now? Then things were going up, and everybody thought, Well, this plan they're putting together is for somebody else. It's for them. They didn't know who “them” was, but it was somebody they didn't know.

When you have a system that's tied to employment—people always thought that this health care business was about them. The difference today is, as you point out, middle class people who yesterday felt they were just about as secure as they could be—they had a job, they had health care, their kids were in college, blah, blah, blah—and bingo, they lose their job. We had a bank go down in Seattle, Washington Mutual Bank. There were 4,300 people that were affected. That's 4,300 families who found themselves instantly without a paycheck, without health care, and in many cases, all of their pension money was in an IRA of the company's stock. So they suddenly had no pension. They had no security whatsoever. No house, no health care, no food, no anything.

It's impossible for that not to be stressful to people, and people then have stress-related diseases. There are plenty of stress-related diseases. We know them. Post-traumatic stress disorder is a stress disease. And any kind of emotional thing like that is going to take a toll on you physically. A lot of

people are suffering today from emotional illnesses, secondary to the instability of their economic situation.

Mr. CONYERS. But, Dr. McDERMOTT, I'm talking about the people that didn't lose their jobs, income and health insurance. I'm talking about the folks that are working, and they know about that. They can't help but think, That could happen to me. I don't know what you call this, but you start another stressful situation from that. There is nothing happening to them, but it's happening to people around them. It happens, like these people that I saw in this shelter in Detroit, where if we weren't in a shelter, they would be people I would expect to see at Starbucks.

Mr. ELLISON. If the gentleman would yield, can I just point out that I have a chart here that I think does shed some light on the situation. Because a lot of the dialogue we've been having, quite frankly, is focused on the uninsured.

But let's take a moment to talk about the insured, the folks who actually have insurance, the people who have anxiety about what could happen to them if they lose it, if they get sick. Because you know, if you get sick, that's when they don't want you on their insurance anymore, right? Cumulative change in single and family health insurance premiums, that's what you pay, what comes out of your check every 2 weeks or every month—and the Federal poverty level.

We've been seeing that the level of poverty has been rising, but look at this dramatic increase in the family premium. This family premium has jumped up 130 percent from 1996. This is real money coming out of the paychecks of real families all the time. People say we don't need reform and say that we're trying to scare people with fake death panels and fake school sex clinics and all this kind of stuff. The fact is that this is what the average family is living through, and this is impacting people who pay premiums, which means they have employer-based health insurance. What are people to do about this dramatic situation as they're facing trying to make ends meet in their family budget?

I yield to either one of the gentlemen.

Mr. CONYERS. Well, when you say 130 percent increase, that's more than double, isn't it?

Mr. ELLISON. Oh, yes.

Mr. CONYERS. A 100 percent increase would be double. A 130 percent increase is one and a third more than what they're paying. Is this an annual increase rate?

Mr. ELLISON. This is from 1996 to 2006.

Mr. CONYERS. Oh, I see. It's a period of over 10 years. What it's saying to me is that these folks don't have any option of changing insurances or doing

anything. What are their alternatives? If you don't pay, where are you going? Is there some private insurance company offering a lower premium? Can we call up insurance companies and say, My insurance has more than doubled over the last 10 years, and I want out. What happens then?

Mr. McDERMOTT. You're tough out of luck. If you go into the individual market, you'll pay even more. So if you're in a big group, you know, working for Ford Motor Company or for Delco Battery or something, that way you get the risk spread over everybody. But if they're just looking at you or me or the next guy, they're going to charge you a much higher premium for anything that you have, any kind of preexisting condition.

So it's worse when you leave one of those groups. People stay in, and they scramble to try to make it. But every company in the country has been shifting more and more cost onto the individual. They used to pay in some companies 100 percent. Now they pay 60 percent, and 40 percent has to be paid by the employee. Their deductibles are going up, and the copays are going up. That's why the President has said we have to find a way to control costs. We can't let this go on.

Mr. ELLISON. If the gentleman would yield, if you look back at this chart, "National Health Expenditures Per Capita." That means that we take all the health care expenditures and divide them by the number of people. So the average amount of health care expenditure for the average person—look at these numbers. This is what actually happened, and this is what is projected to happen.

If we look at 1990, going back to 1990, what we saw was about \$2,814 per capita, per health care expenditure per person. This is 1990, the year I graduated from law school. If you go to this one, 2009, it's \$8,160. Look at how this has more than doubled since 1990. As a matter of fact, this has nearly tripled.

The fact is these expenditures are galloping higher. If you look at the projected rate, we're up here. By the year 2018, it will be \$13,000 per person. This is ridiculous.

Now, there is another chart I want to show you, and this chart is a chart that looks at different countries. So you look at this blue here. The blue is the United States; and then we have the red, France; the green, Canada; the purple, Germany; and then this aqua color, the United Kingdom. Back in the year 2000, we were up here at \$4,570, way above everybody else. If you look at Germany, they were second, but everybody else was in the low 2,000s or higher 1,000s. This is the industrialized world.

Now, if you flash forward to here, in 2006 we're up around \$6,714. We're still way above everybody else, but look at how we are compared to ourselves over

time. The American family can't sustain this. Why do we cost so much more than everybody else? It's time for a change. It's absolutely time for a change.

I yield back to the gentleman from Washington State.

Mr. McDERMOTT. Well, I think that is what is really troublesome about this debate, is that people on the other side who argue that there doesn't need to be change—you say to them, Well, what are you offering? They say, Well, let's give tax credits to people so they can buy their own health insurance.

Now, let's just think about that for a minute. The average income in this country is about \$45,000. So you're making a little less than \$4,000 a month. You can easily spend \$1,000 a month on a premium. So each month you've got to take \$1,000 of your \$4,000 out and go down and buy your health insurance. Now, the Republican solution to that is, Give them a tax credit. Let them wait a whole year to the end of the year, and then you give them back their money at the end of the year.

□ 1715

Most people don't have that kind of ability to wait for 12 months to get their money back. Rich people can. I mean, they can wait for a tax credit someplace down the road. But ordinary people who are living from paycheck to paycheck do not have the ability to spend a thousand dollars a month on a health care premium and wait 12 months to get credit for it on their income tax.

So their proposals sound like they have something in mind. Yes, they have something in mind, but it simply won't work.

Mr. ELLISON. Reclaiming my time, I'll cite another example of that.

We hear a lot of people saying the solution to the problem is that we should just let people buy and sell insurance across State lines, and they offer this as something that's supposed to fix everything. But what they don't tell you is that 34 markets around the country have markets where one to five insurance companies are offering products and that's about all there is. Like in Alabama, as the President mentioned, one company dominates 90 percent of the market.

So basically they want to say, well, if you can go from Ohio to Minnesota, then the fact is that they think that's going to solve the problem. But if you have a monopolized market here and a monopolized market there, you still don't have a whole lot of choice. You still don't have a whole lot of people willing to offer you very much.

And how come these markets are so monopolized? Because it's extremely difficult to break into a market and build up a provider network, a doctor network in order to be able to compete

that way. So they're saying you can compete with this monopoly and that monopoly and it's not going to solve anybody's problem, it might be a small part of some solution somewhere. But the real solution is single payer, which is why I'm on the bill, but a good medium solution is a strong public option, and we have got to have people fighting for it.

Mr. CONYERS. Will the gentleman yield?

Mr. ELLISON. I yield to the gentleman.

Mr. CONYERS. More and more Members of the Congress are coming on our universal single-payer health care bill. I'm very pleased about that.

The judiciary, one of the subcommittees, we had a hearing about this McCarran-Ferguson bill that exempts from antitrust obligation insurance companies, and health insurance companies in particular. And I received a letter, a nice letter, from the CEO of the America's Health Insurance Plans. Her name is Ms. Karen Ignagni, and she sent us a nice letter back. She declined to be a witness. That's a subject we'll probably pursue later on.

But I just checked in my little file of health insurance executive compensation, and this is public information, so I don't think she'd be offended by my discussing it here on the floor. Ms. Ignagni earns \$1.580 million in compensation, but her base salary was \$700,000. This was from 2007 filings. But she did also receive \$170,000 in deferred compensation and a bonus. She probably works very long hours, and we concede that.

But we looked at others that we want to talk with, another person that we are beginning to be in negotiations with. We have to, all of us, come around the table and discuss these matters.

Let's take Aetna; one of the biggest, I presume. Its distinguished chairman and CEO is Mr. Ron Williams. Mr. Williams, I don't know what it is he does, but his income is \$24,300,112 per year. Now, he's got some heavy responsibilities. Do you know how much more money he makes than the President of the United States?

Look, capitalism, a love story, I'm for capitalism. He earned a total of \$24 million plus for compensation in 2008 with more than half of that, \$13.5 million, coming from stock option awards. I don't know how that works. He also received \$6.4 million in stock awards to go along with his base salary, which was only \$1 million plus. But, in addition, he has the personal use of corporate aircraft plus a land vehicle as well as financial planning and a 401(k) company matches, adding up to another \$101,000 plus for Mr. Ron Williams.

Now, I sent out a friendly invitation for the head of Aetna to come before my committee to discuss the incred-

ibly important decisions involved in reforming health care in America. Here is a person who has a lot of experience in the subject matters that are being debated in three committees in the House, two committees in the Senate, and heaven only knows how many of the people in the White House are working on this. K Street, we know, is fully occupied in this matter. We need to talk.

What about CIGNA? That's another big company. Its CEO, unfortunately he only makes half of what the CEO of Aetna earns. Maybe he's not as efficient or maybe he doesn't produce. I don't know what it is.

But would anybody object if we invited these folks in to discuss this? I mean, we have the unemployed. Our colleague SHEILA JACKSON-LEE is going to have people coming in Tuesday at 5 o'clock next week to tell their problems. These are people that not only don't have income but they have huge debts.

But I want to go from the other end of this, Mr. ELLISON. I sympathize with all those that are suffering, but I want to try to understand—I've got to comprehend the view from the top with those who are not unemployed, who are not marginal, who are not lower income, not middle income. They're wealthy. So we have to extend these conversations both ways.

What about the chairman and the CEO of CIGNA, \$12.2 million annual income? What about WellPoint, Ms. Angela Braly, its president and CEO, \$9.8 million every year? What about Coventry Health Care, President Dale Wolf, another \$9 million? Centene Insurance Chairman Michael Neidorff, \$8.7 million; James Carlson, chairman of AMERIGROUP, \$5.2 million; Humana's President Michael McCallister, \$4.7 million; Mr. Jay Gellert, the distinguished president of Health Net, \$4.4 million; Universal American, Chairman Richard Barasch, \$3.5 million; Stephen Hemsley, UnitedHealth Group, president and CEO, \$3.2 million.

I want to get the picture from the top. They could explain to us and maybe put into more perspective why there's such a maldistribution of health care to everybody, because these are health insurance companies. If they don't know—I mean, they have a lot to tell us, and I would like to hear them in their own way and in their own words explain this situation, because we've got big decisions to make.

We don't just represent the poor and the left out and the marginal; we represent the whole country. When I cast a vote in the House of Representatives, it's from my district that they sent me, but the vote applies to everybody in the United States of America, all 350 million people, including the upper 1 percent of income earners especially in health care.

Mr. ELLISON. Reclaiming my time, I want to thank the gentleman for making the point so very clear that there are winners and losers in the health care roulette that we have going on in our country, and it would be nice to hear from some of those people who seem to be coming up roses all the time to explain exactly what's going on.

Mr. CONYERS. But they make the policy. I'm not a work inspector that wants to know how many hours they worked or what they did, but they make the decisions that lead us to be here, the whole Congress, two committees in the Senate, three committees in the House. We have caucuses every single day. Talk to me, somebody. If I'm going to be working on something this enormous, a multitrillion dollar decision, the people that have been making the decisions all these years, they have got to send me some letters.

□ 1730

Mr. ELLISON. Well, Mr. Chairman, if I could cut in. I just want to read very quickly before I hand it over to the gentlelady from Texas, SHEILA JACKSON-LEE, that I have somebody from Minneapolis who wants to tell me that their family—it says actually this, "We are in foreclosure, housing foreclosure, health insurance is \$600 a month for a family of five. We applied for a loan modification and were denied."

You know, this is a big deal. This family is dealing with this situation. "Even with a loan modification, we still would not be able to afford our mortgage because of the cost of our health care insurance."

This is what a young lady trying to put food on the table is dealing with in my district right now. And I just think that her voice deserves to be heard as well.

So with that, let me yield to the gentlelady from Texas and note that we have about 12 minutes left of our time, and it has been a wonderful hour.

And the gentlelady from Texas, let me welcome you to the floor, and I yield to you for your remarks.

And by the way, thank you for bringing people together next week to let the people be heard.

I yield to the gentlelady.

Ms. JACKSON-LEE of Texas. Let me thank the gentleman from Minnesota and the distinguished chairman, who was really posing a rhetorical question as to why the voices of opposition are in opposition, and let us hear about their case.

And today I am on the floor joining you, Congressman ELLISON, to thank you as you've kept this battlefront going. Many of us have had moments when we have had to depart quickly, and therefore, we have missed the opportunity to share with you, but we have appreciated the opportunity for your presence on the floor.

We have got to have health care reform now. We have got to have a vigorous public option, Medicare Plus 5,

and my position is, if this is about, Congressman ELLISON, about loss of life, 18,000 people are dying every year because they do not have health insurance.

But let me try to dispel the myth that this is a Democrat issue. This is a bipartisan issue, and I don't know when our friends on the other side of the aisle are going to get it. Because if history was recollected, you would see that Nixon, Carter, and Clinton all tried health reform because it was imperative. And if we had enacted Federal health spending as a percent of GDP dealing with health care under Nixon, Carter, or Clinton—meaning that we would have cut the cost, slowed the cost down—we would not be where we are today, which is this excessive cost in health care—and I've got a small chart. But the main idea is to say to you that spending would be much lower today if we had enacted health care reform under Nixon, Carter, or Clinton.

Right now we are spending 5.2 percent of annual growth, and we're spending \$2,000, it seems, in U.S. dollars per capita for individuals trying to be covered by health care. If Nixon, Carter, or Clinton health reform had been enacted, the share of GDP on health spending in the U.S. would be closer to other countries.

We have a problem, and the interesting thing is that we seemingly are listening to our own voices and the voices of those who do have a right to express them but seem to be confused by the messages that are coming out.

We see the attack on TV suggesting that this bill will take away Medicare from seniors. It is well known that we have been working with AARP. They are not beholden to us. They are not making decisions precipitously. They are looking closely at their responsibilities to their members. And I can assure you they are watchdogs, and they want to have a fix in the doughnut hole—Medicare part D—and they want to ensure a healthy Medicare, and they want to protect their members. So there is no substance to the characterization that we want to take away your insurance, that we want to take away Medicare, that Medicare Plus 5 will not be valid.

And there are questions about hospitals. Some of us are openminded in dealing with this question about hospitals, making sure that they don't represent to themselves that their doors are closing. We're concerned about doctors; we want to make sure that they can keep their doors open.

And I would offer to say this point: The chairman has spoken about the voices of opposition, if I heard him as I came on the floor. Why can't we find out what their gripe is, that are making this amount of money and seem to be doing well?

Mr. CONYERS. Would the gentlelady yield?

Ms. JACKSON-LEE of Texas. I would be happy to yield to the gentleman.

Mr. CONYERS. I don't claim them to be voices of opposition. I don't know what their position is.

Ms. JACKSON-LEE of Texas. Exactly.

Mr. CONYERS. I just want to find out.

Ms. JACKSON-LEE of Texas. What is it.

Mr. CONYERS. And I offer the hand of cordial exchange of views that we always do in the Judiciary Committee, and that is can we talk. Let's see where we have areas of agreement and where we have areas of disagreement. That's how the legislative process works. And then get all of the facts out on the table and decide what form and shape health care reform is going to take.

I can't predict it now. If somebody asked me to tell them what a strong public option is—I've never seen a public option in my life. I don't know what it is. I know that it's an alternative to the 1,300 private insurance companies, that every industrial company has at least one or more public options. But what its precise characteristics are, nobody's ever handed me a sheet of paper and said, This is a public option.

Ms. JACKSON-LEE of Texas. If I could reclaim the time yielded for a moment. And I thank the gentleman for clarifying that.

You're right. I am willing to hear them too, but juxtaposed alongside of listening to a reasoned discussion and debate as to whether you're for or against, or what you're for, and to get them to understand what a vigorous public option is, as we've interpreted Medicare Plus 5, which will harm no one. I want to hear from the sick and the infirm, people who have suffered. Maybe you are better now. But you've suffered the burden of not having health insurance.

Mr. Chairman, we're going to convene those individuals in Washington, D.C. We'd love for you to reach out to our office. If you're prepared to drive in or bus in or fly in so that your story can be heard, here's my condition: Because I had no insurance; my insurance was denied because of pre-existing disease; or because, in essence, my insurance said, you are not covered. These voices we have not been able to hear on the floor of the House or in committee rooms. When various individuals who have opposed this approach have offered their proposal, who are they speaking for? Are they speaking for that throng of individuals who claim that this country is their country as well, but they have not been able to secure the opportunity for good health care.

Mr. CONYERS. Could we have friendly CEOs of health insurance companies join us at that hearing? Would they be invited too?

Ms. JACKSON-LEE of Texas. I think that that would be most advantageous

because then we could hear from individuals who feel and know by their work and their research and their companies' research that their house will not collapse if we open up insurance so that all Americans have access to insurance and that we have 100 percent coverage.

What I am shocked about, something as vital as health insurance and as close to saving your life as health insurance, people are willing to say it's okay if 47 million Americans are uninsured. They seem to believe that that is a statistical number that we can bear.

I want these individuals who have suffered unfortunately and tragically from our failed health care system—not in terms of quality, not in terms of commitment, not in terms of good hospitals, but in terms of covering all Americans and lowering the costs.

Democrats are standing here advocating for lowering the costs. And this document that was presented to us by, if I might, by Karen Davis, president of the Commonwealth Fund, suggests to us if we had suggested the health care reform of Nixon—who was a Republican—of Carter and of Clinton, we would have had lower health care costs today.

And I can assure you we wouldn't have the premium surge, the upstart, the support of the premiums that are probably impacting the family between mortgage foreclosures that have not been responded to, the \$600-a-month premium that they have to pay in order to provide for their family.

Mr. ELLISON. If the gentlelady will yield, I have one more I want to show to you.

Another gentleman named Patrick who says, We have a 19-month-old daughter with congenital heart problems. We're self-employed. She was denied coverage. We pay \$14,000 a year.

Ms. JACKSON-LEE of Texas. This is a crime.

Congressman ELLISON, thank you for that real-life exhibit, if you will. And to that family, we don't want to suffer this kind of injustice to you much longer, a 19-month-old who is denied because of preexisting disease.

I know if we start this program, first of all, we're expanding CHIP, Children's Health Insurance Program, we will be expanding Medicaid. We'll have a public option. There will be an opportunity for the private insurers. This is a big country. We're growing exponentially, and the issue is, those are the sad stories.

I wish that gentleman could come here to Washington and tell his story because these are the voices that need to be heard. Even though we heard them in our town hall meetings, they need to be here in the Nation's capital, their home, their capital, to tell this body and the other body what this is in real life and real time.

Mr. ELLISON. If the gentlelady and the gentleman will yield.

We are down to about 1 minute.

So let me just say—because you will have the last word—this is the Progressive Caucus coming to you week after week for a progressive version of America where we're all included, we're all a part, health care for all, peace now, environmental sustainability, and civil rights for everybody, health care performed, patients before profits.

I yield to the gentlelady and the gentleman for their last words.

Ms. JACKSON-LEE of Texas. I am proud to be part of the Progressive Caucus and working closely in negotiating and working with my colleagues on ensuring a vigorous public option to save 18,000 lives every year.

I yield to the distinguished gentleman.

Mr. CONYERS. I just want to close the debate hoping that one of the dozen presidents of the health insurance companies will join us—maybe all of them or as many as schedules will permit. What I want them to know is that they've never said that they didn't care about the 47 million people who aren't insured.

#### MESSAGE FROM THE SENATE

A message from the Senate by Ms. Curtis, one of its clerks, announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 2997) "An Act making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes."

#### TURNING POINT IN WAR ON TERRORISM

The SPEAKER pro tempore. Under the Speaker's announced policy of January 6, 2009, the gentleman from California (Mr. HUNTER) is recognized for 60 minutes as the designee of the minority leader.

Mr. HUNTER. You know, we're at a turning point right now in the war on terrorism. We talked about Afghanistan today, Madam Speaker. But first as we do this, I would like to yield as much time as he may consume to the gentleman from Florida, an Army veteran and a member of the House Armed Services Committee, TOM ROONEY.

Mr. ROONEY. Thank you, Mr. HUNTER.

Just last week, myself, along with Mr. HUNTER from California, sent a letter to the President asking him to take seriously the request of General McChrystal, the commander in Afghanistan; ask McChrystal to come to this body and address the Congress—or at least address the Armed Services Com-

mittee, of which I am a member—to let us know what his plan is in a very specific and detailed manner so that we can ask the tough questions, that we can do the people's work and to look out for our men and women serving in uniform.

Along with many members of the freshman class, that letter was sent last week, and along with many other letters sent to the President, along with letters sent to my office, phone calls asking me to support our troops, support the generals on the ground, support our military chain of command and to do the right thing in Afghanistan. And that's to give us a chance to win where we know that we can win.

The United States versus the Taliban. Think about that for a second. The United States versus the Taliban. And what the questions are and what we have to do. As Sun Tzu said, Don't go to war until you know you can win; and when you go to war, know that you've already won it.

So what General McChrystal is asking the President to do quite simply is three things to win the war in Afghanistan: First, give us a surge in troops more than the troops that we've already approved—at least 43,000 more troops—to be able to secure the towns and villages and cities so that people feel safe, so that people come out of the woodwork and the intimidation of the Taliban and can feel that they can trust the Americans and our allies, that we're not going to leave, that we're going to stand by them and stand by for the people's rights and freedom in Afghanistan.

□ 1745

This has been an issue of a lot of contention and, quite frankly and unfortunately, politics, not only here in the House but between the two parties and across this great country. The second thing is to integrate with the Afghan people. It's going to be risky. We are going to have to come out from behind the walls, out of the Bradleys, come down from the turrets in the Humvees and really do a much better job of winning the hearts and minds of the Afghan people.

It's going to open us up to risk, and it's going to up us up to harm's way, quite frankly. But I think General McChrystal understands that it's going to take some sacrifice; it's going to take making the risks and the hard decisions to be able to accomplish this goal. Because, on the other hand, you have the Taliban, which operates under intimidation, operates under violence and threats that, if you cooperate with the Americans, we won't forget it and you will be punished, and there will be recourse for the things that you have done to cooperate with the enemy, in that case, us, the United States.

The third thing that General McChrystal asks of the Commander in

Chief is to help end the corruption in Afghanistan politically. This is the hardest of the three prongs and I think the most important. The local governments, the regional governments and the central national government have a long, long way to go in ending what has been a long string of corruption in Afghanistan. That's going to be the most difficult aspect of General McChrystal's request. But, again, we have the best team in place.

The President, to his credit, has assembled the finest military and civilian defense staff that, as a former Army captain, I could possibly ask for, Secretary Gates, Jim Jones, General Petraeus, even General Shinseki being on the cabinet, even though he's with the Veterans Administration, just an outstanding dream team of military brass. We have the best team in place.

I urge the President to listen to them, take their counsel, do the right thing in Afghanistan, finish the job that we started there. Whether or not it was neglected, whatever argument you want to make, starting from today on, for the kids that are there now, that are manning a post, that are out there alone and cold and homesick and undermanned, let's do the right thing and send a message to the world that the United States of America will stand up for freedom across this great planet of ours and stand by where freedom wants to ring out.

And I believe it does, and I believe it will; and we should not let politics play a role in this, and let the generals on the ground do their job, and then support the President once he makes that decision.

Thank you, Mr. HUNTER and Madam Speaker.

Mr. HUNTER. I thank the gentleman from Florida for his service in the Army as well as his service now to the Nation in Congress. He's really living up to those Army ideals. You know, now that this security situation in Iraq is under control and U.S. forces are beginning to rotate out of that region, we're confronted with a new challenge of equal significance in Afghanistan.

By all accounts, the combat mission in Afghanistan has reached an important crossroad. In March, President Obama unveiled a new approach to achieve this victory in Afghanistan, reminding all Americans of the necessity to disrupt, and I quote from President Obama, disrupt, dismantle and defeat al Qaeda, in Pakistan and Afghanistan and to prevent their return to either country.

Leading the mission in Afghanistan is General Stanley McChrystal who was appointed by the President and Secretary Gates to evaluate the situation on the ground and provide a resource request detailing the needs to achieve his victory. The President now has General McChrystal's request in hand, which includes adding another

40,000 combat troops, minimum, to the region.

As the President considers what course to take, the security situation in Afghanistan is deteriorating. The insurgency is gaining strength, and U.S. soldiers, marines, sailors and airmen, as well as our allies, are being increasingly targeted by ambushes and roadside bomb attacks. To prevent mission failure and to protect those troops already there, the President must act quickly to fulfill General McChrystal's request for more combat resources.

Only until recently the collective commitment to this new strategy has come into question. Some in Congress have raised opposition to any type of troop surge whatsoever, even if it means defeat. They instead prefer to maintain or draw down our combat forces, focus on training local security, and rely on targeted air strikes and drone strikes. While a scaled back strategy might be attractive to some people, it would inevitably constrain resources already in short supply in Afghanistan, unnecessarily putting our mission and the safety of the coalition forces at risk.

General McChrystal has made it clear that a small footprint counterinsurgency strategy will not work in Afghanistan. What's more, General McChrystal has clearly defined our objectives and the metrics for achieving victory against a resurgent Taliban and possibly al Qaeda. This entails our ground forces working to stand up Afghanistan's security and police forces as we did in Iraq and substantively weaken the stronghold of al Qaeda and the Taliban to the point where these local forces can effectively take control.

Madam Speaker, this is nothing new. We had almost the exact same challenges in Iraq and we were told 2 or 3 years ago we were going to lose in Iraq, the surge wouldn't work; there was no way we could win. It was a quagmire. We were going to be stuck there, and Iraq was another Vietnam. Well, guess what? You can walk up to any soldier, marine, sailor or airman who has served over there and don't just say, thanks for serving, you can say thanks for victory, because we're now rotating home out of Iraq in victory, not defeat because of General Petraeus, General Odierno and the almost exact same strategy of surging to provide security so that we could stand up the Iraqi forces, stand up the Iraqi military and the Iraqi police and the Iraqi Government so that we can leave.

Afghanistan is not Iraq, true, but that counterinsurgency strategy still stands. It still works. The more troops we send over to Afghanistan, the more secure we can make Afghanistan and the quicker we can leave Afghanistan victoriously. We truly are at a vital turning point in Afghanistan, and the President does have a very difficult de-

cision to make. To quote General McChrystal: time matters. We must act now to reverse the negative trends and demonstrate progress.

President Obama himself, in March, said that the counterinsurgency strategy, also known as COIN, is the way to defeat the Taliban in Afghanistan and to defeat al Qaeda. The strategy presented by the President and his national security team would require, quote by the President, executing and resourcing an integrated civilian, military counterinsurgency strategy.

But now, the President, instead of listening to the general he appointed who is the resident expert in Afghanistan, who's on the ground in Afghanistan, and who the President had not even met with face to face until he took his Olympic sightseeing tour to Denmark when he finally deigned to meet General McChrystal face to face, he's now listening to possibly Vice President BIDEN. So he's going to listen to Vice President BIDEN's advice on Afghanistan instead of the four-star general who he put in charge in Afghanistan.

In mid-April, Chairman Mullen and Secretary of Defense Gates actually replaced General McKiernan with General McChrystal because he specialized in counterterrorism. Counterterrorism. That's what Vice President BIDEN wants to do. McChrystal, even after being an expert in counterterrorism, came back and said, counterterrorism is not going to work. It's got to be counterinsurgency. So to have this counterterrorism expert come out and say counterterrorism's not going to work, we need a COIN strategy, the counterinsurgency strategy, we need to get the Afghan people on our side and the only way to do that is to secure the area, that's pretty phenomenal.

As we speak right now, Madam Speaker, the Iraqi troop levels are going down. Equipment and resources are coming back over here to the U.S., and they're also going to Afghanistan. We have won in Iraq, and we can win in Afghanistan; and we can bring civility to the Afghan Government so that we can leave.

But here's what we have to do. We have to have enough boots on the ground to provide security needed to properly train and equip the Afghan security forces, both police and army. You'll see many people saying that it's impossible in Afghanistan because Afghanistan's a much larger land area than Iraq is. That is true.

Afghanistan has more area than Iraq does. But it's got much smaller concentrated population centers. There's only two really. There's RC South. This is the Helman province. Kandajar's there. That's where the marines are at this point in time. Then you have Kabul and RC East. That's where the Army focuses on. Pakistan's over there to the east. This is that

mountainous range where you have drug runners coming across, you have people bringing weapons across, you have Taliban, al Qaeda and general bad guys coming across with that far arrow. Then you have RC South here where those marines are in Kandajar.

Those are the two main population centers. That's what we're focusing on. When it comes to IEDs going off, those are improvised explosive devices, the roadside bombs, the 155 rounds put underground by the bad guys to blow us up.

In Iraq we had a very complex road system. There were towns all over, cities all over, bases all over. We had to run resupply routes going everywhere. In Afghanistan you don't have that. You have one main road that rings the entire country. It's called Ring Road because it's a big round road. The only places we have to stop these IEDs from going off are between those two arrows. That's it. These IED casualties that we see coming back, which is 85 percent of our casualties in Afghanistan right now, are improvised explosive device casualties.

If we stop those, we will stop sustaining major casualties so we can move on to this security phase. We have to stop the IEDs and we can do it just like we did in Iraq; and it's actually easier to do it in Afghanistan. The Department of State needs to work on the Afghan government structure. I won't argue with anybody who says that the Afghan Government right now is almost completely corrupt. There are many charges leveled against President Karzai who says he's corrupt.

And the Afghan government system that we have set up right now over there does not represent the thousands of the years of the Afghan tribal set-up that they've had that the Afghan people are used to. That's going to be a major challenge. Getting the Afghan people to trust in their government so that they actually go out and vote and they actually tell us where these improvised explosive devices are being implanted, that's a counterinsurgency problem.

We need to work on the Afghan Government. We need to make sure that it's not corrupt. Right now I am a Congressman from San Diego, California. I was voted in by the people of San Diego. In Afghanistan you don't have that. In Afghanistan, President Karzai appoints who the different representatives are. So that's like President Obama saying, You aren't allowed to elect DUNCAN HUNTER. What I'm going to do is I'm going to tell you who your Representative's going to be. That's how this government's set up in Afghanistan, and it does not properly represent the way that the Afghan people want to be governed nor need to be governed.

Just as important as our military and security mission in Afghanistan,

it's just important that we work with Pakistan so that Pakistan is not a safe haven to al Qaeda and to the Taliban. I want to read a few quotes here. This is President Obama talking about Afghanistan. He says, and I believe this, Afghanistan has to be our central focus, the central front on our battle against terrorism. President Obama said, Troop levels must increase in Afghanistan. And as little as 2½ months ago, he said, For at least a year now, I have called for two additional brigades, perhaps three.

The President obviously knows what needs to be done in Afghanistan because he's called for it. In his campaign he said, Afghanistan is the central fight against terrorism. When he became President he said Afghanistan is the central fight against terrorism. And now that it looks like it's difficult politically, he's stepping back from that assessment and he's saying, Well, we have to wait and see here. We have to look at this.

I don't think that shows good leadership. What I would like to see the President do is listen to the head general who he appointed, who he put in place, and who is the smartest person possibly in the entire United States military on Afghanistan and knows how to win this fight.

□ 1800

I would like to yield such time as he may consume now to the honorable gentleman from Michigan, Mr. THAD MCCOTTER.

Mr. MCCOTTER. I thank the gentleman for yielding. Because of its prestige in the history of our Nation, the Presidency and its occupants are often envied. This view is erroneous, because within the Presidency comes the requirement to make painful, agonizing decisions between war and peace, between life and death. Many of its past occupants have said that it is the loneliest of places in the United States to be in that Oval Office when the weight of these demands fall upon your shoulders.

Understanding this and empathizing with our President and fully understanding our role as the servants of the sovereign citizens who sent us here, we have to offer the President honest advice for his consideration in just such circumstances. I do so today.

We have seen the report from the commanding General on the ground, General McChrystal, who was appointed by the President to implement the President's counterinsurgency strategy. I applauded that move. I applauded the President's willingness to go to a counterinsurgency strategy.

We have of late seen tendered to the President the recommendations of General McChrystal as to how we can, yes, still achieve victory in Afghanistan. The report said that we can have a status quo and not achieve victory. We

can have 40,000 troops and a full counterinsurgency effort—or we could have more than 40,000 and a full counterinsurgency—to win.

The President is now faced with a momentous decision. The decision is whether we shall have victory or we shall have defeat, a defeat which, however disguised, as a withdrawal or otherwise, will be viewed by our enemies, our allies, and the Afghan people as a defeat.

It is my sincere hope that the President supports and implements the General's request for at least 40,000 additional troops and a full counterinsurgency strategy so that the United States, their allies, and the Afghan people can be free.

You see, within the context of this decision, the President must consider, obviously, the lives of our troops in the field, our allies in the Afghans. The President must weigh the consequences to our Nation and the world of a revanchist Taliban return to power, an emboldened al Qaeda, and the dangers that it imposes not only for the people of Afghanistan and the United States, but to Afghanistan's neighbors, such as Pakistan, and to our allies, who will continue to be the targets of terrorism, as will ourselves.

In weighing this, he will also have to think about the honor of the United States, a Nation which throughout its history has posed a threat to tyrants and terrorists throughout the globe—not because of our actions, but because of our existence.

It is our existence as a free people and a people large enough of heart to expand that liberty to others to defend it here for ourselves, that we have, throughout our history, faced challenges, both martial and ideological.

Within the context of Afghanistan, a decision for a withdrawal that will constitute a defeat means that the United States of America will say to the people of Afghanistan: You will again be returned to the murderous regime of the Taliban. Women will be again treated as second class citizens. Children will again grow up in a culture of violence and hatred directed at other people, and the United States will have broken its word to them.

Today, there are decisions even greater than the one the President faces being made. It is by our men and women in uniform, our allies in the Afghans, who every day wake up fully conscious and devoted to the cause of human freedom in Afghanistan, despite whatever the Taliban and al Qaeda and others may do to them.

It is this type of decision, this type of bravery, this type of commitment to the God-given right to liberty that is possessed by every soul on this Earth that motivates ourselves and our allies in the Afghans. And I would urge the President that, in coming to your decision, you never forget that; that the

strength of the United States is our willingness to sacrifice for the expansion of liberty to others to defend freedom for ourselves; that our security is from strength, not surrender; and that throughout our history and throughout the future of this free Republic we will never betray our word to oppressed peoples we have helped to come to emancipate, for in doing so we will betray our own birthright as free citizens and endanger our own security.

Let us pray for our President as he makes this fateful decision and let us hope he comes to the right one—a victory in Afghanistan, a victory for the Afghan people, a victory for the cause of human freedom in our all-too-tortured world.

I yield back to the gentleman from California.

Mr. HUNTER. I thank the gentleman from Michigan for his words so well put. You can see that he understands what is at stake in Afghanistan.

What interests me about Representative MCCOTTER's words, we just want the President to do the right thing. And we believe that he knows what the right thing is, because it was his idea. He brought up the counterinsurgency strategy. He said that Afghanistan should be the main focus in the war on terror.

He knows what the right decision is because he has already made that decision in his mind months ago. He put in General McChrystal because he knew that General McChrystal was the right guy at the right time to lead us to victory in Afghanistan.

The President knows all of this, and we can only pray that he makes the right decision in Afghanistan or America will be a much less safe place than it is now.

What happens if we don't win in Afghanistan? What happens if we keep the troop levels the same or we incrementally escalate our troop levels over there that is not a surge but we add a few thousand troops at a time, what's going to happen in Afghanistan?

First, Afghanistan will become once again a petri dish for terrorists. Al Qaeda will return to Afghanistan. There's already networks there. One is the Hakani network. They're in touch with al Qaeda all the time.

Al Qaeda will be back in Afghanistan. We won't be there anymore. The Taliban will have control of Afghanistan because they have shadow governments set up throughout the entire country.

This is not like in Iraq where there would be a car bomb going off for no reason other than to hurt people. A car bomb in Iraq is not an alternative form of government.

The Taliban in Afghanistan is an alternative form of government. They want to take over this fledgling, possibly corrupt, democracy parliamentary system that we have set up in Afghanistan. As bad as it is now, this Afghanistan Government that they have

set up, the Taliban would be much, much worse.

So what if we don't win? Afghanistan will become a breeding ground for terrorism. Pakistan, which has nuclear weapons, will be destabilized, completely destabilized.

I will tell you right now what is going on in talks in Pakistan and with different Taliban people—not because I've heard this from anybody; just because I know because this happened in Iraq. The Taliban is telling the Afghan people right now: America's going to leave. Look how indecisive they are. Their President, even after he said that they're going to surge in Afghanistan to have this counterinsurgency strategy, they can't make a decision. And the people of Afghanistan are listening.

Why would the people in Afghanistan not go with the Taliban forces if they think that we're going to leave? Because if we leave, they're going to be slaughtered. There will be reprisal attacks against those Afghans who dared help America; who dared tell us where the IEDs were being planted at; who dared say, These guys over here are bad guys, Sergeant. Could you go get them for me?

The people of Afghanistan are going to stop working with us if we keep being indecisive on what we're going to do over there, so Pakistan could possibly become destabilized.

Out of all of the bad things happening in this world—Mexico imploding because of its narcotics trade and its gang war, North Korea shooting off nuclear missiles, Iran shooting off nuclear missiles, getting that fissile nuclear material there—all of these things could happen.

This world is a very dangerous world. We all know that. One of the most likely, though, and one of the absolute scariest, is the destabilization of Pakistan; it's Pakistan going away and the Taliban getting their hands on their nuclear weapons. I don't think we would want to think about what would happen if the Taliban or al Qaeda got their hands on Pakistan's nuclear weapons. This entire area would be destabilized, and I guarantee you they would be gunning for another 9/11. And it would be that much easier for them because we're not there anymore.

And I understand we've been at war in Afghanistan since 9/11. We've been over there a long time, over 7 years. And I understand, Mr. Speaker, that the American people are tired of war. I was in the Marine Corps. I joined after 9/11. I did two tours in Iraq and one in Afghanistan in 2007. I was in the Battle of Fallujah in Iraq. I was in Diwaniyah. I was in Babylon.

I'm tired of war, too. But what I want to make sure of is that our country stays safe, it stays secure, and it stays free, and we don't turn our backs on a people who we promised aid to. If we lose in Afghanistan, it will embolden al

Qaeda, it will embolden all of our enemies, and we will see increased attacks.

This is not a scare tactic, Mr. Speaker; this is simple fact. If we're not there, if America does not lead, our allies will not lead themselves. America is the leader in Afghanistan and our allies are following them.

I served with the British, Canadians, Australians, the Poles, Czechs, the Italians, Spaniards, French. I served with a whole lot of people, other countries that are in Afghanistan, and they're following us. We are the leaders for this war.

We are providing that leadership role and we're the economic pillar for this war, too. And it is an expensive war. Wars are extremely expensive. Afghanistan, with its tribal layout, its mountainous regions, its desert, its terrain is more complicated than Iraq is.

This is not easy. We aren't saying that this is easy. We're saying this is going to be very, very difficult. But we have the willpower, and I think we have the ability. We have the leader in General McChrystal. We sure as heck have the men and women who want to serve and win in Afghanistan. We can do this.

So, consistent with General McChrystal's recommendation, the initial strategy outlined by the President almost 7 months ago constitutes the best way towards accomplishing all of these goals. My hope and Mr. ROONEY's hope, and it should be every America's hope, is that a favorable decision is reached promptly so that our military, this Congress, and the administration can begin doing everything they can do to provide the full resources necessary to execute a counterinsurgency strategy.

We have to know here in Congress what the President wants to do. We need to know what his decision is so we can get the men and women serving over there right now, the ones getting shot at, the ones getting IEDs, the ones getting rocketed, we want to get them what they need.

One of the things they need is the support of the American people. Until President Obama comes out, makes his decision, lets Congress know about it so we can inform our constituents and we can tell them why it's important that we win in Afghanistan, our men and women overseas right now are suffering.

You don't think that the privates, sergeants, corporals, staff sergeants at the officer corps in Afghanistan are looking back right now, watching C-SPAN watching CNN, and saying, Our main General, General McChrystal, the man who we're following, the man who's asked us to fight, the man who's asked us to drive these dangerous roads, the man who's asked us to kill the enemy for our country and our lives are put in danger, he's asking for

40,000 troops, and the administration in D.C., in Washington, is not giving them to him right now, they're thinking about it.

□ 1815

We've had enough time to think about it. It's been 7 years. Was our strategy in Afghanistan under President Bush the right one? No, it probably wasn't. It probably was not the right one. We were focused on Iraq, and frankly I think that's a good thing, too, because we have won over there now. But we need to shift focus to Afghanistan. That's what this President said he would do. Experience tells us that wars must be run by our military leaders, not politicians or bureaucrats back here in D.C. I don't want to create strategy for Afghanistan. That's not my job. My job, as a congressman, is to give the military men and women the support that they need to get the job done for whatever the President, who's Commander in Chief, sets out as their strategy and their goals. You don't want me running a war. You don't want Vice President BIDEN running a war, either. That's why General McChrystal is there. That's why General Petraeus is there. That's why General Odierno is there. They are the resident experts.

The President rightly recognizes the importance of defeating al Qaeda and the Taliban, but in order to do so, he must stay clear of political currents and do what is right. And once more, I truly believe that he knows what is right. Because what General McChrystal, once more, has brought to the President in his resource request was what the President asked him to do.

On two occasions over the last few years, I have been to Afghanistan, both as a Member of Congress and as a Marine. While there, I served alongside and shared experiences with the best that this country has to offer. They are truly the greatest generation. People that have so much opportunity, young men and women, they could go to college, they could pretty much do whatever they wanted to do. Instead, they went and served. I have had the awesome opportunity of serving with them. And they have dutifully undertaken their mission to protect our Nation and the Afghan people. I have also spoken to many civilian leaders and military leaders outside of Afghanistan, and they know what the right thing to do is. Our goals in Afghanistan will become further out of reach. In fact, they become more out of reach every single day that we dally here at home and not give them what they have asked for.

If we significantly reduce our military presence right now, at this critical time, the war in Afghanistan will be lost. Understanding this risk, I sincerely hope that President Obama, as Commander in Chief, will follow the

recommendation of his appointed military commander and commit his full support to this important mission.

#### HATE CRIMES LEGISLATION

The SPEAKER pro tempore (Mr. PERRIELLO). Under the Speaker's announced policy of January 6, 2009, the gentleman from Iowa (Mr. KING) is recognized for 60 minutes.

Mr. KING of Iowa. Mr. Speaker, I appreciate being recognized and the opportunity and the privilege to come to the floor and address you here. It is also a bit nostalgic to step in behind DUNCAN HUNTER. I remember many times standing here on the floor of the House debating issues, and a lot of them were national security issues, including our immigration issues, with DUNCAN HUNTER's father. And this transition has been very good to see a young man, a young marine, stand here in the well and speak to you and talk to you about our national security issues from the experience standpoint of a marine who has served in Afghanistan and now one who serves in the United States Congress. I very much appreciate the addition to this Congress that he is.

I lament what we have seen happen today, this activity that this Congress has gone through; the Department of Defense authorization bill that saw at least 144 or so vote against it. Most of those that voted against the authorization bill, including me, support, of course, the Department of Defense and our national security and all of our men and women in uniform and all of our veterans all the way back to many wars prior to today. The Department of Defense authorization bill was used as a political tool by the left to advance a left-wing agenda that should be appalling to the American people if they understand the motivation of this idea of inserting hate crimes into the Department of Defense authorization bill.

It's a piece of legislation that had passed off the floor of this House a piece of stand-alone legislation. Many of us opposed it. It is activist legislation that sets up and creates sacred cows, people who get special protected status, people who are identified by their alleged, hopefully private, sexual behavior or thoughts. This is a bill that the United States Senate couldn't figure out apparently how to debate on its own and send back over here to the House amended or simply send it to the President. So they polluted the Department of Defense authorization bill with it.

I would be very happy to yield so much time as he may consume to the gentleman from California who I think has an opinion on this matter.

Mr. HUNTER. I thank the gentleman.

The liberals in this Congress and in the Senate did a despicable thing today. There is usually one bill in this

Congress that gets passed that's non-partisan. It's bipartisan. It's the authorization bill to get our military what it needs. And it has never been so important as it has been during this time of war. This is beans, band-aids, bullets, trucks, armor, and flak jackets. Everything that we need to win these wars in Iraq and Afghanistan is in this authorization bill that was being voted on today. I voted "yes" on it. Many voted "no," and they were in the right as well as I was in the right. And here is why. To attach a hate crimes bill, a thought crimes bill, which is wrong in and of its own, but has nothing to do with the military, nothing whatsoever, but the Democrat Congress knew that we would not vote against the military. That's the hand that they played. So they put one of the worst and most rotten bills that has been passed by this Congress on top. They piggy-backed it on top of our defense authorization bill because who's going to vote against the troops?

That was their slant today. And as a marine and as a congressman, it is one of the most despicable things that I have ever seen done by this body. Some of us voted for it. Some of us voted against it. Each of us voted our own conscience on this, and both votes were right. We do have to get our military what it needs on one hand, but on the other hand, we are not going to be ridden roughshod over by a liberal Congress that thinks that they can attach absolutely despicable bills to important things like the defense authorization bill. That's why voting "no" on this bill today was also the right choice. So I thank the gentleman for his conscientious vote today, and I appreciate it.

Mr. KING of Iowa. Reclaiming my time, I so much appreciate the gentleman from California. I'm looking to this new leadership that's emerged into the new Congress, and DUNCAN HUNTER is one of those people. The statement that he has made, I concur with. I have looked at the Department of Defense authorization bill with hate crimes legislation, which is, in fact, thought crimes legislation, built into it, slipped into it as a, not quite a poison pill, because there were liberals over here today, and I would be happy to yield to any one of them that want to stand up and defend themselves, liberals over here today that maybe for the first time voted for the Department of Defense authorization bill because it had this hate crimes legislation in it, the thought crimes legislation in it. Their radical social agenda in some cases overcame their resistance to supporting our military. And so it was a double-edged sword that was put in here, a rotten sword, the wrong, wrong thing to do.

I looked at it from this perspective: that if we are going to let them put into the Department of Defense a piece

of legislation that's so contrary to the rule of law, so abhorrent to equal justice under the law, it turns out to be holding the Department of Defense hostage; it's almost like somebody kidnapped the Department of Defense bill and required that in order to pay off the kidnappers, the ransom note was the hate crimes bill. That's what happened. I don't think anybody is going to stand up and defend that today. They wanted to avoid that debate. They wanted to force a vote. And President Obama, of course, supports the hate crimes legislation. So he will sign the bill, and it will be law in the United States of America. And then we will be asking juries and judges to discern not the act that might be committed that's a crime, but the thought that was in the head of the perpetrator and the victim. And it is not the basis of the law going all the way back to English common law to determine what's in the head of the perpetrator or the victim when a crime is committed because an individual is a sacred life. All life is equal under the law. Whether you're a little-bitty baby or whether you are a senior citizen with a terminal illness, those that value those lives under the law are valued equally.

The father of Senator BOB CASEY of Pennsylvania as a Democrat Governor of Pennsylvania, said this: Human life cannot be measured. It is the measure itself against which all other things are weighed. We measure the life and say that it is the measure itself, and an act committed against a person's life, and it could be murder, it could be assault, it could be rape, it could be a number of different acts actually against a person's property, and now this hates crime legislation for the first time would increase the punishment against someone because the victim may have perceived that they were of a different sexual orientation. So for the jury or the judge to get into the head of the perpetrator and the victim for the first time and value the victim who might be, because of their sexual orientation or their gender identity, a special protected class of people, different from everybody else, so a crime committed against a self-alleged homosexual would be punished additionally.

If there were, say, two people who were equally victims of a crime, one of them was a self-alleged homosexual, the other one was not, the penalty for the assault on the homosexual would be greater than the penalty for the assault on the person who did not declare their sexuality. Mr. Speaker, that's a principle that we should not cross.

As we debated this issue in the Judiciary Committee, I brought an amendment. Now I will argue that the way the language reads and the definitions of sexual orientation and gender identity are so broad that anyone's proclivity could be included in this, whether they are crimes or whether

they are not. So I brought an amendment that would strike out inclusion of special protected status for pedophiles. You would think it should be clear. We should be willing not to protect special protected status for pedophiles. The Democrats on the committee argued against it. And it went on a recorded vote to vote against excluding pedophiles as a special protected class. The result of it, Mr. Speaker, was special protection for pedophiles and all other paraphilias that are listed in the American Psychological Association.

That came to the floor of the House of Representatives. We had a debate on it here. The gentlelady from Wisconsin (Ms. BALDWIN) had a definition. She said it only includes heterosexuals or homosexuals. That was her language in the committee. That would not include then, of course, bisexuals. I think that might be trouble for her analysis. But ALCEE HASTINGS, the gentleman from Florida, stood over at that microphone, and he read a list of about 30, I will call them paraphilias. And he said this language protects all of these behaviors, I believe all philiat whatsoever, are protected. ALCEE HASTINGS. I couldn't believe it, Mr. Speaker.

□ 1830

I couldn't believe it, Mr. Speaker. So after the debate was over, the vote was over, I went over and I personally asked him, Did you really say what you said? Did I hear you right? Did I miss a word? Somehow is there a misunderstanding on my part?

He said, No, that's what I believe.

That's what is in the CONGRESSIONAL RECORD. It is in the CONGRESSIONAL RECORD in the Judiciary Committee. It is in the CONGRESSIONAL RECORD on the full record on the floor of the House of Representatives, in the debate and the effort to offer amendments that would exclude these behaviors. And some of these, many of these behaviors are crimes. Hate crimes legislation protects some acts that are criminal because they are under this list of paraphilias that are part of the sexual orientation or gender identity of the alleged victims or maybe even the perpetrators.

It is a horrible piece of legislation. It addresses crimes of violence, which means an offense that has an element that threatens the use of force against property of another that might be the property of someone with a particular sexual orientation or gender identity.

This is bad law. It is bad legislation. It is a bad, bad precedent for a country that has built its strength upon the rule of law, Mr. Speaker, and now this pill has been slipped into the Department of Defense authorization bill. And there were dozens and dozens of Members of this Congress that voted "no" on the bill exclusively because of the hate crimes legislation, the thought crimes legislation that was injected

into it. And they will be characterized now in campaign ads as being against our national defense.

We know, and the totality of the record of the Members of Congress here is understood, but it was a raw political move, and it was a bitter thing to see happen.

I am not worried myself; I will speak up, Mr. Speaker, so I am not worried myself.

I do have a couple of other subjects that I want to shift to.

Mr. Speaker, I am shifting over to the health care debate. This is the chart of HillaryCare. This legislation emerged in 1993. At the time President Bill Clinton gave a speech on the floor here of the House, September 22, 1993. He laid out the principles for a national health care act, for a complete government takeover of all of the health insurance and the health care delivery system in the United States.

This is the flowchart that came from that legislation. I will at least give him credit for honesty. And I will give he and Hillary credit for at least writing a bill. Some of us were nervous that a lot of it happened behind closed doors. But they did write a bill, and they tried to push it on Americas, and Americans rejected the National Health Care Act in 1993 and 1994.

This is the flowchart that comes off of The New York Times that was published at the time. Black and white, a little fuzzy. They didn't have the graphics that we have now. They didn't have color in their newspapers like we do now. But I do have the chart that we have for the new bill now.

This, Mr. Speaker, is the new chart. The black and white that is on this new chart for H.R. 3200, the black and white are existing programs. The color are the new programs that are created by H.R. 3200. So you can see some of the things that exist. Let's see, the Office of Minority Health exists. The Office of Civil Rights exists. The National Coordinator For Health Information Technology exists. But the new ones in color are created by the bill.

There are a lot of them, and I can bog us all down in this, but I will take you down to the part of the bill that gives me the most heartburn. And there is no cure offered for my heartburn if this bill should pass. We have private insurers in America. This black-and-white box here, that represents 1,300 private insurance companies in the United States of America. It is a lot of companies, a lot of competition; 1,300 private health insurance companies.

They are offering in the area, the best estimates we have, about 100,000 different policy variations. That is this box here, traditional health insurance plans.

The private insurers and all of their plans in this box, under the bill they would have to qualify in order to be qualified health benefits plans. That is

this purple circle here. It looks rather benign, but it is not benign. Getting qualified for all of these 100,000 policies with the 1,300 companies into these qualified health benefits plans will be done so by the rules of the bill, and the rules are written by the Health Choices Administration and the commission and the commissioner.

This would be one of the most powerful positions in government, the health choices commissioner. And you're wondering why are they not calling him a czar?

Mr. Speaker, that is because we are full up to here with czars. I am going to call him the commi-czar-issioner, the person who would be writing the rules, with his huge staff, and he would make the determination which, if any, of these 100,000 health insurance policies would qualify to go into the purple circle of the qualified health benefits plans.

While those decisions are being made by the health choices commi-czar-issioner, we would also be creating under the bill a public health plan. That's the public option. That is the public option that—I believe today Speaker PELOSI said there are the votes to pass a public option plan here in the House of Representatives. If that is the case, I don't know why she is waiting. They will lose some Members I am convinced of that, Mr. Speaker, but the health choices commissioner will be writing rules that have to be met in order for the private carriers to qualify, all the while they are looking at setting up the Federal health insurance plan that will take billions of dollars of capital to get it established, and they will write their plans with certain restrictions and with certain premiums designed to compete with the private sector.

Remember, the President said we have to provide some competition. We don't have enough competition in the health insurance industry.

I would suspect that he couldn't answer the question how many companies do we have today? How many policy options do we have today? Mr. Speaker, I have just told you, 1,300 companies, 100,000 policy options, and the President's argument is we have to provide a little more competition so there is a little more variety. The government can do that because health insurance companies aren't doing that job?

What would happen would be billions of dollars would go in to create this new Federal health insurance plan. And then if it couldn't compete with the private sector, the rules would be written differently for these private plans. Many of them wouldn't qualify. They would set mandates and require that policies cover a whole series of things. What about pregnancy for someone who is a grandmother? If everybody has to pay for those kinds of things, the premiums will go up. Those

are the kind of mandates that make health insurance premiums go high.

The government would write the rules so they can compete with the private sector is what would happen, and they would tap into the pockets of the taxpayers in order to have the capital to jump-start the health insurance plan. And then as they move forward, regulating private insurance companies and subsidizing the public option, the government plan, the Democrats' health insurance plan, it would squeeze out the private plans.

Now, how can I say that this is what would happen with some confidence? None of us have a crystal ball. But I have a little bit of history, and I take you back to 1968 when, at the time, the only flood insurance in America was provided in the private market by the property and casualty companies.

In 1968, this Congress passed the Federal flood insurance program. When that program was passed, in order to compete, they started to write regulations. The regulations that they wrote in part were requiring national banks who gave loans for real estate to require that those policies, the Federal flood insurance policies, be purchased by the borrower. So there was a mandate that people had to buy flood insurance. They wrote the rules, the premiums and regulations.

And today, since 1968 when there was no Federal flood insurance program and all flood insurance was private on that day when they came to the House in 1968, today a person in America cannot buy a flood insurance policy from anyone except the Federal Government. The only thing left is Federal flood insurance. There are no private carriers out there. The Federal Government has swallowed up the entire private flood insurance industry.

That is an example of what might happen with the health insurance industry, and what I think is likely to happen with the health insurance industry.

In examining some of the policies around the world, I would point out that in Germany they tell us they have the oldest national health care plan in Germany, that they have provided health care for their people since Otto von Bismarck's time. I don't know whether they tell us that or I recall reading that from history. Ninety percent of the health insurance in Germany is the public option; 10 percent is the private option. The people that buy insurance outside of the government insurance plan are those that are entrepreneurs, self-employed, more well-to-do. They want a policy that gives them a little extra coverage and takes a little better care of their health. At least that exists; 90 to 1.

Really, this is something that is the President's plan? He would like to have this public health plan swallow up 90 percent of the private health insurance

in America? I think so. He is on record saying he wants a single-payer plan.

When you think about how that goes, a single-payer plan, and if we provided, let's say, funding to buy insurance, to help people buy insurance that couldn't afford it, and that would perhaps be a voucher that goes in, that one can control to buy health insurance, the argument then becomes: How big should that voucher be? Let's just say poor people would get \$3,500, and the more wealthy they were, the less money they would get. And if that were ever established, the next argument is: Where is the threshold? What is the means testing?

Pretty soon the number would go from \$3,500 to \$7,500 to a \$10,000 subsidy for people's health insurance premiums. And then at a certain point, I will hear the argument from over here, if we are still around on that day, we will hear the argument, well, it costs too much money to administer vouchers and to give refundable tax credits to people so they can afford to buy health insurance, why don't we wipe out that whole bureaucratic mess and simply have people show up at the public clinic and we will take care of them accordingly, and their medical records can be managed by the government along with their health care.

I can give you some examples of what happens when you end up with a National Health Care Act, Mr. Speaker. That would be the average time waiting for a knee replacement in Canada: 340 days. The average time waiting for a hip replacement in Canada: 196 days.

I talked to an individual, ran into him at a home improvement type of store. He is a legal immigrant from Germany. He told me he had a hip replacement. He waited in line for at least 6 months for a hip replacement. Finally, he was put in several lines around Europe. He went from Germany to Italy, where they gave him a hip replacement. That was one of the ways he could move more to the front of the line.

We had an individual that made a presentation to us. He was a doctor from Michigan who practiced both in Michigan and in Canada. When he first went to Canada to work the ER, a young man came in with a torn meniscus and some ligament damage. The doctor looked at it and said, You need surgery right away. I will schedule you for tomorrow morning. He was used to working in the United States.

Little did he know, and he found out quickly, he couldn't schedule him for surgery in Canada for the following morning. He couldn't even schedule him for an examination. The specialists that approve the surgery had to be scheduled first. So this young man, with his knee torn up, waited for 6 months for the specialist to examine the knee and approve surgery, which was scheduled another 6 months later.

So the reconstructive surgery for this young man who was incapacitated, couldn't work, was 6 months for the exam, 6 months to get the surgery scheduled, and then all of the rehab that it takes after the muscles atrophy over a 12-month period of time. A full year from the injury where, this doctor, who has good credentials and has spoken to this Congress and I find to be a very credible individual, in the United States that surgery would have taken place the next day, in Canada, it took place 365 days later. We don't need this kind of health care in America. The argument that we have too many uninsured is something that we just simply need to address with some facts.

□ 1845

I know it's hard on the people on the other side when they have to deal with facts. When the President says that we have too many uninsured, and the arguments that you have constantly made that there are 44 to 47 million uninsured. Sometimes you round it up to 50 million, but 47 million is the largest legitimate number that we hear that are uninsured in America.

Somehow they have gone past the idea—first, they want to establish the idea that everybody has a right to health care. Well, that's not in the Constitution. We can make your argument as to this right to health care. Out of the compassion of the American people, we can decide that we don't want to leave anyone behind, and we can decide that we want to make sure that everyone has access to health care. In fact, everybody in America has access to health care. That question is answered.

The only argument that remains is that there are too many that are uninsured, 47 million. So here are the enlightenment facts, Mr. Speaker: 84 percent of the people in the United States have a health insurance policy. In fact, they're happy with it. They don't want it changed. They don't want to lose it. This is the pie chart. All of the people here in blue are insured, and almost all of them are happy about the insurance that they have.

All of these little slices here, these are the 47 million people who are uninsured, and they go down through these categories. I'm going to go from right to left—yellow, black, orange from the bottom. Illegal immigrants, 2 percent. That's part of that 47 million. I don't want to give them insurance off the back of the taxpayers, especially if we're borrowing the money from our grandchildren and the Chinese. Then we have legal immigrants.

This is a slice in black. They are the ones that are, by law, barred for 5 years from being able to access public benefits. You come into the United States, you should be able to take care of yourself. That's one of the standards.

That's another 5 million people, 5.2 million illegals, 5 million legals. Then you have individuals who are earning more than \$75,000 a year. That's the list up here in orange. That number is a number that presumably, if you're making more than \$75,000 a year, you can write a check for a health insurance policy. So they do have an affordable option. They just aren't exercising the option.

Then in green, those eligible for government programs. That's 9.7 million. That is these people here, 3 percent. They're eligible most generally for Medicaid, but they don't sign up. But they're on the list, 9.7 million. We're adding up to 47 million as we go. Here are those that have coverage eligible under their employer. That's around 6 million people. These folks opted out or didn't opt in to their employer-provided health coverage, health insurance coverage.

So all of these lists that we have, from illegal immigrants to new immigrants, \$75,000 or more and could buy their own insurance, those who are eligible for government programs and don't sign up, those who are eligible for employer programs and don't sign up—all of that, you subtract that from 47 million and, Mr. Speaker, you come up with a number that is 12.1 million Americans who don't have health insurance and don't have affordable options.

I have another little chart that shows this. This is the breakdown of this group here. This spectrum from yellow to—well, red or orange has been put now on a chart. This is 47 million. Here is how we show this. These are the different categories that I said: illegals, legals, those that are eligible for Medicaid, those eligible under employers, and that full list. But here in orange, 12.1 million people, less than 4 percent of the population of the United States, and we're going to change here in the House of Representatives, working with the Senate and with the effort of the President and likely his signature for less than 4 percent of the population?

Let me look at this. This sliver right here, that's 12.1 million Americans, this piece, and that's less than 4 percent of the population of the United States. The President's proposal and the liberals' and the Progressives' proposal, the Democrats' proposal is to transform 100 percent of the health insurance industry in the United States and 100 percent of the health care delivery system in the United States to try to reduce this 12.1 million number down to something less than that, maybe something less than 6 million, but certainly not down to zero.

The President stood here and tried to tell us that the proposal would not fund illegals, but his Democrats have voted down the amendments in Energy and Commerce and in Ways and Means

that would have required proof of citizenship in order to access these benefits that are written into H.R. 3200, the bill. So it's pretty hard for the President to be critical of those who make allegations about his veracity when the facts show otherwise, Mr. Speaker.

I hope that that dances along the edge of the rules adequately and still carries forth the message. I'm trusting the American people to be intelligent, well informed, objective, not selfish and be able to self-sacrifice, to reach out and help others, but remember to preserve our freedoms. If we sacrifice our freedoms, if we throw over the side that vitality that makes us great, the dependency takes away our vitality. Urgency and need add to our vitality.

Free market capitalism has been a driving force in this country. Yet to date, according to *The Wall Street Journal*, a third of our private sector has been nationalized within the last year. A third of it. When you add three large investment banks that are nationalized, AIG, the large insurance company, Fannie Mae, Freddie Mac, General Motors, Chrysler, eight large huge entities swallowed up and nationalized, which means the Federal Government controls them. That's a third of our private sector, and this health care industry here is between another 14.5 percent and 17.5 percent of our GDP. The range is somewhere between the two.

But if you add those numbers up to what's already been nationalized, you are up to over half of the private sector of the United States. We need to remember that going to Western Europe and looking for ideas and seeking to conform to the ideas that are driven in Western Europe diminish our freedoms. They don't enhance our freedoms. We are a unique people. There is something unique about being an American. We aren't simply an extension of Europe. We are our own people. We're free people that came here to live free or die. I love the motto of New Hampshire: "Live free or die." That has been the case for hundreds of years here in the United States.

We've skimmed the cream off the donor crop from every civilization that sent us people. It was hard to get here. The people that had a dream got here. When they came here, they built on their dreams. They built on our dreams because we have freedom. We have got to expand our freedom, not diminish it. We shouldn't be expanding our government. Now we have got to shrink our government. We have got to find a way to have a private sector that can have the kind of growth necessary to ever pay off this national debt and save people their freedom so that they're not underneath the thumb of a national health care act.

With that, Mr. Speaker, I appreciate your indulgence, and I yield back the balance of my time.

#### SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. MCDERMOTT) to revise and extend their remarks and include extraneous material:)

Ms. WOOLSEY, for 5 minutes, today.

Mr. MCDERMOTT, for 5 minutes, today.

Mr. DEFAZIO, for 5 minutes, today.

Ms. KAPTUR, for 5 minutes, today.

Mr. GRAYSON, for 5 minutes, today.

Mr. SCHIFF, for 5 minutes, today.

(The following Members (at the request of Mr. JONES) to revise and extend their remarks and include extraneous material:)

Mr. POE of Texas, for 5 minutes, October 15.

Mr. BURTON of Indiana, for 5 minutes, October 13, 14 and 15.

Mr. JONES, for 5 minutes, October 15.

Mr. MCCOTTER, for 5 minutes, today.

Mr. BISHOP of Utah, for 5 minutes, today.

Mr. CAO, for 5 minutes, today.

Mrs. BACHMANN, for 5 minutes, today.

#### SENATE BILL REFERRED

A bill of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S. 942. An act to prevent abuse of Government charge cards; to the Committee on Oversight and Government Reform; in addition to the Committee on Armed Services for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

#### ADJOURNMENT

Mr. KING of Iowa. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 53 minutes p.m.), under its previous order, the House adjourned until tomorrow, Friday, October 9, 2009, at 10 a.m.

#### EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

4033. A letter from the Assistant to the Board, Board of Governors of the Federal Reserve System, transmitting the System's final rule — Reimbursement for Providing Financial Records; Recordkeeping Requirements for Certain Financial Records [Regulation S; Docket No. R-1325] received September 28, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Financial Services.

4034. A letter from the Director, Environmental Protection Agency, transmitting Interim Guidance: Providing Communities

with Opportunities for Independent Technical Assistance in Superfund Settlements; to the Committee on Energy and Commerce.

4035. A letter from the Director, Regulatory Management Division, Environmental Protection Agency, transmitting the Agency's final rule — Approval and Promulgation of Air Quality Implementation Plans; Ohio Clean Air Interstate Rule [EPA-R05-OAR-2009-0368; FRL-8950-9] received September 22, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

4036. A letter from the Director, Environmental Protection Agency, transmitting Lead Dust Hazard Standards and Definition of Lead-Based Paint; TSCA Section 21 Petition; Notice of Receipt and Request for Comment [EPA-HQ-OPPT-2009-0665 FRL-8793-3]; to the Committee on Energy and Commerce.

4037. A letter from the Director, Regulatory Management Division, Environmental Protection Agency, transmitting the Agency's final rule — Approval and Promulgation of Air Quality Implementation Plans; Mohegan Tribe of Indians of Connecticut [EPA-R01-OAR-2009-0305; A-1-FRL 8949-8] received September 22, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

4038. A letter from the Director, Regulatory Management Division, Environmental Protection Agency, transmitting the Department's final rule — Approval and Promulgation of Air Quality Implementation Plans; Indiana; Interim Final Determination that Lake and Porter Counties Are Exempt From NOx RACT Requirements for Purposes of Staying Sanctions [EPA-R05-OAR-2009-0512; FRL-8961-9] received September 22, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

4039. A letter from the Director, Regulatory Management Division, Environmental Protection Agency, transmitting the Agency's final rule — Approval and Promulgation of Air Quality Implementation Plans; Commonwealth of Pennsylvania; Determination of Clean Data for the 1997 Fine Particulate Matter Standard [EPA-R03-OAR-2009-0506; FRL-8962-4] received September 22, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

4040. A letter from the Acting Senior Procurement Executive, General Services Administration, transmitting the Administration's final rule — Federal Acquisition Regulation; FAR Case 2006-013, List of Approved Attorneys, Abstractors, and Title Companies [FAC 2005-36; FAR Case 2006-013; Item V; Docket 2006-0033; Sequence 1] (RIN: 9000-AK71) received August 25, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Oversight and Government Reform.

4041. A letter from the Acting Archivist of the United States, National Archives and Records Administration, transmitting the Administration's final rule — NARA Facility Locations and Hours [Docket: NARA-09-0002] (RIN: 3095-AB61) received September 23, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Oversight and Government Reform.

4042. A letter from the Division Chief, Regulatory Affairs, Department of the Interior, transmitting the Department's final rule — Minerals Management: Adjustment of Cost Recovery Fees [L13100000 PP0000 LLWO310000 L1990000 PO0000 LLWO320000] (RIN: 1004-AE01) received September 25, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Natural Resources.

4043. A letter from the Attorney — Advisor, Department of Homeland Security, transmit-

ting the Department's final rule — Safety Zone; Paddle for Clean Water; San Diego; California [Docket No.: USCG-2009-0383] (RIN: 1625-AA00) received September 25, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

4044. A letter from the Attorney, Department of Homeland Security, transmitting the Department's final rule — Safety Zone; BWRC '300' Enduro, Lake Moolvalya, Parker, AZ [Docket No.: USCG-2008-1180] (RIN: 1625-AA00) received September 25, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

4045. A letter from the Attorney, Department of Homeland Security, transmitting the Department's final rule — Safety Zone; Sea World Labor Day Fireworks, Mission Day, San Diego, CA [Docket No.: USCG-2009-0269] (RIN: 1625-AA00) received September 25, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

4046. A letter from the Attorney — Advisor, Department of Homeland Security, transmitting the Department's final rule — Special Local Regulation for Marine Events; Choptank River, Cambridge, MD [Docket No.: USCG-2009-0749] (RIN: 1625-AA08) received September 25, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

4047. A letter from the Attorney — Advisor, Department of Homeland Security, transmitting the Department's final rule — Safety Zone; Munitions and Explosives of Concern (MEC); Seal Island, ME [Docket No.: USCG-2009-0595] (RIN: 1625-AA00) received September 25, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

4048. A letter from the Attorney, Department of Homeland Security, transmitting the Department's final rule — Safety Zone; Upper Mississippi River, Mile 427.2 to 427.6, Keithsburg, IL [Docket No.: WSCG-2009-0646] (RIN: 1625-AA00) received September 25, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

4049. A letter from the Attorney — Advisor, Department of Homeland Security, transmitting the Department's final rule — Safety Zone; MS Harborfest Tugboat Races in Casco Bay, ME [Docket No.: USCG-2009-0524] (RIN: 1625-AA00) received September 25, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

4050. A letter from the Attorney, Department of Homeland Security, transmitting the Department's final rule — Safety Zone; Missouri River, Mile 366.3 to 369.8 [Docket No.: USCG-2009-0594] (RIN: 1625-AA00) received September 25, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

4051. A letter from the Attorney — Advisor, Department of Homeland Security, transmitting the Department's final rule — Drawbridge Operation Regulation; Sabine River, Echo, TX [Docket No.: USCG-2009-0101] (RIN: 1625-AA09) received September 25, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

4052. A letter from the Attorney — Advisor, Department of Homeland Security, transmitting the Department's final rule — Safety Zones; Swim Events in Lake Champlain, NY, and VT; Casco Bay, Rockland Harbor, Linekin Bay, ME [Docket No.: USCG-2009-0523] (RIN: 1625-AA00) received September 25,

2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

4053. A letter from the Attorney, Department of Homeland Security, transmitting the Department's final rule — Safety Zones; Neptune Deep Water Port, Atlantic Ocean, Boston, MA [Docket No.: USCG-2009-0644] (RIN: 1625-AA00) received September 25, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

4054. A letter from the Program Analyst, Department of Transportation, transmitting the Department's final rule — Standard Instrument Approach Procedures, and Takeoff Minimums and Obstacle Departure Procedures; Miscellaneous Amendments [Docket No.: 30684; Amdt. No. 3337] received September 18, 2009; to the Committee on Transportation and Infrastructure.

4055. A letter from the Program Analyst, Department of Transportation, transmitting the Department's final rule — Establishment, Revision, and Removal of Area Navigation (RNAV) Routes; Alaska [Docket No.: FAA-2008-0926; Airspace Docket No. 08-AAL-24] (RIN: 2120-AA66) received September 16, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

4056. A letter from the Assistant Secretary, ETA, Department of Labor, transmitting the Department's final rule — Treatment of Pension Rollover Distributions received September 28, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Ways and Means.

4057. A letter from the Asst. Sec. ## SENATE—Thursday, October 8, 2009

The Senate met at 9:30 a.m. and was called to order by the Honorable MARK L. PRYOR, a Senator from the State of Arkansas.

### PRAYER

The Chaplain, Dr. Barry C. Black, offered the following prayer:

Let us pray.

O, God of light shining in darkness, O, God of hope lifting from despair, we turn our thoughts to what You have done in our lives, what You are doing, and what You promised to do in the days to come. Let our gratitude for Your grace rise up in joy and praise to Your throne.

Lord, use the talents of our lawmakers for Your purposes. Inspire them to dedicate their abilities to You to be used in faithful service. Show them how to maximize their opportunities to bring justice, equality, and peace to our Nation and world. Empower them to enable justice to prevail over injustice, reconciliation to replace conflict, and caring to replace apathy. Lord, give them a sense of destiny and a deep dependence on Your guidance. Strengthen their desire to have congruity between beliefs and behavior as they seek to live worthy of their privilege.

We pray in the Redeemer's Name. Amen.

### PLEDGE OF ALLEGIANCE

The Honorable MARK L. PRYOR led the Pledge of Allegiance, as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

### APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. BYRD).

The legislative clerk read the following letter:

U.S. SENATE,  
PRESIDENT PRO TEMPORE,  
Washington, DC, October 8, 2009.

To the Senate:

Under the provisions of rule I, paragraph 3, of the Standing Rules of the Senate, I hereby appoint the Honorable MARK L. PRYOR, a Senator from the State of Arkansas, to perform the duties of the Chair.

ROBERT C. BYRD,  
President pro tempore.

Mr. PRYOR thereupon assumed the chair as Acting President pro tempore.

### RECOGNITION OF THE MAJORITY LEADER

The ACTING PRESIDENT pro tempore. The majority leader is recognized.

### SCHEDULE

Mr. REID. Mr. President, following leader remarks, the Senate will proceed to a period of morning business for 1 hour, with Senators permitted to speak for up to 10 minutes each. The Republicans will control the first 30 minutes. The majority will control the second 30 minutes.

Following morning business, the Senate will resume consideration of the Commerce, Justice, Science Appropriations Act. We hope to reach short time agreements on available conference reports. Senators will be notified when any votes are scheduled during today's session of the Senate. Senators SHELBY and MIKULSKI feel we can finish the bill that we are working on today.

### FINANCE COMMITTEE CBO REPORT

The Finance Committee report came out yesterday from CBO. It was outstanding, \$81 billion, bending the curve. That bill will be voted on by the Finance Committee on Tuesday morning. It will be reported to the Senate.

Since Harry Truman was President, Democrats have fought to make it more affordable to live a healthy life in America. Every day we come closer to achieving that goal. Yesterday was a landmark occasion. Yesterday the non-partisan Congressional Budget Office confirmed that the Finance Committee plan, which is one of the five plans in Congress to reform the way health insurance companies treat people in this country, will reduce the deficit.

It did not say it will keep the deficit the same. It did not say it will increase it, not even by one penny. It said, in black and white, that the Finance Committee's bill will reduce our deficit, not just in the short term but over the long term as well.

That is something progressives, conservatives, and Independents, everyone in between, can be thankful for and can applaud. Today we stand closer than ever to fulfilling that fundamental promise, the one for which we have fought more than 60 years. We stand closer than ever to fulfilling the cause of Senator Ted Kennedy.

But as anyone who has even superficially followed the debate knows, the route to realizing Senator Kennedy's dream is far from smooth sailing. There are still those who will not rest until the American people are denied

the change they demanded, those who will not be happy unless the status quo is sustained. There are those who still want to pick fights against us, even though we are interested only in fighting for hardworking American families. There are those who consider this a zero sum game and will only declare victory if President Obama concedes defeat. So let me be very clear. Just as Democrats believe in ensuring quality, affordable health care for every American citizen, we believe equally as strongly that this country has no place for those who wish for its leaders to fail.

Just as yesterday brought us another step closer to real reform, it also brought us another round of Republican excuses, from the Republican leadership on down. The other side remains trapped in its strategy of distortion, distraction, and deception. Yesterday on the Senate floor, the Republican leader asked rhetorically: What happens to Medicare under our plan? Well, let me answer that question. Under our plan, seniors pay less for their medicine. Under our plan, seniors pay nothing for their annual checkup. Under our plan, seniors pay nothing for preventive care. And, under our plan, doctors who treat seniors get a raise.

But the other side is not letting those facts get in the way of a good sound bite. Instead, yesterday on the Senate floor, the Republican leader said: Our plan will cut Medicare. What he did not bother to say is that the only thing we are cutting is the waste rampant in that system, waste that you as a taxpayer pay in every paycheck.

Yesterday on the Senate floor, the Republican leader said: "Republicans have tried to protect Medicare throughout the debate."

Listen to that one: "Republicans have tried to protect Medicare throughout the debate."

What he did not bother to say is that this debate is also the first time in history Republicans ever found such an interest. The fact is that ever since Senate Republicans opposed the creation of Medicare, they have spent the past 40 years on the wrong side of history when it comes to helping seniors.

In the past 10 years, Republicans have voted against protecting and strengthening Medicare 59 times. When President Bush vetoed the Medicare Improvement Act last year, the only Senators who supported that disastrous veto were his fellow Republicans here in the Senate. So the American people can be excused for not buying the Republicans' eleventh-hour claim that

they are the true guardians of seniors' health care.

It is telling that after weeks of negotiations, months of debate, and decades of national movements for health insurance reform, this is the best they can come up with. It is telling that one of their most oft-repeated arguments protests not the contents of the bill but now the number of the pages of the bill. How is that for criticism: The bill has too many pages.

Let's not forget the Republicans only offer arguments in response to our plan to make health care more stable and more secure. We have yet to hear any Republican arguments in support of their own health care ideas. Why? Because there are not any. They do not exist.

The Republican plan is nothing more than the status quo. Under the Republican plan, insurance companies can continue to deny a person coverage when they need it the most. Under the Republican plan, insurance companies can deny you coverage because you have high cholesterol or hay fever or even heart disease.

They can raise your rates because you are getting older, because your dad had prostate cancer, or simply because you are a woman. Under the Republican plan, if you have health insurance, your family has to pay at least \$1,000 a year more to cover all of the other families who have none.

Republicans in Congress are the only ones who support that plan. The rest of the country knows we need to act and we need to act now. Here is a list of those who support our plan to improve our health insurance in the short term and the long term alike: doctors; hospitals; the pharmaceutical industry; a bipartisan group of Governors; President Obama, who has made fixing health care his top priority; Democrats in Congress who are committed to getting it done this year; and, at the top of that list, the American people, 9 of 10 of whom say high health care costs are hurting their families, crushing their families.

In recent days, prominent, courageous, independent-minded Republicans throughout this country have added their names to that list of people who are crying for health care reform. Arnold Schwarzenegger, the Governor of a State with 38 million people, the most populous State in the Union; Michael Bloomberg, the mayor of the most populous city in the country; Bobby Jindal, the Governor of Louisiana—Republicans asked him to provide their party's response to President Obama's first ever address to Congress—Tommy Thompson, former Governor of Wisconsin, former Secretary of Health and Human Services under President Bush; Mark McClellan, former head of the Centers for Medicare and Medicaid Services under President Bush; Bill Frist, former Sen-

ate majority leader and a physician who said last week, if he were still in the Senate, he would vote for health insurance reform; and, Bob Dole, today, announced that he supports something being done. This former majority leader and Republican nominee for President this week encouraged his party to drop their "just say no" strategy. He was even stronger in his statements today.

Here is a list of those who think things are just fine the way they are: Republican leaders in Congress. That is it. That is the list. And that is the real match-up in this health care debate. It is clear to see who is listening to the American people, who has tuned them out.

Democrats are willing to listen not only to the American people, we are also more than willing to listen to congressional Republican ideas, if they offer any, to move this debate forward. We would be happy to end up with a bill that does not rely on 60 Senators but one that can earn a lot more.

But until that happens, until Republicans in Congress show they want to be productive partners rather than partisan protesters, we will continue to do what the vast majority of the American people demand that we do; that is, continue moving forward to improve a badly broken system.

I agree with President Obama who told Congress last month: We have no patience for those who seek more of the same failed ideas. We have no patience for those who contribute only criticism and not constructive input. We have no patience for those who mischaracterize our plan or mislead the people, and will call them out when they do.

That is what the speech was all about. We believe this because we believe the American people deserve to be told the truth. We believe hard-working families already have enough real problems to worry about without having their time wasted with fake problems. We believe this country is no place for those who hope for failure, failure of their leaders.

#### RECOGNITION OF THE MINORITY LEADER

The ACTING PRESIDENT pro tempore. The minority leader is recognized.

#### HEALTH CARE: WEEK XII, DAY II

Mr. MCCONNELL. Mr. President, yesterday morning, our friends across the aisle came to the floor to defend the health care plan that they and their colleagues are pushing through Congress—a plan that has as its foundation a trillion dollars in spending, half a trillion dollars in cuts to Medicare, higher premiums, higher taxes on just about everyone at a time of near dou-

ble-digit unemployment, and limits on the health care choices that millions of Americans now enjoy. Later in the day, we got a cost estimate. It is irrelevant. The bill it is referring to will never see the light of day.

What matters is that the final bill will cost about a trillion dollars, vastly expand the role of government in people's health care decisions, increase premiums, and limit choice.

For months, Republicans have taken every opportunity to talk about the kinds of commonsense reforms we need and that Americans actually want. Personally, I have spoken just about every day we have been on the floor since June about step-by-step reforms to lower costs, commonsense ideas that we should all agree on like malpractice reform, equalizing the tax treatment for businesses and individuals, and prevention and wellness programs—all of which would get right at the heart of our health care problems.

We have talked about these things because they address the problems we have, problems of cost and access, without limiting the choices Americans now enjoy. We have talked about these things because these are the reforms Americans want.

I have spoken about reform 43 times on the Senate floor. Yet some don't seem to be listening. And this is precisely the problem Americans have identified with some of the advocates of the Democrats' health care plans. They are not listening to our commonsense proposals any more than they are listening to the concerns of the American people.

In fact, listening to the proponents of these plans, one gets the sense they are more concerned about their legacies than what the American people actually want. "This is the moment" . . . "Be a part of history . . ." These are the kinds of things they say to each other about health care reform. Here is an idea: How about asking the American people what they want instead?

Everyone wants reform. I have said so almost every day on the floor for months. But a 1,000-page, trillion-dollar bill that cuts Medicare by half a trillion dollars, raises taxes on virtually everyone, raises premiums, and limits the health care choices Americans now enjoy is not the kind of reform Americans want. And what matters more than that?

The views of the American people are relevant in a debate about legislation that will have a profound and lasting effect on their lives. And these same Americans overwhelmingly oppose the 1,000-page, trillion-dollar plans they have seen from the administration and Congress. They have been saying so for months.

Take the issue of cost. One of the things Americans are concerned about is how much this legislation will cost. They are asking the question. They are not getting a straight answer.

We have seen a lot of numbers thrown around. As I have already noted, yesterday we got another one from the CBO. It doesn't tell the whole story. The fact is, the bill it is referring to will never see the light of day. That is because the real bill will soon be cobbled together in a secret conference room somewhere in the Capitol by a handful of Democratic Senators and White House officials.

The other numbers we have seen are intended to explain how much this bill will cost over 10 years. What most people do not realize is that the new plans would not go into effect for another 4½ years. So what is being sold as a 10-year cost is really a 5½ year cost. That means you can take the numbers you are getting and nearly double them.

Here is what we know about the true cost of the three bills we have seen so far: The Budget Committee has determined that the Finance Committee Bill, as introduced, will cost \$1.8 trillion over 10 years, and we do not expect it to get any better from here on out. The HELP Committee bill will cost \$2.2 trillion over 10 years. And the House bill will cost \$2.4 trillion over 10 years. So the average cost of these bills, when fully implemented, is more than \$2 trillion.

Americans are concerned about all this spending. They want straight answers. Advocates of the administration's health care proposal seem to think that the bigger the proposal, the more complicated, the more expensive, the better. That is not what the American people think. They are making it clear. It is about time we listen.

I yield the floor.

#### RESERVATION OF LEADER TIME

The ACTING PRESIDENT pro tempore. Under the previous order, the leadership time is reserved.

#### MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will proceed to a period of morning business for up to 1 hour, with Senators permitted to speak therein for up to 10 minutes each, with the time equally divided and controlled between the two leaders or their designees, with the Republicans controlling the first half and the majority controlling the final half.

The Senator from Tennessee.

Mr. ALEXANDER. Mr. President, would the Chair please advise when I have consumed 9 minutes.

The ACTING PRESIDENT pro tempore. The Chair will so advise.

#### HEALTH CARE REFORM

Mr. ALEXANDER. Mr. President, I congratulate the Republican leader for

his comments. If it weren't so serious, he and I and the Senator from Texas would probably all be amused to hear the Democratic leader come here day after day and say the Republicans don't have a health care plan and then attack our plan. That is typical of the kind of talk we are getting about health care reform from the Democratic side. We are getting double-talk.

It reminds me, a few years after I was Governor of Tennessee—it must have been the early 1990s—I was driving along in Nashville as a private citizen. I had the radio on. It might have been an Arkansas radio station, but I think it was a Nashville station. The announcer said: Big news. The Tennessee legislature has passed a new law creating a Medicaid program called TennCare. Here is what it will do. It will cover twice as many people for the same amount of money.

Everybody was happy about that. Nobody had to raise taxes. Nobody had to pay any more money. Twice as many people get health care. I remember what went through my mind: I bet that doesn't happen. That sounds too good to be true.

The same idea went through my mind when I picked up a paper this morning and read: The Senate Finance Committee has finished its work. We are going to give 29 million more Americans health care. It is going to cost hundreds of billions of dollars more, and it is going to reduce the Federal deficit all at once. What went through my mind was: That sounds too good to be true. It sounds like the TennCare story.

Let's remind ourselves what the Republican leader said a minute ago. The focus is reducing cost. We all know there are people who don't have health care and who need it. We would like to extend it to them. But we can't afford to do that until we reduce the cost of the health care we have. It is going to bankrupt us as individuals if we don't reduce the cost of our health care premiums. It is going to bankrupt our government if we don't stop the growth of health care. Our first goal is reducing cost, which is why the Republican plan for health care is to take several commonsense steps in the right direction—reducing cost—that will get us where we want to go. We have said those on the floor time after time after time.

They include allowing small businesses to pool their resources so they can offer insurance to more of their employees. They include taking steps to stop junk lawsuits against doctors, which are driving up malpractice premiums and causing problems for patients. For example, many women who are pregnant in rural West Tennessee counties have to drive all the way to Memphis to see a doctor because doctors would not practice there anymore because of the high cost of medical

malpractice premiums, which is driving up the cost of health care. We could create exchanges in each State so people could shop for individual insurance. We could allow people to buy their insurance across State lines. We all believe that if we did a better job of encouraging technology, we could reduce cost and reduce paperwork. All doctors and nurses and medical assistants know that.

Those are five steps we could take together to reduce cost, and we could begin to add to our rolls the 11 or 12 million people who are already eligible for programs we have today. That would make a big difference.

Instead, what our friends on the other side want to do is transform the system at a cost of closer to \$1.6 to \$1.8 trillion, when fully implemented. The question will be, Will it reduce our costs? That is why we want to read the bill. We want to know what it costs. This is not a bill. This is some pages of concepts. This is not a formal, complete estimate of its cost. That only comes when we have a bill.

We have had 8 Democratic Senators who have written to the majority leader and said what all 40 Republicans have said. The legislative text and the complete budget scores from the Congressional Budget Office that are going to be considered should be available on a Web site for 72 hours prior to the first vote. Democrats voted that down in the Finance Committee. They voted down the idea of allowing 72 hours to read a 1,000-page bill and to find out what it costs. Apparently, some Democrats are coming to their senses and saying: No, we would like to have the bill. We would like to read it. We would like to have a formal, complete score—their words—of what it costs, and then we will start voting. This is not a bill. These are concepts.

Then the majority leader is going to put this all together into another bill or create a bill. Then it will take a couple weeks to find out what that costs. We have some questions to ask in the meantime. First, we would like the Democrats to join us in step-by-step solutions to reduce cost. Next, we want to know whether it is going to reduce the cost to government and whether it will reduce the cost to each of us who is buying health insurance. As I look at the outlines, I think it might not. For example, as the Republican leader said, we know it is going to cost about twice as much as the \$800 billion advertised because it doesn't start taking effect for a few years. The taxes start right away, but the benefits don't start for a few years. That is the first thing.

The second thing is, it is going to put 14 million more people into the Medicaid Program—not Medicare, this is the Medicaid Program. This is the program States operate that is paid for two-thirds by the Federal Government and a third by the States, about which

all the Governors have said: If Washington is going to expand the Medicaid Program, Washington ought to pay for it. I suspect when we start asking questions, we will find Medicaid Program costs are underestimated. All the Governors think so. We had one of the most painful letters I have ever read from the Democratic Governor of Tennessee. Senator CORKER put it in the RECORD. He talked about how Tennessee's condition was similar to the condition of most States.

He said: For example, by 2013, we expect to return to our 2008 levels of revenue. We will already have cut programs dramatically. We will have to start digging out. We haven't given raises to State employees or teachers for 5 years. Our pension plans will need shoring up. Our rainy day fund will have been depleted. We would not have made any substantial investments in years. There will be major cuts to areas such as children's services.

We are going to expand a program that is already causing the State of Tennessee and most other States to go toward bankruptcy. That is the way we are going to achieve reform. That is half the reform. Most Governors who have had anything to do with the Medicaid Program say that dumping low-income Americans into the Medicaid Program, where 40 percent of the doctors would not see them, is not health care reform. Medicaid costs are underestimated.

Also, I don't think the Congressional Budget Office estimate of these concepts we saw includes what we inelegantly call the doc fix. Every year the system we have reduces payments to doctors who work on Medicare patients. So we come back and raise the amount of money. If we only pay doctors 10 years from today what we are paying them today to serve Medicare patients, it will cost \$285 billion, and that is not in this bill. When we ask our questions and read the bill and find out what it costs, we will find it doesn't reduce the deficit. Even if it did, it is going to cost \$1.6 or \$1.8 trillion. Who is going to pay for it? Half of it is going to come from cuts in Medicare, which serves seniors. Instead of putting any savings in Medicare to strengthen that program, which is going bankrupt in 2015–2017, we are going to spend it on a new program. Eight hundred billion will come in new taxes. Our insurance premiums are likely to go up instead of down because we will all be buying new government-approved programs.

If Speaker PELOSI is successful in adding the government-run option into the bill before it finally gets through, millions of Americans will be losing their insurance because employers will be paying a fine, instead of the insurance, because their employees can go to the government program. We are going to be paying for it. If you are a

Medicare beneficiary, if you pay taxes, if you are a State taxpayer, if you buy insurance, you are going to be paying for this program. So it is important for the next 3 to 4 weeks that as we debate this, we ask these questions.

Mr. President, I see the Senator from Texas on the floor, and I wonder, as I conclude my remarks, whether he has thought a little bit about whether it is going to be possible to ensure 29 million more people, spend hundreds of billions of dollars, and still reduce the deficit and reduce costs to the American people who are trying to afford their insurance premiums today.

The ACTING PRESIDENT pro tempore. The Senator from Texas.

Mr. CORNYN. Mr. President, I would respond to the distinguished Senator from Tennessee, of course not. The American people are smart. They can understand that these numbers are not going to add up. As our Republican leader said this morning, this bill that was reported in the newspaper and scored by the Congressional Budget Office yesterday will never see the light of day. So this is a work in progress.

We are committed, I think on a bipartisan basis, to reform our health care system. But the goal—and we need to keep our eye on the goal—is to bring down the cost and to cover people who currently are not covered. This bill, unfortunately, does not accomplish those goals. But we are going to keep working with our colleagues, if they will be open to our suggestions. But I have to tell you, as a member of the Finance Committee, virtually every suggestion Republicans made during the amendment process to this bill was voted down on a party-line basis.

I came to the floor to talk about one of those amendments the Senator from Tennessee mentioned, where we asked merely that the bill—once it is reduced to legislative language and the cost is determined—be put on the Internet for 72 hours. That was voted down along a party-line vote. But I thank the Acting President pro tempore and other folks on the other side of the aisle, eight of whom have written to the majority leader saying that makes sense to them. So I hope we will build a bipartisan consensus for more transparency in the debate.

I have also come to the floor to talk about how it makes no sense to cut Medicare benefits for 11 million Medicare beneficiaries who happen to be engaged in the Medicare Advantage Program in order to pay for this bill. Why would you take \$½ trillion from Medicare, which is on a pathway to bankruptcy by 2017, in order to create a new government program? It can only make sense inside the beltway and if you voluntarily suspend your powers of disbelief. It does not make sense across the country. That is why it is so important to have these discussions, ask these questions, have transparency.

Today I wish to ask another question: Will the health care proposals, such as the Finance Committee proposal and others, break the President's promise of not raising taxes on families making less than \$250,000 a year? Unfortunately, the Finance Committee bill does, in fact, raise taxes on families making less than \$250,000 a year. So the President cannot keep his promise if we pass this particular legislation.

For example, this bill imposes a penalty on individuals who do not meet the Washington-imposed mandate that will be enforced by the Internal Revenue Service. The Internal Revenue Service is going to impose a penalty on you if you do not have health insurance that meets the Washington-imposed mandate.

According to the Joint Tax Committee, the penalty initially included in the bill would especially hit middle-class families hard. They found that at least 71 percent of the penalty would come from people earning less than \$250,000 a year.

The bill also increases the penalty from 10 percent to 20 percent for Americans who use a portion of their health savings account for purposes other than qualified medical expenses. It seems to me we ought to be encouraging more people to use their health savings accounts rather than less. But as I discussed yesterday on the telephone with the CEO of Whole Foods, John Mackey, he said the health savings accounts—they call them wellness accounts, which are overwhelmingly successful and voted on every year with the satisfaction rate of some 85 percent or more by the employees of Whole Foods, headquartered in Austin, TX—will be an illegal plan under this mandate. Insurance premiums, of course, will go up in the process.

This bill also raises the floor on deductions of medical expenses to 10 percent from its current level of 7.5 percent. So you will be able to deduct less of your medical expenses if you have serious health care expenses, which means your taxes will go up. If you can deduct less, your taxes will go up.

The committee did, I would point out, consider an amendment that was intended to bring the bill in line with the President's promise not to raise taxes on people making less than \$250,000 a year, and it was voted down along party lines. Republicans were for it and Democrats were against it. This amendment would have protected families who earn less than \$250,000. But, as I say, it was voted down.

In addition to imposing taxes on people the President promised not to impose taxes on, this also imposes additional so-called industry fees, which experts have said will ultimately be passed down to consumers in higher insurance costs. So instead of making insurance more affordable, this bill

would actually make it less affordable and head in the wrong direction. The nonpartisan Congressional Budget Office and the Joint Tax Committee both confirmed these fees would be passed along to consumers and ultimately raise insurance premiums.

So my question for today is: Will these proposed health care reforms break the President's promise not to raise taxes on those making \$250,000 or less? Unfortunately, the Finance Committee proposal, which we will now apparently vote on on Tuesday of next week, does break the President's promise.

But Republicans stand ready to work with our friends on the other side if they will accept some ideas on how to do this to bring down costs and to cover more people to make health coverage more affordable. But so far all those suggestions have been rejected along party-line votes.

Mr. President, I yield the floor.

The ACTING PRESIDENT pro tempore. The Senator from Utah.

Mr. BENNETT. Mr. President, along with my colleague, I noticed, with great interest, the headline in this morning's paper that said the Congressional Budget Office has said the health plan that is coming out of the Finance Committee will not increase the deficit. I thought: That is a little bit hard to believe. Then I looked at the details, and all of this reminded me of a scene out of an old movie. The movie is not worth talking about, but the scene is worth talking about to describe what is happening.

It was a circumstance where a spendthrift husband comes home to a frugal wife with a new car. The wife takes one look at the new car and says: Why in the world are we doing this? We can't afford a new car.

He said: No. Remember, we got that windfall. There was an inheritance that came through. We got some extra money. We can afford the new car, and it will not add—to use the terms of politicians—a dime to the deficit because we have this windfall coming in and we can spend it on the new car.

She said: Are you kidding? The roof is leaking. The college fund for the kids is empty. Our house payments are in arrears. We got that windfall. We could take care of some of these other problems. We don't need a new car.

Well, he said: We got the money and I have already spent it on the car and there is nothing you can do about it now.

As it turned out in the movie, the new car got repossessed later on because he had only made a downpayment on it, and they could not afford the payments to keep the car.

Why do I say the health care debate reminds me of this scene from the movie? The Federal debt is rising. The deficits from the regular appropriations bills are enormous. We are wal-

lowing in red ink in the Federal Government. But this bill is not going to add to the deficit because we found \$1 trillion as a way to pay for it. We found \$1 trillion someplace else we can use to pay for this bill. We can buy this new car, and, OK, the roof is leaking, the college fund is gone, the house payments are in arrears, but somehow we have a trillion extra dollars that we think is best spent on the new car.

If the new car is that much better than the old car, maybe the case could be made that we should take this \$1 trillion and spend it on the new car. What do we get for \$1 trillion from the Baucus bill? The \$1 trillion, which, if it is available to make this thing deficit-neutral, could very well be spent in balancing other budgetary problems and paying down the national debt and doing other things with it.

If we do have \$1 trillion to spend here, what are we getting for it when we are spending it entirely on the Baucus bill? Well, we are getting a continuation of defensive medicine because there is no significant malpractice reform, tort reform in this bill.

In his speech to the Congress, President Obama said:

I don't believe malpractice reform is a silver bullet, but I have talked to enough doctors to know that defensive medicine may be contributing to unnecessary costs.

I do not want to argue with the President that much because I was delighted when he said that, and I was on my feet applauding with others for that particular statement. I would say, defensive medicine not "may be" contributing to unnecessary costs; defensive medicine "clearly is" contributing to unnecessary costs. But we are not dealing with that in the Baucus bill. We are raising \$1 trillion somewhere else so we can continue business as usual with respect to defensive medicine and malpractice awards within our present system. So the new car is no better than the old car. It is costing us a lot more money, but it is no better than the old car.

Are we getting coverage of the 47 million Americans whom we hear about over and over again in the debate, when they say: Well, the whole purpose we have to undertake this is because we have 47 million Americans who do not have health care coverage. Are we getting them taken care of? Do we have room for them in the new car? Well, not really.

According to the paper this morning, we are going to get 29 million of the 47 million taken care of, which means roughly 20 million left out. We can go into the details of who the 47 million are. As we do, we find out it is a very mixed bag of people who are just passing through that category, people who deliberately choose not to be there. If we are spending \$1 trillion just to get to 29 million out of the 47 million, we

are not getting a very good new car. We are not getting an improvement over what we have already.

Again, that \$1 trillion could be spent in a much better and wiser way. If, indeed, we have an extra \$1 trillion we can spend on health care—if, indeed, we do have an opportunity to buy a new car—this is the kind of thing we could get for the \$1 trillion, if we said: All right, we have an extra \$1 trillion lying around, let's put it in health care. We could double cancer research funding; we could provide treatment for every American whose diabetes or heart disease is going unmanaged; we could create a global immunization campaign to save millions of children's lives; and we would still have enough money left over to keep doing these programs for at least a decade and probably more.

That is what we could get for a new car in the form of health care reform, if we were willing to spend the trillion dollars on trying to improve people's health. Instead of trying to improve people's health, we are simply trying, through this bill, to keep the present system as it is.

I have heard my friends from the other side of the aisle say repeatedly: The present system is broken. The present system is not an acceptable alternative. The present system must be changed. I say: Hooray. I agree. I just wish the Baucus bill would deal with the present system. I just wish the Baucus bill would give us, in fact, a new car rather than simply replacing the old car with a duplicate of the old car that happens to cost an extra \$1 trillion.

So I am hoping that as we move things forward, we can make some significant changes in it because at the present time what we have here is a program that would spend Federal cash for a clunker.

I yield the floor and suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Ms. MIKULSKI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Ms. MIKULSKI. What is the pending order, Mr. President?

The ACTING PRESIDENT pro tempore. The Senate is in morning business for another 27 minutes.

#### HEALTH CARE REFORM

Ms. MIKULSKI. Thank you very much, Mr. President.

As the dean of the Democratic Women in the Senate, we wish to tell our colleagues and the American people that we want to join together as women of the Senate today to talk

about the compelling issues facing the American people in terms of the need for health care reform. We are going to be speaking out and speaking up about the need for reform. I will be the wrap-up speaker.

In order to kick it off, I am going to yield—how much time does the Senator from Minnesota need?

Ms. KLOBUCHAR. I would say 5 minutes.

Ms. MIKULSKI. We have nine speakers.

Ms. KLOBUCHAR. I will need 3 minutes.

Ms. MIKULSKI. I yield 3 minutes to the Senator from Minnesota.

The ACTING PRESIDENT pro tempore. The Senator from Minnesota is recognized.

Ms. KLOBUCHAR. Mr. President, I rise today to talk about the importance of health care reform to the women of this country.

Let me tell my colleagues how I got interested in this issue. When my daughter was born, she was very sick. She couldn't swallow. She was in intensive care. They thought she had a tumor. It was a horrendous moment for our family. I was up all night in labor, up all day trying to figure out what was wrong with her, and they literally kicked me out of the hospital—my husband wheeled me out in a wheelchair after 24 hours—because at that point in our country's history, they had a rule; it was called driveby births. When a mom gave birth, she had to get kicked out of the hospital in 24 hours.

Well, I went to the legislature with a number of other moms and we said: Enough is enough. We got one of the first laws passed in the country, in the State of Minnesota, guaranteeing new moms and their babies a 48-hour hospital stay. My favorite moment of this was at the conference committee when there were a number of people who were trying to get the implementation of this bill delayed so it wouldn't take effect. I went there with six pregnant friends of mine. When the legislature said, when should this bill take effect, the pregnant women all raised their hands and said, "now." That is what happened. That is what the women of America are saying today. They are saying, "Now." They cannot keep having these escalating health care costs that are making it harder and harder for them to afford health care.

I always tell the people in my State to remember three numbers: 6, 12, and 24. About 10 years ago, the average family was paying \$6,000 for their health insurance. Now they are paying something like \$12,000, a lot of them paying even more; small businesses, even more. Ten years from now, they are going to be paying \$24,000, if we don't do something to bend this cost curve.

Medicare is something that is so important for women in this country. It is going to go in the red by 2017.

One of the things that really bothers me about the current situation is this preexisting condition issue. I couldn't believe what I found out last week: In nine States and the District of Columbia, women who are victims of domestic abuse or who have been victims of domestic abuse can be denied health care coverage because domestic abuse can be considered a preexisting condition. So they get abused and then they can't even get the health care coverage to help them. Maternity, being pregnant—these things can all be preexisting conditions, and that is something we need to stop.

That is why I am so glad one of the major proposals in this reform is to do something about preexisting conditions. We also need to make sure preventive care—so important to women—things such as mammograms are covered in our health care plan.

Finally, one of the things I know the Senator from Maryland has been such a leader on is aging parents. People such as myself, we have kids of our own and then we also have aging parents. We are caught in what they call the sandwich generation: taking care of our own kids and making sure our parents get care at the same time. Predominantly, a lot of women are in this situation. That is why the CLASS Act, which Senator Kennedy proposed and which is in one of the health care proposals, which allows Americans to use pretax dollars to pay for their health insurance and their long-term care insurance is so important.

So I am glad for American women that we are moving forward on this health care reform.

Thank you very much, Mr. President. I yield the floor.

Ms. MIKULSKI. Mr. President, we thank the Senator for her advocacy to end this driveby delivery and other punitive practices.

I yield 3 minutes to the Senator from North Carolina.

The ACTING PRESIDENT pro tempore. The Senator from North Carolina.

Mrs. HAGAN. Mr. President, I am joining my colleagues on the floor today to talk about how health care reform will improve women's access to care.

I recently received an e-mail from a woman in Raleigh that truly underscores why women need health care reform in America. Julie wrote to me about her sister who was uninsured and waited years for a mammogram because she literally couldn't afford to pay for one. Then she found a lump in her breast. By the time the lump became a mass, Julie's sister finally got a mammogram and had to pay for it with cash. The mammogram confirmed what she suspected: She had breast cancer. But now that she had the diagnosis, she had no way to pay for the treatment. Julie's sister lost her battle with breast cancer this March. Like

thousands of women across America, perhaps Julie's sister could have beaten this cancer if she had had access to affordable, preventive care and, after her diagnosis, access to either insurance or medical care to cover her cancer treatment. In this heartbreaking situation, Julie's sister was sick and stuck.

Unfortunately, I hear about such cases far too often. Inefficiencies and discriminatory practices in our health care system disproportionately affect women. In all but 12 States, insurance companies are allowed to charge women more than they charge men for coverage. The great irony here is that mothers, the people who care for us when we are sick, are penalized under our current system.

My daughter Carrie recently graduated from college and had to purchase her own health insurance. For no other reason than her gender, her insurance policies cost more than they do for my son Tilden.

Yesterday, a 23-year-old staffer in my office, a female from Fayetteville, shopped for health insurance on the individual market for the most basic, bestselling plan. It would cost her \$235 a month; for a man of the same age, \$88. That is 2½ times more expensive, close to \$1,800 more per year.

Many women who have health insurance are still stuck. Insurance companies don't often cover key preventive services such as mammograms and pap smears. Often, the copays for these critical services can be out of reach for many women when they range as high as \$60 a visit. More than half of all women, like Julie's sister, have reported delaying preventive screenings. Without insurance, mammograms cost well over \$100.

In many cases, the difference between life and death is early detection. The Affordable Health Choices Act—which I worked with my colleagues on the Health, Education, Labor and Pensions Committee to craft—makes preventive care possible for women across America. It eliminates all copays and deductibles for recommended preventive services.

We are also stopping insurance companies from charging women more than men or using preexisting conditions as a reason to deny anyone health insurance.

The PRESIDING OFFICER (Mr. KIRK). The Senator's time has expired.

Mrs. HAGAN. I thank the Chair and yield the floor.

Ms. MIKULSKI. Mr. President, I now yield 3 minutes to the Senator from Michigan.

Ms. STABENOW. Mr. President, I thank the dean of the women in this Senate, Senator MIKULSKI, for bringing us all together on the Senate floor, and I join with my great colleagues from California and North Carolina and other colleagues who will be joining us

as well, to talk about the importance of health care reform for women.

Women are the majority of the population. We have the ability to benefit from this reform that holds insurance companies accountable and creates more opportunity for coverage. We will see a great benefit to come from all of this, and I want to speak to just one piece of it. We know the majority of people today—men and women, families—have insurance, and there are a multitude of bad insurance company practices that are occurring today stopping people from getting coverage because they have a preexisting condition.

By the way, we found out just last week, from an article in the Washington Post, that some insurance companies treat pregnancy, or the intention to adopt, as a reason to reject someone for a preexisting condition. I mean that is pretty shocking to me. In fact, the same report said that being pregnant or being an expectant father, with some companies, was grounds for automatic rejection—automatic rejection—when it comes to being able to get a health insurance policy.

So this reform is about making sure everyone benefits; that women who have insurance, as well as women who don't currently have access to health insurance, can see protections and changes that stop the discrimination and create better access to health care because that is what this is all about, being able to find affordable health care and health care that meets our needs. All women across the country certainly are desperately concerned about that. We have 62 million American women right now who are in their childbearing years, and I was quite shocked to learn that right now, according to the Women's Law Center, nearly 60 percent of the individual insurance plans that are out there in the marketplace—if you are not getting insurance through your employer, but you are going out yourself to find an insurance policy for you and for your family—nearly 60 percent don't provide any coverage for maternity care or even an option of supplemental insurance for an additional cost.

So for the women in these plans who are attempting to get insurance, no amount of money can buy the maternity care that they need. So this bill is about changing that and making sure the women of this country have the care they need.

The PRESIDING OFFICER. The Senator's time has expired.

Ms. STABENOW. I thank the Chair.

Ms. MIKULSKI. I now yield 3 minutes to the Senator from California, Mrs. BOXER.

Mrs. BOXER. I thank Senator MIKULSKI for her leadership. Everyone in America has a stake in health care reform, even if they are happy with their insurance at the moment. The main

reason is that costs are exploding and health care insurance companies are walking away without any penalty. They come up with a reason, and then we all are paying for those who have no insurance and wind up in the emergency room.

Women have even more at stake. Why? Because they are discriminated against by insurance companies, and that must stop, and it will stop when we pass insurance reform.

Now, how are women discriminated against? If they have been victims of domestic violence, that is considered to be a preexisting condition and, therefore, they are told they can't get insurance, and that happens in eight States and the District of Columbia. It is a tragedy, and it will change when we pass health insurance reform.

If a woman is pregnant, only 14 States in America require insurance companies to cover maternity care. Imagine, a country that puts family values first and yet only 14 States will cover maternity. That will change.

Everyone is faced with huge increases in cost, but women 18 to 55 are charged nearly 40 percent more than men for similar coverage in my home State, and that happens in most States, and health reform will stop that.

Because of discrimination, women are at risk under the current system. More than 52 percent of women reported delaying needed care or avoiding it completely because of cost compared to 39 percent of men. Now, 39 percent is terrible, but 52 percent is deplorable. People are walking around sick because they can't afford to go to the doctor. Health insurance reform will stop it. There will be no more gender rating.

Women earn less than men, and that is why it is an impossible situation. In my home State, over the past 9 years, premiums have risen more than four times as fast as earnings. We spend more than twice as much as any other industrialized Nation on health care. You would think we would have greater outcomes, Mr. President, but we rank 29 out of 30 industrialized nations in infant mortality. It isn't surprising, when so many women are not getting prenatal care.

Medicare: More than half of those on Medicare are women. If we do nothing, Medicare goes broke in 2017. So when politicians try to scare our seniors, it is despicable because it is the status quo that is dangerous. When we fix Medicare—and we will in health reform—women will get free preventive care, mammograms, and annual physicals.

So in summary, women, children, and men need us to act on health reform. We must make our voices heard.

I thank my colleagues, my women colleagues, for coming to the floor of the Senate today to wake up this Nation.

The PRESIDING OFFICER. The Senator's time has expired.

Ms. MIKULSKI. Mr. President, I now yield 3 minutes to the Senator from Louisiana.

Ms. LANDRIEU. Mr. President, I thank our leader, the Senator from Maryland, BARBARA MIKULSKI, for organizing this effort on the Senate floor this morning. I am pleased to join my sisters and colleagues in the Senate this morning to raise some specific and important issues relative to this reform debate that is moving forward. They are important facts as we press forward with our reforms.

I would like to begin, just briefly, with reminding all of us that we began—as the President called for us to do—to focus on health care reform and to reduce cost—cost to our Nation, cost to our States, cost to individual businesses as they continue to see these premiums skyrocketing beyond their ability to either afford or to control, and cost to individuals.

The Baucus mark in the Senate Finance Committee, which is pending, goes a significant step forward in terms of the cost issue. That is very encouraging to those of us who believe that health care reform is essential for several reasons. But one of the important reasons is to get cost under control and to begin to help balance the Federal budget and get us back on a sure financial footing, which—as has been stated by many experts, Mr. President—is impossible without fundamental insurance reform. So that is point 1.

Point 2, the benefit of moving forward with reform will significantly improve outcomes for women, as the Senator from California, Mrs. BOXER, stated. It is going to help all Americans, but it is going to be particularly helpful for women of childbearing age, who are often discriminated against with insurance rates because they have to see doctors more often just by the very nature of pregnancy and the care they require. Because they have to see their doctors more often, their insurance is sometimes significantly higher.

In fact, the records show that the cost of an insurance plan for a 40-year-old woman can be up to 38 percent more than a 40-year-old man in the same circumstance—same health, same geographic location. Our reform efforts will eliminate that bias and make health care more affordable for everyone but particularly for women.

I wanted to take my last minute to talk about a letter I received from Denelle Walker, a 25-year-old woman living in Baton Rouge, who just graduated from school and went on to get a job.

Mr. President, 20 percent of Denelle's modest paycheck—20 percent—is going toward insurance. This bill will help young women such as Denelle, middle-aged women, and older women on the issue of affordability.

Ms. MIKULSKI. Mr. President, I now yield 3 minutes to the Senator from New Hampshire.

The PRESIDING OFFICER. The Senator from New Hampshire is recognized.

Mrs. SHAHEEN. Mr. President, I am very pleased to join my women colleagues in the Senate today to talk about the importance of passing health care reform for all the women in this country, and I want to thank Senator MIKULSKI for her leadership on this issue.

Plainly and simply, the status quo is not working. Today's health system is simply not meeting the needs of women. For too many women and their families today, quality, affordable health care is out of their reach.

It should surprise no one that women and men have different health care needs. Despite this difference, it is unacceptable that women are not treated fairly by the system and do not always receive the care they require and deserve. In cases where women can find coverage that is affordable, often it is woefully inadequate.

A recent survey by the National Women's Law Center found that the vast majority of individual market health insurance policies did not cover maternity care, and only a few insurers sell a separate maternity rider. That isn't that surprising when you consider, as we have heard, that only 14 States require maternity coverage and insurance companies are all about their bottom line. Defending the practice, one insurance spokesman called pregnancy "a matter of choice." To make matters worse, many insurance companies consider C-sections a "preexisting condition." One insurer simply rejects women who have had C-sections. This is unbelievable.

What is most shocking to me is that insurance companies can deny coverage to a woman for having been a victim of domestic violence. Domestic violence—something no woman plans for or wishes upon herself or anyone else—can be used to deny insurance coverage. Mr. President, this cannot be allowed to continue.

Without a doubt, the current private health insurance framework leaves too many women uncovered. For those who are covered, care often falls short. It is time to end the insurance discrimination that women face. I am pleased that both Senate bills which have come out of committee ban discrimination based on preexisting conditions, and I also applaud the Finance and the HELP Committees for putting an end to gender discrimination in pricing insurance and ensuring that women and men pay the same price for the same coverage.

We must come together to pass comprehensive health reform to help all the women of our Nation who are facing high insurance costs just because

they are women. I applaud the women on the HELP and the Finance Committees for the work they have done and reiterate that any legislation we consider must level the playing field and make health care accessible and affordable for all.

The PRESIDING OFFICER. The Senator's time has expired.

Mrs. SHAHEEN. I thank the Chair, and I yield the floor.

Ms. MIKULSKI. Mr. President, how much time is remaining in morning business?

The PRESIDING OFFICER. There is 5½ minutes remaining.

#### ORDER OF PROCEEDINGS

Ms. MIKULSKI. Mr. President, I ask unanimous consent that morning business be extended for another 15 minutes.

The PRESIDING OFFICER. Is there objection?

Ms. MIKULSKI. I withhold that unanimous consent request. I ask unanimous consent for 15 minutes and that it be equally divided. I ask unanimous consent that morning business on our side be extended for 15 minutes and that 15 minutes also be added to the Republican side.

The PRESIDING OFFICER. Without objection, it is so ordered.

Ms. MIKULSKI. Mr. President, I assure my colleagues on the other side that all time will be protected. I think there is a little confusion. I have not been briefed on the order. I can assure everyone's time agreement will be protected at the time they were assured they could speak.

I now yield 3 minutes to the Senator from New York.

The PRESIDING OFFICER. The Senator from New York.

Mrs. GILLIBRAND. Mr. President, I rise today to speak in support of health care reform on behalf of greater access to health care for women. I am very grateful to Senator MIKULSKI for her extraordinary leadership on this health care debate.

There are few Americans who are not hurt by the rising cost of health care. However, it is shocking to think that in today's America, over half of this country could be discriminated against in one of their most basic life needs. Women must shoulder the worst of the health care crisis, including outrageous discriminatory practices in care and coverage.

According to the data compiled by the National Women's Law Center, under the current system, a 25-year-old woman pays up to 45 percent more for the same or identical coverage.

Some of the most essential services required by women are not covered by many insurance plans, such as child-bearing, Pap smears, or mammograms. As a mother of two young children, I cannot imagine how awful it would be for a woman who does not have these basic needs covered. That is exactly

what millions of women and young mothers face because of the costs of childbirth.

A standard in-hospital delivery costs between \$5,000 and \$10,000 and much more if there are complications. In the current system, pregnant women can be turned down for health care coverage because insurance companies would rather evade those costs. Pregnancy should never be a preexisting condition. Such discrimination is unacceptable and is contrary to our core American values of equality and equal rights.

As we address the inadequacies of our current system, we must safeguard the women's health clinics that are an essential point of care for millions across this country. Their work is being politicized as part of this debate. Politicizing health care delivery endangers young women, putting them at risk for teen pregnancy, STDs, cervical, or breast cancer. Women's health clinics provide critical services to women every day.

In my own State, over 400,000 New Yorkers receive health care from Planned Parenthood each year. About 50 percent are working adults whose jobs do not include health benefits. Our strategy for reform must protect these critical services that clinics provide and expand upon their success.

The health care crisis is a life-and-death issue for so many Americans—one that disproportionately affects women in this country. We must reform our broken health care system and disparities among race and gender and make quality, affordable health care available for every single American.

Ms. MIKULSKI. Mr. President, I now yield 4 minutes to the Senator from Washington State.

Mrs. MURRAY. Mr. President, I thank my colleague, Senator MIKULSKI, and all of the women who are out on the floor today to talk about this critical issue because the rising cost of health insurance is hurting women and it is hurting our country.

For the millions of women across this country who open the mail each month to see their premiums rising dramatically, who cannot get preventive care, such as mammograms, because the copays are too much or they work part time or for a small business that does not provide insurance for them and their families, who cannot get covered for prenatal care or who are forced to stay in an abusive relationship because if they leave, their sick kids will lose their health care coverage, we are their voice.

I remember a similar debate such as this on this floor almost 16 years ago. Senators in this Chamber were debating legislation that would allow 35 million Americans to stay home to take care of a newborn or sick child, a parent or spouse, without fear of losing

their jobs. I came to the floor then and I told the story about a woman I knew whose child was sick at the time and who was not allowed to take time off from work to care for him as he was dying because she would lose her income and the health insurance that covered him.

At the time, as a new Member of the Senate, I spoke passionately about that. I told the story. As I was walking off the floor, one of our colleagues came up to me and said: You know, here in the Senate, we don't tell personal stories. I remember well what I said to him: I came here to tell the stories of the people I represent. They deserve a voice in the Senate.

Those stories impacted that debate, and we passed the family and medical leave law.

I am back today to tell the story of a woman whose child was sick. I want to tell every one about the story of this little boy, Marcelas Owens. I met him at a health care rally in Seattle. He was 10 years old and his two sisters who we see in this picture as well have been through a lot. Two years ago their mother Tiffany, who is not in this picture—that is his grandmother—lost her life because she was uninsured, 27 years old.

How did that happen? Tiffany was a single mom who felt strongly about working to support her family. She worked as an assistant manager at a fast food restaurant. She had health care coverage for her family. But in September of 2006, she got sick and missed some work. Her employer gave her an ultimatum: Make up the lost time or lose your job. Because she was so sick, she physically could not make up the time, and she did lose her job.

When she lost her job, she lost her health insurance. Without the coverage and care she needed, in June of 2007, Tiffany lost her life, and Marcelas and his sisters lost their mom.

Our health care system is broken. It is broken for moms such as Tiffany who work to provide for their families and do the right thing, and for men who lose their health care in this market we have today. It is broken for women we have heard about who have been denied coverage or charged more for preexisting conditions such as pregnancy or C sections or, tragically, domestic violence. It is broken for their families and for little boys such as Marcelas who will never get back what he lost.

Enough is enough. The time is now. The status quo that is being defended by the other side is not working. For women across this country, for their families, for our businesses, for our Nation's future strength that as mothers we care about so much, we have to get this right. We have to remember these stories. We need to be their voice. That is why we are here today and why we are going to keep fighting to make sure

that we reform the health care insurance system in this country finally and do it right.

Mr. President, I yield the floor.

Ms. MIKULSKI. Mr. President, as we wrap up our discussion on health insurance reform, I want to say as the senior Democratic woman that I am very proud of my colleagues today and how they have spoken up about the terrible practices of the insurance companies discriminating against women.

What you heard loudly and clearly today is that health care is a women's issue, health care reform is a must-do women's issue, and health insurance reform is a must-change women's issue because what we demonstrated is that when it comes to health insurance, we women pay more and get less.

We stand today on the Senate floor to say we want equal access and equal benefits for equal premiums. We women pay more and get less when we do pay our premiums. A 25-year-old woman is charged more than a 25-year-old man of equal or similar health status. And at age 40, it is often up to almost 50 percent. And when we do pay our benefits, when we are able to cross that barrier of getting health insurance, we get less coverage because insurance companies have certain punitive practices.

No. 1, we are often denied coverage because of something called a preexisting condition. These preexisting conditions are not catastrophic. We hear horror story after horror story that a woman who has had a baby by a C section which was medically mandated is then denied subsequent coverage because she had that. We have heard horror story after horror story in some States that victims of domestic violence are denied health insurance because they have been battered by a spouse and then they are battered by the insurance company.

This has to change. Coverage for women is often skimpy and spartan. I think people would find it shocking, good men would find it shocking that maternity care is often denied as a basic coverage or we have to pay more to get coverage for maternity care. Often on basic preventive care, such as mammograms and cervical screenings, we have to pay significant copays in order to get them.

So we the women are fighting for health care reform. We have very basic things we support. No. 1, we want to make sure that Medicare is strengthened and saved. We know that Medicare is a woman's issue and a family issue not only because there are more women on Medicare than there are men, but we know that with Medicare, often without it or if it is curtailed or shrunk, it would mean disaster.

Mr. President, you see that I am speaking from a wheelchair. It is because I had a fall coming out of 4 o'clock mass a couple of weeks ago.

When going through the ER, the OR, the rehab room, if I did not have Medicare and my health care benefit, I would be bankrupt today.

If health care is good enough for a U.S. Senator, it is good enough to make sure we have health care for U.S. citizens. So we want to save Medicare.

We also want to close that doughnut hole. The doughnut hole for prescription drugs has been very difficult to swallow. It is time to change that. We want to end the punitive insurance practices of discriminating on the basis of gender—so whether you have had a C section or whether you need mental health benefits after you have been raped, you can get your coverage.

Later on this weekend, there will be many in my State who will be "Racing for the Cure." I think it is great that we are looking for a cure for breast cancer, and we salute the Komen Foundation. But we not only want to do the research to find the cure, we want to make sure women have access to the preventive screening for breast cancer, ovarian cancer, and cervical cancer. We are fighting to make sure that access is provided for these important screenings and there are no barriers for payment.

In a nutshell, we, the women of the Senate, have fought for equal pay for equal work. Now we are fighting for equal benefits for equal premiums. We hope that when the insurance debate comes to the Senate, we will be able to elaborate. But today, we wanted to say: Let's get rid of the mob scene that is going around the debate on health care. Let's focus on the important human needs.

I now conclude my remarks, and I believe this concludes morning business. I yield the floor.

#### CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Morning business is closed.

#### COMMERCE, JUSTICE, SCIENCE, AND RELATED AGENCIES APPROPRIATIONS ACT, 2010

The PRESIDING OFFICER. Under the previous order, the Senate will resume consideration of H.R. 2847, which the clerk will report.

The legislative clerk read as follows:

A bill (H.R. 2847) making appropriations for the Departments of Commerce and Justice, and Science, and Related Agencies for the fiscal year ending September 30, 2010, and for other purposes.

Pending:

Vitter/Bennett amendment No. 2644, to provide that none of the funds made available in this act may be used for collection of census data that does not include a question regarding status of United States citizenship.

Johanns amendment No. 2393, prohibiting the use of funds to fund the Association of Community Organizations for Reform Now.

Bunning amendment No. 2653, to require that all legislative matters be available and fully scored by CBO 72 hours before consideration by any subcommittee or committee of the Senate or on the floor of the Senate.

Levin/Coburn amendment No. 2627, to ensure adequate resources for resolving thousands of offshore tax cases involving hidden accounts at offshore financial institutions.

Durbin modified amendment No. 2647, to require the Comptroller General to review and audit Federal funds received by ACORN.

The PRESIDING OFFICER. The Senator from Arizona.

AMENDMENT NO. 2626

Mr. MCCAIN. Mr. President, I send amendment No. 2626 to the desk, and I ask for its immediate consideration or, if necessary, set aside the pending business and call up amendment No. 2626.

The PRESIDING OFFICER. Is there objection to the pending amendment being set aside?

Without objection, it is so ordered.

The clerk will report the amendment.

The legislative clerk read as follows:

The Senator from Arizona [Mr. McCain] proposes an amendment numbered 2626.

Mr. MCCAIN. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(Purpose: To eliminate funding for Public Telecommunications Facilities, Planning and Construction)

On page 111, strike lines 4 through 15.

Mr. MCCAIN. Mr. President, I come to the floor with an amendment that would eliminate another unneeded and unwanted earmark which is suggested by the President of the United States.

Before I go into that, I ask unanimous consent to have printed in the RECORD an article from this morning's Washington Post entitled "Ex-Staffers Winning Defense Panel Pork, Study Finds."

There being no objection, the material was ordered to be printed in the RECORD, as follows:

EX-STAFFERS WINNING DEFENSE PANEL PORK, STUDY FINDS

(By Carol D. Leonnig)

In the coming year's military spending bill, members of a House panel continue to steer lucrative defense contracts to companies represented by their former staffers, who in turn steer generous campaign donations to those lawmakers, a new analysis has found.

The Center for Public Integrity found that 10 of the 16 members of the House subcommittee on defense appropriations obtained 30 earmarks in the bill worth \$103 million for contractors currently or recently employing former staffers who have become lobbyists. The analysis by the Washington Watchdog group found that earmarks still often hinge on a web of connections, despite at least three criminal investigations of the practice that became public in the past year. Those probes focus on a handful of defense contractors and a powerful lobbying firm that together won hundreds of millions of dollars in work from the House panel and are closely tied to its chairman, Rep. John P. Murtha (D-Pa.).

On Tuesday, the Senate approved a \$636 billion military spending bill for fiscal year 2010; the House approved its version in July. House and Senate members now will work in conference to resolve differences between their two bills.

The Center for Public Integrity's analysis found some shifts in earmarking patterns since its similar analysis of the 2008 defense bill. First, Rep. Peter J. Visclosky (D-Ind.), whose office records were subpoenaed by federal prosecutors in May, has markedly reduced his earmark requests and sought no work for private companies. Also, defense appropriators are generally steering more earmarks to nonprofits.

The Washington Post has documented more than \$400 million in defense earmarks that Murtha has directed in the past decade to research groups in his district, including the Penn State Electro-Optics Center and the John P. Murtha Institute for Homeland Security, which steered much of the funds to private contractors.

Since last fall, federal investigators have been probing the PMA Group, a now-shuttered lobbying firm whose clients had unusual success in winning earmarks from Murtha's subcommittee. Founder Paul Magliocchetti is a close friend of Murtha's and worked as a defense appropriations staffer when Murtha was a rank-and-file member of the committee.

PMA and its clients had been big donors to Murtha and his fellow subcommittee members in the past decade, according to a Center for Responsive Politics report, with Murtha receiving the most. Since 1998, workers at those firms and their family members provided \$2.4 million to Murtha—who helped insert more than \$100 million in defense-related earmarks into 2008 appropriations bills. Visclosky was second, collecting \$1.4 million, and Rep. James P. Moran, Jr. (D-Va.) was next, with \$997,000.

Mr. MCCAIN. Mr. President, I quote from the beginning of it, something that is well known but continues to be authenticated about the corruption of the process that we go through in appropriations. It says, "Ex-Staffers Winning Defense Panel Pork, Study Finds."

In the coming year's military spending bill, members of a House panel continue to steer lucrative defense contracts to companies represented by their former staffers, who in turn steer generous campaign donations to those lawmakers, a new analysis has found.

Not an astonishing finding but, again, authenticating of the corruption that goes on around here and the reason Americans are fed up.

The Center for Public Integrity found that 10 of the 16 members of the House subcommittee on defense appropriations obtained 30 earmarks in the bill worth \$103 million for contractors currently or recently employing former staffers who have become lobbyists. The analysis by the Washington watchdog group found that earmarks still often hinge on a web of connections, despite at least three criminal investigations of the practice that became public in the past year.

Mr. President, I bring forward another amendment—this will be my sixth—to eliminate a program and the appropriations for it that the President of the United States has asked for. I often quote from this document. This

will be the sixth one. This document is entitled, "Terminations, Reductions and Savings, Budget of the U.S. Government, Fiscal Year 2010."

Again, I would like to read from the introduction. This comes from the administration. It says:

The President's 2010 Budget seeks to usher in a new era of responsibility—an era in which we not only do what we must to save and create new jobs and lift our economy out of recession, but in which we also lay a new foundation for long-term growth and prosperity. Making long overdue investments and reforms in education so that every child can compete. . . .

It goes on and on. In the next paragraph:

Another central pillar of a sound economic foundation is restoring fiscal discipline. The administration came into office facing a budget deficit of \$1.3 trillion for this year alone—

By the way, I think that is up to \$1.4 trillion now—

and the cost of confronting the recession and financial crisis has been high. While these are extraordinary times that have demanded extraordinary responses, we cannot put our Nation on a course for long-term growth with uncontrollable deficits and debt.

It goes on to talk about the problems we face.

[T]he President has announced a procurement reform effort that will greatly reduce no-bid contracts and save \$40 billion, and at the Cabinet's first meeting, he directed agency heads to identify at least \$100 million in administrative savings.

Then it says:

This volume is the first report of that effort. In it, the Administration identifies programs that do not accomplish the goals set for them, do not do so efficiently, or do a job already done by another initiative—and recommends these programs for either termination or reduction.

We are talking about the administration speaking. We have identified 121 terminations, reductions, and other areas of savings that will save approximately \$17 billion next year alone.

It goes on to describe what they are:

Half of these savings for the next fiscal year come from defense programs and half come from non-defense. No matter their size, these cuts and reductions are all important to setting the right priorities with our spending, getting our budget deficit under control, and creating a Government that is as efficient and it is effective.

As I said at the beginning of my remarks, this will be the sixth amendment I have offered to support the President's request for reduction or termination of unneeded or unwanted programs. I am confident this will be the sixth time that the appropriators on both sides of the aisle will vote down the President's request—not my request, not my assumption, but that of the President of the United States and the Office of Management and Budget.

By the way, had the Senate agreed with my amendments—which they did not—and supported the call of the

President to end programs that do not accomplish the goals set for them, we would have saved the taxpayers \$87 million. In this day and age with multitrillion-dollar deficits, \$87 million is not a lot around this town, but it certainly is back in my home State of Arizona.

What this amendment does, and I quote again from the President's document, and I will read from it:

The Budget supports public broadcasting through increased appropriations to the Corporation for Public Broadcasting and eliminates the unnecessary Public Telecommunications Facilities Grant Program.

Let me make it clear. The administration is supporting increases in public broadcasting but is trying to eliminate the unnecessary Public Telecommunications Facilities Grant Program in the Department of Commerce.

PTFP funding equals less than 4 percent of the Corporation for Public Broadcasting funding and has in recent years supported the transition to digital television broadcasts which will be completed in fiscal year 2009.

The administration goes on to say:

Since 2000, most [of these] awards have supported public television station's conversion to digital broadcasting. Digital broadcasting facilities mandated by the Federal Communications Commission will be completed in fiscal year 2009, and there is no further need for this program.

Again, it goes on to say:

The Administration proposes to support public broadcasters through CPB, and the Budget includes \$61 million for the Corporation for Public Broadcasting in 2010, which is in addition to the \$420 million enacted advance appropriation, for total proposed 2010 resources of \$481 million, nearly \$20 million above 2009. The Budget also includes an advance appropriation request for the Corporation for Public Broadcasting in 2012 of \$440 million to support public broadcasters. The Corporation for Public Broadcasting funds can support the same types of capital projects as PTFP funding as well as stations' operating and programming costs. . . .

The National Telecommunications and Information Administration, the Commerce Department bureau that has administered this program, was provided \$4.7 billion in the American Recovery and Reinvestment Act to implement the new Broadband Technology Opportunities Program. Terminating this program will enable the NTIA to focus its efforts on BTOP, [the Broadband Technology Opportunities Program] a major challenge for this small Commerce Department bureau, and one which will aid the nation's economic recovery and help promote long-term competitiveness.

These are not my words. These are the words of the President of the United States. We are talking about \$20 million savings by eliminating this program.

One of the arguments we are going to hear, and one of the great sacred cows around here, is the Corporation for Public Broadcasting. This does not affect the increase in funds for public broadcasting. It simply terminates a program that the President of the United States believes is not necessary

because its mission has been completed.

I imagine we will lose again with appropriators on both sides of the aisle voting not to eliminate a program—again, the sixth amendment I have had trying to implement the recommendations of the President of the United States and the Office of Management and Budget, and while we are staring at a \$1.4 trillion deficit for this year and a \$9 trillion debt for the next 10 years. Those estimates have been completely underestimated.

I tell the managers, the American people are mad. They are very angry. There is going to be another tea party in my home State this weekend. You know we are mad because we are stealing their children's money; 43 cents out of every dollar we are spending today is on borrowed money. Who is going to pay it back? They know they are. They know our kids and grandkids are. We cannot even eliminate a program or programs the President of the United States requests that we terminate. There will come, and it will come fairly soon, a day of reckoning.

The reason I added this article from the Washington Post this morning is because, I say to my friends and colleagues, there is corruption, and there is corruption in the earmarking and porkbarrel process that goes on. The American people are tired of it. I urge my colleagues to adopt the amendment.

I ask for the yeas and nays.

THE PRESIDING OFFICER. Is there a sufficient second.

There appears to be a sufficient second. The yeas and nays are ordered.

MR. MCCAIN. Mr. President, I yield the floor.

MS. MIKULSKI. I suggest the absence of a quorum.

THE PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

MS. MIKULSKI. Mr. President, I ask unanimous consent the order for the quorum call be rescinded.

THE PRESIDING OFFICER. Without objection, it is so ordered.

MS. MIKULSKI. Mr. President, I strongly oppose the amendment of the Senator from Arizona to strike the funding in the bill for the Department of Commerce Public Telecommunications Facilities. His amendment would eliminate from the bill \$20 million. That \$20 million goes for competitive grants for public radio and TV stations around the Nation to upgrade their infrastructure and technology. His amendment would terminate the grant program in fiscal year 2010.

He argues that President Obama's budget proposed to eliminate the program, so Congress should too. We are a separate and coequal branch of government. In this case, the CJS Committee respectfully disagrees with the Presi-

dent's budget. We know our President inherited a terrible mess. We know the previous administration ran up debts and deficits and now, as we try to clean it out, our President is looking for modest cuts to the budget. But here, with public telecommunications facilities, this is exactly what we need during these troubled economic times to provide access to quality TV to ordinary people who might not be able to afford cable TV, satellite TV, or dish TV.

I am ready to dish on the McCain amendment. We need jobs in this country, and we need to let people know their government is on their side and that they can have access to public television—public television.

Sure it is a public option. We like the public option on TV.

But we know for our local stations, where donations are down and their revenues starved, you cannot put up the necessary antenna and other technology by doing it on bake sales and dialing for dollars. They need help from their government. This is what this does: A modest \$20 million that will help replace equipment such as antennas, power, and telephone hookups, generators and other kinds of things.

It will improve technology to keep up with changing requirements. Grants are competitive. There are no porkbarrel projects in this, no earmarks. The grants are competitive. The Commerce Department selects what are the ones that meet the compelling needs in communities. By the way, the local community has to provide 25 percent of local cost share so it is not a free ride.

The President's budget and the amendment sponsor argue that this technology program is no longer needed because all radio, public radio and TV stations are already going from analog to digital, so we do not need it.

This argument is flawed for two reasons. First, digital conversion has never been nor ever will be the sole purpose of the Public Telecommunications Facilities Program. The Public Telecommunications Facilities Program was intended to help public radio and TV upgrade their infrastructure and buy new equipment. Digital conversion equipment is eligible, but that is not all.

I am saying this because not only do we provide public TV. It is great to have the Corporation for Public Broadcasting. That is about content. About content. But you need to have an infrastructure to deliver the content. In many of our communities, the infrastructure is worn. It is dated. It is 20, 22 years old. So they are looking to replace it. Guess what. When they do replace it, it creates jobs, jobs, jobs in those local communities. It takes talented men and women to put that antenna or that tower up, to install that very important new digital equipment.

For \$20 million, we can broadcast to people, we can broadcast quality, and we have people going to work putting up and replacing dated equipment. Last year this program received almost \$50 million in applications but had only \$20 million to award. This funding is important in rural and underserved areas.

Last year, the technology program received 57 applications from Native American communities alone. The President and the Senator from Arizona argue it is not needed because the Corporation for Public Broadcasting will pick up the slack. I will repeat: I love Orszag, but maybe he did not read the fine print, which is the Corporation is for ongoing operations and programming. It does not provide funding for new infrastructure.

It is about infrastructure; just like we want to have money to build our highways, we need to have super-information highways. This helps the public facilities be able to do it. The local communities depend on the Commerce Department to do this.

The program has built the Public Broadcasting System. It ensures that the American public has access across the Nation. This is not Senator MIKULSKI talking because she is the chair of the CJS and she wants to hold onto every program. I got a letter, as did my ranking member, from 21 Members of the Senate, including the chairman of the Commerce Committee, asking us to put \$44 million into the Appropriations Committee to fund this. We could only afford to do \$20 million, the same as last year.

Why? Let me read from their letter: For some four decades, PTFP has served as a critical infrastructure program for building public broadcasting systems of radio and TV stations that reach 95 percent of the American people.

What does this do? It maintains infrastructure for transmitters, translators for the deaf, power, and antennas.

It has been drastically underfunded in the past several years since suffering an 18-percent cut in 2002 and 2003. Over the years, PTFP has foregone \$270 million in Federal funds over the authorized level during the last 8 years.

I am not going to sound like an accountant here. I want to sound like I have accountability to my communities. I want them to have access to public TV and public radio and the technology to transmit it. "PTFP's preservation role has always been most important," says the letter from the 20 Senators, "because it is the only source of Federal emergency funds for public radio and television in the event of an emergency."

After Katrina and Rita, several stations in the gulf region were awarded these emergency grants so they could start rebroadcasting. Without those funds, many communities would have

been vulnerable to the compounded effects of losing local news and the kinds of programs they needed as they were struggling to rebuild.

On average, according to the letter from my 21 colleagues, including the chairman of the Commerce Committee, stations leverage these PTF funds by an additional 50 percent. So this is a Federal-local partnership.

PTF funding is about providing access to quality TV. In my own community, it has meant access to educational programs. It has meant a way to link up to community colleges and the way they have done distance learning. Many of the early children's programs, many of those early children's programs often help get children learning ready. Again, yes, that is about content. But content cannot be delivered without infrastructure.

During several weeks this summer as I lived in a rehabilitation facility getting physical therapy, many of my constituents said: Well, is it not great to watch public TV? We can see what is going on in the world. They loved the MacNeil/Lehrer show, even though it is not called that anymore, to get news about what was going on in the country.

They loved hearing public debate in a civil way, thrilled and enjoyed "Mystery Theater," and at the same time were excited that their grandchildren were able to get learning ready, either at the preschool level or the work it was doing in the community college.

There are a lot of things government does that is unpopular with people. But one of the things it does that is very popular with the American people is public TV and public radio. We have to maintain quality content. We have to maintain quality infrastructure.

Because of that, I urge the defeat of the McCain amendment eliminating \$20 million and essentially zapping those much-needed antenna and monitoring and transmission facilities we need. There are other things we can zap. Let's not zap public TV and public radio.

I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Ms. MIKULSKI. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Ms. MIKULSKI. Mr. President, I ask unanimous consent that at 12:15 p.m. today the Senate proceed to vote in relation to the McCain amendment No. 2626; with no amendment in order to the amendment prior to the vote; further that prior to the vote, there be 2 minutes of debate equally divided and controlled in the usual form.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### HEALTH CARE

The PRESIDING OFFICER. The Senator from North Dakota.

Mr. CONRAD. Mr. President, I have come to the floor very briefly to talk about the Congressional Budget Office's score of the health care reform proposal that is before the Senate Finance Committee.

I understand that earlier today there were members on the other side who were questioning whether the Finance Committee's proposal is paid for and whether it reduces the deficit and whether it bends the cost curve of health care in the right way.

Let me say that the Congressional Budget Office has now issued their determination on all those issues. Their conclusions are very clear. The Congressional Budget Office has said—and I will put on the chart stand a page from their report. It shows very clearly, over the 10 years of the bill, from 2010 to 2019, that the deficit will be reduced by \$81 billion if the Finance Committee proposal were to become law.

With respect to the question that apparently has been raised by some, as to whether this bill is paid for, the Congressional Budget Office has answered clearly and unequivocally. They have said the bill is not only paid for over the 10 years, but it actually reduces the deficit by \$81 billion.

Second, on the longer term question of bending the cost curve and whether this proposal bends the cost curve in the right way, the Congressional Budget Office has also been clear and unequivocal. Here is what they said in their report of October 7, just yesterday:

In subsequent years, beyond 2019, the collective effect of the Finance plan would probably be continued reductions in Federal budget deficits.

... CBO expects that the proposal, if enacted, would reduce federal budget deficits over the ensuing decade relative to those projected under current law—with a total effect during that decade that is in the broad range of between one-quarter and one-half percent of gross domestic product.

What does that mean? What CBO is saying is in the first 10 years, the Finance Committee plan would reduce the deficit by \$81 billion. In the second decade, they are saying it would reduce the deficit by one-quarter to one-half percent of gross domestic product. Gross domestic product over that decade, the second decade, is estimated to be cumulatively \$260 trillion. That would be the gross domestic product of the United States from 2020 on through the next 10 years. One-quarter percent of \$260 trillion is \$650 billion of deficit reduction in the second 10-year period. That would be one-quarter of 1 percent of GDP. One-half percent of GDP over that second 10-year period would be \$1.3 trillion.

Just to be clear, CBO has told us in their report of yesterday—and the Congressional Budget Office is the non-partisan scorekeeper, the one we all look to for objective facts—that the Finance Committee proposal reduces the deficit by \$81 billion over the next 10 years and in the second 10 years would reduce the deficit by one-quarter to one-half percent of gross domestic product. No one can be certain what the gross domestic product will be in the second 10 years. Current projections are that it will be \$260 trillion. So one-quarter to one-half percent of that second decade would be a reduction in the deficit from what would otherwise occur of \$650 billion to \$1.3 trillion, bending the cost curve in the right way.

I might add parenthetically, the Finance Committee plan is the only plan that has been produced that the Congressional Budget Office says reduces the deficit in the first 10 years and bends the cost curve in the right way, has further deficit reduction, in the second 10 years.

I am a little disappointed when I hear some of my colleagues coming to the floor and suggesting that this really isn't paid for. We have a way of determining what scores are around here. We can all make up our own facts or we can rely on the Congressional Budget Office, which is the objective scorekeeper, nonpartisan. I have great respect for them even though I have had strenuous disagreements with them at times about how they score things. Indeed, I had strong disagreements with them on how they scored some of these proposals. But there has to be an arbitrator here, somebody we look to, someone with credibility, and the Congressional Budget Office does.

For Members to come to the floor and suggest this isn't paid for flies in the face of the facts before us from the CBO. The Congressional Budget Office reported yesterday clearly and unequivocally that the Finance Committee plan is paid for; that it, in fact, reduces the deficit by \$81 billion over the next 10 years; that it has further deficit reduction in the second decade of one-quarter to one-half percent of GDP. As I have said, in the second 10 years the forecast is that gross domestic product over that 10-year period will approach \$260 trillion. One-quarter to one-half percent of that amount would be \$650 billion to \$1.3 trillion of additional deficit reduction in the second decade. Those are the unvarnished facts. I hope that during the debate, which will be tough enough, which will be contentious enough, we will not resort to trying to mislead people as to the objective facts before us.

It has been said by a previous President that facts are stubborn things. Indeed, they are. One of the stubborn facts is, we are on a course that is utterly unsustainable with respect to

health care. Today, we are spending \$1 of every \$6 in this economy on health care. Seventeen percent of the gross domestic product is going to health care. The CBO long-term budget outlook says that in the next period from 2010 to 2050, we will go to spending 38 percent of our gross domestic product on health care unless we do something. That would be more than \$1 of every \$3 in this economy going to health care; in fact, close to every \$1 of every \$2.50 going to health care. That is an unsustainable course.

The question before this body and before the Congress and before this President will be, Do we act or do we stick with the status quo? I suggest sticking with the status quo is utterly indefensible. There is no way to suggest that sticking with the status quo is going to succeed for America's families, businesses, or the government itself.

The hard reality is, Medicare and Medicaid spending as a percentage of GDP is going up dramatically during this forecast period. It has been happening. This chart shows clearly, between 1980 and 2009, the share of our gross domestic product going to Medicare and Medicaid has been rising inexorably. We know that trend will continue unless we do something about it. That means we have to act. That means we have to take responsible steps to rein in the skyrocketing cost of health care. That is critically important to families, businesses, and their competitive position, and it is absolutely essential to the Federal Government. The trustees of Medicare have told us clearly: Medicare is going to go broke in 8 years unless we act. The Medicare trust fund has already gone cash-negative. The Social Security trust fund has already gone cash-negative. The time and the need for action is about as clear as it can possibly be.

I appreciate the opportunity to respond to what some colleagues suggested this morning. It is clear—the Congressional Budget Office has told us—that the Finance Committee proposal is not only paid for, it actually reduces the deficit both over the next 10 years and over the next decade after that 10-year period as well. That is a significant accomplishment by the Finance Committee chairman who laid down this mark. We will see where the votes lie on Tuesday.

I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. NELSON of Florida. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NELSON of Florida. Mr. President, I wish to speak on behalf of those of us who are concerned about NASA

and express my personal appreciation to the Senator from Maryland, chairman of the appropriations subcommittee that handles NASA, for the tremendous work she has done in appropriating money to keep NASA going. If I may, I want to go beyond the Senator's appropriation. She has taken the very difficult task of a budget that is quite lean, put out by the President, and has come up with the best she can come up with in trying to sustain the Nation's human space program with those resources.

What we know is, over the course of the last several years, the Office of Management and Budget and the White House have not given adequate resources to those of us in this Chamber who want a vigorous human space program. We simply, over the last several years, have not been able to get the resources we need for NASA to do everything it has been asked to do, with the result that NASA is now at a crossroads.

I commend Senator MIKULSKI for her work in how she has put together this budget. We find ourselves now with the opportunity beyond this specific budget to strengthen and advance our leadership in the world or to stand by and allow what has become a hallmark of U.S. leadership to slip by the wayside.

Last month, the blue ribbon panel the President appointed, called the Augustine Commission, released a summary of the findings from the final report on the Nation's space program. That report has not come out in detail. We await its release. In part, what it says is, the U.S. human space flight program that has made America a world leader in science and technology "appears to be on an unsustainable trajectory."

Specifically, the report will say:

[O]ur space program is being asked to pursue goals without the appropriately allocated resources.

So this country stands at a crossroads for NASA with a stark choice before us: We can continue on the path we are on—underfunding and underallocating our space program—or we can choose to act. We can choose to act by ensuring that the appropriate resources are allocated to meet the goals laid out before us.

The Augustine Commission was abundantly clear. It said that—while the current path we are on is unsustainable—"meaningful human exploration is possible under a less constrained budget" with an additional \$3 billion a year. That is \$30 billion additional over a 10-year period. These are not my words. These are the Augustine Commission's words.

Even though we face uncertain economic times—certainly in a recession—the challenge of finding that additional money is one we cannot afford to ignore.

I wish to add my voice to others from this Chamber in asking the President

to divert \$3 billion to NASA from the unspent portion of the \$787 billion in the economic stimulus recovery money. The stimulus bill—that we passed by a one-vote margin back earlier this year—was to get this economy moving again, to stimulate, to electric shock therapy the economy back to life by getting dollars out, turned over, and jobs created.

That is a very good source for this money, for NASA to be able to continue on the road of what almost every American wishes for—to continue to explore the unknown.

We have identified other possible revenue sources for future years. But no matter how much we find by scraping the bottom of the barrel, it is still going to come down to one thing: It is going to be the President's decision.

If we remember, similar to President John Kennedy before him, a President has to decide and has to commit the resources. If this President will do it, it will commit the space program that will keep America a global leader in science and technology.

Why do I say that? Think of all the effects of the spinoffs that came out of the Apollo Program when President Kennedy said: We are going to the Moon and back, and that was within a 9-year period.

Currently, our space program is funded at less than 1 percent of the total Federal budget. Yet our space program has always paid back dividends—both tangible and intangible—which is vastly greater than the initial investment.

The additional funding for NASA, I have indicated, will ensure the United States remains at the very top for the peaceful use of technology for the betterment of humankind. Of singular importance, this commitment will help us to inspire the next generation of explorers and the next generation of scientists and technologists and engineers and mathematicians and educators. It is this payoff which is Apollo's greatest and lasting legacy.

We have a similar opportunity right now in front of us. You think about that generation of kids who got inspired when President Kennedy said we were going to do what was almost thought to be the impossible and how many of those kids went into math and science and technology and engineering. Look what that generation brought to us in the global marketplace.

The Augustine Commission notes that the time may finally be upon us when commercial space companies can begin to carry some of the burden of the access to low-Earth orbit. Many of these companies are already developing capabilities to give us a commercial resupply of the International Space Station. Are they going to be successful? We certainly hope so. Are they going to be timely? We do not know. These commercial ventures are already behind

the timeline. We certainly hope they are going to be timely.

This ability, according to the Augustine Commission, is critical to ensuring our ability to operate the station beyond 2016. Almost everybody unanimously agrees we should be planning to keep the International Space Station, of which we are still continuing to complete its construction and equipping, to keep that going at least until 2020 and to maximize the return of what has become a substantial \$100 billion investment.

Those commercial endeavors serve another function. They also create new industries and, with that, new jobs for Americans. But we are still going to have to have the question of: What is NASA's new mission, new architecture? How are we going to fund it? What are we going to do with the workforce in the meantime that is going to have severe disruptions?

This is what the President of the United States is going to have to decide as soon as the Augustine Commission report is final and is published.

The International Space Station has proven to us that many nations can work together on enormous endeavors in a peaceful fashion. The station—just now being completed—is at its dawn, and its many economic, scientific, and social payoffs from our investment are still to be realized. But the international partnerships formed during the design, the construction, and the ongoing operation of the station have proven something. It has proven that the world community looks to the United States for leadership in space.

Many of the world's nations are patiently waiting to see which direction our country chooses, which direction this country chooses as a result of our President's decision. At the same time, these many nations are prepared to follow the U.S. lead in the form of additional commitments and resources in space. To turn our backs on space at this moment would have negative effects that would reverberate around the world.

It is interesting that last night President Obama hosted several young people at the White House for a star-gazing party. Oh, that must have been very exciting for those young people. They had the opportunity to view, in vivid detail, craters on the Moon, the rings of Saturn, the colors of the planet Jupiter, and the belt of the Milky Way. For many of those kids, it was the first time they ever even thought of viewing those things.

The wonderment displayed by those children—and many of those adults there as well—proved, once again, that the space program inspires. If all goes well, tomorrow morning America will successfully plow a rocket into the surface of the Moon to help determine conclusively whether large quantities of water can be found just beneath the

lunar surface. Imagine, this mission may reveal new knowledge about a source of water for astronauts in the future and fuel for their rockets to explore the cosmos.

A suitably funded space program is the best catalyzing element to gather and organize the energies and abilities of this Nation. In return, this program will pay many dividends, perhaps the most important of which is to inspire, encourage, and motivate the next generation of Americans.

I ask my colleagues to join me in supporting Senator MIKULSKI on her appropriations bill but then to join me in supporting increased funding for NASA and this Nation's space program.

You can tell I am quite intense about this subject. I have had the privilege of being a beneficiary of our Nation's space program. I have seen us achieve extraordinary things. It is a part of our character as a people. We are, by nature, as Americans, explorers and adventurers, and I do not want us to ever give that up. That is why I make this plea to the Congress of the United States and to the President of the United States for NASA's funding.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. BURRIS. Mr. President, I ask unanimous consent to speak as in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### HEALTH CARE REFORM

Mr. BURRIS. Mr. President, many of my colleagues have taken to the floor in recent weeks to discuss the details of health care reform and, in particular, the clear need for a public option.

We have heard from distinguished Senators on both sides of the aisle. For the most part, this has been a healthy debate. But it is a debate that has been going on for almost a century. Over the years, the problem has grown. Care has become more and more expensive.

Today, \$1 out of every \$6 spent in this country goes to pay for health care. Insurance company profits are up. Health outcomes are down. After a century of thoughtful debate, I believe the way forward is clear—very clear. The only way to achieve meaningful health care reform and bring costs down is through a public option that creates real competition in the system.

Let me be clear. I will not vote for any health care bill that does not include a public option. That is because the stakes are too high to settle for anything less.

Every day, more people get sick and die because they cannot get the quality care they need; 45,000 Americans died last year because they did not have adequate coverage. That is one death every 12 minutes and 45,000 more will die this year and next year and every year until we pass meaningful health care reform.

Some of my colleagues think we are moving too fast, and they say we should wait. I say the American people have been waiting long enough. We must not wait another moment.

A public option would restore choice and accountability to the insurance market. It would help bring down costs and make quality care affordable for every single American.

If you cannot afford private insurance under the current system, you will have the opportunity to buy a low-cost public plan or a private plan that is guaranteed to be affordable based on your income level.

If you have private insurance but it is too expensive or they do not treat you right, you will have the opportunity to switch to an affordable and high-quality public plan. No American has ever experienced such freedom of choice when it comes to health coverage. That is because consolidation in the insurance market has left a few corporations with control of the whole industry. In Illinois, two companies dominate 96 percent of the market. They can charge excessively high premiums, drop your coverage for any reason or no reason at all, and cap the amount they will spend on treatment in any given year. That is why their profits are breaking records and growing four times faster than wages, while the rest of us suffer the effects of a terrible recession.

But we can rein in these costs. If we pass insurance reforms that include a public option, these corporations would have to compete for your business. Premiums would come down. No one would be able to drop your coverage because of a preexisting condition. Companies would not be able to drop you in the event of a catastrophic illness, and they would not be able to place a cap on the benefits you can receive during your lifetime. Honesty and fair play would be restored to the system.

I don't understand how my colleagues on the other side of the aisle can oppose such a plan. I don't understand how they can oppose competition in the market, which I have always regarded as a quintessential American idea. Certainly there is nothing wrong with making a profit. Insurance companies play an important role in our system, and I support that role. But between 2000 and 2007, the profits for the top 10 insurance companies grew at an average of 428 percent. Let me repeat that. Between 2000 and 2007, the profits of the top 10 insurance companies grew by an average of 428 percent. This is not only unreasonable, it is breaking American businesses and families.

Many analysts agree that health care costs have contributed to the severity of the current economic crisis, and it is easy to see why. Competition and appropriate regulations will rein in these excessive profits and put pressure on the companies to improve coverage or risk losing customers.

Reform with a public option will restore choice to the insurance industry. Millions of Americans will be able to get coverage for the very first time. And far from driving companies out of business, health reform will allow an estimated 1 million to 3 million new customers to purchase coverage from private insurers. It will enhance their business.

Some of my colleagues have expressed concerns about the cost of a public plan, but if they look at the way the program will function, they will see there is no reason for concern. As in any business, a not-for-profit public insurance option would require some initial capital to get it off the ground, but afterwards it would rely on the premiums it collects to remain self-sufficient. The current system is a strain on the American taxpayers. A public option will not be.

There will be no government takeover. I will repeat that. There is no such thing as a government takeover. There will be no death panels, no rationing, and no red tape between you and your doctor. The public option would complement private insurance providers, not drive them out of business.

It is time to take decisive action. This Senate has been debating health care reform for almost a century, while outside this Chamber ordinary Americans suffer more and more under a broken system. I believe we have been talking about it enough. Our way forward is clear. Now is the time for us to act. That is why I will not compromise on the public option.

I urge my colleagues to join with me to stand on the side of the American people and demand nothing less than the real reform a public option would provide. We must not wait another moment.

Mr. President, I thank you, and I yield the floor.

The PRESIDING OFFICER. The Senator from Maryland.

Ms. MIKULSKI. Mr. President, we will shortly be voting on the McCain amendment. We look forward to closing that debate. But before we do, I wish to comment that we are going to dispose of as many amendments as we can today and we are also going to arrive at a finite list of amendments. So for those Senators who do have amendments on both sides of the aisle, Senator SHELBY and I ask our colleagues to come and offer them so we can dispose of them, as we did with the Senator from Arizona. He offered his amendment, we had a good debate, and we are going to vote on it. So please, colleagues, if you have amendments, come to the Senate floor and offer them.

Second, if you have amendments that you wish to file, this is the day to file them. We are trying very hard to see if we can finish today, but that seems to

be a bit of an exuberant wish on my part and on the part of Senator SHELBY. But if we can't finish today, we would at least like to get a sense of the amendments colleagues wish to bring over today. Then when we get to the Columbus Day weekend, we can work to either come to an agreement to take them, or a way of disposing of them when we come back from commemorating when America was discovered by Columbus.

Again, I ask my colleagues to come forward and either offer amendments or file amendments.

Mr. President, I note the absence of a quorum.

The PRESIDING OFFICER (Mr. BURRIS). The clerk will call the roll.

The bill clerk proceeded to call the roll.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. BEGICH. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2646

Mr. BEGICH. Mr. President, I ask unanimous consent that the pending amendment be set aside and I call up amendment No. 2646.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report.

The bill clerk read as follows:

The Senator from Alaska [Mr. BEGICH], for himself and Ms. MURKOWSKI, proposes an amendment numbered 2646.

Mr. BEGICH. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(Purpose: To allow tribes located inside of certain boroughs in Alaska to receive Federal funds for their activities)

At the appropriate place, insert the following:

SEC. \_\_\_\_\_. Section 112(a)(1) of the Consolidated Appropriations Act, 2004 (Public Law 108-199; 118 Stat. 62) is repealed.

Mr. BEGICH. Mr. President, at a later time I will have a floor statement.

Mr. President, I note the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. MCCAIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2626

There will now be 2 minutes of debate, equally divided, prior to a vote in relationship to amendment No. 2626, offered by the Senator from Arizona, Mr. MCCAIN.

The Senator from Arizona is recognized.

Mr. McCAIN. Mr. President, this is another attempt to agree with the President's request to cut some unneeded spending. This time, it is only \$20 million, which around here is obviously chicken feed. But the President has requested that this \$20 million be cut. It is not needed. The program it was funded for is complete.

I ask my colleagues to vote for the amendment.

I yield the floor.

The PRESIDING OFFICER. The Senator from Maryland is recognized.

Ms. MIKULSKI. Mr. President, as the manager of the bill, I oppose the McCain amendment. This \$20 million is competitive funding that helps local public TV and radio stations with equipment, things such as antennas, generators, fire-suppression equipment, and transmission. It improves technology. It enables our very important public TV stations to modernize.

This is a competitive grant program—no earmarks but big footprints. It does require local cost sharing of 25 percent. It also creates jobs in local communities by actually installing this equipment, while we move out the very wonderful content of public TV and public radio.

We, too, are stewards of the purse. The Commerce Department—

Mr. McCAIN. Mr. President, we have to have the regular order at some time.

The PRESIDING OFFICER. The Senator's time has expired.

Ms. MIKULSKI. Mr. President, I do like to know that. I like to follow the regular order. If the Chair would have notified me, I would have stopped sooner.

I call for the vote.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The clerk will call the roll.

The legislative clerk called the roll.

Mr. DURBIN. I announce that the Senator from West Virginia (Mr. BYRD) and the Senator from Massachusetts (Mr. KERRY) are necessarily absent.

Mr. KYL. The following Senator is necessarily absent: the Senator from Ohio (Mr. VOINOVICH).

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 33, nays 64, as follows:

[Rollcall Vote No. 317 Leg.]

#### YEAS—33

Alexander	Crapo	Johanns
Barrasso	DeMint	Kyl
Bayh	Ensign	LeMieux
Bennett	Enzi	Lugar
Brownback	Graham	McCain
Bunning	Grassley	McConnell
Chambliss	Gregg	Risch
Coburn	Hatch	Roberts
Cochran	Hutchison	Sessions
Corker	Inhofe	Thune
Cornyn	Isakson	Wicker

#### NAYS—64

Akaka	Gillibrand	Nelson (FL)
Baucus	Hagan	Pryor
Begich	Harkin	Reed
Bennet	Inouye	Reid
Bingaman	Johnson	Rockefeller
Bond	Kaufman	Sanders
Boxer	Kirk	Schumer
Brown	Klobuchar	Shaheen
Burr	Kohl	Shelby
Burr	Landrieu	Snowe
Cantwell	Lautenberg	Specter
Cardin	Leahy	Stabenow
Carper	Levin	Tester
Casey	Lieberman	Udall (CO)
Collins	Lincoln	Udall (NM)

Dodd	Menendez	Warner
Dorgan	Merkley	Webb
Durbin	Mikulski	Whitehouse
Feingold	Murkowski	Wyden
Feinstein	Murray	
Franken	Nelson (NE)	

#### NOT VOTING—3

Byrd	Kerry	Voinovich
------	-------	-----------

The amendment (No. 2626) was rejected.

The PRESIDING OFFICER. The Senator from Maryland.

#### AMENDMENT NO. 2653

Ms. MIKULSKI. Mr. President, unless the distinguished Democratic leader is ready to speak, I ask unanimous consent that the Bunning amendment, No. 2653, be the pending business.

The PRESIDING OFFICER. Without objection, the amendment is the pending.

Ms. MIKULSKI. Mr. President, I also make a point of order against the amendment that it violates rule XVI, paragraph 4—legislation on an appropriations bill.

The PRESIDING OFFICER. The point of order is sustained and the amendment falls.

Ms. MIKULSKI. Thank you, Mr. President.

The PRESIDING OFFICER. The Senator from Kentucky.

Mr. BUNNING. Mr. President, I am very disappointed the majority has chosen to block full consideration of my amendment. What I am trying to accomplish is simply more transparency in the Senate. This would be accomplished by requiring a Congressional Budget Office score and posting of legislation 72 hours before consideration by committees or the full Senate.

As a recent poll has shown, 83 percent of the American people support a waiting period before Congress votes on bills. My amendment would provide this to the American people. I think it is outrageous the other side is using a procedural tactic to block consideration of this amendment on this bill.

Be assured I will be back to bring up this issue again and get a fair and full consideration of it by the Senate.

I thank the Chair.

The PRESIDING OFFICER. The Senator from Nevada.

#### AMENDMENT NO. 2648, AS MODIFIED

Mr. ENSIGN. Mr. President, I call up amendment No. 2648, and I send a modification to the desk.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered. The clerk will report.

The legislative clerk read as follows: The Senator from Nevada [Mr. ENSIGN] proposes an amendment numbered 2648, as modified.

Mr. ENSIGN. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(Purpose: To provide additional funds for the State Criminal Alien Assistance Program by reducing corporate welfare programs)

At the appropriate place insert:

STATE CRIMINAL ALIEN ASSISTANCE PROGRAM  
For an additional amount for the State Criminal Alien Assistance Program \$172,000,000 to remain available until expended.

OFFSET.—All amounts appropriated under this Act, except for amounts appropriated for SCAAP, shall be reduced on a pro rata basis by the amount necessary to reduce the total amount appropriated under this Act, except for amounts appropriated for SCAAP, under the heading "OFFICE OF JUSTICE PROGRAMS" under this title, by \$172,000,000.

Mr. ENSIGN. Mr. President, I rise today to propose an amendment adding \$172 million for the State Criminal Alien Assistance Program and offset it with corporate welfare funding currently in the bill.

The State Criminal Alien Assistance Program, known as SCAAP, provides Federal payments to States and localities that incur correctional officer salary costs for incarcerating undocumented criminal aliens with at least one felony or two misdemeanor convictions for violations of State or local law and are incarcerated for at least four consecutive days during the reporting period.

This program also reimburses State, county, parish, tribal, or other municipal governments for the costs associated with the prosecution of criminal cases declined by local U.S. Attorney's Offices.

While we have made strides in securing our border, illegal immigration remains a significant problem, and the Federal Government should bear the additional burden placed on States and local governments. While this amendment does not fix our problems with illegal immigration, it does help local communities address costs associated with the incarceration of illegal immigrants who continually and repeatedly violate the laws of our country.

This will bring this program's funding up to the 2009 level of \$400 million. This increase will match the level the other Chamber, the House of Representatives, accepted by a nearly unanimous vote of 405 to 1. With increased funding for SCAAP, we can keep more repeat offenders off our streets and reduce some of the catch-and-release practices instituted by many communities that just don't have the resources to keep these criminals where they belong, which is behind bars.

So I urge my colleagues to support this amendment to ensure that critical funds reach our State, county, parish, tribal, and municipal governments to help battle the problems associated with illegal immigration and to keep lawbreaking illegal immigrants off our streets.

Mr. President, I ask unanimous consent to have printed in the *RECORD* an article from the *Las Vegas Review-Journal* relating to this matter.

There being no objection, the material was ordered to be printed in the *RECORD*, as follows:

**LAS VEGAS POLICE REFER 2,000 INMATES TO IMMIGRATION OFFICIALS**

(By Antonio Planas and Lynnette Curtis)

The Metropolitan Police Department forwarded the names of nearly 2,000 inmates to federal immigration officials during the first 10 months of a controversial partnership that allows specially trained corrections officers to start deportation proceedings against immigration violators.

The agreement between the Police Department and U.S. Immigration and Customs Enforcement officially began Nov. 15 and is limited to the Clark County Detention Center.

Nearly 10,000 county jail inmates through Sept. 19 were identified as being born outside the country or their identities were in question, said officer Jacinto Rivera, a Las Vegas police spokesman.

Police sent the names of 1,849 inmates who were determined to be in the country illegally to ICE for possible deportation.

It's unknown how many of those inmates were deported. ICE doesn't track removals that way, the agency said Wednesday. Illegal immigrants referred to the agency by local law enforcement become part of ICE's larger caseload. Those cases can drag on for months or even years.

The Police Department's partnership with immigration officials has always been narrower in scope than that of Maricopa County in Arizona and does not allow officers to arrest people for immigration violations. Only once an individual has been arrested on unrelated charges can he or she be screened for possible deportation.

Sheriff Doug Gillespie has repeatedly insisted the partnership is meant to target violent criminals.

In fact, police did not forward to immigration officials the names of an additional 1,808 inmates who also were identified as being in the country illegally because those inmates had no violent criminal history, Rivera said. Overall, 62,803 people were booked into the county jail between Nov. 15, 2008, and Sept. 19, 2009.

Hispanic and civil rights groups have fiercely criticized "287 (g)" partnerships, named for the corresponding section of the federal Immigration and Nationality Act, saying they target Hispanics and could lead to racial profiling and make people afraid to report crimes.

"Evidence is mounting across the country that 287 (g) programs are being run in problematic ways," said Maggie McLetchie, an attorney with the American Civil Liberties Union of Nevada. "We understand federal immigration laws need to be enforced, but that's the job of federal immigration officers, not the job of Las Vegas police."

**MOTION TO RECOMMIT**

Mr. ENSIGN. Mr. President, I send a motion to the desk.

The PRESIDING OFFICER. The clerk will report the motion.

The legislative clerk read as follows:

The Senator from Nevada [Mr. ENSIGN] moves to recommit the Act H.R. 2847 to the Committee on Appropriations with instructions to report the same back to the Senate with changes that reduce the aggregate level of appropriations in the Act for fiscal year 2010, excluding amounts provided for the Bureau of the Census, by \$3,411,000,000 from the level currently in the Act.

Mr. ENSIGN. Mr. President, what this motion is similar to the motions I have made on previous spending bills. What we are asking the Appropriations Committee to do is to fund our government at the 2009 level.

In 2009, we saw huge funding increases. Then, with all of the spending programs, the government has seen massive increases on top of the increases in spending we had last year. So what we are saying is, while businesses, families, local governments, and State governments across the country are cutting their budgets, the Federal Government should freeze spending levels to 2009 levels. Let us not go on this massive increase in spending.

We understand the census, which we do just once every 10 years, is not part of the normal budget process, so we allowed for that. We allow for the census to be funded. But everything else should be funded at 2009 levels.

We allow the Appropriations Committee to set the priorities; that is, what funding is to go into which particular program. Some programs are more effective than others, and they may have different priorities. That should be the prerogative of the Appropriations Committee. But what this body should be doing is sending a message to the American people that we care about our children and our grandchildren.

What we are seeing right now is that we are borrowing 43 cents of every dollar we spend. Think about that. Think about a family or a business borrowing 43 cents out of every dollar they spend. That is what we are doing. I think this next chart illustrates very well on whom this burden is going to fall.

The picture of this young lady was taken out in the public. She had a sign around her which said: I am already \$38,375 in debt, and I only own a dollhouse.

It is a picture of a cute little girl, and it would really be a cute picture if it wasn't so sad because it is true. Every child in America has a huge debt burden put on them because of the spending.

During the last many years we have heard about the spending programs. The other side of the aisle actually ran on fiscal discipline. They said we spent too much money under the Bush administration. By the way, I agreed with that statement. I think we did spend too much money during the first

part of this decade. But the spending levels now, in comparison, are skyrocketing. We are adding trillions and trillions of dollars in debt to future generations.

So my motion, very simply, says: Instead of this large increase in this spending bill, we are going to live at last year's numbers. We are not even going to cut in ways State governments and local governments are doing. They are cutting. We are going to live within last year's funding levels—which were, by the way, increased dramatically. Last year, I think the same appropriations bill got a 15-percent increase. Let's at least live at last year's level instead of living on huge increases this year.

I think this motion is the responsible thing to do for future generations and for the future of our country. We have to think about this debt. What is this debt going to do? We are hearing about the weakening dollar. There are articles every day in financial magazines about what a weak dollar means to America. The higher the debt, the weaker the dollar gets. We are adding trillions of dollars onto the debt. That weak dollar is going to hurt our economy into the future. We have to worry about not only inflation, but hyperinflation. We have to worry about whether jobs are going to continue to go overseas because of a weak dollar.

Every country that has tried to handle their debt by devaluing their currency, which is what seems to be going on now—has never succeeded. The only way to control your debt is to get spending under control. That is what we have to do in this body. That is what we have to do in this country. My motion says: Time out. Time out from all the spending. Let's at least live at last year's spending level. Let's put a freeze on Federal spending so we are not hurting future generations. I encourage my colleagues to vote for this.

I yield the floor.

The PRESIDING OFFICER. The Senator from Colorado is recognized.

Mr. UDALL of Colorado. Mr. President, I ask unanimous consent to speak as in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The remarks of Mr. UDALL of Colorado are printed in today's *RECORD* under "Morning Business.")

The PRESIDING OFFICER. The Senator from Ohio is recognized.

**HEALTH CARE**

Mr. BROWN. Mr. President, I come to the floor regularly to share letters from constituents of mine, Ohioans, letters we get from people commenting on the health care system. Many of these letters—most of them, in fact—have come from people who thought they had good insurance. If you had called them a year ago or 3 years ago or even, in some cases, a month ago and said: Are you satisfied with your

insurance, they most likely would have said yes. Then one of their family members gets sick and it is a very expensive illness, spend weeks in the hospital or has all kinds of doctors visits and tests, and they end up spending so much that they lose their health insurance. The insurance company cancels them. The insurance companies call it a rescission.

You read the fine print and you see these policies are not what they are cracked up to be. That is one important reason why this health insurance bill is so important.

Let me share a couple of these letters with my colleagues.

Edward, from Montgomery County, that is the Dayton area—Dayton, Kettering, Huber Heights, that area of Ohio, sort of southwest Ohio.

About 5 years ago I took my wife to the hospital one evening because she hurt her back. They took an X-ray but told her nothing was wrong. She came back home, but she stayed up all night crying in pain.

I then took her to the emergency room where the doctors took an MRI. It showed she had a ruptured lumbar disc that could have led to paralysis. The insurance paid for the MRI, but their attitude was sickening. After being admitted that night, the next day the hospital told her she had to go home because the insurance wouldn't pay for the stay.

The doctors and nurses disagreed with that decision, but insurance rules.

The public option is the only thing that will keep these companies honest.

Edward from Montgomery County has it exactly right. He knows we need insurance reform so the insurance companies can no longer deny care for pre-existing conditions, no longer discriminate against people because of gender or disability or age or geography. He understands there should not be a cap, an annual cap or a lifetime cap, on coverage, so if someone gets very sick and it is very expensive, their insurance could no longer be canceled.

But he also understands not only do we need to change the rules, as our bill that we will bring to the Senate floor does, to change those rules so insurance companies can no longer game the system, this legislation also includes a strong public option as Edward asked for. A public option will make sure the insurance companies stay honest. It will inject competition into the insurance industry, and it will give people choice. That is why we call it a public option. It is a choice.

If you are in southwest Ohio, in my State, you only have two insurance companies, and they have 85 percent of the insurance market. That is not competition. You know that means rates are higher. That is why injecting competition with the public option will help stabilize insurance rates and make the insurance companies behave a whole lot better than they have been.

Let me share two other letters. I see my colleague from Pennsylvania, Senator CASEY, is in the Chamber. Linda

from Hamilton County, also southwestern Ohio, Cincinnati, Blue Ash, Avondale, that part of Ohio.

I am 60 years old and I have private health insurance—if you want to even call it that. I pay \$450 a month and so few services are covered until I reach a \$10,000 deductible.

Three years ago I had a double mastectomy. As a result, I can no longer go to another insurance company because of pre-existing conditions.

I have a good life. My husband and I worked hard, saved our money, and have enjoyed our retirement so far. But I now find myself not being proactive about my health care because I know I will have to pay out-of-pocket for care until I reach \$10,000.

That's not insurance. It is highway robbery. I want you to vote—

She says: Senator—

I want you to vote for the public option. Get in there and fight for those who have nothing and for those of us who want to remain healthy in our golden years.

Listen to what she says:

I now find myself not being proactive about my health care—

Because she has a \$10,000 deductible, living now, it sounds like, probably, on a fixed income, she simply cannot afford to pay that kind of money out of pocket to get the sort of maintenance of care she needs. So she simply is not taking as good care of herself. She is not able to have physicians and nurses and others help her maintain her health the way we encourage our constituents to do. We want people to get regular checkups. We want them to do all kinds of preventive care. She can't afford to because of this deductible. So she already, in some sense, has been a casualty of our health care system. I pray it is not worse than that. But in too many cases, that has happened. She argues again—she says: I want you to vote for the public option. She understands she will not have this kind of \$10,000 deductible if she chooses the public option—a choice, but a choice that she sounds like she would make. She will not be turned away or in her mind think she can't get this other health insurance, these other health care services because they are so expensive. She understands and she asks for a choice—the choice of a public option.

This is the last letter I will read before I yield the floor.

Christopher from Summit County, the Akron area, northeast Ohio, Akron and Barberton and Tallmadge and Stow and that area of the State, writes:

As a 58-year-old self-employed entrepreneur, it is virtually impossible to obtain serious and genuine health coverage insurance. Thanks to a relatively minor pre-existing condition and total lack of a public option, I fall through the cracks in the wealthiest nation in the world.

Two sentences he writes: "It is impossible to obtain serious and genuine health insurance" and "Thanks to a relatively minor pre-existing condition and lack of a public option, I fall through the cracks in the wealthiest

nation in the world." Why can't somebody like Christopher—he is self-employed, he had the initiative to start a business and employ himself, and he wants to have insurance. He is 58 years old. His medical problems don't sound particularly severe, but he has a minor preexisting condition. He can't get insurance. That is why we are changing the law. We are no longer allowing denial of care for preexisting conditions, but we also need a public option, as Christopher asks for, for him to choose from if he would like to choose the public option or Aetna or Medical Mutual, an Ohio company, or CIGNA or BlueCross or whatever. But he also understands that the public option will enforce these rules, so the insurance companies can no longer game the system. In other words, the public option, as the President has said, will make the insurance companies more honest.

It is clear our legislation does a handful of things that are so important. It is clear this will move our country forward. It says: If you have insurance and you are satisfied with it, you can keep that insurance, but we are going to build consumer protections around that insurance: No more denial of care for preexisting conditions; no more caps on coverage if you get very sick and you lose your plan—they can't throw you off your plan then; no more discrimination based on gender or geography or disability or age.

The third thing our legislation does is it gives all kinds of incentives to small businesspeople to insure their employees: tax credits, allowing them to go into a larger pool with consumer protections. And our legislation provides insurance for people who do not have it, with some help from the government if people are low or median income.

So all of that will mean a healthier population. It will mean choices for people because they can choose the public option or they can choose private care, and they know the public option will make our whole health care system much better.

As we move forward and get this legislation to the President's desk before Christmas, I am excited about what we can do to make peoples lives better and to make for a healthier country.

I yield the floor.

The PRESIDING OFFICER. The Senator from Pennsylvania is recognized.

Mr. CASEY. Mr. President, first of all, I commend the words of my colleague, Senator BROWN, on the issue of health care but in particular the importance of having a public option in our health care plan and the legislation the Senate will take up.

AFGHANISTAN POLICY

I rise today to speak in particular with regard to the debate we are having—just beginning to have, by the

way, and need to have a lot more debate about—the U.S. role in Afghanistan, with a special focus in terms of my own remarks today on building the Afghanistan National Army. At the same time, I would also like to recognize the dedication of the Pennsylvania National Guard as well.

But first with regard to Afghanistan, the challenge we face in Afghanistan and Pakistan is a grave challenge indeed. Those who might disagree on the way forward or what to do next can agree on that, that it is a grave challenge. In order to get it right, and we must get it right, we need to debate these issues thoroughly.

I have been fortunate enough in the 3 years since I have been in the Senate to be a member of the Foreign Relations Committee. As a member of that committee, most recently—the last couple of months, really—I have had several opportunities, as others have on the committee, to examine the military, political, diplomatic, and regional implications of our presence in Afghanistan. Chairman JOHN KERRY has taken a very comprehensive approach, and I applaud his efforts.

I also support the administration's deliberate consideration in making this strategic determination. The President is taking the time that I believe is necessary to make the right decision.

General McChrystal as well has contributed much to this debate, not only with his report but, more importantly than what he put on paper, the kind of leadership he has provided to our troops on the battlefield and the way he has assessed the threats to our security and to our troops and to the Afghan people and the way he has articulated those threats.

Now he has made a recommendation to the President. We hear a lot about what General McChrystal's report said, at least parts of it. We also hear a lot about General McChrystal's recommendation on troops. What we have heard very little about and need to hear more about is the nonmilitary part. What will happen on the nonmilitary aspects of this counterinsurgency strategy? That is vitally important and at the same level of importance as what we do militarily. So we have to get it right militarily and in terms of the other strategy.

But one thing we have not heard a lot about is that General McChrystal has actually, in words I am quoting from the New York Times, endorsed the President's deliberate approach. General McChrystal was quoted on October 2 in the New York Times as follows: "The more deliberation and the more debate we have, the healthier that is going to be" for the strategy. So far as much attention as has been paid to what his report says, or at least part of what his report says, I think it is also important to listen to his words about

taking the time to debate it and taking the time to deliberate it because if all we do in the Senate is point a finger to the White House and say the White House must do this or the President must do this or the administration must do this, we are not fulfilling our responsibilities in the Senate.

A number of us have been talking about this challenge, but we have to hear from more voices here and we have to debate this in a very substantive, serious, thorough, and bipartisan way. I will talk more about that in a moment.

In that same New York Times story, General McChrystal was also quoted as saying: "I don't think we have the luxury of going so fast that we make the wrong decision." So I think it is important to highlight what General McChrystal has said about the approach we take, the approach President Obama is taking, spending a number of weeks looking at this, focusing on the strategy before the resources. A lot of people in this town want to just talk about troop levels only and resources only instead of getting a sense of where we should be strategically first and then getting to resources.

We should consider the ideas set forth in a recent Wall Street Journal op-ed by the following Senators: MCCAIN, GRAHAM, and LIEBERMAN—all respected voices on national security and foreign policy.

This is not going to be the strategy going forward, the solution to a difficult problem; this is not going to be a Democratic solution and it is not going to be a Republican solution; this has to be a strategy and a solution that comes from both parties.

Also, I should say that only by working together can we develop the best strategy, and to literally focus on strategy before the question of resources. We cannot simply use sound bites to communicate the complexities of this conflict or simply reassert talking points from the Iraq war debate. If that is all we are going to do around here, we might as well not have a debate because that will not do it for this debate, especially when we are talking about what is at stake here and especially in this case. Politics must stop at the water's edge. I think we can do that. This body has done it in the past, and we can do it again.

Let me say at the outset that our problems in Afghanistan are political in nature and will ultimately require a political solution. This does not mean additional troops may not be needed, but it does indicate to me that our strategy needs to reflect a deeper commitment to supporting the Afghan people in their efforts to focus on at least three principal areas—one, the obvious priority of security. There is a lot to talk about just under that umbrella. The second focus we have to have, as well as the Afghan people, is govern-

ance. We cannot govern for them; they have to govern themselves. President Karzai and whoever else has authority in that country to provide services have to demonstrate to us and to the world that they can govern themselves. So first security and then governance and finally development, and that obviously is a joint effort, not just American-Afghan but all of the more than 40 nations that are helping us in Afghanistan to help communities with water systems and infrastructure and education and so many others—health care included—so many other aspects that involve development or at least quality of life in Afghanistan.

Ultimately, our success will come in empowering Afghan institutions to address their own internal security. In some cases, this may mean co-opting certain elements of the Taliban, in other cases taking on the Taliban directly. We are now at a stage where the United States can play a positive role in making sure the political framework for the country is sound.

The chairman of the Armed Services Committee, CARL LEVIN, has helped to focus attention on the critical importance of training the Afghan National Army or the so-called ANA. I applaud Chairman LEVIN's leadership in this regard and support his call for an acceleration—a rapid acceleration of troop training to the levels of 240,000 Afghan National Army troops by 2012. While there is some disagreement over these training timelines, no one disputes the central importance of getting the Afghan security forces trained well and soon. As this force is prepared to provide security, it will decrease the need for a robust U.S. presence in the country.

I applaud the efforts of Major General Formica, head of the U.S. unit charged with training the Afghan troops. While the ANA certainly needs substantial additional assistance, we need to acknowledge the fact that this fighting force did not exist 7 years ago. Due in large part to the extraordinary efforts of coalition forces and people like the general, the ANA can be considered a measured success. Without these remarkable efforts, the Afghan National Army would not be in a position to grow at the pace necessary in the coming months.

I should also add that the recent Presidential election in Afghanistan presented a very difficult security challenge, and both the Afghan National Army as well as the police performed pretty well. We could witness some security problems but on a much more limited basis than many would have predicted. So that is a bit of good news in all the bad news we hear about Afghanistan.

Challenges do remain, however, and this training process will not be easy. A little more than 40 percent of the population in Afghanistan is of the

Pashtun ethnicity, although they are not fully represented in the army at these levels. The officer corps of the Afghan National Army, based on traditions that go back decades, is primarily made up of Tajiks, who represent just over 25 percent of the population. The most substantial fighting in Afghan currently takes place in the Pashtun belt, an area of the country in the south and east along the border with Pakistan. I hope the Afghan National Army can continue to take these important ethnicity concerns into consideration as they grow the force.

These are critically important concerns about ethnicity. We have to recognize that and not turn away from it.

Second, Afghanistan has a very high illiteracy rate; some estimate as high as 70 percent. This presents considerable complication in troop training as some recruits are not able to read or write orders, understand maps or interpret instructions on how to operate equipment. Our trainers have come up with creative training techniques using pictures, for example, but this is no substitute for basic skills required in a modern army.

The third challenge with regard to building up the Afghan National Army and perhaps the most significant is posed by the substantial resources needed to stand up such a force. Army recruits are paid only \$100 a month, while there are reports that the Taliban pays as much as \$300 a month. Both are small amounts, but when the Taliban is paying three times as much, that presents a challenge that we must confront, if we are serious about this. The Afghan National Army should begin to address the discrepancy. Overall the cost of maintaining this expanded force will be considerable, and it is unlikely that the Afghan Government will be able to shoulder this burden anytime soon. It is a challenge that involves both cost and the reality that the government doesn't have the resources to do all it needs to do in building up the Afghan Army. We need to be honest about that. This will be expensive but nowhere near as expensive as the continued deployment and costs associated with maintaining an international coalition force.

I have tried to outline some of the realistic challenges we face in standing up the Afghan Army. Afghan Defense Minister Wardak, whom I met during my trip in August, oversees this effort in Kabul. Minister Wardak has been commended for his leadership of the Afghan armed forces. He believes these ambitious troop increases are challenging but possible. I hope we can aggressively pursue Chairman LEVIN's plan, no matter what comes of the President's strategy. An expanded and enhanced Afghan Army should be a central part of the equation. In the final analysis, this fight against the Taliban is an Afghan fight. We need to

be there to support them, but a stable and peaceful Afghanistan will ultimately depend upon how well the Afghan Government can provide security for its own people.

(The further remarks of Mr. CASEY are printed in today's RECORD under "Morning Business.")

Mr. CASEY. I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. THUNE. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### HEALTH CARE REFORM

Mr. THUNE. Mr. President, this week the latest version of the health care reform plan was scored by the CBO. The expectation is that sometime in the next few days, the Finance Committee will report out a bill which at some point will be merged with the bill that was produced by the HELP Committee. I rise to make some observations about the process generally, because we are talking about literally one-sixth of the American economy. This is not something that is inconsequential, and certainly it is something that is personal to most Americans. Health care is something they value deeply. Any type of reform ought to focus on patient-centered health care—not insurance centered, not politician centered, not Washington, DC centered, but patient-centered health care. As we get into this debate, we ought to have an opportunity not only for Members of the Senate to carefully examine what is in this legislation but also for the American people. The American people deserve and have a right to know what is going to be in any final bill.

My first point is that we have tried. An amendment was offered in the Finance Committee by the Senator from Kentucky, Mr. BUNNING, that would require for any bill that ultimately, once it is reduced to legislative language and has an estimate from the CBO about what it might cost, there be 72 hours for people to evaluate it, Senators as well as the general public. That amendment was defeated in the committee deliberations. Seventy-two hours is the bare minimum that ought to be required and necessary for people here in the Senate to look at what will be inevitably north of 1,000 pages of legislative language.

The reason I say "will be" is because we don't know yet. We haven't seen legislative language to date. All we have is a concept paper. The Finance Committee will be voting out a concept paper. That concept paper has been scored by the Congressional Budget Office but it is just that. It is a concept paper. We have yet to see anything that resembles legislative language

that ultimately is what we in the Senate will be asked to vote on.

The simple expectation is that there ought to be an adequate amount of time, whatever that amount is, but at a minimum 72 hours was all that was requested by the Senator from Kentucky in his amendment before the Finance Committee. That was defeated by the Democratic majority.

He subsequently offered that today, a resolution as an amendment to the currently pending legislation, the CJS appropriations bill. It was objected to. There was a point of order raised against it. It is pretty clear that our colleagues on the majority side do not want to consider having any sort of a requirement imposed that would allow people an adequate amount of time to review this incredibly consequential and impactful piece of legislation coming before the Senate.

I make that observation to start with because it is relevant. This process needs to be open and transparent. The American people have a right to know exactly what is in this legislation. Even Senators and Senators on the Finance Committee right now don't know because they haven't seen bill language. What they are going to be voting on is a concept paper. And what the estimate that has been provided by the CBO is in response to is a concept paper, not legislative language. I argue to my colleagues that we need to have at least a certain amount of time. I would argue more than that—it ought to be 2 weeks, when we are talking about something this voluminous and this consequential for Americans or the American economy. I regret that our colleagues on the Democratic side of the aisle are objecting to what is even a minimum amount of time to review this legislation, and that would be a 72-hour time limit.

I don't believe for a minute that the Finance Committee bill, even if and when it is reduced to legislative language, is the thing we will be voting on. There has been a lot of reaction to it and a lot written in the last couple of days about how this would be scored by the CBO. And there is a story out today that it actually would reduce the deficit, which I will get into in a moment.

But before addressing that, this bill, when it does become a bill, will have to be married with another bill passed earlier by the HELP Committee. Those two will be merged. Where will they be merged? They will not be merged on the floor of the Senate. They will be merged behind closed doors in the majority leader's office by a handful of people who will be determining what is in the legislation. Then at some point they will have to come out and we will get an opportunity to look at it.

I don't think the work the Finance Committee is putting in right now is anywhere close to what the end result

will be. I argue that we will see a very different product produced by the majority leader when they go behind closed doors and a handful of people write the health care bill that will come before the Senate.

Those are a couple of observations I wished to make with respect to the process and how flawed I believe it is with regard to the issue of being open and transparent and making sure there is accountability to the people.

The second observation I wish to make has to do as well with the fact that most Americans believe there is a right way and a wrong way to do this. The right way ought to be making sure we are prioritizing our spending and being careful with taxpayer dollars.

The wrong way is for Washington to go about this in the traditional way; which is, to raise taxes still higher, put the country further into debt, and more money into programs we do not believe—at least a lot of us do not believe—will work in the long run. Again, I will point out in a minute why we think this is the case, why these programs will not work in the long run.

The right way to do this is for us to protect and expand that doctor-patient relationship and to do it in a way that is fiscally responsible and to do it in a way that gets at the real crux of the issue; that is, how do we reduce the cost of health care in this country.

As to the current bill, which I mentioned earlier, there have been some news stories in the last day or so about how this bill reduces the deficit, with \$829 billion in spending and about \$81 billion in surplus to reduce the deficit. What I think is important for people to focus on is, because there is a delayed implementation of these provisions in this bill that do not start kicking in until 2014 or thereabouts, the numbers that are being used by the other side and being reported upon by the media reflect a 10-year period starting now and going forward.

But when the bill is fully implemented, when all the provisions are finally in place and we get the 10-year window from that point forward—or from that point through the 10-year window—that is when we get a real assessment of what the costs are. If we do that, the cost of this legislation is not the \$829 billion that has been put out publicly and has been sort of picked up by the media in the last day or two, but it is nearly double that amount. It is \$1.8 trillion.

So it is a massive amount of new spending, a massive expansion of the Federal Government at the Federal level, and a massive amount of spending that somehow is going to have to be paid for either in the form of additional revenues, cuts in Medicare—which is what is being proposed—which I do not think, frankly, is ever going to happen. We tried back in 2005 when we were reforming Medicare to shave \$10

billion out of that. We could not get the votes for it in the Senate. We had to bring the Vice President back from Pakistan to cast the deciding vote.

So the notion that somehow we are going to be voting to cut \$500 billion from Medicare is a pipe dream. You would have to be smoking something to believe that is actually going to happen. That is one of the ways that \$1.8 trillion of new spending is paid for.

The other way it is paid for is with higher taxes. The problem with that is the taxes do not just fall on the “rich” or “wealthy.” They do not just fall on the insurance companies, which is where some of the taxes and fees in the Finance Committee bill are directed. They fall on the American people. In fact, I think it is important to point out the Congressional Budget Office, when asked about this, said 90 percent of the tax burden in 2019—90 percent of the tax burden in the health care bill—would fall on wage earners making less than \$200,000 a year. That directly violates and contradicts the commitment and the promise the President made that he would not impose taxes on people making less than \$250,000 a year.

So we have these massive tax increases which, according to CBO, are going to fall disproportionately on people making less than \$200,000 a year, and we have these cuts in Medicare which, in my view, are not going to happen or, if they do, could be very devastating to seniors, as well as to a lot of the health care providers across this country.

But here is what is most amazing about all that: almost \$2 trillion in new spending over a 10-year period—\$500 billion, \$600 billion of tax increases; \$500 billion in Medicare cuts to pay for this—and who is to say if the Medicare cuts do not happen a lot of this will not end up being borrowed, which piles up huge debt on future generations of Americans. But after all that, and after all the bills, including the Finance Committee bill, it assumes a tremendous level of government intervention and involvement in the health care economy of this country. The government is going to be in the middle of making decisions that traditionally have been made by doctors and patients.

But after all that, we would assume, at the end of the day, the underlying purpose and goal of this—which is to reduce health care costs—would have been achieved. The truth is, it does not reduce costs. The bottom line is, after everything else is said and done, and we look at all the spending and all the taxing and all the new government expansion and all the new government interference and involvement and intervention in the health care economy and the fundamental doctor-patient relationship, we have not done anything to lower costs for the Americans who are struggling with the high cost of health care.

In fact, the Congressional Budget Office, during the Finance Committee markup last week, when asked whether the insurance company taxes would be passed on—and how would that impact the people who are actually having to pay the insurance premiums out there—they said those new taxes would be passed on dollar for dollar. We have seen all kinds of varying estimates about the amount of the increase, but there has not been a bill yet, of the five that have been produced by any of the committees in the Congress, that bends the cost curve down. They all raise and increase costs.

I think that is the Achilles heel, ultimately—that the American people, who are struggling with the high cost of health care, are looking for solutions and for reforms that will actually put downward pressure on prices, and all that is being talked about is spending a couple trillion dollars of their tax dollars, raising taxes and cutting Medicare in order to raise their overall cost of insurance. Only in Washington, DC, could something that stunning actually make it in the light of day.

So at the end of the day, it ought to be about reducing costs for Americans. It ought to be about trying to provide access for those who do not have access to health insurance. By the way, the most recent version of the Baucus bill—the Finance Committee bill—still leaves 25 million Americans uncovered. So we are not covering a lot of people we are proposing to cover. We are increasing costs of health care for people who currently have insurance, and we are creating a couple trillion dollars of new spending when this bill is fully implemented over 10 years that, again, is going to, in some way, have to be financed with taxes, Medicare cuts, or, worse yet, perhaps borrowing, which will come on the backs of future generations.

The amount of debt we are going to have at the end of 2019, according to CBO, is enough so that every household in this country will owe \$188,000. Imagine if you are a young couple today just exchanging your vows, you are starting your family, you are getting ready to move on with your life, and you get handed a big fat wedding gift from the Federal Government to the tune of a \$188,000 IOU. That is not fair to future generations.

We ought to learn to live within our means. We talk about reforming health care. We ought to put reforms in place that actually reduce the cost of health care for working-class families in this country, that do not raise their taxes, that do not borrow from their children and grandchildren. Those are the types of things we would like to see as part of this debate.

We have already put forward a number of proposals that would do just that: allowing people to buy insurance across State lines—interstate competition would put downward pressure on

prices and insurance rates across this country—allowing people to join larger groups, small business health plans—something we voted on repeatedly in the Congress which has been consistently defeated in votes—dealing with the issue of defensive medicine, which it is estimated costs the health care economy about \$100 billion annually; doing something about medical malpractice and all those physicians who order those additional tests simply because they are worried about being sued.

We have had proposals put forward that would change the tax treatment of employer-provided health care plans so that those who do not have insurance would have a tax credit that would be available to them so they could go out and buy health insurance in the private marketplace.

We are laying out a lot of solutions we believe actually get at the fundamental issue before the American people, and that is the high cost of health care and also trying to provide coverage for those who do not have it. None of these proposals, in my view—and I think the Congressional Budget Office, in their analysis, bears it out. These are all proposals that bend the cost curve up, that increase and raise insurance costs for this country.

The only reason they could go out like they did yesterday and say, well, this actually reduces the deficit, is because of the massive tax increases and the massive cuts in Medicare that it assumes will take place.

Again, I want to mention one more time, in closing, notwithstanding the numbers that were released yesterday by the Congressional Budget Office—and the way they were reported by the media—the number people need to focus on is the cost of this program when it is fully implemented.

Because it is delayed, because many of the provisions in the bill, in its entirety, for the most part, are going to be delayed—the implementation—until 2014, we have to get the full picture of the cost, what it is going to cost in the 10 years once it is fully implemented because a lot of the revenues are front loaded, the costs are back-end loaded. That is why this sort of wires and mirrors—the approach that is being used—understates the overall cost. They can go forward and say, well, we are reducing the deficit over 10 years because of all the tax increases, which kick in right away, but some of the costs in the program do not come into play until later on.

So the American people need to be engaged in this debate. They need to have their voices heard. Frankly, they have a right to know exactly what is in this legislation. That is why it should not be rushed. It should be done in a way that allows people to actually review this bill. It ought to be done in the light of day.

Secondly, it ought to be done in a way that actually is fiscally responsible to future generations so we do not pile this huge burden of debt on them. But even more importantly than that, it ought to accomplish the stated objective, which is to reduce the overall health care costs for Americans.

These proposals do not do that. There are ideas out there and solutions out there that do, some of which I just talked about. If we would be willing to sit down and come to a consensus about those things that actually do drive health care costs down, we could pass health care reform through the Senate this year, through the House of Representatives, put it on the President's desk, and do something that actually meaningfully reduces costs for Americans and what they pay for health care.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from Delaware.

Mr. KAUFMAN. Mr. President, I ask unanimous consent to speak as in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

TRIBUTE TO ERICA WILLIAMS AND HER SEC TEAM

Mr. KAUFMAN. Mr. President, I rise again today to honor a great Federal employee, something I have been doing each week on the Senate floor. I do so because I believe it is very important to recognize the unsung heroes who work every day on behalf of the Nation with great effort and often with great sacrifice.

Today, I want to honor an employee of the Securities and Exchange Commission, one of our most important independent Federal agencies, whose work affects all Americans. This great Nation was founded on a belief in freedom and fairness—two fundamental pillars of American society.

This is what the Revolutionaries fought for in the time of Samuel Adams and George Washington. It is what the Framers enshrined during the era of Alexander Hamilton and Thomas Jefferson. Maintaining democratic government and fair, open markets were the charge of every administration and Congress from their day to ours.

In the decades since World War II, American global leadership has focused on promoting these two concepts throughout the world. Democracy and a fair marketplace complement each other perfectly. A society based on fair markets cultivates an egalitarian political culture. Likewise, democracy instills in all citizens the sense that they ought to enjoy in commerce what they so cherish in government: a marriage of liberty and equality.

I have already spoken from this desk several times about the challenges we and the SEC jointly face today in protecting our financial markets. I have talked repeatedly about how, as a nation, our credit and equity capital mar-

kets are a crown jewel. Only a year ago we suffered a credit market debacle that led to devastating consequences for millions of Americans.

I have squarely blamed the self-regulation philosophy of the SEC as being a major part of that problem. By this I mean that the SEC had too often deferred to those it regulates for knowledge, experience, and certitude. I feel so strongly about this because we have lived through an era where regulators and the leadership of regulatory agencies failed to regulate. Perhaps Congress, too, failed to give the regulators the tools and resources they needed to do their jobs effectively.

These failures have contributed not only to a financial disaster but also to a loss of public confidence in our markets and our national economy. In addition, these failures run counter to our ideals of democracy and market fairness.

During the time of the Revolution, we were a nation of farmers and merchants bound together by our common dependence on the trade of manufactured goods, foodstuffs, and local services. Today, we have become a nation of investors. Tens of millions of Americans own retirement accounts, and they depend on fair markets to protect those long-term holdings.

Many Americans have suffered directly as a result of the markets losing value. Those who have not been hurt personally surely know someone—a parent, a friend, or a coworker—who has. The financial crisis has forced many to delay retirement or even go back to work. Most working Americans have lost something; some have lost almost everything.

Under its previous leadership, the SEC lost its way. While the failure of the SEC to follow up on tips about the Bernie Madoff Ponzi scheme is certainly emblematic of this failure—and probably a huge blow to the morale of the agency—I believe morale at the agency may also have suffered for a much more fundamental reason. Too often in the past, the SEC leadership kept its employees from pursuing its core mission. This happened not only at the SEC but at other Federal agencies as well. There was simply a philosophical difference between their policies and the need for effective enforcement of regulations.

Employees at the SEC, while still working hard every day, sadly, I suspect, have become somewhat demoralized by this and by resulting setbacks. And, I might add, SEC employees have also had to endure criticism of the Commission in recent months by concerned Members of Congress—myself chief among them.

Today, the SEC stands at a crossroads.

In the wake of last year's historic election, Washington has been focused on change. The greatest thing about

change is that it offers the promise of a new start. I wholeheartedly believe one of the most fundamental qualities of the American people is the ability to pick ourselves up, dust ourselves off, and return to the important task before us.

For the SEC, this means a renewed focus on its original mission: to maintain public faith in our markets, to protect all investors. The SEC needs to reassure our long-term investors—many of whom are average Americans saving for retirement—that the system is not rigged against them. I know the SEC can, and will, be a can-do agency once more.

In 2005, the SEC moved into a new headquarters just a few blocks from the Capitol. It is a beautiful glass and stone building with a high, curving facade. The lobby is full of light, and its windows frame a view of the Capitol dome. Much of the building wraps around a courtyard, and in the center of that courtyard is a playground for the children who attend the SEC's employee daycare. Across the street are a school and a row of small businesses, including a busy coffee house. Behind the new building are the tracks leading out from Union Station carrying business travelers and commuters each day.

The men and women who work in that building don't need to be reminded who they work for. They see them every day out of their windows. The stability and fairness of our financial markets affects every American, from the small business owner to the coffee house patron; from the daily commuter to the future of that toddler in daycare. I believe a new building provides a chance for a new beginning.

I agree with the President that at least with regard to the financial crisis, the worst is behind us. Now is the time for the SEC to step to the plate. I know they can do it. I have faith in the SEC because it stabilized our markets in the aftermath of the Great Depression. I have faith in the SEC because it always proved to be resilient during times of institutional change, and I have faith in the SEC because it has some of the most talented public servants who are now working tirelessly to catch up after several years of failed leadership.

One of those public servants is Erica Williams, a lawyer for the SEC's Enforcement Division. A graduate of the University of Virginia Law School, Erica has been with the SEC for 5 years. During that time, she has distinguished herself as a trial lawyer on several complex cases involving accounting and fraud. Before coming to the SEC, she worked at a major private sector law firm in Washington.

In July, she and her team of SEC enforcement attorneys won a hard-fought verdict in Federal court on a case involving insider trading. This case, com-

monly referred to as SEC v. Nothorn, was a rare case involving U.S. Treasury bonds.

She could not have had better colleagues on this case than John Rossetti, Sarah Levine, and Martin Healy, all of whom equally deserve recognition. John is a graduate of Catholic University Law School, and he served for 9 years as an SEC enforcement attorney. Sarah, who holds a law degree from Yale, clerked for Justice David Souter before coming to the SEC in 2007 as a trial attorney. Martin supported their efforts as a regional trial counsel at the SEC's office in Boston.

Erica and her team had to prove that the defendant had insider knowledge from someone inside the Treasury Department. Approximately \$3 million in illegal profits had been generated from this scheme. They argued their case strongly and thoroughly. They also had to prosecute the case with fewer resources than are usually available to private sector litigators. They worked weekends and sacrificed time with their families for long hours spent in the office or on the road. It all paid off, a victory that reflects what the SEC is all about: punishing and deterring wrongdoing.

What Erica achieved with her team is more than a court victory, however. She is helping to send a message the SEC is back; that those who are contemplating fraud better think twice. That is why I am honoring her as my "Great Federal Employee" of the week.

I know this is only the beginning. The SEC knows it needs to focus on deterring those activities that make our markets unfair. That is what Erica's victory and what other recent gains of the Commission have done. As new SEC Enforcement Division Director Robert Khuzami has said, the SEC is engaged in "a rigorous self-assessment of how we do our job." Their victory is what Khuzami meant when he promised "a focus on cases involving the great and most immediate harm and on cases that send an outside message of deterrence."

I also have faith in SEC Chairman Mary Schapiro, who shares my concern about the stability and the quality of our markets. She understands the trade-offs between market liquidity and market fairness, and she recognized how important it is to protect the interests of long-term investors.

As my colleagues are aware, since March, Chairman Schapiro and I have exchanged communications, and I believe under her leadership the SEC is coming back stronger and better able to pursue its mission.

The famous Alabama football coach, Paul "Bear" Bryant, once said:

I have learned over the years how to hold a team together. How to lift some up, how to calm others down, until finally they've got one heartbeat, together, a team.

Chairman Schapiro believes in the SEC's mission, and she is working dili-

gently to ensure that all who work there are doing so with one heartbeat—as a team. They, too, believe in the SEC's mission, and we have to make certain they get all the resources they need, not only to catch up but also to operate ahead of tomorrow's market threats.

Taped to the door of Chairman Schapiro's office is a sign for all those entering with new proposals or ideas. It reads: "How does it help investors?" This ethos must once again be the source of inspiration for everyone who works in that beautiful new building.

As the SEC embarks on its next chapter, I want all of its employees to know when they walk out of that lobby each day and see the Capitol dome, they should feel confident that those of us who work under it are their partners. We will be their partners by making certain the SEC is strong enough to do its job, and we will work together with the Commission to help identify and prevent new problems before they arise. The American people also should have patience and hope that the SEC is back and on the right track. We all hold a common stake in its success.

The era of looking the other way is now behind us. The time has come to look forward. I hope my colleagues will join me not only in honoring the service of outstanding Federal employees of the SEC such as Erica Williams and her team but in recommitting ourselves to help them pursue our common goal. When it comes to protecting America's investors, we must have one heartbeat.

I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. BROWN). The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. SHELBY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SHELBY. Mr. President, I ask unanimous consent to speak as in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### AIR FORCE TANKER COMPETITION

Mr. SHELBY. Mr. President, I rise today to speak about the recently restarted Air Force KC-X tanker competition.

On February 29, 2008, after a lengthy competition, the U.S. Air Force announced that the team of Northrop Grumman and EADS was selected to deliver the best, most capable tanker to our warfighters, at a price of \$3 billion less than their rival Boeing's offer.

It was only after the GAO sustained a mere 8 out of 111 complaints submitted by the losing team—Boeing—that the award was overturned and the competition was placed in limbo.

Even after GAO's recommendation, there is still nothing to suggest that

the KC-45 was not the best tanker solution. This is a very important point to remember. The Air Force's contracting system may have been flawed, but nowhere did GAO state that the KC-45 is not the best tanker for our airmen.

A year later, Defense Secretary Robert Gates terminated the award and canceled the entire tanker acquisition program.

Secretary of Defense Gates' decision to cancel the Air Force's No. 1 acquisition priority outright clearly placed politics and business interests over the interests of the warfighter.

While Secretary Gates may have characterized this decision as a "cooling off" period, it sent a clear message that only a Boeing tanker will be acceptable. The defense acquisition policy was unmistakable: No Boeing, no tanker. That is a fundamentally flawed policy that may please some Members of Congress from the States in which Boeing would build the tankers, but it fails to satisfy the critical need for the best new tankers for our warfighters. In that case, politics obviously trumped military necessity and troop welfare.

After review of the September 24 draft RFP that begins the new tanker competition, I again have serious concerns that fairness and capability are being completely ignored.

For a moment, let me elaborate. As a result of the last protest, Northrop Grumman was compelled to submit its proprietary, competitive-sensitive pricing data to the GAO, which, in turn, provided that critical information to Boeing. Let me say it again. Boeing now has all of Northrop Grumman's competitive pricing information. Yet they are going to be competing again.

Boeing knows exactly how the Northrop Grumman team was able to offer the best deal to the Department of Defense during the last competition. Boeing knows all of Northrop Grumman's bidding strategies.

In a competition for a defense contract, nothing is more carefully protected than a company's pricing and bidding strategy.

Let me remind my colleagues here that Northrop Grumman/EADS offered a clearly better plane, at a price that was \$3 billion less than Boeing. And now, today, Boeing knows how they did it.

Northrop Grumman has repeatedly asked the Department of Defense to level the playing field by providing them—Northrop Grumman—with Boeing's pricing information from the previous competition. To date, the Pentagon has continually denied Northrop Grumman's requests. The Department of Defense has stated that Northrop Grumman's pricing and bidding strategies are not relevant issues in the current competition, and that the data is outdated.

Not relevant? I could not disagree more. It is intuitively obvious to any-

one who is even vaguely familiar with the concept of competitive government bidding that the Department of Defense, from the outset, is tilting the competition toward Boeing. Northrop Grumman is being severely penalized before the game even begins. This situation is inconceivable and must be changed.

Further, after review of the draft RFP, it is becoming increasingly clear that this competition is not structured around what we call a "best value" competition that would ensure that our warfighter receives the best plane. Rather, it is structured around the lowest price technically acceptable competition that does one thing and one thing only—it reduces the chances that our warfighters will receive the most superior plane on the market.

One would think that our Air Force's top priority would be to ensure that our men and women in uniform have the best, most capable equipment. It seems to me that is not the case.

A lowest price technically acceptable procurement process focuses heavily on cost and does not take into account additional or advanced capabilities that may be available on the aircraft that will help us in the years to come. This means that price is more important than quality; that performance is not a critical factor; that added capabilities, technology that could help save the lives of our men and women in uniform and have an edge on the opposition, is not a key factor in the draft RFP.

The fact that the draft RFP is structured so that cost is almost the only component considered in the competition makes the aforementioned pricing data issue even more relevant.

When combined with Boeing's knowledge of Northrop Grumman's pricing data and not vice versa, it has become abundantly clear that the Department of Defense and the Air Force have their thumbs on the scale in favor of Boeing.

As was clearly shown in the previous competition, Boeing has a less capable airframe, but Boeing now has all of Northrop Grumman's pricing data and a full understanding of Northrop Grumman's bidding strategies. This information is the holy grail for Boeing that provides them with everything necessary to surely submit a lower cost bid for their less capable aircraft.

If this matter should not be a concern, then there should be no issue whatsoever with the Department of Defense providing Boeing's prior data to Northrop Grumman because Boeing, again, has Northrop Grumman's data, as they recompile.

In order for this competition to be untainted, to be fair, to be at the level of openness and transparency that my colleagues and I were repeatedly assured would be the case, I believe it is imperative that Northrop Grumman be allowed to obtain Boeing's pricing data from the last tanker competition and

that the competition shift away from purely a cost basis to what is best for the warfighter.

It makes no sense for a procurement process that has been continually hampered by scandal, delays, and jail time for certain officials to begin the latest version of this competition with such an absurdly uneven playing field.

As we go forward, it is my sincere hope that the safety of our warfighters and the security of our Nation will become the priority, as it has been in the past, this time and decisions will not be based on political pressures that unfairly tilt competition.

Unless the Department of Defense and the Air Force live up to their commitment of impartiality and transparency, I am fearful that our warfighters will have to settle for second best. Apparently, that is just fine with some, as long as Boeing wins.

I yield the floor.

THE PRESIDING OFFICER. The Senator from Maryland is recognized.

Mr. CARDIN. Mr. President, I ask unanimous consent to speak as in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The remarks of Mr. CARDIN pertaining to the introduction of S. 1765 are printed in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

Mr. CARDIN. Mr. President, I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant bill clerk proceeded to call the roll.

Mr. SHELBY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2625

Mr. SHELBY. Mr. President, I now call up amendment No. 2625.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered. The clerk will report.

The assistant bill clerk read as follows:

The Senator the from Alabama [Mr. SHELBY], for himself and Mrs. FEINSTEIN, proposes an amendment numbered 2625.

The amendment is as follows:

(Purpose: To provide danger pay to Federal agents stationed in dangerous foreign field offices)

On page 170 at the end of line 19 insert the following:

SEC. XXX. Section 151 of the Foreign Relations Authorization Act, Fiscal Years 1990 and 1991 (Public Law 101-246, as amended by section 11005 of Public Law 107-273; 5 U.S.C. 5928 note) is amended:

(a) by striking "or" after "Drug Enforcement Administration" and inserting ", the"; and (b) inserting after "Federal Bureau of Investigation": ", the Bureau of Alcohol, Tobacco, Firearms and Explosives or the United States Marshals Service".

Mr. SHELBY. Mr. President, I, along with Senator FEINSTEIN, have offered this amendment that would make the U.S. Marshals and the ATF agents, who put their lives on the line in dangerous foreign countries to protect our Nation and our citizens, eligible for danger pay.

The U.S. Marshals and ATF agents are actively assisting Mexican law enforcement and the Mexican military in one of the bloodiest wars in the world today—the Mexican drug war. There have been nearly 10,000 drug war murders and deaths in Mexico since January of 2007. President Calderon has deployed 45,000 troops and 5,000 Federal police to 18 Mexican States to help combat these cartels.

Every week, we read about the gruesome murders of Mexican law enforcement officers, many of whom have our own Federal agents serving at their side. Currently, FBI and DEA agents receive danger pay in Mexico, while U.S. Marshals and ATF agents do not. I believe it is outrageous that these agents—our agents—serving their country and risking their lives on a daily basis, do not receive this compensation like their Department of Justice counterparts.

This amendment I offer on behalf of myself and Senator FEINSTEIN simply brings danger pay parity to the Department of Justice Federal law enforcement officers working in dangerous foreign countries. This amendment, I believe, has a lot of merit, and although Senator MIKULSKI is not here right now, I believe she would join with me in support of this amendment.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. FRANKEN). The clerk will call the roll. The assistant bill clerk proceeded to call the roll.

Mr. KOHL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### ORDER OF PROCEDURE

Mr. KOHL. Mr. President, I ask unanimous consent that at 3:30 p.m., the Senate proceed to the consideration of the conference report to accompany H.R. 2997, the Department of Agriculture, Rural Development, Food and Drug Administration Appropriations Act; that debate time on the conference report be limited to 30 minutes, equally divided and controlled between Senators KOHL and BROWNBACK or their designees; that if points of order are raised, any vote on the motions to waive occur beginning upon the use or yielding back of time; and that following the disposition of the points of order, and if the motions to waive are successful, then at 4 p.m., the Senate then proceed immediately to vote on adoption of the conference report; that upon adoption of the conference report,

the Senate then resume consideration of H.R. 2847, and the Ensign motion to recommit with 2 minutes prior to a vote in relation to the motion, with no amendments in order to the motion.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### MAKING APPROPRIATIONS FOR AGRICULTURE, RURAL DEVELOPMENT, FOOD AND DRUG ADMINISTRATION AND RELATED AGENCIES PROGRAMS FOR THE FISCAL YEAR ENDING SEPTEMBER 30, 2010—CONFERENCE REPORT

The PRESIDING OFFICER. The report will be stated.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 2997), making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes, having met, have agreed that the House recede from its disagreement to the amendment of the Senate and agree to the same with an amendment and the Senate agree to the same, signed by a majority of the conferees on the part of both Houses.

(The conference report is printed in the House proceedings of the RECORD of September 30, 2009)

Mr. KOHL. Mr. President, I rise in support of the conference report on H.R. 2997, the Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act for 2010.

This bill includes total spending of \$121.1 billion. Of the total, \$97.8 billion is for mandatory programs, and \$23.3 billion is for discretionary programs. The discretionary spending in this bill is an increase of \$2.7 billion and is within our 302(b) allocation.

This bill funds a range of programs that help improve the lives of Americans every day.

It provides more resources for food and drug safety.

It delivers low-income housing and supports rural communities who need sanitary water systems.

It fully funds the WIC, SNAP, School Lunch and School Breakfast Programs. It expands the Commodity Supplemental Food Program and the Child and Adult Care Feeding Program.

It significantly expands the McGovern-Dole Program so children in developing countries can get school meals. Often, that is the only reason they come to school.

It bolsters agricultural research so we can produce better crops and feed more people more efficiently.

It funds conservation, community development, animal and plant health, trade, and much more.

We worked closely with our counterparts in the House to come to satisfactory agreements on issues about which we had differing views.

We included compromise language on the reimportation of Chinese poultry, setting up a stringent system to protect public health. This language meets all of our WTO requirements and has been endorsed by all sides.

We included critical funds to aid the dairy sector which is suffering from historically low prices. Some will be used to purchase dairy products for food pantries, and the rest will provide direct relief to producers.

We fund development of new food aid products to provide higher nutritional content for food aid recipients; most of these products have not been updated for nearly two decades.

Overall, this bill is properly balanced. It provides appropriate funding and direction for the Department of Agriculture, FDA and other agencies. We worked to ensure that the concerns of all Senators were addressed, and I believe we have been successful.

I am very encouraged by the process that brought us to this point, and I am grateful to my ranking member, Senator BROWNBACK, and others who have been instrumental in its success.

I strongly encourage all Senators to support this bill.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. BROWNBACK. Mr. President, I thank my colleague, Senator KOHL, who chairs this committee. This is the first year for me to be ranking member. He has been a delight to work with.

A number of issues are addressed in this bill. The centerpiece is the agriculture industry. It is of key importance. It is interesting to note, in this economic downturn we are in, that the agriculture industry has had a great deal of difficulty, although it has been one of the stronger industry sections we have had during this period. That is in no small part because of the strength of the industry, the willingness of people to work, to invest aggressively, to work hard, and to pay attention to details.

For us to support the research entities underneath it—a lot of that is in this bill. So we are researching aggressively what we can do to produce things efficiently, effectively, that the marketplace wants. It is a great export industry. It is one that provides a lot of exports out of my State, out of the State of the chairman, and the States of other Senators. That research is important. That is what is in the bill, the research and development industry. That is the primary piece of it. It is not the total, but it is a key part.

Looking into the future, I can see that places we need to go are in things that will require the research for us to be able to move forward, things such as cellulosic ethanol where people are excited about doing the grain-based ethanol. We need to have a stream from cellulosic ethanol so we can produce

more of our energy needs domestically and renewably. That also goes into the energy field, but it is a key part of agriculture. It also grows jobs in rural areas where it is pretty hard at times to grow jobs. People go to more concentrated regions and places, but we need them in rural areas. If we can invest and if we can show ways people can invest and make money in rural areas, going into food and fiber and fuels and pharmaceutical products, these are things that can really work for us and for our people and around the world. I am pleased to work with Chairman KOHL on that. He has worked on this many years. This has been my first year as ranking member.

In particular, I would like to note two areas we made key investments in that are important for the country and to save people's lives. One is in the food and drug piece of this bill. The FDA is also appropriated in this bill.

One of those areas is rare and neglected diseases. There is language included in this bill that creates two groups within FDA to examine the agency's approach to rare and neglected diseases in the developing world and here.

Unfortunately, a number of people in the United States get diseases that maybe only 100,000 people get. That sounds like a big number, and it is a big number, but to a drug company looking at making an investment and then being able to develop a cure, it is looking for a much larger marketplace.

What we are asking in this bill is, are there ways within the FDA, for a rare disease or neglected disease, for us to cut down the cost process to develop a new drug? Otherwise, we are not getting any research into how we take care of diseases for somebody who is one of 50,000 who get it, and there is nothing going on research-wise to help them. I had a lady in my office this morning who had a disease in this category. She was basically told by her physician when she got diagnosed: You should get your affairs in order. That is not an acceptable answer, particularly as a policymaker.

We have two groups in here looking at rare or neglected diseases and how do we cut the cost of developing that drug so that a pharmaceutical company or others could say: This doesn't affect a lot of people, but my entry cost is lower, so I will look at this, I will go into this field. Our hope is we can stimulate some research in this country.

Then neglected diseases around the world that can affect huge numbers of people—the World Health Organization says that more than a billion people, nearly one in every six persons worldwide is affected by at least one of the neglected diseases. This isn't a small category, but they happen to be in countries that don't have high per capita income. So again a company looks

at this and says: There are a lot of people affected, but there is no income level here, so I can't go into it. Well-known examples include malaria, tuberculosis, and cholera. They disproportionately affect low-income populations in developing countries. We are going at this issue too.

I can't think of a better place for us to invest more policy-wise than helping to save people's lives. People tend to like you more when you help save their lives. This affects a broad cross-section of people around the world. And we have the marketplace, the technology to work on it, if we can cut the cost down. These two really track together, and they are very important for us to save lives. I always consider it a great day if we can save a person's life by some policy move we are making that may make things work better. These are a couple of them.

Another area the chairman and I have been working on is the issue of food aid. Here, I have had a lot of disappointment in the fact that we put a lot of money in food aid and then not a lot of it hits the target. For every dollar we put in food aid, 60 percent is eaten up by transportation and administration. So 40 percent gets to the person who actually needs it.

A lot of these are food aid situations where it costs a lot to get the food there. Going into the interior in Sudan, it just costs a lot to get there, there is no question. But still I have to think we can do this better. We are starting to look at that but also pilot projects to help develop new food aid products and to develop micronutrient-fortified foods for infant through schoolage children, pregnant or nursing mothers. We haven't developed a new food aid product in over 20 years. The last one was a corn-soybean blend which is a good product. But I know the chairman and I don't eat the way we did 20 years ago. You kind of understand the body moves a little differently.

This area of micronutrients is the area that most researchers believe that if the world would invest in it, it is the highest yield category for us to save and positively affect the most lives, an investment in micronutrients. It may be a corn-and-soybean blend, but it also has vitamin additives put into it for that infant, that nursing mother, that person with AIDS or malaria. We have invested a lot to try to save the person with AIDS or malaria, but now they really can't get better because they don't have the nutrition in their body they need. We get that into the system.

I am excited about these steps and pilot projects, what we might be able to find out in these categories and do to save lives. These are well-spent funds.

It is tough economic times for us as a country. These are critical issues for us. I am always looking at ways we can

hold the budget numbers down because I think we really have to get our budget under control. These are ones that have been good and wise investments. They are important places for us to work in.

I am appreciative of being able to work on these particular projects. As we move forward, looking at next year, I hope we can sharpen the pencil even more in areas that may have been a high priority in the past but they should not be now, for us to look at ways we can control and get our budget down. And then you move that money either into paying down the deficit so the deficit is much lower or you say: If we are going to put things in higher investment areas, we move them from low-investment to high-investment regions, and that we would emphasize ourselves and work in the committee to see what areas are there that we should be taking money out of to put into higher need categories or to put back against the deficit that is just running way too high for us as a country.

We all know that. This deficit is way too high. It is unsustainable. We need to sharpen our pencil every bit we can in these committees to do our part. I hope we can really spend some time this next year, even as we line up for the appropriations process, holding hearings on what are low-priority areas, what we can cut out of this budget. We tend to mostly focus on new ideas, new programs, and those are good and important, but in these budgetary times, we have to spend some time asking: What is it we could do without? That would be important for us to do.

It has been a pleasure to work with the chairman. I urge colleagues to vote for the conference report and to send it on to the President.

I yield the floor.

#### CONGRESSIONALLY DIRECTED SPENDING

Mr. KOHL. Mr. President, it has been brought to my attention that the Congressionally directed spending items table in the statement of managers to accompany the Fiscal Year 2010 Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act mistakenly listed Senator HUTCHISON as requesting funding for the medicinal and Bioactive Crops research project through the Agricultural Research Service. Additionally, Senator HUTCHISON's name was mistakenly omitted from the table for the Grain Sorghum research project through the National Institute for Food and Agriculture and the Range Revegetation for Ft. Hood conservation project through the Natural Resources Conservation Service.

Mr. BROWNBACK. I agree with Chairman KOHL and appreciate him bringing these items to the Chamber's attention.

EMERGENCY DAIRY ASSISTANCE

Mrs. BOXER. Mr. President, I thank the Senator from Wisconsin and the Senator from Vermont for joining me to discuss \$350 million in emergency dairy assistance funding included in the fiscal year 2010 Agriculture, Rural Development, and Food and Drug Administration Appropriations Act conference report.

I had a very encouraging meeting with the Secretary of Agriculture where he informed me that he intends to distribute emergency dairy assistance funds included in the conference report in a way that is regionally equitable, and to do so as quickly as possible.

As the author of the amendment to the fiscal year 2010 Agriculture appropriations bill that added \$350 million in emergency dairy assistance funds, the Senator from Vermont stated on the floor that “whether it is Vermont, Wisconsin, California, Colorado—rural America is hurting.”

The Senator from Vermont went on to say that “I know the people familiar with dairy always say these are great regional fights, the Northeast is fighting the Midwest is fighting the Southeast is fighting the West coast, and every region has its own set of priorities. This is not a regional issue, this is a national issue.”

I ask the Senator from Vermont, was it your intention that emergency assistance be provided to dairy farmers in every region of the country?

Mr. SANDERS. Yes, that is correct.

Mrs. BOXER. I thank the Senator from Vermont. If I may ask the Senator from Wisconsin, as the lead Senate negotiator, can you tell us how the conference committee intended these funds to be used when crafting the final language?

Mr. KOHL. Let me start by saying that I appreciate the guidance and input I have received from my California colleague throughout this process.

The bill before us provides \$290 million to the Secretary under broad authorities to assist our Nation’s dairy farmers. The conference report does not direct any form this assistance shall take—an approach that was the result of a hard-fought negotiation with the House. Many members would have preferred to distribute this assistance through the MILC program formula. In fact, I must admit that such an outcome would have been my preference since programs such as MILC would greatly benefit my farmers in Wisconsin. But I knew that dairy farmers all across the country are suffering and an approach couched in inherently regional terms would not meet the test for national acceptance.

I understand the MILC program would impose limitations difficult for some regions to accept, and for that reason a more general authorization

was employed to provide greater regional fairness in the distribution of assistance. My understanding is that the Secretary has three main goals in mind in administering this assistance: No. 1, the payments must be directed to actual dairy farmers, No. 2, the payments must go out as quickly as possible, and No. 3, the payments must reflect as much regional equity and fairness as possible. I agree with these three principles and trust that the Secretary will carry out this assistance in that fashion.

Mrs. BOXER. I thank the Senator from Wisconsin for his views and say further that his understanding of the Secretary’s goals is correct. I thank my colleagues for joining me to discuss this issue.

Mr. CONRAD. Mr. President, I rise to offer for the record, the Budget Committee’s official scoring of H.R. 2997, the Agriculture, Rural Development, Food and Drug Administration and Related Agencies Appropriations Act for fiscal year 2010.

The conference report provides \$23.3 billion in discretionary budget authority for fiscal year 2010, which will result in new outlays of \$17.7 billion. When outlays from prior-year budget authority are taken into account, non-emergency discretionary outlays for the bill will total \$24.9 billion.

The conference report matches its section 302(b) allocation for budget authority and is \$120 million below its allocation for outlays.

The bill is not subject to any budget points of order.

I ask unanimous consent that the table displaying the Budget Committee scoring of the bill be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

H.R. 2997, AGRICULTURE, RURAL DEVELOPMENT, FOOD AND DRUG ADMINISTRATION AND RELATED AGENCIES APPROPRIATIONS ACT, 2010—Continued

[Spending comparisons—Conference Report (in millions of dollars)]

	General purpose
Outlays .....	1

Note: Table does not include 2010 outlays stemming from emergency budget authority provided in the 2009 Supplemental Appropriations Act (P.L. 111–32).

Mr. MCCAIN. Mr. President, today the Senate turns to the conference report for H.R. 2997, the Agriculture appropriations bill for fiscal year 2010. This bill spends about \$120 billion in direct and mandatory spending. This is on top of the \$108 million that was provided under the fiscal year 2009 omnibus bill, as well as the infamous economic stimulus package, which provided another \$26.5 billion in Ag spending.

I acknowledge that many of the programs funded by this bill are valued for providing important services to the agriculture community at large, and I commend the members of the Senate Appropriations Committee for reporting this bill in a timely manner. I agree that we should ensure that our farmers stay out of the red, and that some Federal involvement is necessary to assist low-income families under nutrition programs. Unfortunately, Congress once again has conformed to the practice of diverting precious taxpayer dollars into an array of special interest pork projects which have not been authorized or requested by the administration.

When the bill passed the Senate shortly before the August recess, the bill carried with it 296 “Congressionally Directed Spending Items” a fancy new term for earmarks—totaling over \$220 million. Now that conferees have had their chance to feed at the trough, the number of earmarks has grown to 461 totaling over \$360 million. None of these projects were requested by the administration. Many of them were not authorized, or competitively bid in any way. No hearing was held to judge whether or not these were national priorities worthy of scarce taxpayer’s dollars.

Let’s take a look at some of the earmarks that are in this bill: \$2 million for a fruit laboratory in West Virginia; \$819,000 for catfish genome research in Alabama; \$360,000 for a corn ethanol research plant in Washington, DC; \$75,000 to promote childhood farm safety in Iowa; \$250,000 for the Iowa Vitality Center; \$700,000 to improve cattle health in Maine; \$300,000 to develop “Best Practices in Agriculture Waste Management” in California; \$1.3 million for greenhouse nurseries in Ohio, which weren’t requested by the administration; \$2.9 million for shrimp aquaculture research in Arizona and Massachusetts; \$693,000 for beef improvement research in Missouri; \$165,000 for maple

syrup research in Vermont; \$195,000 to research how to increase the lifespan of peach trees in South Carolina; \$349,000 for pig waste management in North Carolina; \$500,000 goes to the National Wild Turkey Federation in Nebraska, and \$250,000 for the Kansas Farm Bureau Foundation for a workforce development program.

The largest earmark in this bill goes to Hawaii. The Aloha State bags \$5 million to continue construction of an Agriculture Research Service Center to study agriculture practices in the Pacific. As my colleagues know, ARS construction is one of the most heavily earmarked accounts in government. So much so that the President's budget actually proposed zeroing out ARS construction for fiscal year 2010 because:

Congress routinely earmarks small amounts of funding for [ARS projects] located throughout the nation. The result of scattering funding in this manner is that . . . few if any of the projects are able to reach the critical threshold of funding that would allow construction to begin. Funding construction over such a long time significantly increases the amount of money needed to fully complete these projects, as well as postponing their completion for many years.

So here we have a program that is earmarked so severely that it delays and drives up the costs of approved construction projects. Not only are we funding this Hawaiian facility, but conferees approved 21 earmarks totaling over \$71 million for ARS facility construction, some of them airdropped in conference.

During Senate consideration of this bill, I filed over 300 amendments to strike every earmark as well as cut funding to several USDA programs that the President proposed for termination including the ARS facilities account. It should come as no surprise that my amendments were defeated at every turn by appropriators on both sides of the aisle.

These projects may be meritorious and helpful to the designated communities, but considering our current budgetary crisis, it's inappropriate to include them on this year's agriculture spending bill, especially when they have been identified for termination or reduction. I hope my colleagues will agree that we have higher spending priorities that are directly related to the purposes of this agriculture bill. This bill is intended to address farmers, women, children, and rural communities with the greatest need, not for piggybacking pet projects that garner the support of special interest constituents.

I know that many of my colleagues have spoken about the economic struggles of America's hardworking farmers and low-income families. The farmers and struggling families I know are tired of watching their hard-earned money go down the drain.

I will oppose this conference report and every other pork-laden bill that comes before this body.

Mr. INOUE. Mr. President, I submit pursuant to Senate rules a report, and I ask unanimous consent that it be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

DISCLOSURE OF CONGRESSIONALLY DIRECTED  
SPENDING ITEMS

I certify that the information required by rule XLIV of the Standing Rules of the Senate related to congressionally directed spending items has been identified in the conference report which accompanies H.R. 2997 and that the required information has been available on a publicly accessible congressional website at least 48 hours before a vote on the pending bill.

Mr. AKAKA. Mr. President, I am pleased that the Senate will pass H.R. 2997, the Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act for Fiscal Year 2010 conference report.

This legislation will fund important programs, such as food safety inspection, agricultural research, and the Supplemental Nutrition Program for Women, Infants, and Children. Programs such as these will benefit the entire Nation. My constituents will additionally benefit from a number of projects located throughout the State of Hawaii.

The bill will stimulate food and agricultural development in Hawaii through projects tailored to the State's needs. It will fund continued agricultural development and resource conservation programs through the local, community-based leadership of Hawaii's four Resource Conservation and Development Councils. It will foster food science and agricultural research that meets Hawaii's unique needs and that bolsters American competitiveness in such areas as floriculture, tropical fruit, and aquaculture.

Watershed and flood prevention projects in Hawaii also receive appropriate attention in this bill. Recent droughts underscore the importance of watershed projects to increase water storage capacity, delivery system efficiency, and water conservation. Projects on Maui and the Big Island will help make progress on the planning and construction of projects dealing with the limited natural resource of water.

Funding in the bill also includes programs to control invasive species in Hawaii such as termites, brown tree snakes, coqui frogs, and other alien pests and weeds that threaten agricultural lands and sensitive ecosystems. Hawaii is the only domestic supplier of varroa mite-free queen bees for honey producers and pollinators, and therefore the mite eradication efforts cultivated by this legislation are of national importance. Similarly, farmers

in the continental United States will benefit from the establishment of a facility to provide a secure supply of sterile fruit flies used to control fruit flies that are destructive to fruit crops. Hawaii offers a premier location for rearing sterile fruit flies as four pestiferous fruit fly species are already established there.

In sum, this bill will fund programs meeting Hawaii's unique needs in addition to supporting local leadership that will aid agriculture nationally. I am glad to have advocated for this funding and thank the senior Senator from Hawaii, the Chairman of the Appropriations Committee, as well as the Chairman and Ranking Member of the Senate Appropriations Agriculture, Rural Development, and FDA Subcommittee for their work in crafting and managing this bill.

The PRESIDING OFFICER. Who yields time?

Mr. BROWNBACK. I suggest the absence of a quorum and ask unanimous consent that the time be equally charged to both sides.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. KOHL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KOHL. Mr. President, I ask for all the remaining time to be yielded back.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KOHL. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The question is on agreeing to the conference report.

The clerk will call the roll.

The bill clerk called the roll.

Mr. DURBIN. I announce that the Senator from West Virginia (Mr. BYRD) and the Senator from Massachusetts (Mr. KERRY) are necessarily absent.

The PRESIDING OFFICER (Mrs. MCCASKILL). Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 76, nays 22, as follows:

[Rollcall Vote No. 318 Leg.]

## NOT VOTING—2

Byrd	Kerry
------	-------

The conference report was agreed to. Mrs. FEINSTEIN. Madam President, I move to reconsider the vote and I move to lay that motion on the table. The motion to lay on the table was agreed to.

# COMMERCE, JUSTICE, SCIENCE, AND RELATED AGENCIES APPROPRIATIONS ACT, 2010—Continued

The PRESIDING OFFICER. The Senate will continue consideration of H.R. 2847.

## MOTION TO RECOMMIT

There will now be 2 minutes of debate, equally divided, prior to a vote on the motion offered by the Senator from Nevada, Mr. ENSIGN.

The Senator from Nevada is recognized.

Mr. ENSIGN. Madam President, this is a simple motion to recommit the bill to put it at last year's funding level, plus the money for the census. The census is once every 10 years, and it will allow for that funding increase.

But in this era of record deficits and uncontrolled Washington spending, we are living under last year's spending levels with this motion. We need to get serious in this body about getting our spending under control. We have to start with appropriations bills. We know we have to cut spending on entitlements.

Let's start now by living under last year's spending levels, instead of the large increases we are having on appropriations bill after appropriations bill.

My motion allows the Appropriations Committee to determine what levels programs would be at, but we are not going to allow across-the-board increases.

The PRESIDING OFFICER. The Senator from Maryland is recognized.

Ms. MIKULSKI. Madam President, I vigorously oppose the motion.

First, the bill is consistent with the budget resolution and the CJS subcommittee 302(b) allocation.

Second, the bill is a product of bipartisan cooperation reported out of the Appropriations Committee unanimously.

Third, the consequences of cutting the CJS bill to 2009 levels by excluding the census would be devastating. If you take out the census and do a cut, guess whom you are cutting. First of all, you are cutting Federal law enforcement. If you think this is a simple resolution, tell that to the FBI. If you think it is simple, tell it to the marshals who are chasing sexual predators. If you think it is simple, tell it to the astronauts, who are waiting to make sure we put the money in the budget to keep them safe as they go into space.

There is nothing simple about this motion to recommit. I simply ask you to reject the Ensign motion.

Madam President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is this a sufficient second? There is a sufficient second.

The question is on agreeing to the motion.

The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. DURBIN. I announce that the Senator from West Virginia (Mr. BYRD) and the Senator from Massachusetts (Mr. KERRY) are necessarily absent.

The result was announced—yeas 33, nays 65, as follows:

[Rollcall Vote No. 319 Leg.]

## NOT VOTING—2

Byrd	Kerry
------	-------

The motion was rejected.

Mr. LEAHY. Madam President, I move to reconsider the vote.

Mr. REID. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

## UNANIMOUS CONSENT REQUEST—H.R. 3548

Mr. REID. Madam President, I ask unanimous consent that the Senate

proceed to the immediate consideration of H.R. 3548, which was received from the House. I further ask unanimous consent that a Reid substitute amendment which is at the desk be agreed to; the bill, as amended, be read a third time and passed; the motion to reconsider be laid upon the table, with no intervening action or debate, and that any statements relating to the bill be printed in the RECORD.

The PRESIDING OFFICER. Is there objection?

Mr. KYL. Reserving the right to object.

The PRESIDING OFFICER. The Senator from Arizona.

Mr. KYL. Madam President, it is my understanding that we received this an hour and a half ago. I have no doubt at the appropriate time we will be able to work out some kind of agreement. But our side is going to need some time to look at it. We will need some Republican ideas or amendments as well, and we will need a CBO score.

At this time, I will have to, on behalf of Members on our side, pose an objection.

The PRESIDING OFFICER. Objection is heard.

Mr. REID. Madam President, if I can just say—and I know others wish to speak on this issue—we have found a new stalling tactic. It is pretty new. It is CBO. Now I am sure everything is going to be "CBO." I am sorry the consent request was not granted.

The PRESIDING OFFICER. The Senator from Vermont.

Mr. LEAHY. Madam President, I was going to call up an amendment, but I think the Senator from New Hampshire wishes to speak. I ask unanimous consent that the Senator from New Hampshire be recognized and I be recognized after her.

Mr. REID. Madam President, if I may ask my friend, the chairman of the Finance Committee, does he wish to speak?

Mr. BAUCUS. That is correct, 2 minutes.

Mr. REID. Why don't we let the chairman of the Judiciary Committee go for 30 seconds to offer an amendment.

I ask unanimous consent that Senator BAUCUS be recognized following Senator LEAHY and then Senator JACK REED.

Mr. REID. And then Senator SHAHEEN.

The PRESIDING OFFICER. Is there objection to the leader's request?

Mr. GRAHAM. Reserving my right to object, and I don't intend to, I would advise my colleagues that somewhere in this line, I need a minute to call up an amendment I wish to have pending.

Mr. REID. Why don't you do that—you will have a minute following Senator LEAHY.

The PRESIDING OFFICER. Without objection, the Senator from Vermont is recognized for 30 seconds.

## AMENDMENT NO. 2642

Mr. LEAHY. Madam President, I ask unanimous consent that the Senate set aside the pending business and call up my amendment at the desk, amendment No. 2642.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Vermont [Mr. LEAHY] proposes an amendment numbered 2642.

Mr. LEAHY. I ask unanimous consent that further reading of the amendment be dispensed with; and I ask unanimous consent that I be allowed to continue for 1 minute.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(Purpose: To include nonprofit and volunteer ground and air ambulance crew members and first responders for certain benefits)

On page 170, between lines 19 and 20, insert the following:

**SEC. 220. BENEFITS FOR CERTAIN NONPROFIT EMERGENCY MEDICAL SERVICE PROVIDERS.**

(a) **SHORT TITLE.**—This section may be cited as the “Dale Long Emergency Medical Service Providers Protection Act”.

(b) **ELIGIBILITY.**—Section 1204 of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3796b) is amended—

(1) in paragraph (7), by striking “public employee member of a rescue squad or ambulance crew;” and inserting “employee or volunteer member of a rescue squad or ambulance crew (including a ground or air ambulance service) that—

“(A) is a public agency; or

“(B) is (or is a part of) a nonprofit entity serving the public that—

“(i) is officially authorized or licensed to engage in rescue activity or to provide emergency medical services; and

“(ii) is officially designated as a pre-hospital emergency medical response agency;”;

and

(2) in paragraph (9)—

(A) in subparagraph (A), by striking “as a chaplain” and all that follows through the semicolon, and inserting “or as a chaplain;”;

(B) in subparagraph (B)(ii), by striking “or” after the semicolon;

(C) in subparagraph (C)(ii), by striking the period and inserting “; or”; and

(D) by adding at the end the following:

“(D) a member of a rescue squad or ambulance crew who, as authorized or licensed by law and by the applicable agency or entity (and as designated by such agency or entity), is engaging in rescue activity or in the provision of emergency medical services.”.

(c) **EFFECTIVE DATE.**—The amendments made by subsection (b) shall apply only to injuries sustained on or after January 1, 2009.

(d) **OFFSET.**—The total amount appropriated under the heading “SALARIES AND EXPENSES” under the heading “GENERAL ADMINISTRATION” under this title is reduced by \$1,000,000.

Mr. LEAHY. Madam President, more than three decades ago Congress created the Public Safety Officers Benefits Program at the Justice Department to provide assistance to the surviving families of police, firefighters, and medics who lose their lives or are disabled in the line of duty.

The benefit, though, only applies to public safety officers employed by Federal, State, and local government entities.

With volunteers providing emergency medical service to many communities all across the country, my amendment would remedy this gap in the P-S-O-B program by extending benefits to cover nonprofit EMS personnel who provide critical prehospital care.

We have been working to address this gap in the Federal program for some time, and the tragic loss earlier this year of Dale Long—a decorated EMT from Bennington, VT—reminded everyone that first responders of many uniforms literally put their lives at risk every day.

These brave emergency professionals never let their communities down when a call comes in, and no one ever asks the lifesavers at an emergency scene whether they work for the Federal government, a State government, a local government, or a nonprofit agency. My amendment will erase that unnecessary distinction from the P-S-O-B program.

I would like to thank a number of first responder groups—including the American Ambulance Association, the International Association of Fire Fighters, the International Association of Fire Chiefs, and the Fraternal Order of Police—for their assistance on this matter. I also would note that this amendment is fully offset and cosponsored by Senator SANDERS.

I hope the Senate can move quickly to approve this amendment, and I yield the floor.

The PRESIDING OFFICER. The Senator from South Carolina.

## AMENDMENT NO. 2669

Mr. GRAHAM. Madam President, I ask unanimous consent to set aside the pending amendment and call up amendment No. 2669.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report.

The assistant legislative clerk read as follows:

The Senator from South Carolina [Mr. GRAHAM], for himself, Mr. MCCAIN, and Mr. LIEBERMAN, proposes an amendment numbered 2669.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(Purpose: To prohibit the use of funds for the prosecution in Article III courts of the United States of individuals involved in the September 11, 2001, terrorist attacks)

At the appropriate place in title II, insert the following:

**SEC. \_\_\_\_ (a) PROHIBITION ON USE OF FUNDS FOR PROSECUTION OF 9/11 TERRORISTS IN ARTICLE III COURTS.**—None of the funds appropriated or otherwise made available for the Department of Justice by this Act may be obligated or expended to commence or continue the prosecution in an Article III court of the United States of an individual suspected of planning, authorizing, organizing,

committing, or aiding the attacks on the United States and its citizens that occurred on September 11, 2001.

(b) **ARTICLE III COURT OF THE UNITED STATES DEFINED.**—In this section, the term “Article III court of the United States” means a court of the United States established under Article III of the Constitution of the United States.

Mr. INOUE. Mr. President, the Senate is now considering the 8th of 12 Appropriations bills reported by the Appropriations Committee this year, the fiscal year 2010 Commerce, Justice, and Science Appropriations bill.

This bill includes total resources of \$65.15 billion, an increase in funding of \$7.2 billion above the fiscal year 2009 enacted level. While on first blush this level of funding may appear generous, Members need only to look at the accounts in this bill to understand the need for these additional funds.

Specifically, fiscal year 2010 is the peak funding year for preparations for the constitutionally mandated decennial census. As a result, an additional \$4.1 billion above the fiscal year 2009 omnibus enacted level is required for this account alone.

The next largest increase is for science. On August 9, 2007, then-President Bush signed into law the America Competes Act, legislation that moved through this Chamber with 69 cosponsors and passed the Senate by unanimous consent.

That legislation called for the doubling of science, technology, engineering, and mathematics funding for the purpose of investing in scientific innovation and education to improve the competitiveness of the United States in the global economy.

This bill includes an increase of \$1.7 billion for NASA, NOAA and NSF science programs, all of which contribute to the goals of the America Competes Act and bolster our economic competitiveness.

Finally, the bill provides for an increase of \$580 million for the FBI which allows that agency to continue its efforts to fight both terrorism and violent crime in this country.

Senators MIKULSKI and SHELBY have worked diligently to offer a strong bipartisan bill that tackles the needs of law enforcement, supports scientific research in both space and in our oceans, and invests in scientific innovation and education. I applaud them for their hard work and bipartisan cooperation.

As with the other seven bills that have come before the Senate for consideration to date, the committee supported their recommendations unanimously, and the bill was reported out of the Appropriations Committee on June 25 by a recorded vote of 30 to 0.

This bill has been available for review by members for more than 3 months, so if a Member has an amendment, they should be willing to come to the floor today and offer it. At this

point, it makes no sense for Members to delay.

Vice Chairman COCHRAN and I, along with the other subcommittee chair and ranking members have worked diligently to restore regular order to the appropriations process. We have come a long way in responding to what was asked of us at the beginning of the year.

But for us to succeed, it takes the cooperation of all Members of the Senate. Therefore, I strongly encourage my colleagues not to delay action on this bill.

Mr. LEAHY. Mr. President, I am pleased to cosponsor today an amendment to require the antitrust division of the Department of Justice to carry out oversight, information-sharing, and joint activities concerning competition in the agriculture sector. Our Nation's antitrust laws exist to promote competition, which ensures that consumers will pay lower prices, and receive more choices of higher quality products. The Department of Justice is charged with enforcing these antitrust laws. Yet there are few industries in which there are more serious concerns about the state of competition than the agriculture sector. Small farmers are suffering because the prices they can charge for many of their products continues to decline, and the level of concentration throughout the industry could have a negative long-term impact on the prices that consumers pay and the choices they have.

Since first coming to Washington, I have fought to help our family farmers by ensuring a level playing field in American agriculture. The consolidation in recent years throughout the agriculture sector has had a tremendous impact on the lives and livelihoods of American farmers. It affects producers of most commodities in virtually every region of the country, and in my home State of Vermont, it affects dairy farmers. Farmers need a fair opportunity to compete in the marketplace and we must prevent giants in corporate agriculture from repeatedly hurting them with unfair, discriminatory, deceptive, and anticompetitive practices.

I held a field hearing last month in Vermont to assess competitive issues in the dairy industry. During that hearing, we heard from officials from the Department of Justice and the United States Department of Agriculture. We also received first hand testimony from farmers whose businesses are suffering at the hands of large distributors. This crisis is real, and the Department of Justice has pledged to take a renewed look at competitive issues in the agriculture sector as a whole. This amendment is another step to help ensure that competition exists in the agriculture sector.

Mr. GRAHAM. Madam President, this amendment is simple, direct, and

to the point. It would prohibit the use of funds for the Department of Justice to prosecute the perpetrators of 9/11 in article III courts.

What does that mean? That means that Khalid Shaikh Mohammed, and people like him, who organized the attacks against our Nation on September 11, 2001, would be tried by military commissions, not Federal courts. They are not common criminals, they are war criminals. They should be tried in a military setting, like other people throughout the 200-year history of this country have been tried regarding acts of war against the United States.

The military commissions have been reformed. Thanks to Senator LEVIN and others, we have a great process that I would not mind our own soldiers being tried in. At the end of the day, we need not criminalize this war. There is a law of armed conflict awaiting the defendants that is fair and it is robust. It has adequate due process, but it recognizes we are at war. And military commissions have been used throughout the history of this country. They are better able to protect classified information.

We need to be consistent. The people who planned the attacks of 9/11 are not common criminals. They are people who have taken up arms against the United States, and they should be adjudged accordingly in a military tribunal, which I think we have now designed as the best in the world.

There will be more to follow in this important debate.

With that, I yield the floor.

The PRESIDING OFFICER. The Senator from Montana.

Mr. BAUCUS. Madam President, what is the parliamentary situation? What is pending?

The PRESIDING OFFICER. The Graham amendment is pending to the CJS appropriations bill.

#### UNEMPLOYMENT INSURANCE EXTENSION

Mr. BAUCUS. I thank the Chair.

Madam President, on another subject, I wish to say I am very distressed that the other side objected to a request by the majority leader to pass legislation offered by himself, by myself, and Senators REED and SHAHEEN to extend unemployment insurance benefits.

Our country faces very high unemployment rates nationwide. In some States, it is much worse than other States. It is only fair. It is the right thing to do for the U.S. Government to recognize those folks who don't have jobs—to help tide themselves over until they get a job—with extension of unemployment insurance benefits.

I think for every job that is available in the United States today there are about six applicants. There are too many people unemployed—people seeking jobs who cannot get jobs. So the right thing to do, as we come out of this great recession, is to recognize

those who are unemployed and help them tide things over to make sure they are compensated.

The legislation we have introduced does that with 14 additional weeks for all States, and also would provide additional weeks for the hardest hit States—6 weeks of additional benefits for those States hardest hit, those States with the highest rates of unemployment. This unemployment rate we are facing is going to continue. It is not just a short-term phenomenon. There are estimates that we will see rates up to 9.8 percent through most of even next year.

I am very disheartened myself, but more so for the folks who are going to be denied benefits by the action taken by the Republican side to object to extending benefits to those folks who are in need of them. I am hopeful at a later point in time—very soon in fact; hopefully by next week—the other side will see fit to let this legislation pass because it is sorely needed. I urge my colleagues to vote for it when it does come up next week.

The PRESIDING OFFICER. The Senator from New Hampshire.

Mrs. SHAHEEN. Madam President, I rise today to add my voice to Senator BAUCUS in strong support of the Unemployment Compensation Extension Act. This bill, as the Senator said, is designed to help those families who are struggling in all 50 States by extending at least 14 weeks of unemployment benefits to workers across the country who are going to exhaust their benefits by the end of this year.

I thank Majority Leader REID and Chairman BAUCUS for bringing this bill to the floor, and the many Senators and staff who have worked so hard to get this done, particularly Senator JACK REED, who is going to be speaking, Senators CHRIS DODD and AMY KLOBUCHAR.

Through no fault of their own, many of those who lost their jobs months ago still cannot find work. Five million workers have been unemployed for more than 6 months. That is an all-time high, and it is why extending unemployment benefits in all 50 States is so important.

When I am back in New Hampshire and meeting families trying to get by, one thing is very clear: People want to go back to work, but they face one of the weakest job markets since the Great Depression. Until that job market improves, we have a responsibility to help those workers pay their mortgages and keep food on the table.

Another very important reason why we should support this, and why I am disappointed that our colleagues on the other side of the aisle have refused to come forward in support of this, is that extending unemployment benefits is a proven boost to our economy. Unemployment compensation is money that gets spent immediately on necessities.

People who are out of work need this money to help pay the rent, pay their mortgages, buy food, pay for gas. Extending unemployment benefits is one of the most effective actions we can take to help get this economy moving again, and I urge my colleagues to support this important extension and to quickly pass this critical legislation.

Madam President, I yield the floor.

The PRESIDING OFFICER. The Senator from Rhode Island.

Mr. REED. Madam President, I commend Leader REID and Chairman BAUCUS for the work they have done to get this bill to the floor. I also commend Senator SHAHEEN for her valuable contribution to moving this forward.

I am disappointed, to say the least, that we cannot move this legislation quickly. There are millions of Americans who are looking at the prospect of losing their unemployment compensation, others who have already lost it and, frankly, millions who may be working but, sadly, may qualify shortly for unemployment compensation.

As my colleagues have pointed out, there are six job seekers for every job. This unemployment crisis will continue, and the least we can do is to provide people with some support while they look for jobs and try to maintain their families.

One point I wish to make—which should be very clear—is that this legislation is fully paid for. This is not something that requires a CBO score in order to determine how it is used and what the cost will be and how it will be paid for. It is paid for by a continued extension of the FUTA surtax for a year and a half—through 2010 and the first six months of 2011. So this is responsible legislation as well as critically important legislation.

Again, as my colleagues indicated, this legislation will provide an additional 14 weeks of unemployment insurance benefits throughout the country. But as we have done on numerous past occurrences, it will recognize that even though there is pain everywhere, the pain is not distributed equally. There are States, such as my home State, where the unemployment rate is extraordinarily high. It is a critical need in Rhode Island where the unemployment rate is nearly 13 percent. So for those States, there will be an additional 6 weeks, for a total of 20 weeks, for all States with an unemployment rate of 8.5 percent or above.

This has to be done quickly, because as we speak there are 5.4 million Americans who have been unemployed for 6 months or more. There are signs that the economy may be recovering—credit markets, equity markets—but the unemployment markets still remain, unfortunately, in a deep decline. We are trying all we can do to reverse that, but in the interim we have to be able to give people a chance to simply get by, and that is what this does.

We are poised to pass this, and this unnecessary delay is not only inappropriate but inexcusable. This is something that affects every State in the country and it affects people who have worked hard all their working lives and now face unemployment, many for the first time. The psychological shock is great. Add to that the financial reality that they can't pay their bills, they can't pay the mortgage, and that adds another problem which I think cries out for immediate action, not waiting for a score from CBO, not waiting to see if there is something ancillary to this that could be attached. This is a time and a moment to meet the needs of the American public, to do so responsibly—and we have because it is fully offset—and not to delay. I urge the speedy passage of this critical legislation. I hope Leader REID will be prepared to make a UC the next time we are convened and that at that time this measure can be passed unanimously.

Madam President, I yield the floor, and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. SCHUMER. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SCHUMER. Madam President, I want to support the words of the Senator from New Hampshire and the Senator from Rhode Island about moving the unemployment insurance extension forward.

We all know that joblessness is a tremendous problem in this country. We can argue about which States should get the unemployment benefits and for how much time, but if you are unemployed, your household is 100 percent unemployed. It doesn't matter to you whether you are in a State where it is a 6-percent or a 9-percent or a 12-percent rate. If you have been looking for a job for 26 weeks, you are in trouble and your family is in trouble.

It is hard to believe on an issue such as this, where you would think there would be some comity—you know, I was on one of the TV shows with the Senator from Texas and he agreed unemployment benefits should be extended. We talked about it on that show. Yet we are now holding things up. But people can't wait. They have food to put on the table; they have families to keep together. They have a work ethic. When you can't find a job, try as you might, it eats at you. It is one of the great things about Americans.

I hope my colleagues will reconsider. I hope they will reconsider—yes, because the politics is not on their side here, but more important, because of the substance. We have the worst un-

employment we have had over a period of time since World War II, since the Great Depression. We can debate what we should ultimately do. We have to do more, in my opinion, to get this country out of the economic problems in terms of jobs. We do not want to wait 2 or 3 or 4 years for unemployment to gradually come down. We can debate all that. Should there be a second stimulus? Should we do other things? What should we do about highway building? Should we extend the home credit? These are all legitimate considerations we should debate. There will probably be some differences. But in terms of helping those unemployed, the vast majority of whom are unemployed through no fault of their own, I don't think there can be much of a debate. I don't think there will be much of a debate. When it comes to the floor through the good efforts of the Senator from Montana and the Senator from New Hampshire, my guess is it will be overwhelmingly voted on.

Let's not delay. Let's move forward as quickly as we can to help those who, through no fault of their own right now, cannot find a job, try as they might themselves.

I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER (Mrs. SHAHEEN). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DURBIN. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DURBIN. Is there a pending order of business before the Senate?

The PRESIDING OFFICER. The appropriations act is pending, and there is an amendment pending to that.

Mr. DURBIN. Madam President, I rise to discuss an amendment I filed that takes an important step to address the disturbing level of youth violence in the city of Chicago. My amendment would allow the Attorney General to dedicate up to \$5 million from the Office of Juvenile Justice and Delinquency Prevention to community-based, street-level violence prevention efforts.

It breaks my heart to read the Chicago newspapers and see the stories of senseless violence that occurs on a regular basis. Stories such as that of Chastity Turner, a 9-year-old girl who was shot and killed last June while she washed her pet dogs outside her home in Englewood. Or Simeon Sanders, an Army soldier who was on furlough back home in the south suburbs when he was fatally shot in front of a community center this past July. Or 17-year-old Corey McClaurin, a high school senior shot and killed by a gunman while sitting in his car just a few weeks ago. Many of us have seen the shocking, startling videotape of the beating

death of 16-year-old Derrion Albert, buried in Chicago last Saturday.

These stories simply overwhelm us. My heart goes out to the families and all the loved ones grieving for their loss. No one ever should have to face the tragedy of losing a child to such senseless violence.

All too often this violence ends up involving school-age children. We lose a classroom's worth of schoolchildren each year to deadly shootings in Chicago and hundreds more are injured. Chicago is a great city. I love representing that city and being part of it. It breaks my heart to think that for many people across America, this is a new image, an image of children being killed in the streets, shot, beaten. It isn't what the city is all about. It isn't the values of the city. But we have to do better. Youth violence is devastating to families, communities and schools in Chicago and other urban centers.

Wednesday, Mayor Daley and the CEO of the Chicago public schools, Ron Huberman, met with Attorney General Eric Holder and the Secretary of Education, Arne Duncan, to talk about ways to stop this epidemic of violence. As this meeting demonstrated, officials at the local, State, and Federal level are committed to taking bold action. Starting this year and using Department of Education dollars that were made available through the economic recovery package, the Chicago public school system will provide an unprecedented degree of intervention and support for school children who, according to statistical indicators, are at the greatest risk of being caught up in violence.

This plan provides employment and adult mentoring for at-risk students. It provides structure and guidance to help prevent them from becoming victims. This comprehensive youth violence plan will also involve coordination with law enforcement, particularly to help secure areas on the way to and from schools where kids tend to congregate and where violence often flares.

Ron Huberman is a very smart man. He runs our public school system in Chicago. Previously, he had been a Chicago policeman. He tried to analyze the school violence and come up an approach. What they did was to enlist some experts who did basically a statistical profile of both the victims and perpetrators of violence over the last few years in Chicago. Who are these young people? How do they find themselves in these predicaments? What are indicators that they are likely to become violent in their own lives or become victims of violence? He found recurring patterns. What he has suggested, with the cooperation of Mayor Daley, is intervention at an early age so we can get to these children before they become victims, before they turn

to violent ways. It is an innovative and thoughtful approach. I support it.

I am pleased the Justice Department is providing substantial assistance to Chicago to combat crime. It has been one of my priorities in recent years to make sure the Justice Department is doing all it can to partner with Chicago to try and stop youth violence.

Last year, then-Senator Obama and I asked Attorney General Mukasey to include Chicago in the Department of Justice's Comprehensive Anti-Gang Initiative. This is a program which provides extra money for selected cities for gang enforcement, prevention, and prisoner reentry initiatives. At our request, the Justice Department included Chicago and has provided \$2 million in additional Federal funding for this purpose.

I have also strongly supported the COPS Program and Byrne-JAG grants, and so many other areas where we have assisted law enforcement. Over the last 2 years, we have been able to provide dramatic increases in law enforcement funding for Chicago and Cook County. In fiscal year 2008, Chicago received \$1.4 million in Byrne-JAG local law enforcement grants. But this year, through the stimulus act passed by Congress at the inspiration of President Obama and through the fiscal year 2009 Justice Department spending bill, we increased that amount to \$35 million, bolstering police efforts in that area.

The Chicago Police Department recently was awarded funding for 50 new cops on the beat through the \$1 billion program the stimulus act provided for hiring new cops.

I know Attorney General Holder's commitment to this issue. I know he is genuine. I raised the matter with him at a Senate hearing earlier this year. He made clear the administration's dedication to helping solve this problem.

Arne Duncan also is a true champion of the city of Chicago, its schools and kids and families who depend on him. He wants to reduce violence and is dedicated to it.

The efforts we are putting into Chicago have helped some. In the first 7 months of 2009, we saw an 11-percent drop in homicides and a 9-percent drop in all crimes. This is due, in large part, to the dedicated efforts of law enforcement. But while beefed-up law enforcement is essential, it is not enough. We have to do more to prevent children from turning to violence.

I have worked with a group called CeaseFire, which goes into the most violent neighborhoods of Chicago and tries to treat violence as if it is a public health issue. How do you eradicate a public health issue? With intervention. They do it on the streets. I have put—and I will use the word—earmarks in continuing appropriations bills year after year for CeaseFire, a community-

based program to bring peace to the streets of Chicago. No apologies. It is an earmark. I will put it in again, if I get a chance, because I believe they are saving lives, and it is money well spent.

CeaseFire was reviewed by the Justice Department in an evidence-based study and was found to have a significant impact in reducing shootings and killings. The amendment I will offer, when we get a chance to return to this bill, will help enhance the efforts of crime prevention organizations such as CeaseFire. It only permits—it doesn't mandate—the Attorney General to devote up to \$5 million of grant money from the Office of Juvenile Justice and Delinquency Prevention for community-based violence prevention.

As Attorney General Holder mentioned Wednesday in Chicago, the administration supports community-based programs. This gives them the resources to make that work. It doesn't require an offset. It simply broadens the purposes for which the administration can use existing funds.

The problem with youth violence is not new, and it is not exclusively Chicago's problem. But it is not inevitable either. We must help provide a safer, more stable environment for these kids. It will take a sustained commitment to do so. My amendment is a step in that effort I hope my colleagues will support. I urge adoption of the amendment when we return to the bill.

I yield the floor.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. BROWN. Madam President, I thank the Senator from Illinois for speaking out for justice in his community and across the country.

I ask unanimous consent to speak for up to 2 hours, time which I will control and disperse to others, as in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### HEALTH CARE REFORM

Mr. BROWN. Madam President, I take the floor tonight with my colleagues Senators MERKLEY, STABENOW, UDALL of New Mexico, CASEY, and WHITEHOUSE to talk about the public option and why the public option is so important to our Nation and to improving our health care system. I will speak for the first 10 minutes. Then I will turn to Senator MERKLEY, who serves with me on the HELP Committee and has done such a terrific job helping to write the health care bill. I wished to start with something I have done for several weeks and that is to share letters from people in Ohio who, by and large, have health insurance they were satisfied with.

They thought they had a good health insurance policy. In these letters, typically, people tell me when they get sick, they have very costly health problems, long hospital visits, doctor

visits, tests. They end up losing their health insurance. The insurance company cuts them off because they have become too expensive, which is not even insurance. That has happened too many times. That is one of the reasons this is so very important.

I know Senator STABENOW gets letters from Lansing and Detroit. I know Senator MERKLEY gets the same kind of letters from Eugene and Portland, from all over his State.

Joyce from Ottawa County, west of where I live on Lake Erie, writes:

I am a 77-year-old great-grandmother who knows how the expenses of health care create a constant worry for families. My oldest daughter and her husband have three children and they are in dire straights. He might lose his job soon and she recently lost hers after 13 years with the company. Their health coverage is due to expire in December and they have received estimates for coverage of \$1,000 a month. There is no way for them to pay, and at age 54 and 61, they are not [close to being] eligible for Medicare. My fear for my grandchildren and great grandchildren is that they struggle day after day to find a job, care for themselves with pride. They want to go to college but they know they will owe tens of thousands of dollars when they graduate and still not be able to find a job or afford health care. Please fight for a public option to help my family.

Joyce understands what the public option will do. It will bring discipline to the market to keep prices in check. It will make health insurance companies honest so they can't dump people from their plans because they are more expensive or because they have a pre-existing condition. They can no longer discriminate based on disability or age or gender or geography.

Jill from Defiance, in northwestern Ohio near the Indiana border, writes:

Later this month, I'll be losing my job due to the economy. I will no longer have health insurance. Based on my unemployment pay, I will not be able to afford COBRA . . .

COBRA is the extension of insurance for people who have lost their jobs. Under COBRA, the insured person has to pay both her side of the insurance policy and her employer's side. When they lose their jobs, they rarely can to that.

. . . I will not be able to afford COBRA and pay for my house, utilities, [other] bills, and food. Me and the other 150 people losing their job at the plant will be lucky to find new jobs, let alone afford health insurance. We need health reform now with a strong public option.

Jill understands, as does a majority of my colleagues and an overwhelming number in the House of Representatives and an overwhelming number of the public—by 2 to 1—that the public option matters because it will make sure people who don't have insurance now will go into an insurance exchange and will have choices. They can choose CIGNA. They can choose Blue Cross, Aetna. They can choose Medical Mutual, an Ohio not-for-profit company, or they can choose the public option. It

is all about choice. People can decide: Do I want the public option? I like Medicare. Or do I want to go into a private plan.

The last letter I will share is from Brenda in Lorain County. She writes:

My husband is retired but has to get insurance through a private insurance company. Neither of us will be eligible for Medicare. My husband for 3 years, me for 4 years. Our plan is ridiculously overpriced and the premiums, deductibles, and co-pays have almost doubled in the 3½ years since my husband retired. All this is happening as we get older and need health care. Please fight for health reform including a public option. Every American citizen should have affordable health care without exception.

As Brenda points out, people who are so often losing their jobs are in their fifties and sixties. Their health problems are increasing. People in their fifties and early sixties obviously have more health problems than people in their thirties and forties. And that is when they are losing their insurance.

That is why this legislation is so important for people and why the public option will make our health insurance plan significantly better.

Some 77 years ago, President Roosevelt addressed the class of 1932 in my mother's home State of Georgia. His task was not an easy one: to give hope to young people beginning careers at the worst moment possible. He may as well have been giving hope to Americans today who have lost a job and with it their health care.

FDR said:

The country needs and, unless I mistake its temper, the country demands bold, persistent experimentation. It is common sense to take a method and try it: If it fails, admit it frankly and try another. But above all, try something. The millions who are in want will not stand by silently forever while the things to satisfy their needs are within easy reach.

It is time to try something different. The insurance industry has had nearly a century to provide coverage to all Americans. It is safe to say, if we rely on that industry to cover all Americans now, we will be disappointed. If we rely on them to take charge of our health insurance system, as they have now—if we rely exclusively on them, we will be disappointed again.

We need a public insurance option, one that is designed to compete fairly with private insurers but differs from them in two crucial aspects. No. 1, the public plan will not pick and choose where to locate. Instead, it will offer coverage in every corner of this country—from the Presiding Officer's State of New Hampshire, to Senator MERKLEY's Oregon, to Senator STABENOW's Michigan, to Ohio, and to Florida—it will offer coverage in every corner of the country that is affordable, continuous, and patient-focused. You do not see Medicare turning down somebody for a preexisting condition like the insurance industry habitually does in the country.

Second, if the public plan takes in more premiums than it needs, it will return those dollars to enrollees. Not a dollar will go to Wall Street, not another dollar will go to huge CEO salaries—more on that in a moment—and not another dollar will go to massive ad campaigns.

For these and many other reasons, we need a public option. The public option will protect the public from price gouging. It will protect the public from rescission tactics. That is an insurance company word—"rescission"—that disqualifies people who have insurance from keeping their insurance. It will protect the public from insurance loopholes that deny you coverage, deny you care, and deny you financial protection. The public option will protect the public from premium markups that pay for outrageous CEO salaries and sales trips to Tahiti.

I want to show, just for a moment, some of these CEO salaries for 2008. This is in millions, in case you cannot see that directly on the chart: Aetna's CEO's salary, \$24 million; CEO of CIGNA, \$12 million; CEO of Well Point, \$9.8 million; CEO of Coventry—it is not even an insurance company I am particularly familiar with—\$9 million; CEO of Centene, \$8.8 million; CEO of AmeriGroup, \$5.3 million; CEO of Humana, \$4.8 million; CEO of HealthNet, \$4.4 million; CEO of Universal American, \$3.5 million; and the poor man or woman at UnitedHealth Group, that CEO is only bringing in \$3.2 million.

The point is, these CEO salaries are from these same companies that turned down somebody in Findlay, OH, or denied care to somebody in Warren, OH, because of a preexisting condition, or they take a patient in Springfield, OH, who has been a little bit too expensive for their company, and they have this cap on their insurance costs, this annual cap, and they disqualify them from further care. They practice their rescission in order to pay these kinds of CEO salaries.

The public option will also protect the public from insurance that is unaffordable, unresponsive, and unreliable.

Our Nation should try something new when it comes to health reform, something that gives Americans more options and the insurance industry a reason to cut out the fat from health insurance premiums.

Some of my colleagues in Congress believe a public insurance option will harm the private insurance industry. That industry, however, has profited from competing with Medicare. Taxpayers did not profit from that deal, but that is a story for another day.

The insurance industry profited from competing with Medicare, and it will profit from competing with the public option. There is simply no reason, when we have this competition, that

the insurance companies will not continue to make money. They are going to have 40 million new customers—40 million new customers. Several million will join the public option, to be sure. But these insurance companies will continue to find a way to make money because they are competing. They will be competing on a level playing field with the public option.

The insurance industry claims to be infinitely more cost-efficient and capable than a public plan could ever hope to be. The same industry, though, on the other hand, insists it will go under if forced to compete—level playing field or not—against a public option.

So think of it this way: On the one hand, the insurance industry tells us: We are going to be put out of business. The first thing the insurance companies say is, the government cannot do anything right. The government is bloated. The government is bureaucratic. The government is inefficient. They just cannot do anything right. But then they say: This public option, it is just going to put us out of business because it is going to be so efficient.

So which way is it? Of course, we know how efficient Medicare is. What the public option is going to do is make these private insurance companies a lot more efficient and make them approach the levels of efficiency in Medicare.

The private insurance industry is not trying to help our Nation make the right reform choices. It is trying to help our Nation put more tax dollars into insurers' pockets. I do not want to see all these 45 million people with government subsidies who are going to get insurance forced into insurance company plans with no choice.

The opponents to the public option are saying: These people should not have choice, they should have to go with their tax dollars—in some cases, their subsidies or their own money—they should have to go into private insurance. We say: Let them choose to go into private insurance, but give them the opportunity to go into the public option.

In my comments, I am not saying the insurance industry is evil. The insurance industry is loyal to their shareholders. They want to make a buck. They do not have rules. They are allowed to disqualify people. We are going to change the rules so they are not allowed to do that.

We need a public-private solution that addresses the needs of every American and discourages wasted spending. That is why I support a public option. That is why I believe my colleagues should too.

As FDR said, it is time to do something. It is time to do the right thing.

Madam President, I yield as much time as he would need to Senator MERKLEY.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. MERKLEY. Madam President, I thank very much my colleague from Ohio, and I appreciate his advocacy for the working people of America, working to make America work for working Americans, both in terms of jobs and in terms of our health care system.

I rise tonight as well to address the importance of a public option. Here is where we are right now. We are within reach of a historic opportunity to provide accessible health care to every single American, and that would be tremendous. But if that accessible health care is unaffordable, then we have not reached our goal.

Right now, the cost of health care is doubling about every 6 to 7 years, and the pace is accelerating. It doubled over the last 9 years, and now it is on pace to double in 6 or 7 years. So folks who could afford insurance just a few years ago cannot afford it today, and families who can afford insurance today are not going to be able to afford it a couple years from now. So it is essential—essential—we bend the cost curve. Perhaps the most powerful instrument for bending the cost curve is the public option because it is the public option that brings competition and choice. This is as American as apple pie. Competition and choice result in better service and lower costs.

Much of our Nation—our health care consumers—do not have a real choice. A couple companies dominate the market, dictate the terms, deny folks coverage, or drop coverage. So doesn't it concern all of us a little that after someone has paid their premiums for a decade or 15 years or 20 years, and they get really sick, the insurance company says: We are not renewing your insurance? That certainly is not a health care system.

When you do not have choices, you do not have improved service, you do not have lower costs. But a public option changes that equation because it introduces real competition in every health care market in America. It adds another choice for our citizens in every health care market in America.

This is important to stress. This is a choice. My colleague from Ohio pointed out this point, but I will point it out again. Sometimes as to the idea of introducing a community health plan or a public option, it is attacked by saying: What does government do well? Why would we want a plan from the government? Then the same critics turn around and say: The government is going to create a public option that is going to work so well it is going to drive every other option out of existence.

You cannot have it both ways, and neither extreme is accurate.

We have seen this idea work in many States in related areas. For example, in the State of Oregon, 20 years ago, Oregon's workers' compensation market was a mess. It is a form of insurance,

and it is a form of health insurance. It is a form of insurance for workers on the job. We made reforms to that market in the last 20 years, including a redesigned public option that resulted in premium rates that are today less than half of what those rates were 20 years ago.

Let me repeat that. As a result of our reforms with a redesigned public option in Oregon's workers' compensation market in the last 20 years, it has resulted in premium rates today that are less than half of what they were 20 years ago. That is the result of introducing competition. That is the result of introducing choice.

The public option for workers' compensation was successful. It came under fire from insurers who did not like competition. But it was our business community that stepped up and saved it. Think how powerful it is for the success of a business to have good service and low premiums on workers' compensation. Translate that: how important it is to the success of our families to have good service and low premiums in their family health care premiums.

The public option in workers' compensation has been an economic development tool for the State of Oregon. During the last downturn, we recruited Amy's Kitchen—an organic food producer—into southern Oregon because they could save \$2 million a year in workers' compensation rates from the place they were formerly doing business.

Well, this is what we need to do with health care. We need to have competition in every corner of this country. We need to have choice in every corner of this country. We need to empower consumers by giving them a community health option or a public option.

Madam President, I am pleased to speak to the public option tonight, and I look forward to comments from my colleagues. I thank Senator BROWN from Ohio.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. BROWN. Madam President, I thank the Senator from Oregon. We will hear in a moment from Senator STABENOW, who is a member of the Finance Committee, and who on that committee has been so active in helping preserve people's plans who have insurance who are satisfied with it, and building those consumer protections around those plans. She has also been a strong advocate in the Finance Committee for the public option and all that comes with that.

I yield to Senator STABENOW.

The PRESIDING OFFICER. The Senator from Michigan.

Ms. STABENOW. Madam President, I thank Senator BROWN.

I want to thank my friend from Ohio—and before he leaves, my friend from Oregon as well. We are so proud

and happy to have the Senator from Oregon with us as one of our terrific Members, coming from being the speaker of the house in Oregon, and leading on energy and being passionate on health care and jobs. It is just wonderful having the Senator with us. So we appreciate his advocacy on this important issue.

I want to thank my friend from Ohio. I think we have States that are more alike than any two States I can think of in the Senate because of the challenges that have undergone the auto industry and manufacturing—the extent to which we understand that fair trade is important, that health care and jobs are critical. We also fight to protect our Great Lakes. So we have many ways in which we are team partners in the Senate, and I want to thank the Senator from Ohio for his leadership in bringing us together again to speak about a critical part of this health care reform effort.

I also want to recognize the Senator from New Mexico, whom I see on the floor, whom we are very proud to have with us, as well, coming from the House of Representatives, who has done such a wonderful job in transitioning, hitting the ground running. And with the Presiding Officer, the Senator from New Hampshire, who is presiding, we have a fantastic group of Members who have joined us who are going to help us get health care reform done, as well as tackle energy and a number of different issues. So it is a pleasure and honor to work with you.

As I speak about health care and the importance of having a public insurance option, I first want to take just a moment to note another issue that is very much tied to health care but an action that was taken a while ago—a very concerning action, again, where the Senate Republican leadership chose to block us moving forward on the extension of unemployment insurance.

As our Presiding Officer from New Hampshire knows, having been a leader in bringing us together and putting forth a plan to be voted on, it was incredibly concerning to me that, in fact, the effort and the proposal to extend 14 weeks of benefits for all of the people in all of our States who are currently unemployed or who will soon be unemployed, with an additional 6 weeks for States such as mine with the very highest of unemployment levels, was blocked one more time on the Senate floor. This is not what we ought to be doing.

When we look at what is happening in our State with about 15 percent unemployment, everyone understands the challenges we are going through. We have people who want to work. They want to work. They are looking for work. They may be piecing together income in a variety of ways. The difference between their being able to keep a roof over their heads for their

families and food on their tables right now has been the efforts of extending unemployment that we did with our great new President, President Obama, coming into office and making that a priority. We made it a priority in the Recovery Act. Now we are at a point where we need to extend that.

We expect in Michigan alone that 99,000 people will exhaust their unemployment benefits by the end of this year; tens of thousands of people coming to the unemployment offices. So this is critical for us. We are not going to go away. We are going to keep right back at it until we get this done.

The same thing is true with health care reform because there is a direct relationship. As I start to speak about health care, I wish to say one of the very positive things of the many positive things about the legislation we will be voting on is that we want to strengthen it with a strong public option. One of the very important pieces of this legislation we worked on in the Finance Committee, and supported by the HELP Committee as well, creates a real safety net so if you lose your job, you don't lose your insurance. This is absolutely critical.

We are talking about extending unemployment benefits for people who have been trying to find work and can't find work. Well, what we all know is that when you lose that job, too many people also lose their insurance. Then they lose the house. Then they lose whatever comes next—the car or the kids can't go back to school. So it is all related. In our health care bill, we make sure there is a real safety net and that people who lose their jobs know they will be able to have insurance, and that is very important.

It is also critical, for people who are looking to purchase insurance, that they can get the very best price. It is important that people who have insurance can keep it; that they know what they are paying for they actually get, by the way, which is why the insurance reforms are so important; so you are not dropped right when you get sick or blocked from getting coverage. We know in order to create this new pool for individuals and small businesses that can't find or afford insurance that it is absolutely critical, if we are going to say everybody in the United States of America needs to have insurance, that it be affordable, that it be competitive in the marketplace, and that people be able to have every choice possible available to them. That is what we are talking about tonight because, ultimately, this is about providing real stability and security for American families.

I received a letter from a constituent of mine, Lynn, in Marshall, MI. She wrote:

In the space of two months, my husband's income was cut 25 percent because of the economic downturn. At the same time, our

oldest son, 21 years old, was diagnosed with leukemia.

Every parent's worst nightmare.

To date his bills have totaled about \$450,000 for treatment. While we currently have insurance, I worry about my son and how his ability to obtain adequate health care will forever be affected by his illness. His leukemia has an exceptionally high cure rate, but how will he afford his own health insurance which will likely affect his ability to stay healthy for the rest of his life. He is only 21 and on the verge of graduating from college. Once he graduates, he will lose his coverage under my husband's plan. His treatment won't even be finished by the time he graduates. I lay awake at night and worry how we will finish his treatment.

Lynn, everybody who has ever had a child worries about this kind of scenario and what could happen for their children. That is why we are here tonight. In the richest country in the world, no parent should have to lay awake at night worrying about how their son or daughter would be able to find the health care they need.

In our reform in the Finance Committee, there is great news from part of what Lynn talked about, and that is we have extended health insurance for young people on their parents' policies until age 26. That is incredibly important and very positive. But when he then goes into the marketplace to find insurance, will he be able to find affordable insurance in this new exchange we set up? The way to guarantee that happens is through a strong public option, a public choice. You don't have to choose it. That is the great thing about America. We are all about choices.

So we make sure there is a real competitor in the marketplace that is pegged to the real costs of health care and that doesn't have to worry about making a profit, that doesn't have to worry about marketing, that doesn't have to worry about other costs, but strictly providing health care and the costs of providing health care in the marketplace. Having that kind of competitor will make sure everybody is honest about the real costs associated with providing health care.

We know there are very powerful interest groups that have lined up to slow down or to stop this bill from passing, and they are bitterly opposed to a public insurance option. They know it will bring down costs, it will hold insurance companies accountable, and will bring down the overall costs for taxpayers because of what we are doing in health care reform, now and on into the future. We don't need to hear from more of those voices. We need to hear from our own constituents who are struggling every day with the rising costs of health insurance.

That is why I created my online Health Care People's Lobby, so people in Michigan can have their voices heard. We have had over 7,000 people respond. I am very grateful we have had

hundreds of stories that have been shared with us. I am so grateful for all of those.

Lisa from Novi, MI, signed up for the People's Lobby, and she wrote:

I am one of the lucky ones. We have health insurance and everyone is healthy. However, with just routine doctor visits, the time spent deciphering bills and reconciling what the insurance company paid and what we owe can be overwhelming.

Haven't we all been through that?

Our insurance is a primary reason my husband has stayed with his current employer at a lower salary, because most new job opportunities don't offer coverage. I strongly believe in a public option.

The reason we are here on health care reform and the reason we have a sense of urgency about it is because, as Lisa said, many new job opportunities don't provide health insurance, and we know we have to do better in this country. That is the point of creating a large pool for people who can't find insurance, don't have it through their job, to be able to pool people together and have an insurance exchange. But as I said before, to make sure that works, to make sure it is really affordable for families and for small businesses, we need real competition of a public insurance option.

Another constituent, Glenn from Sterling Heights, is 62 years old. He got laid off in December, and it doesn't look like he will be called back. He writes:

I am too young for Medicare. I have a pre-existing condition, so nobody wants to insure me. If I get sick before I can get Medicare, my savings and everything will be wiped out. This is not the way I pictured retirement was going to be. I raised four children, got them through school, and married. Paid taxes and did what I thought was right and moral things to do. I didn't create this mess, but I am sure paying for it.

There are many people in Michigan in that very same situation that I am fighting for every day. In our insurance bill, first we have positive responses to this issue. We are going to stop the banning of insurance because of pre-existing conditions. That is extremely important. We have help in this bill for early retirees to make sure we can help with the costs. But to make sure this whole system works together, we need a public insurance choice for Glenn so that if the other options don't work for him at 62 years old, he has a choice where he can go to an option that is affordable and is focused totally on providing health care for him. A public health option would give Glenn some hope. It would give him security until he is able to get to Medicare, so that he wouldn't lose everything if he had a medical crisis.

Glenn is not alone. We know 62 percent of bankruptcies occur because of the medical crisis. We know 5,000 people every day lose their homes to foreclosure because of the medical crisis.

I have literally received thousands of e-mails and stories from people around

Michigan, and I wish to thank everyone who has e-mailed me, who has shared their story. We have literally thousands of stories of people who have gone through so many different experiences of worrying about whether they are going to lose their insurance, trying to figure out how to pay for their insurance, not being able to find insurance because of a preexisting condition, not being able to find something affordable as an individual going out into the marketplace. We have heard thousands and thousands of stories from Michigan, and they all say act now. Give us choice, real choice and competition.

We know having a public insurance option is the way we guarantee all of this fits together. So for my constituents—for Lynn, for her son, for Lisa and Glenn, for the 11,000 others who have signed up for the People's Lobby—I urge all of my colleagues to join with us to make sure with all of the pieces we have put into these bills that are so important and so positive that we bring it all together by including a public health insurance choice for people so that if the private, for-profit companies in the exchange are not able to give people affordable insurance, they know ultimately they can find it.

I thank you very much, Mr. President. I wish to thank my friend from Ohio again for his passion and his time and efforts, and I yield the floor back to him.

The PRESIDING OFFICER (Mr. BEGICH). The Senator from Ohio.

Mr. BROWN. Thank you, Mr. President. I thank the Senator from Michigan for her steadfast leadership advocating for workers in Michigan and across the country.

We have been joined by Senator UDALL of New Mexico, as well as Senator WHITEHOUSE from Rhode Island, and Senator SANDERS from Vermont. Senator WHITEHOUSE and Senator SANDERS played a role on the HELP Committee to put this legislation together.

Before turning to Senator UDALL, I wish to read another letter from Phil in Franklin County in central Ohio about his situation and then talk to the Senator from New Mexico for a moment.

Phil writes:

When I was 8 years old, my father suffered a stroke despite being a physically fit nonsmoker. Despite having employer-based insurance, I still recall my mother in tears on the phone with the insurance company arguing for something she shouldn't have had to: That the insurance company cover the care my father deserved and the care for which he paid.

In America, we are supposed to prize competition. It is the lack of competition that drives inefficiency in our health care system.

It has become clear that health insurers are either incapable or unwilling to reform themselves and control costs.

Among the many reforms our system desperately needs, we need a public option to promote competition and keep private insurers honest.

We, your constituents, need help; we need you to represent us, not the insurance companies. As consumers, the more choices we have, the better off we will be.

Phil understands this from his mother, who was pleading with the insurance company to be fair and to live up to their side of the agreement. His father paid for insurance for years. He suffered a debilitating stroke, and she had to push and push and push. With the competition that a public option would bring, those kinds of things won't happen.

A moment ago, I was speaking with Senator UDALL. We were talking about competition. In my State, Ohio, one health insurer, WellPoint, controls 41 percent of the market. WellPoint and one other insurer control nearly 60 percent of the market. We were looking at this map. On this map, the dark purple illustrates those States where more than 80 percent of the market is controlled by 2 companies. I am not a lawyer—and I am sure not an antitrust lawyer—but I know if 2 companies have 80 percent of the market, there are a lot of games being played.

When two companies have that percent of the market, you can see why those CEO salaries I put up earlier are so high. Look at these salaries. You can see what the CEO of Aetna makes, \$24 million; Cigna, \$12 million; and WellPoint, almost \$10 million, in my State. In Montana, 2 companies have more than 80 percent of the market; North Dakota, more than 80 percent of the market; Minnesota, more than 80 percent of the market. Two companies. In Iowa, 2 companies have more than 80 percent of the market. The same is true in Arkansas, Alabama, Alaska, Hawaii, and Maine, 2 companies have more than 80 percent of the market. The lighter color on the chart—the medium color is where 2 companies have 70 to 80 percent of the market. No wonder these companies charge so much. No wonder insurance company salaries are so high. No wonder people are denied care and have nowhere to turn, because there isn't any real competition when you have 2 companies that have 70, 75, 80, 90, or maybe 100 percent of the market.

In Senator UDALL's State, which is not quite like mine, 2 companies have only 50 to 70 percent. In Maine, it is 58 percent. I am not sure exactly what his State is. Even then, two companies have more than half the market. Insurance prices in Santa Fe, Albuquerque, and Truth or Consequences—my favorite name of a town in New Mexico—are too high, just as they are in Lima, Findlay, Zanesville, and Cleveland, in Ohio; and the service those companies bring to customers isn't particularly

high quality. Those customers are denied care because of preexisting conditions, because of discrimination, and because of annual caps and lifetime caps.

Again, I thank the Senator from New Mexico, Mr. UDALL, for joining us to discuss some of these issues about his support for the public option.

Mr. UDALL of New Mexico. Mr. President, I ask unanimous consent for those of us on the floor to be able to carry on a colloquy about a public option.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. UDALL of New Mexico. Mr. President, I say to Senator BROWN that the number in New Mexico—the Senator from Ohio has a range on his chart, but the number in New Mexico is actually 2 companies controlling 65 percent of the market. So we are talking about a situation that isn't very competitive. I think that is the bottom line of what we have been hearing.

We have had our colleague from Oregon, Senator MERKLEY, and we have had DEBBIE STABENOW from Michigan, and other colleagues are here on the floor, speaking to that situation in their States, and why we should proceed with a public option.

Let me first say to the Senator from Ohio, I appreciate his leadership. I know he was on the HELP Committee, which is the one that wrote the public option we have the opportunity to put in the final legislation. He was on the committee. Some of us are getting into writing the legislation now. But one of the best public options out there is the one that came out of Senator Kennedy's committee. It has been passed for a couple of months. It is sitting right there ready to go, if we just put it in.

When we talk about a public option, what exactly are we talking about? I think people have a right to know a little bit about what we are talking about when we say public option. I think if I outline that a little bit, people will see why it is so important to have a public option, so let me give a little bit of an outline.

First, it would be voluntary. We are not forcing anybody to get into it. We are talking about a voluntary system. So you would have a choice to get into it, based on whether it would fit your particular circumstances.

The public option would not be subsidized by the government. It would be fully financed by premiums. So this would be something where people would be paying premiums, the premiums would come in, and we wouldn't be adding to the deficit. We would be creating a good, solid insurance situation and insuring people.

We have heard, as Senator BROWN has talked about here—he put up a chart about these incredible salaries. One of the things a public option would do is

you won't make profit for the shareholders. You have the opportunity to take those premiums and put them all back into health care. So that, once again, is something that is very important.

Let's look here at this chart Senator BROWN has loaned me. Look at the total compensation for CEOs of major health insurance companies in 2008: Aetna, \$24.3 million; Cigna; WellPoint; Coventry—look at these salaries. There is a total, for these 8 or 10 companies, of \$85 million in salaries.

What we are talking about is money being spent on health care for people through a public option. One of the other things that I think would be a hallmark of a public option would be having low administrative costs, since it operates on a nonprofit basis. One of the things you should know about these insurance companies where you have these CEOs working is that they have administrative costs in the range we have heard about, 30 percent administrative costs. So what happens here is that the money comes in on the premiums, but they spend an incredible amount of time going back and forth denying claims, telling doctors they should not put that in, they are not going to cover it, and it builds up into a big administrative cost.

The great thing about a public option is you don't have high administrative costs. One of the comparisons there, as Senator BROWN and Senator SANDERS know, is that I think Medicare has 3 percent administrative costs. Here you have a comparison of 30 percent to 3 percent.

One of the other parts of a public option I think makes a difference is exerting bargaining power to obtain discounts from providers. That could make a big difference with the public option operating out there. We would offer savings to subscribers with lower premiums. We should follow the same insurance requirements as private plans. What we would offer, through a public option, would be low cost and high value.

Basically, what we are talking about here is keeping insurance companies honest, driving the costs down, and having a competitive market.

Senator SANDERS well knows that the situation right now isn't serving the American people. I know he wants to comment on his situation in Vermont and what's going on there.

Mr. SANDERS. I do. I thank the Senator from New Mexico for his remarks and Senator BROWN for his leadership efforts here. I will say a few words.

If anyone in America does not understand what the function of a health insurance company is, let me give you the bad news. If you think the function is to provide health insurance for people, sorry, you are wrong. The function of a health insurance company is to make as much money as it possibly

can. Do you know what. They do that very well. We have to acknowledge that. Insurers have increased premiums 87 percent over the past 6 years. Premiums have doubled in the last 9 years, increasing four times faster than wages.

Profit at 10 of the country's largest publicly traded health insurance companies in 2007 rose 428 percent from the year 2000 to 2007, from \$2.4 billion to \$12.9 billion, according to the U.S. Securities and Exchange Commission.

What we are seeing is that people are thrown off of health insurance because they committed the crime of getting sick, and they cannot get health insurance because of preexisting conditions. Well, that is the bad news. The good news is that CEO salaries are very high, and profits are doing very well.

At the very least—and I speak as somebody who believes in a Medicare-for-all, single-payer system—this country deserves a strong public option to give people the choice about whether they want a private insurance company.

With that, I yield back my time.

Mr. UDALL of New Mexico. Mr. President, I thank the Senator from Vermont.

I want to also yield to a Senator here and give him the floor—with Senator BROWN's permission. SHELDON WHITEHOUSE, from the great State of Rhode Island, I believe was also on the committee and was intimately working through the bill. It is wonderful to have him here with our colleagues talking about the idea that we have to have a public option.

Mr. WHITEHOUSE. I thank the Senator. I had the real pleasure and honor, along with Senator BROWN, of being among the principal draftsmen of the public option in the HELP Committee. When I think back on the effort we put into it, and the plan we came up with, it is astonishing to me that it is now the public option that appears to be the most contentious part of the American health care debate right now, because the bill we passed out of the HELP Committee in July was very thoughtful. It includes a community health insurance option—a national plan, administered by the Secretary of the Department of Health and Human Services. It will be available in every State and territory. It would offer benefits that are as good as those available through the private insurance plans, or better. The Secretary would negotiate provider payment rates to encourage doctors and hospitals to participate. Americans who need financial help to participate in the public option would get it. And local advisory councils would assure that the public option was sensitive to local conditions and local needs.

To be clear, this plan includes no mandate for doctors to participate, no rate setting by the Secretary, no requirement that any American buy a

public option policy, and absolutely no direct link to the Federal Treasury. Other than the initial capitalization, this plan would operate solely on premium revenue—a completely self-sufficient financial model. It would have absolutely no baseline advantage over private insurance companies. The HELP Committee got here by approving a number of amendments by our friend from North Carolina, Senator BURR, to make sure of this.

Because this version of the public option was so sensitive to these concerns from across the ideological spectrum, the House Blue Dogs, moderates in the House, used a number of our provisions in the House bill to gain moderate support. In fact, the community health insurance option makes so much sense that Republicans have had to resort to illogical arguments to justify their opposition.

For example, they argue that the government should not be in the business of providing health insurance, that it is a slippery slope to socialized medicine. Well, hello, government-sponsored health insurance serves nearly half of Americans—78 million Americans—who are enrolled in Medicare, Medicaid, TRICARE, VA, and they get benefits from the Federal Employee Health Benefits Program, and so forth. We don't hear our colleagues on the other side talking about ending Medicare, closing up the trust fund, throwing our parents and grandparents out to the tender mercies of the private insurance companies. We don't hear that. I have not heard one Republican say they want to deny our Iraq and Afghanistan veterans all the Federal medical care they need when they come home. I don't see Republican Members of Congress opting out in droves or criticizing the Federal Employee Health Benefits Program.

Why? Because these programs work, because Americans rely on them, because they provide dignity and stability in the lives of millions of American families and they have not led to a government takeover of our entire health care system. Indeed, ironically, the very best program is probably the VA program where the level of government involvement is the highest, where they own the hospitals and where they employ the doctors.

Republicans have also been arguing that government involvement in the private health insurance market will be uncompetitive and will push private companies out of business. We see the government competing competitively in a variety of markets in this country—private versus public universities, private versus government student loans, workers' compensation insurance, the Postal Service versus UPS and FedEx. The existence of public options in these markets has not swallowed up private industry. What it has done is broadened the market and en-

hanced the variety of competition consumers enjoy. Think how many people in America right now have a higher education because a State university was there as an affordable option, an alternative to private colleges.

Similarly, a public insurance option adds choice for consumers and adds competition in the market, and it gives private insurers a strong incentive to behave fairly and to keep their costs down. In fact, if one thinks about it, there is hardly an industry in this country where the big players are so far from being pushed out of the market. In fact, if you ask me, the for-profit health insurance industry has been doing the pushing—pushing the American people around—for far too long.

Let me give one example from my home State of Rhode Island. Two years ago, United Health Care of Rhode Island proposed to send \$37 million in excess profits to its parent company, United Health Group, hundreds of miles away instead of investing that \$37 million back into the system. That is \$37 million in 1 year out of a State of only 1 million people in which this company only had a 16-percent market share. With a public option, that \$37 million would have gone back into improving the health care infrastructure in Rhode Island, into lowering premiums, into increasing provider payments, into investing in our health information and chronic care sustainability projects and helping doctors buy electronic health records and supporting our Rhode Island Quality Institute. But no. And this after United had already sent \$16.5 million out of our State in 2004, \$13.4 million out of our State in 2005, and \$17.1 million out of our State in 2006.

Competition is supposed to lower prices for consumers, create demand for a better product, and push bad actors out of the marketplace. I don't see that in the health insurance market. I see 10 States with the two largest health insurance companies controlling over 80 percent of the market. I see a 120-percent increase in premiums from 1999 to 2007, while wages only went up 29 percent. I see a 109-percent increase in administrative costs from 2000 to 2006—a 109-percent increase—as insurers increasingly game the system rather than competing on better quality of care, better health, and lower cost.

As I have traveled around Rhode Island, I have seen how these circumstances work out for individual Rhode Islanders.

David, a self-employed resident in Central Falls, described the astronomical rise in the cost of health insurance for him and his wife. Years ago, he paid \$85 a month for his plan. Today, it is \$19,000 for their annual health insurance. Despite the dramatic jump in price, the health insurance does not cover as much as it used to. David has

been forced to drop dental coverage and increase the out-of-pocket expenses he and his wife pay on their plan.

He wrote to me:

I'm almost afraid to get sick because today's health plans have so many holes in them they can nickel and dime you to death.

Charlotte is a self-employed consultant from Providence. She wrote to share the difficulties she has faced as health insurance became the single largest expense for her company. She buys one of the least expensive plans she can through a small business alliance, but the premium for her current coverage increased by 35.6 percent—more than a third—just this past year, it is covering fewer and fewer tests and procedures, and she has to pay more out of pocket for needed medical treatments. She wrote to me that we needed to move forward on health care reform because “the cost of health care is pulling the plug on my livelihood.”

For these Rhode Islanders and for millions more, there has to be a better way. There has to be a new challenge in this marketplace, a new business model, a new entrant to change the landscape of competition. Instead of competing to lure the healthiest patients, plans should have to compete on quality. Instead of developing a better claims denial procedure, plans should have to develop a better customer service department. Instead of paying executives tens of millions of dollars per year, they should make sure working-class Americans can afford safe and secure health coverage.

Need I remind us that our health care system is teetering on the edge of collapse and the status quo is not sustainable. Over 80 million Americans were uninsured at some point during 2007 and 2008. As many as 100,000 Americans are killed every year by unnecessary and preventable medical errors. Life expectancy, obesity rates, and infant mortality rates are embarrassing by most international measures. The annual cost of our system is closing in on \$3 trillion and is expected soon to double. We spend more of our GDP on health care than any other industrialized country, double the European Union average. More American families are bankrupted by health care costs than any other cause. There is more health care than steel in Ford cars. There is more health care than coffee in Starbucks coffee. It is out of control.

We have two choices: We can derail and delay this debate until unpalatable solutions, such as throwing people off Medicare, drastically cutting coverage, or paying doctors much less, are our only remaining options or we can do what Americans have always done when faced with a tremendous challenge, and that is to innovate our way out.

Government is not the enemy in this undertaking. Americans, with a helping hand from their government, have

done great things time and time again. We put a man on the Moon and an explorer on Mars. We built a Peace Corps and the Marine Corps. We virtually eliminated polio and smallpox. We built the National Institutes of Health and the Federal Highway System. We have mapped the human genome. Government helped then, and it can help now through an innovative public plan.

Let me make one last point. My Republican colleagues have argued that a public option would drown out private competition and amount to a government takeover. In many places from which they made that argument, the facts at home disprove that contention. Twenty-five States actually provide health insurance benefits through public plans. They actually provide health insurance benefits through public plans in their workers' compensation systems.

For example, Kentucky, represented so ably by our distinguished minority leader, is home to Kentucky Employers Mutual Insurance, a State-run public fund which has operated in the State since 1995 and now provides health insurance benefits to 24 percent of the workers' compensation market in a competitive market.

In Wyoming, the home State of the ranking member of the HELP Committee, Wyoming's Worker Safety and Compensation Division delivers all the health care in the workers' compensation system. They have a single-payer public plan. There has been concern expressed that a government plan will give terrible customer service. I doubt that the Wyoming plan would last very long if it gave terrible customer service.

In Arizona, so ably represented in this Chamber by Senators McCain and Kyl, since 1925 SCF Arizona has provided health insurance benefits through the workers' compensation system, and it now has a 56-percent market share in a competitive market environment. To those who have said you cannot have a government plan because it will necessarily crowd out private insurance by virtue of an unfair competitive advantage, Arizona belies that argument. It has been that way for 80 years, since 1925.

To my knowledge, those who criticize the idea of a Federal public option for health insurance have not criticized the role—often a decades-old one—of public insurance plans in their own States' workers' compensation insurance markets.

We have in front of us an opportunity for a new day in the American health care system where affordable, quality health care is available for everyone; where doctors and hospitals are paid for value, not volume; where you cannot lose coverage because of an illness or preexisting condition; where insurance company bureaucrats do not come between you and your doctor; where

care is not rationed by your family's ability to pay; where every American gets the best health care the country's medical system has to offer.

I support the public option because I see that vision for the future, and I think a public option can get us there. I also see this lesson of the past: that an industry—the private insurance industry—that has put its own financial welfare in front of the physical and mental health of its customers for years, over and over again, cannot now be trusted on its own to lead us into that future, not without a push in the marketplace, not without the kind of push in the marketplace a public option will give.

Mr. BROWN. Mr. President, I thank the Senator. I was intrigued by much of what he said.

We are also joined on the floor now by Senator BENNET from Colorado, and Senator CASEY and Senator UDALL are still with us.

When the Senator from Rhode Island talked about the Rhode Island experience, I remember while we were drafting the public option language in the Health, Education, Labor, and Pensions Committee, on which Senator CASEY and now Senator BENNET sit, the Senator talked about what a disaster Rhode Island's workers' compensation system was because of the corruption in private insurance and the high costs and that the Senator from Rhode Island introduced a public option into private insurance there. Many States—I believe roughly half the States—have a public option as Rhode Island does and the experience of the Senator from Rhode Island with bringing in this competition.

My understanding—and correct me if I am wrong—is that the public option not only made private insurance operate more efficiently and made private insurance more honest, if you will, and helped to sort of flush the corruption out, but I would guess competition from the private insurance industry made the public system a little bit more nimble, too, right?

Mr. WHITEHOUSE. We actually pretty much had a complete meltdown in the private insurance market, so we had to put in a public option to provide any workers' compensation insurance. But the private insurance companies had written off our marketplace because their business model was impossible to maintain for any reasonable cost. We knew that with good reform in the system and with a public option to implement that reform, we could reduce those costs.

What has happened is two things. It used to cost \$3.93 for 100 hours of payroll for workers' compensation, the year after this went through and got stood up. Today, it is \$1.74. It is more than 50 percent cheaper in Rhode Island. The model that was set by the public option, a new business model

that focused on prevention, on getting people back to work, on better quality medical care, has actually attracted the private industry back into the market.

Mr. BROWN. So the private companies are making money.

Mr. WHITEHOUSE. They are back in and making more with the leadership of the public option.

Mr. BROWN. A lot more honest and a lot more efficient.

Mr. WHITEHOUSE. And they improved their business model, so they are now delivering better quality care, getting people back to work sooner, reducing medical costs by getting people back to work, and providing better quality care. It has been a very successful story from a cost point of view.

It used to be the worst issue for the Rhode Island business community. They were nuts about workers' compensation. We literally had torch-lit parades, and nobody has heard about the issue in a decade because the public option has led the way.

If you think the business community is scared about a public option, go to a State where there is a workers' compensation public option. I think you will find they support it.

Mr. BROWN. I think we can safely predict that 10 years after the President signs a good health care reform bill in November or December which has a strong public option similar to the language our Health, Education, Labor, and Pensions Committee drafted and the House Energy and Commerce Committee passed, we will see the same kind of thing; we will see a more efficient but still profitable health insurance industry, with a public option disciplining the market and keeping prices in check. We no longer will have people denied care because they have a preexisting condition or denied care because of an annual limit or a lifetime limit on coverage. We will no longer see the kind of discrimination in the marketplace we have seen from all of these private companies.

Before turning to Senator CASEY, who has brought the bill to the floor with him tonight to talk about the legislation itself which he helped draft in the Health, Education, Labor, and Pensions Committee, I want to mention that today we submitted a letter to Majority Leader REID that pretty much all of us on the floor signed. Some 30 Senators signed a letter to him today calling on him to support the public option and putting that on the bill when we bring the bill to the floor in the next couple of weeks.

Again, before turning to Senator CASEY, I wanted to read another brief letter I received from Ohio—Kathy from Medina. Kathy writes:

I own a small business with three employees. With the current economy, I can no longer make payments on our health plan. We were paying \$2,000 a month for our plans

and were told we needed at least 10 workers to negotiate a more affordable plan. After dropping our plan, I had to see a doctor because I had difficulty breathing. I now have to see a cardiologist and endocrinologist. I am still in shock at how quickly my health turned into a serious condition. In just a month's time, I have almost \$7,000 in medical bills and I still have further tests and treatment ahead. Unless there is health reform, I will be just another 55 and over American not taking my meds or seeing a specialist when I should because of the high medical bills. It's been upsetting just being seriously ill, let alone facing financial hardship.

I am certainly not a doctor, and I don't know Kathy except through this letter, but you have to figure the anxiety of figuring out her business and trying to manage her health insurance; going without health insurance and her fears are probably making her health and her situation worse. That is why Senator CASEY worked on helping us write the legislation on what you do to give incentives to small business owners to buy insurance, understanding this whole bill will mean that everybody has insurance and so those with insurance no longer will have to subsidize—a tax, really, at \$1,000 a year—all those uninsured.

Everyone who pays insurance pays about \$1,000 a year more for their insurance to compensate for those who go to emergency rooms without insurance and go to doctors and don't pay. They have to recapture that money from somewhere, and it comes from all those who have health insurance. That is one of the most important parts of this bill, to get at the cost.

Senator CASEY.

Mr. CASEY. I wish to, first, thank Senator BROWN for keeping us organized and focused on this issue. When we went through the work of our committee this summer—some 60 hours of hearings and many hours prior to that walking through the bill—there came a point in time when we realized that if we were going to be strong supporters—and we were and still are—of the public option, we needed to define it, we needed to make it readable and understandable to people, and also we needed to fully articulate what it means to have a public option.

A number of people went to work on that—and the two principals of that are with us tonight: Senator BROWN and Senator WHITEHOUSE—spending hours and hours trying to get this right. Contrary to what we have seen in some of the debates and some of the coverage of this issue, this is not very mysterious and it is not theoretical. If you look at the bill—and I will get to sections of the bill in a second—this is meant to be a choice for people. It is voluntary. It is the first word of the section—and I will go through that in a moment.

What we did today, when we sent the letter to the majority leader that Senator BROWN referred to, we outlined very succinctly what this is all about.

Let me read two or three sentences from the letter we sent today. In the second paragraph, we say:

Without a not-for-profit public insurance alternative that competes with these insurers based upon premium rates and quality, insurers will have free rein to increase insurance premiums and drive up the cost of Federal subsidies tied to those premiums.

In other words, unless we have some competition, the insurance companies have free rein to keep jacking up prices. That is what we are living through right now. That is what virtually every American has a concern about. We have a concern about cost. If we don't have competition for insurance companies, they will have that free rein to keep driving up cost.

What is wrong with competition? I thought that was the American way. But I think some people have lost their way in part of this debate. Competition and choice, that is what this public option is all about.

Later in the letter we say this:

It is possible to create a public health insurance option that is modeled after private insurance—rates are negotiated and providers are not required to participate in the plan.

Very simple. Part of this legislation has features to it that are very similar to Medicare—a public insurance program that has worked real well for generations of Americans. But it will also have some of the requirements that insurance companies have to live by. Let me go through a couple of those.

First of all, a public option, in terms of the process starting, would have to get government funding to start. In the way of resources, the government would pay for the first 3 months of claims as a way to capitalize it initially, but then it has to pay back any kind of capitalization over a 10-year time period.

What we are talking about is a program, State by State, that would be self-sufficient. It is very important for people to understand that. This would be self-sufficient. Senator WHITEHOUSE talked about this a moment ago, and it needs repetition and reiteration. It would follow the same rules as private plans by defining benefits, by protecting consumers—we hope any entity would do that—finally, by setting premiums that are fair based upon local costs.

So this isn't some theory. This isn't some idea we don't know how it will work. We know exactly, and the American people know exactly, how this will work because we understand what it is like to deal with a system where the insurance companies have virtually unlimited power to deny you coverage if you have a preexisting condition, for example. The bill also makes that illegal under the bill we passed in the HELP Committee this summer. But also, insurance companies right now have free rein to jack up their prices.

I know there are some State-by-State limitations on that, but mostly free rein exists to do whatever they want. Without a public option, that is what we will have going forward. So if you like costs going up, then you should be against our proposal because costs going up is what we are going to have more and more of if we don't have a public option.

One of the important features is that there be State advisory councils—councils set up in each State, made up of providers and consumers to recommend strategies for quality improvement. So this isn't going to be some Washington control here. You are going to have lots and lots of accountability at the State level, and States would share in the savings that result from that kind of accountability.

Finally, the notion it is a voluntary program. The providers would have a choice of participating in the public option and there would be no obligation to do so. I point to the bill for this reason. When we were in our States this summer, I remember going back to Pennsylvania and reading about Senator BROWN's public forum in the State of Ohio and I was reading about others as well and learning about what was happening in other States. We had our public forums. I spoke to thousands of people over the course of a couple weeks.

One of the things I would say to the audience when we had our public forums is, Look, if you walked in here today and you don't support the public option, I ask you to do one thing: Read the bill. Well, the final version of the HELP Committee bill that I am holding right here was 839 pages. I wasn't asking them to read every page, but what I said to them was: If you don't support the public option, just read that section, which is right now 19 pages in the bill. Section 3106, Community Health Insurance Option. In the bill, it is from page 110 to 129. So it is 19 pages in the bill. I said: Look, spend some time taking a look at it.

I remember at the one public forum, someone who disagreed with my point of view on the public option went at me verbally and said: You are going to force people to go into these public options. I said: That is not true. Of course, saying it doesn't always end the argument. So, then, I would hold up the bill and I would say: Let's go to section 3106, and I would read from section 3106—I know the camera can't see this—subsection (a). The first two words of this section—other than the heading of it—are “voluntary nature.” That is the subheading. So I would read part of that section and say: This is voluntary. Voluntary for any American who goes into the exchange and may decide they want to stay with their own private insurance coverage or may want another—a different—choice. So they can choose this.

It was important for people to understand that in a long bill we at least spent 19 pages to get this right.

There is a solvency standard in here, for example. This isn't some theory we dreamed up in Washington. We know solvency is important; that a program such as this, in an option such as this, has to meet basic solvency standards. Senator WHITEHOUSE spent some time talking about that and helping Senator BROWN and others craft that, along with Senator UDALL, who is with us here tonight. It is voluntary. It has to be self-sufficient.

There is even an audit section. If you want to get into the detail, there is even an audit section. So that when you have administrators, there is a measure of accountability, in terms of auditing.

There are a lot of parts to this that we could go through. The important point, though, is that unless we inject some choice into this and some competition, I am not sure the American people will believe we have done our job. We have said over and over again that among the basic elements of any final health care bill is that we have to have a total commitment to prevention, so we can prevent disease and conditions from leading to bad results for an individual and their family, and prevention will also help us save money at the same time; that any health care bill would have to have choices. If someone wanted to stay with their private coverage, they could do that, but if they wanted other options, we are trying to give them a public option; that any kind of health care reform would have to have quality standards. This will help ensure more quality standards in our system. So I don't believe we can get to where we want to get to in the end unless we have a public option.

Let me make two or three more points, and then I wish to have my colleagues rejoin this discussion and also talk about what we are trying to do. There are a lot of discussions—and I know my colleagues saw these in these public forums where we would have someone stand and say: I don't like a government program or I don't like government in our health care, as if we have a system now that is 99 to 1—99 percent private and 1 percent public. I would remind them—and these are some overall numbers, but it is important to remember—that we have a Medicaid Program right now that at last count had over 60 million people in it—60 million Americans. We have a Medicare Program with about 45 million Americans. Then you go to VA health care, and at last count it has 7.8 million Americans.

So when you go down the list of programs right now that are government-run programs for health care, you get a large number of Americans—well over 100 million Americans—and their fami-

lies who benefit from those programs, and you get a commitment from the Federal Government year in and year out to make sure we have that kind of coverage for those who happen to be poor, those who happen to have particular health care challenges, those who happen to be over the age of 65, those who happen to be veterans and who need health care coverage. So we have an American system right now that has a lot of private coverage, but there is a lot of coverage through government programs that even people who oppose some parts of this bill, the last time I checked, don't want to repeal. I haven't found anyone who wants to repeal VA health care or who wants to repeal Medicare.

I think we have a system right now that is not working in large measure, but there are some things that are working well. We are trying to improve both ends of this, the public health care end of this and the private health care part of our system.

Mr. WHITEHOUSE. Will the Senator yield for a question?

Mr. CASEY. Sure.

Mr. WHITEHOUSE. With respect to your observation that we don't see a lot of outcry about ending Medicare, about ending VA health care, and other government programs, Senator BROWN has been remarkable about coming to the floor regularly to read the true-life horror stories that our present health care system inflicts on Americans and American families across the board. I have brought a great many Rhode Island stories to the floor. We all have this experience.

I am interested in the evaluation the Senator from Pennsylvania might make in terms of his own experience and his own constituent contacts in terms of those heartbreaking stories you get. Do you hear a lot of heartbreaking stories from people in Medicare; people being thrown off for pre-existing conditions? Where in your experience have the real heartbreaking stories come from in Pennsylvania?

Mr. CASEY. I will give you an example. In our State, just in terms of age categories, we have, in terms of children up to the age of 18—we have a 5-percent uninsured rate. It is still too high. Until it gets to zero, we have not done enough, but that number is way down. So we have a diminishing number of children who are uninsured largely because of efforts and initiatives such as the Children's Health Insurance Program. Then, on the other end, those who are over the age of 65, they have Medicare.

Where I am getting the real-life stories from people, people who send e-mails to our office just like to Senator WHITEHOUSE, or people who do it the old-fashioned way, who actually write a letter or people you see in a public forum or on the street—they are coming to us in that age category, 19 to 64.

In our State, that number of uninsured is 12 percent, more than double the number of uninsured children.

For example, I got a letter in February from Trisha Urban from the eastern end of our State near Reading in Berks County. Here was her story in summary.

She was working; her husband was working. But he was trying to advance, as we always tell people we want them to get more education. So he was trying to finish his doctorate. In order to finish that he had to take an internship. The internship did not have health insurance coverage. The coverage they had, ultimately they lost.

Here is Trisha Urban who was working, and her husband was working as well. She was working four different jobs. They lost coverage and then they started to run up bills. Then she became pregnant. While she was pregnant, her husband, who had a heart problem, missed an appointment because they were worried about paying for the doctor visit for her pregnancy and also worried about the doctor visit for his heart ailment. So he skipped his appointment because of his heart problems.

Time goes by, a couple of weeks go by, and all of a sudden her water broke. She was preparing to go to the hospital in a couple of hours, her husband went out and did a few errands, came back to the house, and as she was walking out of the house to go into the driveway to join him in the car to go to the hospital to deliver her baby, she looked in the driveway, and her husband is on the pavement of the driveway dead because of his heart condition, a pre-existing condition which, thank God, in our bill, in the first section of our bill, we make illegal. It should have been illegal a long time ago. I still find it hard to believe that we live in a country where we have allowed insurance companies to do that to people.

She went out and found her husband dead. An ambulance came to take her to the hospital to deliver her baby, and the other ambulance came to pick up her husband.

That is the kind of story we hear in Pennsylvania and across the country because of our system. There is no reason we should tolerate this and let it go on any longer. We have a chance to change it.

One of the ways to move it forward is by making sure we have choices and competition in a public option.

Mr. BROWN. Could I ask Senator CASEY a question? I thank him for that story. Of these stories of people in private insurance, that is as tragic a story as you will ever hear. We have these letters I have read and these stories from Senator WHITEHOUSE, Senator BENNET, Senator UDALL, who have come to the floor and read these letters from people who thought they had pretty good insurance and something

happened and they lost it because they have gotten too sick or they lost their job and they can't afford COBRA and all that.

I want to ask the Senator a question. You mentioned early in your comments about the costs going up. I want to put this chart up and ask about this. Senator BENNET from Colorado will speak in a moment. These are costs under Medicare Advantage. The government, as you know, provides, in large part because of insurance company lobbying, plain and simple—the government provides all kinds of subsidies to Medicare Advantage plans.

These are not most of the Medicare beneficiaries. Most Medicare beneficiaries, 75 to 80 percent of them, are in what is called regular fee-for-service Medicare. Some are in a more privatized Medicare. The government writes checks to insurance companies. You can see how insurance companies have extracted more and more taxpayer dollars as their salaries have jumped and jumped. The poster that Senator UDALL was showing, that I showed earlier, the executive salaries of Cigna and Aetna and these companies have gone into the tens of millions of dollars, in some cases. These subsidies—in 2004 they got \$4 billion; by 2005, \$5 billion. Now the insurance companies basically get a check from the Federal Government for \$11 billion.

Talk for a moment, if you would, Senator CASEY, about what if the public option is competing with these insurance companies. What will it do to these costs as these insurance companies continue to extract more and more money, with their lobbyists, from the government, as they have tried to privatize Medicare?

The public option, talk about what it would do about cutting costs so people like your friend in eastern Pennsylvania—those kinds of things don't happen to them.

Mr. CASEY. I think it stands to reason if you have, as we do in a lot of States, one or two or a very small number of insurance companies that dominate the marketplace, sometimes a lot more than 50 percent of the marketplace but in other cases—in our State we have two that have control over at least half of the marketplace. That alone is bad enough.

Mr. BROWN. In this poster—we talked about it earlier; Senator UDALL mentioned it too—some States, yours and mine are a little bit better. In some States—Montana, Alaska, Hawaii—lets go down to Minnesota, Iowa, Arkansas, Alabama, Maine—two companies have more than 80 percent of the market. Two companies control 80 percent of the market, which means there is no price competition. In some States it is 70 to 80 percent, in Ohio, Pennsylvania, Rhode Island—I am sorry Rhode Island has two companies more than 80 percent also. In all, about almost 10 States.

But in our States—Pennsylvania, Ohio—large States, States with populations over 10 million people, each of those has more than 50 percent. In my State one company has 41 percent; the two largest companies have 58 percent. In Pennsylvania, two companies also have more than 50 percent.

Mr. CASEY. It just stands to reason. If you don't have competition, you have no incentive, no pressure to keep your rates at an affordable level. I do not understand why anyone, in the midst of this debate, is against choice and competition. Both are the central pillars of why we need a public option. What do we do for our health care system? I don't understand the logic.

One point we should make, and we address it in the bill—we will not spend a lot of time on it—we should all remember, you look around, we have 100 Senators. Everyone in the Senate, and all of our families, everybody in the House, and then you add other millions of Federal employees, we have a pretty good deal because we have a system where, as I look at some of the features of the public option, we have a pooled purchasing power.

If you have millions of Federal employees and their families who are in the same pool, that brings costs down. We are trying to get more and more Americans the same opportunities we have, to be in a pool that big and to keep costs down. For the life of me I cannot understand why someone would not like that, especially people who benefit from it and their families who benefit from what the Senate gets.

I have been blessed to have that kind of coverage because I happen to be in the Senate. But every seat here, and then add millions more Federal employees, gets this opportunity because we are in a large purchasing pool. I don't know why a small business owner should not get the same opportunity, a business owner paying through the nose.

I know Senator BROWN has seen this in the State of Ohio. You have heard from small business owners, time and again, haven't you, about what they are paying every day? What we are saying is, if it works for and if it is good enough for Federal employees to get the lower cost/benefit of a large and open purchasing pool, why isn't it good enough for the rest of America?

I say it is not only good enough for them, but we should make sure they have the same opportunities as small business owners or as part of a family. That is one of the reasons the public option makes lots of sense.

Mr. BROWN. Let me read a note from a small business person. I get so many letters from small businesses. You know, like most Americans, they care enough about their employees, their fellow employees, their friends, they want to provide insurance. Almost every small business person I have

talked to who is struggling with health insurance wants to find a way to pay for insurance for her or his employees, and so often they can't.

Let me read a letter, Kathy from Crawford County, which is Bucyrus, Gallion, Crestline, just west of where I grew up. She says:

I am the owner of a small telephone contracting firm. Needless to say, we've been hit hard by the recession.

But our main concern is the staggering cost of health care for our employees. We started the company in 1990 when we were able to fully pay for health insurance for our employees.

But since 2000 our premiums have increased over 250 percent. In 2008 our increase was 37 percent. In 2009, it was 24 percent. We have searched for other health insurance companies but because of the pre-existing conditions of [some of] our employees we cannot switch to anyone else.

Along with the economy, the cost of health care makes it a challenge to stay in business.

This happens too often. That is why in the legislation we wrote in the Health, Education, Labor, and Pensions Committee, we made special provisions for small businesses. If you have 20 people or you have 5 people, if 1 of them gets very sick and costs the pool of 15 or 20 people exorbitant amounts of money, the insurance company either raises premiums so high—increases, as Cathy said, 37 or 24 percent—or the insurance company sometimes cancels the insurance. Either way, it is a terrible hardship and a tragedy for the small business and a tragedy for so many employees.

If we do this right, we enlarge the pool by allowing these insurance companies to go into the insurance exchange or the public option, if they choose—an option. They also get a tax credit. They get a break that way and they are much more likely to be able to afford their insurance.

Let me turn to Senator BENNET, who is a new member of the Health, Education, Labor, and Pensions Committee. He has been outspoken for the public option. Senator BENNET?

Mr. BENNET. Mr. President, I actually am here to talk about something else, but I was so inspired by what the Senator from Pennsylvania and the Senator from Ohio and the others have said, I want to spend a few minutes on this issue. Part of it is I just don't understand what Washington doesn't understand about what our working families and small businesses are going through.

In my State over the last 10 years, median family income has actually gone down by \$800 in real dollars. The cost of health insurance premiums have gone up 97 percent during the same period of time.

There are people who want to leave the system just the way it is, but the result of having flat income for our working families and small businesses, and for those costs going up 97 percent—by the way, in my State the cost

of higher education has gone up 50 percent at the same time. The cost of health insurance, up 97 percent; the cost of higher education up by 50 percent—this is tough on the middle class. It is tough on small business owners in my State.

The result is, if we keep the status quo—there is a great irony of the arguments to keep the status quo—by default, we are putting more and more people off private insurance and more and more people either on public insurance or having the benefit of uncompensated care.

We have seen in my State, you can see it on this chart—probably not all that well—small business spends 18 percent more for insurance than large business just because they are small, and fewer and fewer people in Colorado are able to get coverage at work. Before this recession started it had already dropped roughly 10 percentage points; the percentage of folks who were getting insurance from their employer, from our employer-based system. You can see, the Senator from Ohio certainly can see, the percentage of small businesses in my State able to offer health insurance has declined dramatically.

Where do these people go? They either end up on Medicaid or they end up showing up in the emergency room where they are treated with uncompensated care, the most expensive way we can deliver health care in the United States of America.

We have a wonderful public hospital in Denver called Denver Health, where they do an amazing job at a much lower cost than a lot of other hospitals.

I was told by the woman who runs the hospital—her name is Patty Gabow, a gifted administrator—that they had done a study and they discovered they had spent \$180 million in 1 year on uncompensated care for people who were employed by small businesses. These were not unemployed people, these were not people who could have had access to Medicaid, but people employed by small businesses who could not afford health insurance.

So I think one of the ironic things about the debate we are having is the failure to recognize that the status quo is creating a situation where fewer and fewer people have private insurance and more and more people are moving into public insurance. But it is not being done in a thoughtful way. It has not been constructed that way. So I think that is one of the reasons it is very important that we are having this debate.

I tell the Senator from Ohio, I am sure he had this reaction when he was on recess. I certainly did. I had townhalls all over the State. What I kept hearing from people is this, and this is the reason I support a public option. They would say to me: MICHAEL, we paid every single year, year after year

after year, into private insurance. Every year, we did what we were supposed to do, and then when we needed it, it was not there for whatever reason. Because somebody on the other end of the telephone told them: You are not covered, or the fine print did not cover you for that problem or your child for that problem. They deeply resented the fact, as I would, that someone earned a profit off that commercial transaction.

That is the thing about insurance. It is not like going to the store and buying a loaf of bread or a gallon of milk where you know what you are getting in return. Many people who buy private insurance year after year don't know what they have until they need it and they don't know what they have lost until they lose it.

Having a choice, just another option that is out there, not a government takeover of health care but a choice that empowers working families in my State to make the decisions that are in the best interests of their family or their children—as a father of three little girls under the age of 10, I can understand why people would want that choice. I am not scared by the choice. We have to design it properly, and the HELP Committee did a very good job designing it, in answering a number of the charges that have been made against it. We may be able to do a better job in the final legislation.

The final thing I am hearing from people in Colorado is: If you are going to mandate that we have insurance, if you are going to require that we have insurance, you better make it affordable. You better not tell me I have to have insurance and make it unaffordable. You better not tell me I have to have insurance and I have to change the plans I have for my family.

The public option provides one more choice for people, an affordable choice for people. We have to do a lot more to drive down costs, as I and others have talked about on this floor. But we need to do this right.

I understand, I come from a State where we have a lot of diversity of opinion on a lot of things, and there is a lot of concern about the way the system works today, and there is a lot of concern that we are going to make it even worse. I think we need to elevate the standard of the discussion we are having to the standard that we had, that the people of Colorado had in townhall after townhall, which, by the way, no one would ever have any interest in putting on TV, I am proud to say. We need to elevate the standard of the discussion in Washington so that we can produce a result that has something other than double-digit cost increases year after year for working families.

Mr. BROWN. Will the Senator yield for a question? I heard what you said about buying a loaf of bread and how

buying insurance is different. Before you were in the Senate, you were the superintendent of the Denver public schools and were very successful in business before that. When you talk about how insurance companies deny care and insurance executives get paid well, talk for a moment about the business plan. When you were an entrepreneur and you were a businessperson, you obviously had a business plan. Talk to us. Share with Senator UDALL and me and others what the business plan of a health insurance company is in particular.

Mr. BENNET. I appreciate the question. I will say that I used to make my living buying bankrupt companies. So these were companies that were actually fairly well managed but capitalized really poorly, and our opportunity was to buy them, capitalize them properly, produce a business plan, as you are describing, and make sure the people who worked for them, the people who benefited from them continued to be able to do that.

You know, as a capitalist, I look at the state of our health insurance industry and our health delivery system and I can almost not believe what I see. We have 44 counties in Colorado. Every one of those counties has a convenience store, at least one, some many more than one but at least one. With the exception of the loose beef jerky that is on the counter, there isn't anything in there that doesn't have a barcode on it. It is 1970s technology that our small business owners in Colorado know is critical to managing their inventory, critical to allowing them to be competitive and giving their customers what they need.

Only 3 percent of hospitals in this country have that technology. One out of every 25 doctors has that technology, which is a really simple thing. And it is the reason why—as a parent of three little girls or if you are caring for a parent of your own, it is so frustrating when you go in and you have to explain over and over again what the last person just told you simply because we don't have a system of electronic medical records.

Then, on top of that is a business model where, unlike everything else in our society, every year the cost goes up and the quality to the customer goes down, which is what we see with insurance. We don't see that in other parts of our private marketplace. We don't see that in other parts of our private marketplace where people are incentivized to compete on price, on quality, on customer service. And it is why it is not just enough to have a public option. We need a public option, but we also need commonsense regulation of insurance so that we start driving a marketplace that actually makes sense.

Mr. UDALL of New Mexico. Senator BENNET, one of the things that is happening—and your chart there really explains it, and I wanted to get you to talk about this a little bit—your chart says: Rising health care costs are hitting small businesses the hardest and forcing all Colorado businesses to make tough choices.

That is exactly what is happening in New Mexico, exactly what is happening in Ohio. And really what we have going on here is very hard-working, good small businesspeople who want to give their employees insurance. I hear that. I know the Senator from Ohio said that a number of times when he read letters. They want to give that insurance, but they can't. They search around, they can't find policies they can afford, and so they are really stuck. And I can give you a list of examples in New Mexico.

One of the things you pointed out on your chart is that even before the recession—even before the recession—fewer Colorado small businesses could offer coverage. I was wondering if you could talk a little bit about the small business situation because most of these people are working without insurance.

Mr. BENNET. I appreciate the Senator from New Mexico raising that. I remember a florist I talked to, a family-owned business since 1972 in my State, and he is now down to no employees, just his wife and himself. They are running the shop. They had health insurance for many years, and they took it, as so many small businesses do, as an article of faith that part of their job was to offer insurance to their employees, to make sure their employees had the benefit of insurance. Now they are the only two employees. There is no one working for them. They do not have health insurance themselves.

Their daughter has been admitted to the University of Colorado. He said to me last week: MICHAEL, what was she supposed to do when she got to the box that said check the box if you have health insurance? If you don't, you have to pay this terrible fee.

So, first of all, people are having to make choices they should not have to make and they would not have to make in a rational private market that was working well. That is one of the issues.

The second thing is, as you know—I am sure it is true in New Mexico, and it is certainly true in Ohio—most of our jobs are created by small businesses. Depending on the numbers you look at, roughly 70 percent of our jobs are created by small businesses. And a higher percentage of those jobs are going to be responsible for the recovery that hopefully we are about to have in this country. It is harder and harder to do that if you are carrying the freight of double-digit cost increases in insurance every single year.

The last point I want to make—every small business owner understands

this—as small business owners try to hang on to insurance for their employees and the price of that goes up and up, what that leads to is a choice between holding on to the insurance and compressing the wages of the employees because you can't do both. You can't give people the increases they deserve in their compensation and at the same time hold on to health insurance. So that is a reason we have seen all across this country, actually, a decline in median family income. It has gone down by \$300 over the last decade in the country, \$800 in my State, while the cost of insurance has gone up by 97 percent. That wage compression is directly linked to the problems people have holding on to insurance.

I appreciate the question. I yield.

Mr. BROWN. I thank the Senator from Colorado for his good work and his very good description particularly of how the cost of health care affects small businesses in such a negative way.

We will wrap up in the next 10 or 15 minutes.

Earlier today, a group of Democratic women Senators came to the Senate floor to talk about health care. And some of the things that amaze a lot of us as we work through this, some of the things we hear—in several States in this country, being a victim of domestic violence is considered a pre-existing condition. There are women in this country, believe it or not, who have been victims of domestic violence. Insurance companies have said: You cannot get insurance because of that because, presumably, you might be abused again, you might be hit again, and it would cost us, the insurance company, far too much money. So, believe it or not, they actually can't get insurance because of that. Obviously, this legislation makes that—as Senator CASEY says, there will be no more preexisting condition denials of care, no more discrimination based on gender, based on geography, based on disability, based on age.

One of the other things the bill does that is important is it will eliminate copays for things such as mammograms. We want people, particularly when they get to be my age, when they are in their fifties, we want people to go in and get the right kind of preventive care and get the right kinds of tests. People should have a colonoscopy when they are 50, and people should be tested by mammography and should have mammograms and all of that. I mean, none of us probably goes in as often as we should for the preventive care and the tests, but an awful lot of people would like to do that and simply can't because of the cost.

This legislation would say: If you are going in for something like a mammogram or for something like a colonoscopy, there will be no copays. It

will encourage people to get into the system. Then, if they are diagnosed with cancer, they are diagnosed typically in the early stages, and it is certainly more likely to save their lives, and it is much less expensive as a result of going into the system earlier. So it ultimately saves us money by telling insurance companies: You are not going to do that anymore.

That is so clear to me, that if we are going to do this right, we need to make sure women are treated better by this system, no longer preexisting conditions and all that.

I will close and then turn to Senator UDALL or Senator BENNET, if they would like.

I have another letter I got—exactly what I was talking about.

Darlene from Mahoning County:

I lost my job in May 2007 after 27 years with the company. For a while, I did not have any health problems. I paid for private coverage with my unemployment check and savings. Within the last year, I started having medical problems. I was diagnosed with diabetes. I had back surgery in July to relieve severe back pain. I now have to pay premiums with my savings. When my savings run out, so will my insurance. Please do something to help.

She is not yet eligible for Medicare.

So many of these letters just cry out: I am trying to get through the next year or the next 3 years, the next 6 years, whatever, until I am eligible for Medicare, I am just trying to get through. And it really is a call for help, and it really is a plea from people in my State, people in Warren and people in Bellaire and people in Gallipolis and people in Crestline: Please help us in these years when we are in our late fifties, early sixties. We are going to be in Medicare pretty soon. We know Medicare works for us. We know this government program works, a program that doesn't look much different from the public option. But I need just a few more years. It is a time in my life when I am starting to get more aches and pains or worse. It is a time in my life when I am much more likely to get sick, to get an expensive illness, when I am 56, 58, or 63.

These are people who know they will be embraced with a decent health care system. They know they will be in a decent health care system when they get to Medicare age, when they get to be 65.

They have friends who are in Medicare, and they know Medicare works for them. That is as good a testament to the public option as there is. Those are the kind of letters I am getting from people saying: Please include a public option. I am 58 years old. I am not yet eligible for Medicare. I was diagnosed with diabetes. I need to do this; I need to do that. That is what is so very important about the public option.

I yield to Senator UDALL.

Mr. UDALL of New Mexico. One of those charts you put up over there emphasized the point of competition in the marketplace and how much we need competition. We joined together with the majority of our colleagues in the caucus to sign a letter to our leadership. I think one of the paragraphs in this letter is particularly persuasive. The Senator's signature is the No. 1 signature on this letter, but we wrote:

Opponents of health care reform argue that a public option presents unfair competition to the private insurance companies. However, it is possible to create a public health insurance option that is modeled after private insurance. Rates are negotiated and providers are not required to participate in the plan. As you know, this is the Senate HELP Committee's approach.

This is the public option we are talking about that was passed out of the Kennedy committee and is available to be inserted in the bill on which we are going to vote.

The major differences between the public option and for-profit plans are that the public plan would report to taxpayers, not to shareholders, and the public plan would be available continuously in all parts of the country.

So small businesspeople in New Mexico would have an opportunity to get into this public option insurance plan.

The number one goal of health reform must be to look out for the best interests of the American people—patients and taxpayers alike—not the profit margins of insurance companies.

We have to get competition into the market. We know that health insurance markets are effective monopolies or in some cases duopolies. In New Mexico we have two companies that hold 65 percent of the market. There is no incentive for competition. There is no incentive for lower cost. In fact, what we do under the law is, we allow these insurance companies to be exempted from antitrust laws. For most of the other businesses in America, we have those antitrust laws out there, and the Justice Department and various State attorneys general can move in to bring competition when there gets to be too much consolidation of power. We don't have that when it comes to insurance companies. As a result, we see premiums skyrocket; in my home State of New Mexico, 120 percent skyrocketing premiums.

As I wrap up, I want to talk about a New Mexican, a woman from Raton. I met her at a townhall in August. She received a renewal notice. Her premium had gone up 24 percent alone this year. She can't afford an increase, but she doesn't have any other option. A public option would bring that woman the ability to get into a health care plan and take care of herself. That is what you and I are fighting for. We are going to keep doing this. We are going to keep doing this because we have a lot of days to keep pushing forward. We will make this happen.

With that, I know the Senator has a couple more things to say. You should show the Presiding Officer Alaska on that map. What does it say?

Mr. BROWN. More than 80 percent of insurance is controlled by two companies in Alaska. That is a pretty compelling case.

I thank Senator UDALL and also Senator BENNET from Colorado, as well as Senators SANDERS, WHITEHOUSE, CASEY, MERKLEY, and STABENOW. It shows the breadth of support for the public option because it injects competition into the system. It will keep the insurance companies honest, and it will bring pressure to keep prices down.

My last 5 minutes I yield to Senator BENNET who has a sobering issue he wishes to discuss.

Mr. BENNET. Mr. President, I thank the Senator from Ohio for letting me have the last 5 minutes.

(The remarks of Mr. BENNET are printed in today's RECORD under "Morning Business.")

The PRESIDING OFFICER. The Senator from Oklahoma.

Mr. COBURN. Mr. President, I listened very patiently to the last 2 hours about why we need a government-run plan. I want to concur with my colleagues about the problems in the insurance industry. There is no question they are great. But the reason the problems are great is because there is no real competition today. The rhetorical question is, you can't have it both ways. Nobody wants it both ways. The fact is, I saw this on the Internet this week. I thought it was appropriate for where we are. Here is a youngster walking on a street. She says:

I'm already \$38,375 in debt and I only own a doll house.

Everybody agrees we have a too costly health care system. Everybody agrees we need to fix that. What we don't agree on is how to fix it. We have heard 2 hours of what is wrong with the private insurance industry that has not been allowed to be competitive, has not been forced to be competitive. And yet the answer to that question is that we want the government involved. The Senator from Pennsylvania talked about all the government programs. Sixty-one percent of all health care today comes through the government. Every government program is over budget, associated with fraud, and ineffective in its implementation on a cost basis. That doesn't mean we want to get rid of them. It means we want to make them better. The real problem with having the government do more is, right now 43 cents out of every dollar we are spending we are borrowing. We create a government plan. We put \$60 billion into it, and we can create competition. But we don't have competition now. Everybody agrees with that. Nobody denies that we don't have good competition. But we don't have good competition because we have failed to act.

The Senator from Ohio showed a chart of CEOs' pay. If they were having to compete, that pay wouldn't be there, especially not at that level. I don't disagree with that. But the way to control that is real competition. Forty-three cents of every dollar we spend this year we will borrow. And it will be worse next year. It will be 45, 46 cents next year of what we spend we will borrow.

This picture doesn't talk about what she owes. This is just what the debt is now, just the \$11.8 trillion. What she owes is another \$400,000, because we are paying out of Medicare what we have never created the tax base to fund. So in fact what we are doing is, we are going to charge this little girl for our Medicare. The impact of that is when she was born she owed \$400,000. By the time she is 20, she will owe \$800,000. What will happen to her?

There is no question we have positive benefits with Medicare. There is no question we are taking care of people who can't take care of themselves through Medicaid. There is a question of how effective we are doing with Native American tribes in terms of that. We are seeing improvements in veterans health care. We have all these different programs that are run through the government. So when you only have 39 percent of the health care in the country to put into the market, it is going to be very difficult to lower costs.

What is the problem with health care in America today? The problem is cost. It is too expensive. It is about 40 percent more expensive here than anywhere else in the world. Why is that? Well, there are a lot of reasons for it. But the first reason is, we will not allow real markets to develop in the health insurance industry. We have stopped it. And now we come and say: We are unhappy with it, so we want to create a government plan—a government plan that will compete.

I do not have any problem if you create a government plan if you fund it and make it competitive. But that is not what we are going to do. Because what we are going to do with a government plan is we are going to turn it into another Medicare. It will supply people health care. It will lower their costs. But we are going to transfer the cost to this little girl. It is just \$440 billion spent on Medicare this year, of which \$80 billion of it was fraud.

So the problem is, which solution do you think works better? Do you think we have the history that says government-run health care is efficient and effective and, therefore, we ought to do more of it or should we say: We know what works in the rest of the industries and markets in this country. Maybe we ought to allow markets to truly compete—which nobody wants to do—to force the insurance industry into a competitive structure where you can actually see what you are getting and you can see what you are paying.

The other problem about this little number is, not only does she have \$38,000 in debt right now, and another \$800,000 when she gets ready to buy her insurance, we are going to tell her what she is going to buy. We are going to take the freedom away from her to decide what is best for her and her family. Then we are going to yoke her with a whole bunch more taxes.

There is no disagreement in this body that we need to make changes in health care; and the assumption that anybody would say that is absolutely erroneous and fictitious. We recognize that. The question is, which way do you fix health care? Do you fix it with a government that is bankrupt already, that has stolen the future from the next two generations, and add more on to them or do we get common sense back in and say: Well, first of all, we can eliminate 8 percent of the cost if we have good tort reform in this country because 8 percent of the cost of health care is defensive medicine.

I read a study this week. It is interesting—and I have some passion about this because I have been on the end of those lawsuits—I would note that the vast majority of those who have been discussing health care for the last 2 years are lawyers. They are not doctors. They never laid their hands on a patient. They never stayed up 20 hours in a row to take care of somebody who needed them. They have all the answers, but they have never been in health care.

Here are what the numbers are on malpractice lawsuits in the United States: Eighty percent of all the cases that are filed are thrown out of court. Of the remaining 20 percent, 89 percent are thrown out of court. So 3 percent of the cases are legitimate in this country. What do you think that is costing us? And we ignore it? We are not even going to talk about the fact that we have an extorted service going on in health care that does not cost the lawyers a thing? It costs everybody else in this country billions of dollars a year because we are doing tests that nobody needs, except the doctors to defend themselves. And that is \$200 billion a year out of \$2.4 trillion. That is what the number is.

So when less than 3 percent of the people—and I am all for compensating people who are truly injured. I have no problems with that. As a physician practicing over 25 years, there is no question I have made mistakes. There is no question. There are no doctors who are perfect, and, consequently, sometimes people are injured because of doctors' mistakes. Most of the time they are not. And it is not about not compensating the injured. It is about changing the mindset in this country that you can extort people into settling when you have no real claim, and that is what is going on with 85 to 90 percent of the cases.

So the answer for health care is: controlling costs. So how do we best do that? It is interesting, we have had the accusation that there are no other plans out there. My colleague from North Carolina and I introduced the first plan in Congress for health care.

What does it do versus what the Baucus bill or the public option bill will do, according to CBO? We cover 94 percent of Americans—identical to what the Baucus bill does. So 94 percent of all Americans will get covered under our bill. We save the Federal Government \$70 billion in the first 10 years, close to \$1 trillion in the second 10 years.

What does the Baucus bill do? It saves \$88 billion, and nobody knows what it is going to save after that. But it costs the States billions. Our bill saves the States, in the first 10 years, \$960 billion. We cover more people, with no increase in the cost to the Federal Government, versus a marked increase in the cost to the States by the Baucus bill, or by the public option plan.

It eliminates preexisting condition. We all agree we need to do that. Nobody is fighting that. The question is, how do you do it? Do you do it in a competitive model that costs insurance companies pain if they are not covering the people properly? And if, in fact, there is an incentive to cover preexisting conditions, then you have an incentive for the insurance companies to invest in the management of chronic care rather than ignore covering somebody.

I do not deny there is cherry-picking going on right now, but it is only because we allow it. We do not have to allow it. But the answer does not have to automatically be another long-term, bankrupt plan run by the government. Nobody can deny the \$95 trillion, 100-year unfunded liability for Medicare. That is GAO, that is CBO, and that is the Medicare trustees. You cannot deny that.

So we have a program that seniors are fairly happy with, except the Baucus plan is going to cut a half a trillion dollars out of it. But we cannot pay for it. So we are not doing anything to drive that cost down, to drive in efficiency. What we are going to do is create more government, to have another plan that is going to get in the same shape as Medicare.

We all want the same thing. We want to get everybody covered in this country. We want the cost of health care to be affordable. And we do not want to bankrupt our children. We have already bankrupted them. So the danger of having a government-centered, government-centric, government-run, government-devised, government-managed health care program—just by history, look at what we have done.

Medicaid costs tons more than it was ever supposed to cost. SCHIP costs tons more than it was ever supposed to

cost. Medicare costs tons more than it was ever supposed to cost. Indian health care—it does not cost more because we just let them suffer. We do not put the money into it. VA costs tons more than it was ever supposed to cost. TRICARE costs more than it was ever supposed to cost. They are all government programs. They are all way over budget.

So the question the American people ought to ask is: If we all want to get everybody covered, and we all want to drive down costs, does the government have a track record that says it has done that? No. As a matter of fact, it has done the opposite of that.

So it is not a matter of whether you trust in government. We have 61 percent of health care running through government. And as a physician who has practiced for over 25 years, I will tell you, it is my opinion the reason costs are out of control is not because of the insurance industry—and I am not a defender of them; as a matter of fact, I hate them about as bad as I hate anybody telling me what I am going to do to my patient—the problem is, we have directives coming from the government that have disrupted the market in health care and created this tremendous differential.

The other difference that we have in the Patients' Choice Act is that we do not put another burden on the States, which all these bills do. The States are swimming in debt. They are struggling to stay ahead, and we are transferring billions, almost—we are transferring trillions of dollars of expense to the State. We are making it nice for four States. We have picked four States and we have said: You don't have any cost the first 5 years. We just, out of the hat—because they are having a little worse economic time than others, we have said: You don't have it. But for the rest of the States, it is the mother of all mandates, and they will never be able to afford it.

There is also another little sneaky provision in the bills—both in the HELP bill, the House bill, and the Baucus bill—which is, we know we are not going to cut doctors' fees 21 percent. The Presiding Officer would agree to that, the Senator from Colorado knows we are not going to do that. But we are not going to recognize it. We are not going to recognize that cost. So we are playing games with the American people. We are saying: Here is what it costs, when we know it is going to cost a lot more than that because we know we are not about to do that. But we do not have the courage to admit that. We do not have the courage to ask for an honest score.

The other difference is, we empower patients and States, not bureaucrats. We preserve the right, the inherent individual liberty right, of an individual to decide what is best for them rather than having the government decide

what is best for them. In our bill, 9 out of 10 Americans get a tax cut.

So let me draw the parallel again. We do not have a government-run program. We save the Federal Government money. We save the States \$1 trillion. We get more people covered than any other plan that is out there. Nine out of 10 Americans get a tax cut. We eliminate preexisting illness. And we bend the cost curve down considerably.

And, oh, by the way, we do not destroy innovation in health care, which is 75 percent of the innovation in the world, which will go away if any of these other plans are instituted—the incentive to put capital at risk to create opportunity for medical innovation.

There is a lot I could say, but I think what I would like to do is yield to my colleague from North Carolina in terms of someone who has been with me, who knows health care, who has been from the start working with us to try to put forward a plan that says we can accomplish this same thing and save tons of money.

Mr. President, I yield to my colleague from North Carolina.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. BURR. Mr. President, I thank the doctor from Oklahoma, my colleague, my friend. Let me say from the start, 3½ years ago, TOM COBURN and I sat down and realized health care was unsustainable at its current level of investment.

The American people have complained because they have seen a process that has gone too quickly. Well, in the Patients' Choice Act you find 3½ years worth of work—a bill that was designed to take 4 years before we thought we had the right information we needed to do health care reform adequately.

With the change in the administrations, the new President and his timeframe, we accelerated it. But let me say, right from the start, it is unsustainable at its current level of investment. It is 17 percent of our gross domestic product. Health care has to be reformed.

I personally believed the debate we were going to have in Washington was over what type of reform. Dr. COBURN raises a good point: cost. Where are we from the standpoint of our Nation?

I happened to gaze, as I was waiting for the last speakers to finish, on the page of this publication. It says: Baucus Bill Projected at \$829 billion. In the small box down at the bottom of the page—CBO: Deficit Hits Record \$1.4 trillion for Fiscal Year 2009.

Common sense would tell you that when you are in the type of financial shape the United States of America is in, not only do you stop spending, you begin to look for ways to curb spending and a way to invest to reduce the deficit. Because the deficit is what our

children and our grandchildren will inherit. If you believe it is unsustainable at its current level of investment, then you sort of understand where Dr. COBURN and I are coming from.

The worst place we can start is: How much more money do we need to spend to do health care reform? But the truth is, the Baucus plan is not health care reform. It is health care expansion. The debate in Washington is not about how to reform health care. It is about how to expand health care. And once you determine the pool you are going to expand it to, the \$64 million question is: How do we pay for it so the CBO says we have paid for it?

What I would like to do is spend a little bit of time exploring how the Baucus plan pays for it with the caveat up front of saying—as it relates to Dr. COBURN and myself—we don't believe we have to spend more to reform health care. I think from what he said about the Patients' Choice Act, we have made the point. We were the first two people in the Congress—House or Senate—to introduce comprehensive legislation. We cover the same amount of additional Americans that the Baucus plan covers. We do it without making additional taxpayer investments in the expansion of coverage. Why? Because in addition to expanding coverage, we reform health care. We actually bend the cost curve. We change the tax application to where it is fair and equal for all people.

What we have to realize is, the Baucus plan is a 10-year plan. We collect revenues for 10 years and we pay out for the expansion in 6½ years. Let me say it again. We are collecting tax revenues for 10 years, but we are only paying benefit expansions for 6½ years. We have to look at years 10 through 20 if you want to see 10 years' worth of revenue collection and 10 years' worth of expenses. As a matter of fact, if you took the first 10 years and you applied what is done in the bill and said: Well, if they started making payments in the first year, this bill would actually cost \$1.8 trillion, not \$829 billion but \$1.8 trillion.

Incorporated in the Baucus bill are cuts to Medicare, cuts that equal \$449 billion. Dr. COBURN talked about the imminent reduction to physician reimbursements: 21 percent projected. We all agree we are never going to make that. One of the attractions for health care professionals was the Baucus bill said in year one, we are not going to make those cuts. Well, they are going to cut Medicare over 10 years by \$449 billion. This is giving with one hand and taking away with the other hand. Health care professionals around this country have realized that, even though their association that represents them doesn't.

The Baucus bill cuts \$117.4 billion in Medicare Advantage. My colleagues are probably saying: What is Medicare Ad-

vantage? Well, it is the preferred plan of 20 percent of America's seniors. Twenty percent of our seniors on Medicare have chosen Medicare Advantage, a private sector option to traditional Medicare, where they have looked at the two and they said: I would rather have Medicare Advantage, because when I go in the hospital, Medicare is going to charge me a \$750 deductible right off the bat. Medicare Advantage? Zero. For traditional Medicare, you are going to have to have Part A, Part B, Part D. Medicare Advantage, you get it all as one lump sum. You don't have to make separate selections. They provide you the doctor coverage, the hospital coverage, the drug coverage all in one plan.

Why is it under the target of some in Washington to cut \$117 billion? They say it is because we pay 114 percent of Medicare per person allocations to Advantage, where we pay 100 percent in traditional fee for service. That is exactly right. I remember the debate we had in Washington when we did it. Because the objective then was: How do you get Medicare Advantage to offer this plan in rural America? To offer it in rural America meant you had to offer a greater reimbursement. This isn't reflective of a windfall for the insurance companies; it was an incentive to offer this choice not just to urban seniors but to seniors everywhere in America. In my State of North Carolina, 17 percent of all the Medicare beneficiaries are enrolled in Medicare Advantage. When anybody gets up and says pass this bill, the Baucus bill, and you can keep your health care if you like it, there is a caveat to that. Unless you are 17 percent of the seniors in North Carolina or you are 23 percent of the seniors nationally, you lose your plan. You are going to go back into traditional Medicare. You are going to go back to where, when you enter the hospital, they are going to say write me a check for \$750 annually; where your Part B is a separate payment; where your Part D is something you have to figure out as to which plan you want versus something that is seamless and covers everything. I will assure everybody a \$117 billion cut to Medicare Advantage will eliminate that product from the marketplace. Nobody will offer it. Twenty percent of America's seniors will lose the insurance they prefer, not keep it.

Medicaid expansion. It seems like a sensible way to go if you want to expand coverage, which is where the debate has been in Washington. Well, let's simply take a coverage tool that is out there today—Medicaid—and let's raise the income limit so more people qualify for it. So instead of 100 percent of poverty, we raise it to 133 percent of poverty. It costs \$345 billion. There is \$33 billion in direct State spending. As Dr. COBURN said, four States are sort of split out of it, and they say: Well, we

are not going to charge you because you are in tough economic times. Well, North Carolina is at 10.8 percent. Why aren't we included? Our cost, when the Federal Government makes North Carolina ante up, is going to be south of \$1 billion a year for a State that had a \$4 billion shortfall. Where is my Governor in her outrage at the proposal to expand Medicaid to 133 percent of poverty?

The tough thing is, this plan has been sold that it is not going to cost anybody anything, and the truth is it is going to cost seniors, it is going to cost taxpayers, it is going to cost the unemployed but, more importantly, it is going to cost people who have health care insurance today. People who have the money to purchase theirs and people whose employer offers them health care, their cost is going to go up because of the restrictions and the mandates that exist within the Baucus bill.

The Baucus bill would impose an annual \$6.7 billion fee on insurance companies; \$6.7 billion a year; over 10 years, \$67 billion. So a \$67 billion new fee on the insurance companies that we are trying to make the American people believe are going to reduce premiums, reduce costs, and we are sticking them with a \$67 billion pricetag. There is nobody in America when they hear this who believes that health care is going to go down for the American people. For every person who currently has a plan today, I will assure my colleagues their premium will go up. They will pay more money, not less money.

We grow the IRS. There is something we haven't talked about because of the requirements in this bill to collect fees and to collect taxes. It is estimated by the Lewin Group that the IRS would need a 25-percent increase in their budget. The IRS currently gets \$12 billion annually for their administrative costs. The administration costs for implementing the exchange subsidies would add nearly \$40 billion from the Baucus bill. We have additional costs at the IRS because we have to increase by 25 percent the IRS requirements to go and collect and enforce this.

We tax the chronically ill. I thought this one was one of those myths that late night TV talks about. We tax the chronically ill in the Baucus bill. Let me explain what I mean. Current law says that if your health care charges exceed 7.5 percent of your annual income, then you can deduct that off your taxes. Clearly, the lower your income, the more likely you are to utilize the 7.5 percent exclusion. So what does the Baucus bill do to raise money? It raises the exclusion to 10 percent. Instead of at 7.5 percent of your adjusted gross income being able to deduct anything that exceeds that, it says you have to exceed 10 percent of your adjusted gross income. For somebody who makes \$1 million a year, this is no big deal. They probably have more than

enough insurance to take care of it. For somebody who is on a limited income; for somebody who maybe doesn't have all the insurance they need; for somebody who walks in and is chronically ill, has a chronic disease and they are making payments, they are covering their copays, they occasionally go to the hospital, they have that \$50 charge for walking in the door, even though they have insurance. They are making it at the end of the year, even though they make \$20,000 or \$25,000 a year, and all of a sudden, 2½ percent of their adjusted gross income is no longer a deduction they get. What is that? That is taxing the chronically ill in this country.

Listen, I have to give them credit. They have left nobody out of this bill from taxes. They have left nobody out of this bill from instituting a new fee. As a matter of fact, some of it we are going to have to take for granted is going to be applied to us in an indirect way because incorporated in the Baucus bill we collect a new device tax. To the heart patient who goes in and gets a heart catheterization, to the senior who goes in and gets a hip replacement, it is a device. For any medical device that is used, there is a \$40 billion device tax over 10 years.

What does that do for the innovation of new devices? Dr. COBURN can speak to it better than I can. When we were able to switch from open heart surgery to bypass surgery, we probably went from \$40,000 or \$60,000. When we were able to catheterize somebody and put a stent in, we reduced significantly the cost, we reduced significantly the invasion, we were able to raise the quality of life. We couldn't have done that if somebody hadn't innovated a cath and a stent. We would still be doing all bypass surgeries. You think through all the medical procedures we do in this country and you think about all the devices that have been created by companies and by doctors so they can be less invasive because they understand every time they go into somebody, every time they cut in, there is a fear of infection today; there is a consequence of recovery. It means a stay in the hospital is longer.

When you see a new device enter into the marketplace, you actually see a new efficiency come into health care. You see reduced health care costs because you are taking either somebody out of an inpatient setting and you are putting them in an outpatient setting, or you are taking an inpatient patient and you are getting them out of the hospital faster. Actually, you could make the case that innovation of medical devices is health care reform because it is driving down costs, because it is moving patients out, and the net result is the quality of life goes up. But, in this bill, we raise \$40 billion over 10 years, or \$4 billion a year on taxes on devices.

If you listen to the things I have talked about, you are probably sitting at home trying to figure this out: I am going to pay more in health care because they are taxing devices. I am going to pay more in health care if, in fact, I have a chronic illness because I am not going to be able to deduct that out-of-pocket cost that is between 7½ percent and 10 percent of my adjusted gross income. I am going to have to cover, as a taxpayer, a 25-percent expansion in the IRS. They are going to impose a \$6.7 billion so-called fee on the insurance industry, or \$67 billion over 10 years, while I have an insurance policy, so that fee is going to be passed through to me as a covered life under the insurance plan.

I am going to pick up, in the State in which I live, the increase in the limitations on Medicaid when we go from 100 percent of poverty to 133 percent of poverty. How can you make a claim that this bends the cost curve? If you tried to make the claim, it bends the cost curve up not down.

Dr. COBURN and I listened very intently as the President kicked off this debate: Create a program that provides coverage for as many Americans as we possibly could. We did that. Bend the cost curve down. Well, we make a direct investment in prevention, wellness, and chronic disease management—the only three direct areas of savings in health care. We can talk all night about tort reform and about different aspects. They are indirect and there are significant savings we can achieve by incorporating those reforms into health care.

In the Patients' Choice Act, we elected to keep it narrowly targeted, and we invest in prevention, wellness, and chronic disease management. Why? Because we went to States, businesses, and self-insured companies that went 4 years and didn't have an increase in health care costs. Why? Because they changed the lifestyle of their workers. They actually paid their workers, in some cases, to quit smoking, to lose weight, to get exercise, or to take an education program on a chronic disease they had to make sure they got the treatment they needed.

The net result? In every case, the per-enrollee savings were so significant that the companies continued to try to figure out how they could spend more to reduce health care costs. The quality of life for their employees was better. The productivity of the employees was better, and they had no annual increase in their health care costs.

We are sitting here ignoring everything that has been learned in America by private self-insured companies and by some insurers who are doing creative things, targeting chronic disease, and actually paying doctors to educate.

We have ignored all of this. Why? Because we are having a debate in Washington with the Baucus bill about coverage expansion, not about health care reform.

Coverage expansion costs a lot of money—\$829 billion. We are having that debate and telling the American people this is about reform. If you read the fine print, the bottom of the page, and if you read the part they don't want you to remember, it says this year alone there is a \$1.4 trillion deficit. That is \$1.4 trillion we didn't have that we had to borrow.

The last thing we need is more money in health care. It is 16 percent of our GDP, and we cannot maintain that level of investment. The challenge is on us to come up with the reforms that continue to invest and promote innovation, that expand coverage and, more important, reduce costs.

What do the American people want? They want health care costs to go down, and they want quality to go up. We don't accomplish that in the Baucus bill, but you do in the Coburn-Burr bill. It is not perfect, but it heads in the right direction.

I yield to my good friend from Oklahoma.

Mr. COBURN. I thank the Senator. I am sitting here thinking, if I was sitting at home tonight listening to this, how do I hear the story that I heard for 2 hours on having a government-run plan and how bad the insurance industry is? As a physician, I don't like them a whole lot, I can tell you that. I don't like some of their tactics. I certainly don't like the way they cancel insurance policies on people. There is a lot about them I don't like. But I don't want to eliminate them. What I want to do is create a real market where they have to be savvy and compete and they have to be efficient and they have to help us help one another get well.

We are going to hear a lot over the next month on health care. We are going to hear all these claims, much like we did from Congressman GRAYSON, who made an outlandish claim that my side of the aisle wants people to die. That is what was said in the House of Representatives. What I want is people to live. I want this little girl in the picture to live too.

Do we have an unsolvable problem? No. Do we have ways of making health care costs much less in this country? Yes. Do we have ways of ensuring increased innovation and advanced disease prevention in this country? Yes. Do we have ways to protect this little girl in the photo? Yes. But the debate is over how we do that. One side says we do it by making the government a whole lot bigger—\$1 trillion bigger, \$3 trillion bigger over the next 20 years. That is one side of the debate.

Our side of the debate says this is inefficient health care. We want to cover everybody. We never want anybody to

go bankrupt or to be denied care. We think you can do that without growing the government by 25 percent. We think there are other ways to do it. We are honestly worried about our track record in Washington when we have a \$1.4 trillion deficit this year and a Medicare Program that is absolutely bankrupt—it will run out of money in less than 7 years from now, totally out of money—and we are going to be borrowing it all then. Is there another way to do it? So either we make a large jump in the size of the Federal Government and add to the \$838,000 that this little girl is going to have, or maybe we can work together and say the insurance companies are bad, but can we keep something like that and make them efficient? Can we allow people to buy across State lines? Can we give people opportunities to buy what they want to buy rather than being limited? Do we trust people to make good enough decisions for themselves?

The Baucus plan doesn't do that. It says we have three or four plans from which you get to choose, but we are going to tell you what you have to buy. And, by the way, you have to buy insurance in this country. Think about that.

I carry with me a copy of the the U.S. Constitution all the time. Every bill out there has said you don't have liberty because the Federal Government is going to tell you where you have to spend your money. You have to buy an insurance policy. So if you make a quarter million dollars a year, it doesn't matter if you want to fund that self-insurance, it doesn't count. You still have to do that. If you don't, you are liable to a tax. If you don't pay the tax, a \$25,000 fine. If you don't pay the fine, you are in jail for a year.

How do we get off telling people that and taking away that liberty, that freedom that is supposed to be guaranteed under the Constitution? The answer is, well, it is better for everybody because if we don't have everybody covered, then it is going to cost more because that is the big government answer to it. Maybe it will cost more if we force and drive competition, if we create transparent markets, where you know what something costs before you get it in health care. In fact, there is a real connection with the purchase of health care and the payment because everywhere we have tried that, it is working to control health care costs. But we refuse to do it.

Frankly, the reason our idea is rejected, which is changing the Tax Code to treat everybody the same under the Tax Code, is because the labor unions don't want that to happen. That is exactly why. Everybody knows that is the problem. Everybody in the country knows that is the problem, but we don't have the political courage to face up to how to fix the problem.

As soon as you make everybody the same under the Tax Code, you empower

35 million Americans who don't have insurance today to get it. You save the States \$1 trillion over the next 10 years, and you give 95 percent of Americans a tax cut, and guys like me will pay a little bit more for my health insurance and income tax. But we will not do that because the powers that deliver politicians to Washington are more powerful than the principles and the character to follow the pursuit of the Constitution.

This little girl in the picture, and everybody like her in this country, is at risk today. We are going to have this great big debate and say how bad the insurance companies are and how bad the government programs are. But the fact is, we don't have a bipartisan bill. Our ideas were thrown out, 13-10, at both the Finance Committee and the HELP Committee—13-10, 13-10—because the idea is they didn't want a compromise bill. They didn't want to solve the problems. They wanted their way or the highway.

So, consequently, we are going to get a bill. I have no doubt. But my little Lucy right here and her football—she is going to lose her football. She is not going to have any little Lucys because she is not going to be able to afford them. She is going to be paying off her \$800,000 worth of government obligations starting at age 20, and she will never climb out of the pit.

So when America thinks about health care, there are a lot of ways to solve it. One is to trust what makes America great—granted, with some changes—or the other is to trust the government to create more government programs.

I will just add this one point. Do you realize that in the bill that passed the HELP Committee there are 88 brandnew government programs—88; 219 times we have held the Secretary of HHS to write in-depth regulations. Now, 88 programs interfering in health care are going to be problem enough. But 219 new sets of regulations—oh, by the way, we created the comparative effectiveness committee with the stimulus bill, and we are going to have 26 people tell every doctor in the country how they are going to practice medicine, what is right and what is not right. And, by the way, in all the committees a prohibition on rationing was voted down.

What are we to think? We are going to create a large government program and grow the government by \$1 trillion over the next 10 years, \$2 billion-plus, maybe \$3 trillion in the next 10 years, and we are going to have Washington tell people how the physicians and caregivers will treat, what they will use to treat, and all the time little Lucy will not matter if she gets sick. We will have already made her sick because we have stolen her future, her absolute future.

It is a cute picture, but it sends a devastating message to us as leaders in

this country. How dare we do that. I wanted to bring out my other charts tonight, but I didn't want to bore everybody. The fact is, the appropriations bills that were passed—if we keep doing what we are doing—America, hear this—we are going to double the size of the Federal Government in 3½ years.

We passed the Agriculture bill today, which is 22 percent bigger, and it was 15 percent last year, and that doesn't count any of the supplemental and the stimulus money. It doesn't take long, if you are growing something at 22 percent, for it to double.

My gray hair comes from the fact that I think we are missing a great opportunity to work together. I think we can solve the health care problem. I think we can do it without enlarging the Federal Government. Especially when we pay 40 percent more than anybody in the world, there ought to be savings that we can get to make health care cost less and to cover everybody else. I know we have seen the studies that show that.

So why isn't it going to happen? Why isn't there going to be a bipartisan bill? It is all political. It is not about the people in this country, it is about the political power structure in this country.

Problems can be solved, common sense applied to limited government and restoring freedom to individuals.

There are going to be so many lawsuits in this country, most of them legitimate, over the health care bill. You will not be able to uphold a challenge to the Constitution of forcing me to pay, take my money that I earn privately and spend it on what you say I have to spend it on. It is one of the greatest denials of liberty I ever heard of, and it is going to get challenged. It is going to go through the courts fast, and I suspect the courts are going to uphold the citizens of this country rather than the power center.

I yield the floor or I yield back to my colleague from North Carolina.

Mr. BURR. Mr. President, I thank Senator COBURN for yielding. Let me just say the reason he is gray is because he cares. This is a Member of the Senate who typically on Monday morning delivers babies, and all weekend long. Before he comes back to Washington, he practices medicine.

This institution looked at what he did and said: You can't charge for what you do even though it costs you \$200,000 a year to keep your practice open, your license in place, to buy your liability insurance. They said that is illegal under Senate rules.

So TOM COBURN is a unique individual. He sees women who are pregnant. He delivers babies. But he doesn't take any payment for it. He keeps his license up to date. To some degree, it is charity care because he believes it is the right thing to do. More important,

he understands that what we do here affects what our children and our grandchildren get in inheritance from us—not financial inheritance, in opportunity.

Why are we passionate about the debt? Why are we passionate about trampling on the Constitution? Because every time we do it, we take an opportunity away from the next generation. We reduce their ability to be successful, whatever their definition is.

TOM COBURN covered it very well. We are somewhat impassioned about our criticism toward the bills that passed out of the HELP Committee, the Finance Committee soon, and the three bills in the House. Why? Because we introduced our bill first. We laid our cards on the table. We offered to work in a bipartisan way with anybody, and we had no takers.

I believe when you lay it out there and you come up with a successful plan, you have every right to be critical. I do question the ones who do not offer an alternative. But we have offered a solution, and that solution was based on three fundamental principles:

One, it had to cover everybody. The way our bill is structured, every American receives the same financial stipend regardless of whether they work or whether they don't, regardless of where they live. We treat everybody the same.

Two, if you are going to get cost savings, then you have to make direct investments in prevention, wellness, and chronic disease management. The Patients' Choice Act makes direct investments in prevention, wellness, and chronic disease management.

Three, is it financially sustainable into the future? We probably should have started with this one versus save it for last. Why in the world would we create a health care system in America if it is not sustainable? If it is not financially sustainable, why would we even consider that legislation in the Congress of the United States? If it did not pass the test of time, why would it even be worthy of debate?

Unless we expect people outside of America to continue to finance our urge to spend, then I have to tell you, we are not going to have any money—either that or we are going to have to tax the American people to a point where they are not going to want to be successful, they are not going to want to work overtime, they are not going to want to switch jobs because the benefit to them of being successful is to be punished by taxes.

This bill is filled with new fees, new taxes. True reform that expands coverage would pay for itself. Think about that. If you truly reformed health care, would the reforms through savings not pay for the expansion? Shouldn't this be a net sum game?

We have left out of the bill shopping across State lines for insurance. It

saves money. The American people are sitting there: Why aren't you doing this? Tort reform saves money. The American people are sitting there: Why aren't you doing this?

Let me end on one that I think the American people are really plugged into. Congress, which plan are you putting yourself under? You designed this plan for everybody in America. Is it the plan you are going to have? You know what, in the Finance Committee, in the HELP Committee, in the House committees, there have been amendments that said Congress has to take the plan they create for the American people. That government option, that is what Congress has to be under. It has been rejected every time it has been offered.

But you see, Dr. COBURN and I took a different approach because in the Patients' Choice Act, we had to set what the basic minimum plan was going to be. Do you know what we put? The Federal Employees Health Benefits Program. We didn't put them into the FEHBP, but we said it had to be equivalent to what Members of Congress had. How could we ask the American people on a plan we create to have less than we have? The American people expect us to look after them, they don't expect us to give them less than we have.

It was rejected every time that was offered to move Congress to their plan. But I think it tells you a lot about the way TOM COBURN and I approached the bill we worked on because we never thought about taking us and putting us into their plan, we thought about taking them and raising them to our plan. There is a big difference in that. There is a big difference in looking at the American people and saying, you should be here; not the American people saying, you should be where we are.

We want people to be successful in this country. TOM COBURN said this is not a bipartisan bill. He is right. But I will end with this tonight: This is also not a reform bill. If you want to talk about expanding coverage, it does an equal job to what the Coburn-Burr bill does. If you want to judge it based upon reform, it accomplishes no reform.

I encourage those who are not satisfied with the options that have been presented in the House or the Senate or that will be debated, go on TOM's Web site, go on my Web site, Google "Patients' Choice Act." Read the bill. It is only 200-some pages, it is not 1,000.

The truth is, if we have a real debate—at some point, we will have one about health care reform—I could suggest to the American people one word that would drastically reform health care, that could replace all 1,000 pages of a House or Senate bill. It is called portability. It is called the ability for an individual employee to take their insurance from one employer to another, not to be construed in any way

because they have a preexisting condition, but also to recognize the fact that when you do portability, you change drastically the way insurers look at covered lives.

I think the American people would be shocked to know the average person is under a health care plan for an average of 4½ years right now. Ask yourself: If I am an insurer and I am going to invest in somebody's lifestyle changes and I am only going to have them 4½ years—how much are you going to invest? The answer is, probably very little. By the time they lose weight or quit smoking, you haven't reaped the benefits of those savings, and all of a sudden you create portability. That means a 24-year-old covered by an insurance company—that insurance company has an opportunity to keep him until he is 64 years old, 40 years. How much are you going to invest in that insured if you are going to have them for 40 years? You are going to invest a heck of a lot because you will want to keep him well as long as you can. You are going to reimburse doctors to do the education; you are going to make sure you keep them out of the hospital; you are going to make sure that if they go into the hospital you get them the treatment they need to get them out as quickly as you can. You are not going to deny a prescription a doctor wrote for them. You are not going to question a treatment a doctor chose because all of a sudden the doctor is a partner to the insurance versus just a cost to the insurance.

You see, true reform has to change health care across the board. It has to change the relationship between patients and insurers, between doctors and insurers, between hospitals and insurers.

Ask yourself: Does the Baucus plan accomplish any of it? The simple answer is no, it does not. That is why it costs \$829 billion, and that is why it pay for it you don't get it through savings, you get it through taxing and fees. You get it through the insurance costs of everybody who has it. You achieve the costs by cutting Medicare, by knocking seniors off the health care plan they prefer. You get there by increasing the income limitations on Medicaid, making States actually pay for the expansion of 11 million Americans who are going to be covered under the most inefficient health care system in the country, Medicaid, where only 60 percent of the health care professionals will even see Medicaid beneficiaries because the reimbursements are so low. But we are going to grow that population by 11 million people.

We are doing an injustice to these people to put them in a plan where only 60 percent of the health care professionals will see them. They will not get the education they need for chronic disease management. They will not make the lifestyle changes because

Medicaid does not pay for prevention, wellness, or chronic disease management, nor does Medicare, nor does the VA, nor does Indian Health. Show me a government plan that pays for prevention, wellness, and chronic disease management, and I will quit coming to the floor and quit talking about the lack of reform.

The truth is, the Baucus plan tries to replicate what the Federal Government has, and it does not have prevention, wellness, and chronic disease management today. It will not have it tomorrow, and it will not have it next year.

Mr. President, I thank you for your patience. I assure you and our other colleagues that Dr. COBURN and I will be frequent visitors here as we get ready for this debate, as we have this debate, and probably after this debate is over, depending upon the outcome of it.

But let me make it perfectly clear, if any Member in this debate is looking to try to achieve a bipartisan solution to health care, you can sign TOM COBURN and RICHARD BURR up today to sit at the table with you, to forget about who is the author of legislation, to talk about real solutions to real problems that deal with health care. I am committed to doing it, but I am not committed to rolling over and just accepting another expansion of the Federal Government and Federal Government spending.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from Colorado.

Mr. BENNET. Mr. President, as you could hear from the remarks of the Senator from North Carolina and the Senator from Oklahoma, there is agreement on some issues. We know the status quo is not going to work when it comes to health care. We know our families cannot endure another decade of double-digit cost increases every single year in their health insurance premiums. We know we can do better than devoting a fifth of our GDP to health care, when every other industrialized country in the world devotes less than half that to health care. We know the biggest drivers of our outyear budget and debt—which we do need to be enormously concerned about—are rising Medicare and Medicaid costs, and the biggest drivers of those are rising health care costs.

I would say, again, as I have said before, I hope we can start on where the areas of agreement are and try to work from there. Because our small businesses and working families all across this country, including in my State of Colorado, cannot endure another 10 years like the 10 years they have endured. We will not be able to compete effectively in this global economy, where we are devoting more than twice what any other industrialized country in the world is devoting to just one sector of our economy—health care—and

we are not going to keep the kind of commitment the Senator from Oklahoma was talking about to the young girl in the photograph or, for that matter, to my three daughters at home, who are 10, 8, and 5. I am deeply concerned about where we are with respect to our deficits and our debt.

So while we are disagreeing about the outcomes, I think there is a growing understanding that the current system just will not do.

#### AFGHANISTAN

Mr. President, I am here to talk a little bit about Afghanistan, and just for a few minutes because yesterday we reached the 8-year anniversary of the war in Afghanistan. On this occasion, we should remember how unified our entire country was over our mission there when it began. The Nation came together after 9/11 to support our military as it bravely took the fight to the Taliban and the terrorists in Afghanistan. We had one ultimate goal: Removing al-Qaida's safe haven.

Our military succeeded in toppling the Taliban government, which had allowed al-Qaida to use Afghanistan as a staging ground and a hiding place. Once the Taliban was removed from power, an international coalition, led by U.S. forces, went about the long and difficult task of defeating al-Qaida for good.

Yet now, 8 years later and with a new administration trying to determine America's best way forward, many Americans are understandably concerned and frustrated. Afghanistan is not where any of us want it to be, and our ultimate goal has not yet been met. Al-Qaida is still there and in Pakistan as well. Afghanistan's Government has not been able to take centralized control of the country. Elections there have not added to the legitimacy of the Karzai government. We have been left to reassess our position, and we must do this reassessment together.

Policymakers are asking the important and right question: What are the proper goals for our military effort in Afghanistan? How best can we accomplish them? Are these goals purely military goals? Can they be better solved with more troops or fewer? Do we need a more complex new mission in our future, which the military aspect is only one small part?

Unless we are sure, unless all of us are sure that more troops can help us meet our goals, we should not send them. Our soldiers already have sacrificed much. This time, in particular, is a difficult one for servicemembers and their families, and it is also proving to be a difficult one for those of us making policy.

As we decide what our direction will be in Afghanistan, the fallen brave soldiers we lost from Fort Carson this week are solemn reminders of how consequential our decisions have been and

will be. Those of us who opposed going to war in Iraq, including President Obama, believed then it was the wrong war at the wrong time. We believed that Washington's focus on Iraq was diverting precious resources from our efforts in Afghanistan. We are still dealing with the consequences of the decision to focus on Iraq, both in Iraq and in Afghanistan.

Recalling recent history is so important because now we have to find new wisdom on Afghanistan. At the same time, all 100 Members of this body know we must take great care as we make decisions that will affect the lives of our men and women in uniform and their families. For every soldier who answers our Nation's call to serve in combat, a new deployment is akin to a new decision to go to war. That is why our national purpose and their mission must be absolutely clear.

That is also why, as Members of this body, we must be willing to ask hard questions. The country will be counting on the Senate to scrutinize and understand the purpose of any decision to deploy additional troops. As we, together, debate a new approach to Afghanistan, I will be motivated by the memory of the Fort Carson soldiers who died this past week, as well as all those who have fallen in rank and Afghanistan. I know all of us feel the same way. They served honorably. So must we.

Mr. President, I yield the floor.

Mr. BEGICH. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. BENNET). The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BEGICH. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### MORNING BUSINESS

Mr. BEGICH. Mr. President, I ask unanimous consent that the Senate proceed to a period of morning business, with the Senators permitted to speak for up to 10 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### HONORING OUR ARMED FORCES

##### FORT CARSON SOLDIERS

Mr. UDALL of Colorado. Mr. President, I rise today to pay tribute to eight young men from Fort Carson in Colorado who perished last weekend in Afghanistan. This was the heaviest U.S. loss of life in a single battle since July 2008, when nine American soldiers were killed in Afghanistan.

In highlighting the lives of these young soldiers, I do not want to diminish the loss of other brave servicemen and women who have given their lives

for our country. Before last weekend, Fort Carson alone had lost 270 soldiers in Iraq and Afghanistan, and we must continue to honor the courage of our fallen, our wounded, and those who continue the fight.

But I hope the stories of these eight young men today speak to the loved ones of all the brave men and women who have lost their lives in Afghanistan and Iraq in recent years. I honor their service, their courage, their dedication, their love of country and family. I thank their wives, husbands, children, parents, and other family members and friends for their support of these brave servicemen and women. And I want to express my deepest sympathy to them as they mourn their loss.

These eight soldiers were all from the same platoon—Bravo Troop of the 3rd Squadron, 61st Cav, 4th Infantry Division, based at Fort Carson. The 4th BCT has worked since May to secure territory throughout a four-province region near Jalalabad in some of Afghanistan's most rugged terrain, training in the nearby hills to prepare for high-altitude battle. A major achievement included providing security for Afghanistan's presidential election in August, enabling local Afghans to go to the polls.

I met with the 4th BCT commander, COL Randy George, back in April in Colorado, before Colonel George and his soldiers departed for Afghanistan. I know how hard Colonel George worked to get these soldiers ready for the fight, and they were ready. These eight young men and their fellow soldiers fought valiantly, taking on about 200 insurgents in their remote outpost in Afghanistan's Nuristan province.

As MAJ Daniel Chandler, the rear detachment commander for the 4th

BCT, said: "They were attacked, the unit fought bravely, and in the end, they won the day."

I would like to say a few words about each of these men.

SPC Michael Scusa of Villas, NJ, was 22 years old. He joined the Army after graduating from high school and was on his second tour in Afghanistan. A former teacher said: He was a boy any mom would be proud to have. He leaves behind his wife and 1-year-old son in Colorado, as well as immediate family in New Jersey and Nebraska. SPC Christopher Griffin was 24 years old. He grew up in the small town of Kincheloe, MI. A high school classmate said that the "whole town" knew that Christopher would enlist someday. The Army was his calling—and he was very proud of it. He leaves behind his family in Michigan.

PFC Kevin Thomson of Reno, NV, was 22, and joined the Army in April 2008. Friends said that he could make anyone smile, that he valued friendship, and that he had a strong relationship with his mother. His photo hangs

in Scolari's grocery store in southeast Reno, where he used to work. He leaves behind his family in Nevada and California.

SGT Vernon Martin of Savannah, GA, was 25 years old, and leaves behind a wife and three children and family in Georgia and New York. He joined the Army 6 years ago and had served in Iraq before being shipped to Afghanistan. His wife said that he hoped to work with kids someday—and that Vernon was the best thing that ever happened to her and their children.

SPC Stephan Mace of Lovettsville, VA, was 21 years old, and is survived by his family in West Virginia and Virginia. His mother said that he loved sports, wildlife, and the outdoors, and that he always had a smile on his face. He learned about patriotism from his grandfather, who served in the CIA during the Vietnam war, and had a strong love of his country and the military. Stephan's youngest brother just graduated from boot camp at Fort Sill—he wants to join the Army like his brother.

SGT Joshua Kirk—originally of Bonners Ferry, ID—was 30 years old. He leaves behind his wife and 2-year-old daughter in Colorado and mother in Idaho.

SGT Joshua Hardt of Applegate, California, was 24 years old, and was an outgoing and athletic young man—so talented at high school football that his helmet was retired. When Joshua was stationed at Fort Carson, he and his wife moved to Colorado together. Joshua leaves behind his wife and immediate family in California.

SGT Justin Gallegos of Tucson, AZ, was 27 years old. His friends called him "a man of excitement, courage, leadership, and kindness," and a strong man, a go-getter. He leaves behind family and friends in Tucson.

There is so much more to say about each one of these soldiers—and about each of the men and women who have given their lives in the service of our country. Now is a time to honor their memories and pay tribute to them for their tremendous sacrifice and dedication to our Nation. We will not forget you.

The PRESIDING OFFICER. The Senator from Ohio is recognized.

Mr. BROWN. Mr. President, I appreciate the words of the senior Senator from Colorado and his words about soldiers in his State and around the country. We all share that sentiment today in the Veterans' Committee. We heard from soldiers and family members about people who died in the line of service, not in battle but for other reasons—contaminated drinking water in some cases, in other cases open-pit burning. It is important we honor our men and women, as Senator UDALL did, but also that we, frankly, treat them better when they are in the service. Their commanding officers sometimes

need to pay more attention to that and how we treat the families of our men and women, our soldiers, and our veterans. But I thank the senior Senator from Colorado.

Mr. BENNET. Mr. President, it is with a heavy heart that I rise today to recognize the tragic loss of nine soldiers stationed at Fort Carson, CO, who were killed this past weekend in Afghanistan.

Last Saturday, eight soldiers from the 4th Infantry Division's 4th Brigade Combat Team at Fort Carson were killed in a firefight by insurgents in a remote area of Afghanistan. From what we know, as many as 200 insurgents attacked two of our mountain outposts, and U.S. and Afghan soldiers responded together. The fighting lasted most of the day. When it was over, Fort Carson had seen our most costly day since Vietnam.

These eight young men made the ultimate sacrifice for their country. All Coloradans and all Americans honor their bravery and their service. We owe them and their families a great debt.

I wish to read the names of these courageous soldiers into the RECORD, and recognize that a ninth tragedy has also apparently now occurred, and say a few words about each:

SGT Vernon Martin was 25 years old. He leaves behind a wife and three children. After joining the Army 5 years ago, Vernon had already served bravely in Iraq. His wife has told people that he hoped to work with kids in the future. She also said he was the best thing that ever happened to her and their children.

SGT Justin Gallegos was 27 years old. A native of Tucson, AZ, his friends described him as a man of excitement, courage, leadership, and kindness. He is remembered for his constant smile and his generosity. Justin leaves behind a 5-year-old son. His family and friends will miss him dearly.

SGT Michael Scusa was 22 years old. After graduating from high school in New Jersey, he joined the Army to serve his country. Michael was serving his second tour in the region. Before he died, he had told his wife that if he was killed, he wanted to be buried in Colorado Springs to be close to his son. This son had been named after a friend of Michael's who was lost in Iraq.

SGT Joshua Kirk was 30 years old. He grew up in Idaho where his family still lives. He had followed his childhood dream of entering the Army and was serving his second tour in Afghanistan. He is survived by his wife and 2-year-old daughter.

SPC Stephan Mace was 21 years old. Born in Virginia, he grew up loving sports, wildlife, and the outdoors. His mother said that he always had a smile on his face. His grandfather, who had served in the CIA, taught Stephan what it means to serve your country. Stephan recently returned home for a

15-day leave trip, and his mother said that he returned to his post without fear.

PFC Kevin C. Thomson was 22 years old. He joined the Army just last year. Originally from Reno, his friends described him as the type of person who could make anyone laugh. He cared little for material things and put more emphasis on the people around him. His photograph hangs in the Reno grocery store where he worked after high school. He will be missed by his family and friends in Nevada and California.

SGT Joshua Hardt was 24 years old. He was described by family and friends as an extrovert and athlete. He was so talented on the field, actually, that his high school football helmet was retired. Seeing the successes of his older brother in the military, he followed his brother into the Army. He is survived by his wife, his hometown sweetheart, who moved with him to Colorado after he was stationed at Fort Carson.

SPC Christopher Griffin was 24 years old. Coming from a small town in Michigan, friends say they knew he would end up serving his country. Serving in the Army was his longtime goal. He played football and wrestled in high school, and made his friends laugh. Christopher's family in Michigan is proud of his service, and his hometown has made plans to name a street after him.

In addition, we recently have learned that a ninth Fort Carson soldier was killed in Afghanistan this weekend in a separate attack. SPC Kevin O. Hill, of New York, died on Sunday. He was 23 years old.

At great personal risk, these nine men braved a war in a faraway land. They pushed forward into great danger to protect us here at home. When asked, they answered the call of duty and performed their missions with distinction.

Coloradans are immensely grateful for their selfless dedication, and our thoughts and prayers are with their families and loved ones today. I hope their pain is eased by the knowledge that these soldiers will always be remembered and honored.

Let us all remember the incredible sacrifices made by nine young people for America's freedom and our safety here at home. I know I speak for all 100 Members of the Senate in offering America's condolences and gratitude to all nine of these mourning families on this day.

#### PENNSYLVANIA'S 56TH STRYKER BRIGADE

Mr. CASEY. Mr. President, I wish to recognize the contributions of the 56th Stryker Brigade which recently returned to homes and families across the Commonwealth of Pennsylvania. For 9 months the 56th Stryker Brigade has been deployed in Iraq. Here these civilian soldiers, known as the Independence Brigade, worked side by side with Iraqi counterparts to continue to

bring stability and security to the Iraqi people. On the front lines they patrolled neighborhoods, targeted insurgents, and swept for improvised explosive devices. They performed more than 800 combined operations, captured 7 brigade-level, high-value targets, and discovered more than 80 enemy weapons caches. Any success we have had in Iraq is not only the result of military achievements. In this regard, it is equally important to recognize the \$22 million in reconstruction efforts the 56th Stryker Brigade assisted with in coordination with an embedded U.S. provincial reconstruction team.

While these young men and women are now home, we must also remember those who fell in battle. Two members of the 56th gave, as Lincoln said so long ago, "the last full measure of devotion" to their country. SPC Chad Edmundson of Williamsburg was killed by an IED, and SSGT Mark Baum of Quakertown was killed by enemy small arms fire. To these soldiers' families and friends, I express our condolences and gratitude on behalf of the people of Pennsylvania for their sacrifice. Please know that our prayers are with you and that we will never take for granted their personal courage and sacrifice. We pray for Chad and Mark, and we also pray for ourselves, that we may be worthy of their valor.

While deployed, many things have changed for these members of the Pennsylvania National Guard. Some members met their sons and daughters for the first time. For all our troops, a time of readjustment and reintegration back into their communities and daily lives lies ahead. I want the National Guard to know I will always be committed to helping them during this battle. I know there are other guard members who bear scars from battle, whether visible or not. The Senate must ensure our citizen soldiers' jobs are maintained while they are deployed, and we must provide opportunities for them to find employment upon their return.

For this reason, I will continue to urge colleagues to take up and adopt the Service Members Access to Justice Act and the FORCE Act which will make National Guard assistance programs more effective and responsive and ensure that National Guard troops keep their jobs and employment benefits as required under law.

Again, I express my appreciation to the 56th Stryker Brigade and all of the men and women in service.

#### SATURN'S DEMISE

Mr. ALEXANDER. Mr. President, I ask unanimous consent to have printed in the RECORD remarks I made this weekend on the Saturn car company, which has lived and apparently passed away in the State of Tennessee but has contributed a lot to our State over the last 20 years.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

I spent almost all the state's \$450,000 advertising budget to buy a full page ad in the Wall Street Journal saying, "Well, Saturn finally found its home . . . in Spring Hill, Tennessee."

The ad answered a questioned that was on the mind of millions of Americans for a few days in August, 1985: "Why Spring Hill, Tennessee?"

General Motors had looked everywhere for the best place to put its \$5 billion Saturn plant. The biggest corporation in the world was making the largest one-time investment in U.S. history.

Three banks of GM computers analyzed 1000 sites in 38 States. Then (so the ad went) the top brass answered the question: "Where is the best place in America to build the highest quality car at the lowest cost, a small car that will compete with the Japanese imports?"

General Motors hadn't spent a penny yet advertising Saturn, but the intense competitions for the Saturn plant made the front pages for months during 1985. As a result, twice as many Americans were able to identify a Saturn as could identify a Pontiac even though Pontiac had been building cars since 1926 and Saturns wouldn't be produced until 1990.

Governors had made fools of themselves making pilgrimages to Detroit and sitting on stools on Phil Donahue's television show arguing the merits of their States. I hadn't done that but had met GM President Roger Smith in a hotel room in Memphis after he made a United Way Speech. I knew that the big Nissan plant, which had just located in Smyrna, would be either the hook or the kiss of death. So I said to Mr. Smith, "Why don't you put your plant right next to your competitor's plant, and tell your union and tell your management, if the Japanese can do it, you can do it, too."

That is exactly what GM decided to do. The Nissan and Saturn decisions put Tennessee on the map for companies looking for plant sites. (Nissan was the largest Japanese investment ever in the U.S.) Then, Tennesseans had almost no auto jobs and one of the country's lowest average family incomes. Today, thanks to the good work of Governors McWherter, Sundquist and Bredesen and Tennesseans' work ethic one-third of our jobs are auto jobs and our family incomes are a good deal higher.

The Nissan plant became the most efficient auto plant in North America and will begin making electric cars next year. Its future seems secure—and so does that of hundreds of suppliers—who have migrated to Tennessee because it is now central to the American auto industry's most efficient assembly plants as well as its market and because it is a right-to-work State with one of the "best 4" lane highway systems.

Saturn started off with a bang, created almost a cult following of owners but never made a profit. Its apparent death this week when Roger Penske couldn't find anyone to make Saturns so he could sell them is like any death, sad but full of memories.

Most of the memories are good. Saturn's life was a good life, for Tennesseans. It helped put us on the map, job wise. It helped raise our incomes. There is still that \$5 billion plant there, with another billion or so spent to improve it, waiting for GM or someone else to start making cars again. We Tennesseans will miss Saturn but are grateful for its short but good life that truly made our lives better.

#### TRIBUTE TO MARLA AND TOM LETIZIA

Mr. REID. Mr. President, I rise today to honor Marla and Tom Letizia on their being named "Menschen" of the Year by Congregation Ner Tamid. The award is intended to reflect the ultimate values of their congregation, which is to give selflessly of oneself to benefit the community. Marla and Tom have helped make Las Vegas and Nevada a better place with their business and community involvement.

Mr. Letizia started out as an account executive for many Las Vegas television stations including KLAS TV-8. He founded Letizia Ad Team in 1974. The firm specializes in television, radio, newspaper, direct mail, internet and outdoor advertising. Mr. and Mrs. Letizia owned radio and television outlets in Reno, Las Vegas, Laughlin and Tonopah, NV. They cofounded Tonopah's first radio station, KPAH-FM, which was sold in 1992, and the first radio station dual signal property in Laughlin/Las Vegas, KROL-AM, which was later sold in 1993. The Letizias were part owners of the first independent television station in Reno, KAME-TV, which later became a FOX affiliate before being sold in 1994.

In 2001, Mrs. Letizia founded Big Traffic Mobile Billboards Worldwide, which implements trucks that provide four-sided advertising space and environmentally friendly WOBI® walking billboards. She has over 35 years of marketing and journalism experience, beginning her career with KLAS-TV 8 as an assistant production manager and organizer and was subsequently promoted to director of the live television news broadcasts at 5 p.m. and 11 p.m. She gained distinction as the first female director in the history of Las Vegas, as well as the first female hired in production in Las Vegas, running the audio department during production and during live news broadcasts.

The Letizias help their community by acting as founding members of the Board of Trustees for the Meadows School. They are also on the advisory board of the Make-A-Wish foundation of southern Nevada. Marla and Tom also compassionately care about our planet Earth. One of their innovations was a green friendly walking billboard.

With their innovative business approach and compassionate approach to their fellow Nevadans, Marla and Tom represent this country at its best. They have achieved great things and I know their future, both as a family and a business remains, as bright as the neon lights from the Las Vegas Strip. I congratulate Mr. and Mrs. Letizia on their tremendous accomplishment.

#### BUDGET SCOREKEEPING REPORT

Mr. CONRAD. Mr. President, I rise to submit to the Senate the third budget scorekeeping report for the 2010 budget

resolution. The report, which covers fiscal year 2009, was prepared by the Congressional Budget Office pursuant to section 308(b) and in aid of Section 311 of the Congressional Budget Act of 1974, as amended. This is the final report for 2009.

The report shows the effects of congressional action through September 30, 2009, and includes the effects of legislation since I filed my last report on August 4, 2009. The new legislation is Public Law 111-68, an act making appropriations for the legislative branch for the fiscal year ending September 30, 2010, and for other purposes. The estimates of budget authority, outlays, and revenues are consistent with the technical and economic assumptions of S. Con. Res. 13, the 2010 budget resolution.

The estimates show that for fiscal year 2009 current level spending was \$3 billion above the level provided for in the budget resolution for budget authority and \$7.8 billion above it for outlays while current level revenues match the budget resolution level.

I ask unanimous consent that the letter and accompanying tables from CBO be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

CONGRESSIONAL BUDGET OFFICE,  
Washington, DC, October 8, 2009.

Hon. KENT CONRAD,  
Chairman, Committee on the Budget, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: The enclosed report shows the effects of Congressional action on the fiscal year 2009 budget and is current through September 30, 2009. This report is submitted under section 308(b) and in aid of section 311 of the Congressional Budget Act, as amended.

The estimates of budget authority, outlays, and revenues are consistent with the technical and economic assumptions of S. Con. Res. 13, the Concurrent Resolution on the Budget for Fiscal Year 2010, as approved by the Senate and the House of Representatives.

Pursuant to section 403 of S. Con. Res. 13, provisions designated as emergency requirements are exempt from enforcement of the budget resolution. As a result, the enclosed current level report excludes these amounts (see footnote 2 of Table 2 of the report).

Since my last letter dated August 4, 2009, the Congress has cleared and the President has signed an act making appropriations for the Legislative Branch for the fiscal year ending September 30, 2010, and for other purposes (Public Law 111-68). This act affects budget authority and outlays for fiscal year 2009.

Sincerely,  
ROBERT A. SUNSHINE,  
For Douglas W. Elmendorf, Director.

TABLE 1—SENATE CURRENT LEVEL REPORT FOR SPENDING AND REVENUES FOR FISCAL YEAR 2009, AS OF SEPTEMBER 30, 2009

(In billions of dollars)

	Budget Resolution <sup>1</sup>	Current Level <sup>2</sup>	Current Level Over/Under (—) Resolution

(In billions of dollars)

	Budget Resolution <sup>1</sup>	Current Level <sup>2</sup>	Current Level Over/Under (—) Resolution
Social Security Revenues .....	653.1	653.1	0.0

<sup>1</sup> S. Con. Res. 13, the Concurrent Resolution on the Budget for Fiscal Year 2010, includes \$7.2 billion in budget authority and \$1.8 billion in outlays as a disaster allowance to recognize the potential cost of disasters; those funds will never be allocated to a committee. At the direction of the Senate Committee on the Budget, the budget resolution totals have been revised to exclude those amounts for purposes of enforcing current level.

<sup>2</sup> Current level is the estimated effect on revenues and spending of all legislation, excluding amounts designated as emergency requirements (see footnote 2 of table 2), that the Congress has enacted or sent to the President for his approval. In addition, full-year funding estimates under current law are included for entitlement and mandatory programs requiring annual appropriations, even if the appropriations have not been made.

<sup>3</sup> Excludes administrative expenses of the Social Security Administration, which are off-budget, but are appropriated annually.

<b>SOURCE: Congressional Budget Office.</b>			
Note: n.a. = not applicable; P.L. = Public Law.			
<sup>1</sup> Includes the Children's Health Insurance Program Reauthorization Act of 2009 (P.L. 111–3), the American Recovery and Reinvestment Act (ARRA) (P.L. 111–5), and the Omnibus Appropriations Act, 2009 (P.L. 111–8), which were enacted by the Congress during this session, before the adoption of S. Con. Res. 13, the Concurrent Resolution on the Budget for Fiscal Year 2010. Although the ARRA was designated as an emergency requirement, it is now included as part of the current level amounts.			
<sup>2</sup> Pursuant to section 403 of S. Con. Res. 13, provisions designated as emergency requirements (and rescissions of provisions previously designated as emergency requirements) are exempt from enforcement of the budget resolution. The amounts so designated for fiscal year 2009, which are not included in the current level totals, are as follows:			
Helping Families Save Their Homes Act of 2009 (P.L. 111–22) .....	— 630	— 630	0
Supplemental Appropriations Act, 2009 (P.L. 111–32) .....	16,169	3,530	0
<b>Total, amounts designated as emergency .....</b>	<b>15,539</b>	<b>2,900</b>	<b>0</b>
<sup>3</sup> Section 1 of P.L. 111–46 appropriated \$7 billion to the Highway Trust Fund. The enactment of this legislation followed an announcement by the Secretary of Transportation on June 24, 2009, of an interim policy to slow down payments to states from the Highway Trust Fund. The Congressional Budget Office estimates that P.L. 111–46 will reverse this policy and restore payments to states at levels already assumed in current level. Thus, enactment of section 1 results in no change to current level totals. Other provisions of the act will reduce budget authority and outlays by \$40 million in 2009.			
<sup>4</sup> Section 164 of Division B of P.L. 111–68 reduces the required transfer from the Postal Service Fund to the Postal Service Retiree Health Benefits Fund for fiscal year 2009 by \$4 billion. The transfer does not affect unified budget totals; however, since the Postal Service Fund is off-budget, and current level does not include off-budget amounts, only the on-budget piece of the transfer (an increase in spending of \$4 billion) is shown in current level totals.			
<sup>5</sup> For purposes of enforcing section 311 of the Congressional Budget Act in the Senate, the budget resolution does not include budget authority, outlays, or revenues for off-budget amounts. As a result, current level excludes these items.			
<sup>6</sup> Periodically, the Senate Committee on the Budget revises the totals in S. Con. Res. 13, pursuant to various provisions of the resolution:			
<b>Original Budget Resolution Totals .....</b>	<b>3,675,927</b>	<b>3,356,270</b>	<b>1,532,571</b>
<b>Revisions:</b>			
For the Supplemental Appropriations Act, 2009 (section 401(c)(4)) .....	— 1,530	2,240	0
For an act to protect the public health by providing the Food and Drug Administration with certain authority to regulate tobacco products...and for other purposes (sections 311(a) and 307) .....	11	2	8
For further revisions to the Supplemental Appropriations Act, 2009 (section 401(c)(4)) .....	1,515	642	0
For an act to make technical corrections to the Higher Education Act of 1965, and for other purposes (section 303) .....	— 187	— 202	0
<b>Revised Budget Resolution Totals .....</b>	<b>3,675,736</b>	<b>3,358,952</b>	<b>1,532,579</b>

<sup>7</sup> S. Con. Res. 13 includes \$7,150 million in budget authority and \$1,788 million in outlays as a disaster allowance to recognize the potential cost of disasters; those funds will never be allocated to a committee. At the direction of the Senate Committee on the Budget, the budget resolution totals have been revised to exclude those amounts for purposes of enforcing current level.

## VOTE EXPLANATIONS

Mr. KERRY. Mr. President, I am necessarily absent for the vote today on the McCain amendment, Senate Amendment No. 2626 to the fiscal year 2010 Commerce, Justice, Science Appropriations bill (H.R. 2847). If I were able to attend today's session, I would have opposed the McCain amendment.

Mr. President, I was necessarily absent for the vote on the fiscal year 2010 Agriculture appropriations conference report and the Ensign motion to recommit the Senate fiscal year 2010

Commerce, Justice, and Science appropriations bill, H.R. 2847. If I were able to attend today's session, I would have supported the fiscal year 2010 Agriculture conference report and opposed the Ensign motion to recommit H.R. 2847.

## REMEMBERING SENATOR EDWARD KENNEDY

Mr. BARRASSO. Mr. President, in this chamber we have witnessed incredibly moving eulogies and remembrances of our departed colleague Sen-

ator Edward Kennedy. Obituaries in national and international newspapers convey the historic milestones of his life that none could forget, as well as more personal stories of the man that fewer knew.

So much has been said and written since Senator Kennedy's death August 25, 2009. Many of these stories paint the picture of his family, his life, his accomplishments, his legacy all of it extraordinary. Many of us are students of history. Indeed Senator Kennedy lived history.

I am reminded of the recollections of one of my predecessors as U.S. Senator for Wyoming, and a dear friend of Senator Kennedy, Senator Al Simpson. In an interview from 1997 given to the Institute of International Studies at the University of California as part of their "Conversation of History" project, Senator Simpson was asked: Who was the finest legislator he had ever worked with? Senator Simpson replied:

The finest legislator I ever worked with was Ted Kennedy. He had a magnificent staff, he even had a parliamentarian on that staff of his. So when you were in the legislative arena and you were bringing your lunch and staying late, you wanted to get Ted on your side or at least use some of his expertise. I would go to him sometimes early on and say look, you'll have to trust me, what the hell do I do right now to move this bill? Boy I'll tell you he had ways to do it and as you can see he uses those skills on issues in which I was totally on the other side. I can't remember them all there were so many. We were never on the same side. But he is a legislator.

And so he was. He was a quintessential legislator. There is no question about that.

Most of those who have so eloquently written and spoken since his death knew the Senator much better than I Presidents, Senators, world leaders, and other dignitaries, members of his family and friends back in New England. They recall the Senator all of us in the Senate knew, even if only briefly a kind, caring, passionate, and deliberate figure.

Others have detailed his accomplishments they are legendary and lasting. What can I add to these recollections?

I was neither a close friend, confidante, nor legislative partner to Senator Kennedy. I was a new Senator from Wyoming when I first met him. But the story I have, I would like to share, as it is meaningful and illustrates his larger than life personality in the U.S. Senate.

On June 25, 2007, I was sworn in to the U.S. Senate. Senator Kennedy was one of a handful of Democrats in the Chamber. As you would expect, I had a lot of family members in the gallery. Later, they joined me along with Malcolm Wallop, former U.S. Senator for Wyoming, and Senator Mike Enzi in a reception off this floor.

As I was walking up the center aisle to leave the Chamber, there was a booming voice that reverberated through the Chamber. "Senator, Senator!" I was new. I had been a U.S. Senator at that point for all of 60 seconds, so I ignored the calls. At that moment a hand grabbed my shoulder, I turned and heard this booming voice again "Hi, I'm Ted Kennedy." Senator Kennedy through his voice and his presence knew how to get your attention.

All of those who came to see me sworn in—family, friends from Wyoming—they heard it too and we all broke out laughing. "Senator Kennedy, we know who you are."

Senator Kennedy began to tell me stories of his life and about his visits to Wyoming. He spoke about a trip to Rock Springs, WY, when his brother John was running for President. He spoke of Wyoming casting the votes to secure the nomination for John.

He told me about the people he had met—members of the Wyoming Democrat Party at the time—relationships he had built nearly 50 years ago. He named one after another as if he was reading from text. It was a stunning moment to watch Senator Kennedy recall places, events, and people in my home State from 1960.

At my welcoming reception he took personal time with my son Peter and my daughter Emma, both in college. He said to them, "So you're the brother and you're the sister—you know I had some brothers." He talked about John and Robert and Joe. A living history lesson. He invited them up to his office to show them pictures and other memorabilia.

In his office in the Russell Building he must have spent half an hour with Peter and Emma going over pictures of his father Joe, mother Rose, and the Kennedy kids. He shared letters, notes from history.

I think he enjoyed it nearly as much as we did. He beamed when he spoke about his family.

Senator Kennedy leaves behind an astonishing legislative record of accomplishment. He achieved his goals to a degree that perhaps no other Senator in history has. As a public servant, he has few equals.

But he was so much more. Ted also leaves us with the memory of the man—the memory of his kindness and grace, his humility.

Books will detail Ted Kennedy's legislative victories. His moments in history. I will remember the moments he took to warmly and unexpectedly welcome this new Senator and touch the lives of my family that day as well.

To Vicki, we extend our family's sympathy and hope the coming days are filled with more love, God's grace and strength to go on. Bobbi and I wish the Kennedy family our best and our prayers are with you.

Ms. MURKOWSKI. Mr. President, I was deeply saddened by the passing of Senator Edward M. Kennedy in August, my colleague on the Health, Education, and Labor Committee, a statesman in every sense of the word, and a Senator not just for the people of Massachusetts but for every corner of the Nation. I am grateful for the time I shared with him as a colleague and as a friend.

Senator Kennedy may be best known in this body for his consistent leadership on the big national issues. Whether you agreed with him or not Senator Kennedy was "all in" on the issues he cared about, like health care and education, and a formidable force to be reckoned with.

While Senator Kennedy was firm in his convictions, he was open to the ideas of other Senators, regardless of party affiliation. As most Senators who worked with him know, Senator Kennedy had an unequaled reputation for compromise and negotiation. As legislation was being written and developed, he recognized the importance of other Senators' perspectives on an issue, including mine, and was therefore willing to alter legislative proposals for the sake of cooperation and finding middle ground with Senators from any political party. The two years I spent on the HELP Committee with him as my chairman were truly a blessing.

There was so much to admire about Senator Kennedy's career. But the thing I really admired about Senator Kennedy was his ability to look beyond the beltway to take up causes that might seem obscure to many in this body—causes that offended Senator Kennedy's sense of justice. Let me offer a few examples from my State of Alaska.

Federal law requires agencies to reinstate civil servants who go on active duty in the National Guard and Reserves when their service is complete. The law goes by the acronym USERRA. When Bob Traut of Palmer, AK, completed his active duty service with the Alaska National Guard, he was not reinstated to his position in the Indian Health Service. His position had been eliminated and he was not offered another. He filed a USERRA complaint with the Department of Labor, which was passed around among investigators and ultimately lost. Several years after he started this process he was offered a Federal position at a U.S. Coast Guard base hundreds of miles from his home. He couldn't drive to his new workplace—he had to fly there because Kodiak is an island not connected by road to the rest of Alaska. Even then his back pay claims were lost in a morass of bureaucracy, in spite of repeated inquiries from my office. Bob Traut's fortunes changed when Senator Kennedy decided to hold an oversight hearing about USERRA focused on Bob Traut's case.

The Alaska Native Claims Settlement Act, the 1971 law which resolved the aboriginal land claims of Alaska's first peoples, is truly one of the landmark pieces of federal Indian legislation. The administration offered Alaska's Native people 10 million acres of land. Senator Kennedy came to the floor on several occasions to argue that the number of acres should be no less than 40 million. The ultimate settlement was 44 million acres. A settlement which might not have been possible without Senator Kennedy's leadership.

As the chairman of the Subcommittee on Indian Education, Kennedy joined a few other Senate colleagues on a trip to several Alaska Native villages in April 1969. Kennedy recalls being stunned by the poverty and despair in the villages, many of which still lack basic sanitation and are plagued by high rates of sexual assault, domestic violence, and suicide. It affected Senator Kennedy so deeply that he found it difficult to “numb the pain.”

The course of Senator Kennedy's life brought him many blessings and accomplishments. He was a father of three beautiful children and two stepchildren, a Harvard graduate, a nine-term Senator with the third longest time serving in the U.S. Senate in American history, a veteran of the Army, a talented football player who almost went pro but opted instead for a life of public service . . . the list goes on.

My condolences and blessings go out to his family, especially his wife and children. Despite Ted's passing, his spirit lives on. There is little doubt in my mind that this spirit will inspire generations of our colleagues in the years ahead to take up his causes and ensure that the vulnerable in America, the often forgotten Americans who live in remote places like rural Alaska, are never forgotten.

Ted, thank you for your service.

#### COMMENDING SENATOR MEL MARTINEZ

Mr. ENZI. Mr. President, it is always a bittersweet moment when we have to say goodbye to a colleague who is retiring from the Senate. We are sorry to see them go, but we are also very appreciative of all they have brought to our deliberations during their years of service to the people of their home State and the Nation.

Mel Martinez is such a person—the kind who makes the Senate the great deliberative body that it is, for Mel has a great story to tell of his life and how he came to the United States to pursue his own version of the American dream.

If you would have told Mel when he was young that he would someday serve as an elected official in the U.S. Government, I am not sure he would have believed you. He began his life in a small city in Cuba, under the repressive regime of Fidel Castro. At the age of 15 he escaped and began to pursue his destiny in the United States. At every stage of his life he was determined to do everything he could to make a difference. Looking back, I think it's clear he has succeeded beyond his wildest dreams.

From the time he first arrived in the United States, Mel was grateful for the opportunities that were available to him, and he was determined to give

something back to show his appreciation for them.

He began in his own backyard when he served as mayor of Orange County. As a former mayor myself, I know how difficult a job that can be. For Mel, it was a chance to make the lives of his neighbors and fellow citizens better and that became his focus and his top priority.

He did a good job and quickly earned the respect and support of his fellow townspeople. He also caught the attention of then President-elect George Bush who was looking for someone to serve in his Cabinet who had experience dealing with housing issues and the problems that were facing our cities and towns. That is something that Mel had been dealing with in Florida, so he became the first Cuban American appointed to a President's Cabinet when he was named to serve as our Secretary of Housing and Urban Development.

Soon after Mel was sworn in he found himself in the middle of a challenge as great as any that had ever been faced by a Cabinet Secretary before. In the aftermath of the terrorist attacks of September 11, Mel was assigned the responsibility of working on the reconstruction of lower Manhattan.

Then, having served on both the local and national level, Mel then decided to take on another challenge—representing the people of Florida in the Senate. Mel proved to more than up to the task as he has taken on a variety of issues and served on several different committees. Through it all, he has worked hard to put his principles and values into practice every day and he has a great deal to show for his service to the people of Florida in the Senate.

In the years to come, I will always remember Mel's remarkable life story that stems from the years he spent in Cuba living under a dictatorship. They were a matter of great interest to me when I was a student, but for him, it was his life. While I had only read about and watched the drama unfold during my years at George Washington University, Mel had lived it. It was a time that helped to shape his character and mold his destiny and make him appreciate the great gift of citizenship that far too many of us take for granted.

Mel has also impressed me as a man of great faith who takes his relationship with God very seriously. He shared his belief with us at one of our Prayer Breakfasts and he impressed us all with his great sincerity and his unshakeable belief that God had placed him where He needed him and that was why he was in the Senate. He saw it as an opportunity to serve God and the people back home in Florida, as well as those he left behind in Cuba and many more just like them all over the world.

Too often when we say goodbye to one of our fellow members, we forget

that there is just as much life outside of the beltway as there is inside it. Our focus on Washington and our work in the Senate sometimes makes us think that this is the only place where we can pursue our dreams and make a difference in the world around us. Mel is proof positive that there are many ways that we can make this a better world and in the years to come, as this chapter in his life ends and another begins, I have no doubt we will see Mel continue his efforts to address the problems of this world to ensure that those who have lived for too long in fear and oppression in Cuba and all over the world will someday claim the rights and freedoms we all cherish as their own.

Good luck, Mel. I hope you and Kitty enjoy the years to come. Together you have made a great team and we know there is still much more to come in this great adventure of your lives. Good luck and God bless.

Mr. CORNYN. Mr. President, I join my colleagues in appreciation and admiration of Senator Mel Martinez.

Mel lived the first 15 years of his life under communist dictatorship in Cuba. That experience gave him a special appreciation for the blessings of liberty. As Mel's own career in public service took him from Florida to Washington, he never forgot the people living under totalitarianism in his homeland. And he never wavered in his conviction that the people of Cuba deserved the same rights as the rest of us, especially the rights to choose our leaders, worship as we please, and live in freedom.

Mel distinguished himself as a lawyer in central Florida, then won elective office as mayor of Orlando, and was appointed by President Bush to serve as his first Secretary of Housing and Urban Development. Secretary Martinez helped the people of lower Manhattan rebuild after the terrorist attacks of September 11, 2001, and he worked to expand opportunities for home owners nationwide. Mel was proud that he was the first Cuban-American to ever serve in a President's Cabinet.

Mel was also the first Cuban-American to serve in the U.S. Senate. In this Chamber, he raised his voice to strengthen our national defense, especially the Navy's shipbuilding program. He supported the development of America's natural resources in an environmentally responsible way. He had a heart for victims of Alzheimer's disease and their families, and supported greater Federal research funding to help find a cure.

Senator Martinez and I shared a concern about waste, fraud, and abuse in Medicare and Medicaid. So earlier this year, he and I introduced legislation to do something about it. The Seniors and Taxpayers Obligation Protection Act or the STOP Act would give Federal agencies greater tools and authority to

detect waste, fraud, and abuse before they happen. The STOP Act has sponsors on both sides of the aisle, and I believe its provisions should be a part of our efforts to reform our health care system.

Mel served less than a full term in the Senate, but he has helped shape legislation that will govern our Nation for years to come. He and his wife Kitty are now back home in central Florida, and Sandy and I wish them both the very best.

Ms. MURKOWSKI. Mr. President, I rise to remember a good friend who is leaving the Senate after a career of public service, Senator Mel Martinez.

Mel Martinez came to the Senate in 2005 after serving as Secretary of Housing and Urban Development under President George W. Bush. Senator Martinez was the first Cuban American to serve in the U.S. Senate. Born in Cuba, Senator Martinez arrived in the United States at age 15.

During his tenure as Secretary of Housing and Urban Development, Mel Martinez addressed the National Congress of American Indians, pledging to strengthen the government to government relationship with tribes in the Federal Indian programs administered by his agency. He was keenly interested in ameliorating the third world housing conditions that exist in the Native villages of rural Alaska. Alaska's tribe and tribal housing authorities benefit greatly from Federal funding available under the Native American Housing Assistance and Self Determination Act and other Federal housing programs, which were strengthened under Senator Martinez' leadership at HUD.

Despite the fact that the States we represent are as far away geographically as States can be, we have always been good friends.

I was proud to serve with Senator Martinez on the Energy and Natural Resources Committee. Senator Martinez was a close ally on energy issues, and he was always a fierce advocate for the interests of his Floridian constituents. We shared a common interest in promoting Federal energy efficiency standards, responsible nuclear waste storage, and we worked together on the 2005 Energy Policy Act. He was a tough bargainer on the more recent 2007 Energy Independence and Security Act as he aggressively pursued the interests of his constituents with respect to Federal Outer Continental Shelf energy development.

I wish Mel Martinez and his wife Kitty the best of luck in their future endeavors.

#### MILITARY NOMINATIONS

Mr. LEVIN. Mr. President, from the Committee on Armed Services, I report favorably the attached listing of nominations:

Those identified with a single bullet • are to be placed on the Executive Calendar. Those identified with a double asterisk (\*\*) are to lie on the Secretary's desk for the information of any Senator since these names have already appeared in the CONGRESSIONAL RECORD and to save the expense of printing again:

MILITARY NOMINATIONS PENDING WITH THE SENATE ARMED SERVICES COMMITTEE WHICH ARE PROPOSED FOR THE COMMITTEE'S CONSIDERATION ON OCTOBER 8, 2009

• LTG David M. Rodriguez, USA to be lieutenant general and Commander, International Security Assistance Force Joint Command (Reference No. 1067)

#### ENERGY AND WATER APPROPRIATIONS REQUEST

Mr. BOND. Mr. President, it has come to my attention that my name was incorrectly added next to the line item "St. John's Bayou and New Madrid Floodway" Project in the conference Report of the fiscal year 2010 Energy and Water Resources Development Appropriations Act. I ask that the RECORD reflect that this is a mistake. I did not make a request for funding for this project and my name should not be attached to this project.

#### PROTECTING OLDER WORKERS AGAINST DISCRIMINATION ACT

Mr. HARKIN. Mr. President, on Tuesday, October 6, I introduced S. 1756, the Protecting Older Workers Against Discrimination Act.

To appreciate the need for this bill, consider the case of a hard-working Iowan named Jack Gross. Mr. Gross gave the prime of his life, a quarter century of loyal service, to one company. How did that company reward him for his dedication and hard work? It brazenly demoted him and other employees over the age of 50, and gave their jobs to a younger employee.

Expressly to prevent this kind of discrimination, over 40 years ago Congress passed the Age Discrimination in Employment Act, ADEA. The ADEA, which made it unlawful to discriminate on the basis of age, was modeled on and used the same language as title VII of the Civil Rights Act of 1964, the law that prohibits employment discrimination on the basis of race, sex, national origin and religion.

When Mr. Gross sought to enforce his rights, a jury of Iowans heard the facts and found that his employer discriminated against him because of age. That jury awarded him almost \$47,000 in lost compensation.

The case was ultimately appealed to the Supreme Court. This past June, in *Gross v. FBL Financial, Inc.*, five Justices rewrote the rules—indeed, effectively rewrote the law—and ruled against Mr. Gross and other older workers. In doing so, the Court made it harder for those with legitimate age discrimination claims to prevail under the ADEA.

For decades, the law was clear. In 1989, in *Price Waterhouse v. Hopkins*, the Court ruled that if a plaintiff seeking relief under title VII of the Civil Rights Act demonstrated that discrimination was a "motivating" or "substantial" factor behind the employer's action, the burden shifted to the employer to show it would have taken the same action regardless of the plaintiff's membership in a protecting class. As part of the Civil Rights Act of 1991, Congress formally codified the "motivating factor" standard with respect to title VII.

Because the Age Discrimination in Employment Act uses the same language as title VII, was modeled off it, and had been interpreted consistent with the Civil Rights Act of 1964, courts correctly and consistently held that a victim bringing suit under the ADEA need only show that membership in a protected class was a "motivating factor" in an employer's action—the same standard for plaintiffs claiming discrimination on the basis of race, sex, religion, or national origin. If an employee showed that age was one factor in an employment decision, the burden was on the employer to show it had acted for a legitimate reason other than age.

In *Gross*, the Court—addressing a question on which it did not grant certiorari—tore up this settled decades old standard. In its place, the Court applied an entirely new standard that makes it prohibitively difficult for a victim to prove age discrimination. According to the Court, a victim of age discrimination bears the full burden of proving that age was not only a motivating factor but the decisive factor.

This extremely high burden radically undermines older workers' ability to hold employers accountable. Bear in mind that unlawful discrimination is often difficult to detect. Obviously, those who discriminate do not often admit they are acting for discriminatory reasons. To the contrary, they go out of their way to conceal their true intent. Discrimination cases rarely involve a smoking gun.

The reality, however, is that while employers rarely post signs saying "older workers need not apply," ageism in the workforce does indeed exist, as Mr. Gross and his colleagues learned the hard way. Indeed, according to an AARP study, 60 percent of older workers have reported that they or someone they know has faced age discrimination in the workplace.

Countless thousands of American workers who are not yet ready to voluntarily retire find themselves jobless or passed over for promotions because of age discrimination. Older workers often face ugly, baseless stereotypes: That they are not as productive as younger workers; that they cannot learn new skills; that they somehow have a lesser need for income to provide for their families.

These stereotypes—and the discrimination they feed—are wrong and immoral. This is also harmful to our economy, inasmuch as it deprives us of the skills and talents of millions of older workers.

The timing of the Court's decision is particularly troubling. As our economy continues to struggle, older workers are being hit particularly hard. According to the Department of Labor, there are 2 million unemployed workers over the age of 55. This is an all-time high since the Bureau of Labor Statistics began matching age and unemployment in 1948. According to the Equal Employment Opportunity Commission, in 2008 nearly 25,000 age discrimination claims were filed, a 30-percent increase over 2007. Given the stereotypes that older workers face, it is no surprise that, on average they remain unemployed twice as long as all unemployed workers.

The Protecting Older Workers Against Discrimination Act reverses the Court's decision and restores the law to what it was for decades. The bill makes clear that when an employee shows that discrimination was a "motivating factor" behind a decision, the burden is properly on the employer to show it complied with the law.

The act is modeled on part of the Civil Rights Act of 1991, which passed the Senate 93-5. As under title VII of the Civil Rights Act, once a plaintiff establishes that age was a motivating factor, the burden shifts to the employer. If the employer establishes that the same decision would have been made regardless of discrimination, the employer remains liable, but remedies are limited.

Only the employer is in a position to know his or her own mind and offer an explanation as to why a decision that involves discrimination was actually motivated by legitimate reasons. By putting the entire burden on the worker to demonstrate the absence or insignificance of other factors, the Court in effect gave employers license to discriminate, so long as they do not actually say they are singling out an employee solely because of age.

Finally, the Protecting Older Workers Against Discrimination Act makes clear that the "motivating factor" framework applies to all antidiscrimination and antiretaliation laws.

In Gross, Justice Thomas defended the Court's radical departure from well-established law by noting that the Court "cannot ignore Congress' decision to amend title VII's relevant provisions but not make similar changes to the ADEA." In other words, the Court found that because Congress, in the Civil Rights Act, codified the "motivating factor" framework for title VII of the Civil Rights Act, but not for the ADEA, Congress somehow must have intended Price Waterhouse not to apply to any statute but title VII. This

is a serious misreading of the intent of Congress.

Unfortunately, this reasoning in Gross has already had reverberations in other civil rights cases since many antidiscrimination and antiretaliation statutes utilize similar language as title VII and the ADEA. As the Seventh Circuit recently held, "[Gross] holds that, unless a statute (such as the Civil Rights Act of 1991) provides otherwise, demonstrating but-for causation is part of the plaintiff's burden in all suits under federal law."

The Protecting Older Workers Against Discrimination Act, therefore makes clear that Congress is in no way questioning the "motivating factor" framework in other antidiscrimination and antiretaliation statutes.

The aim of this bill is very simple. It reiterates what Congress said 40 years ago when it passed the ADEA: When an employer makes an employment decision it is illegal for age to be a factor. A person should not be judged arbitrarily because he or she was born on or before a certain year, despite the fact that he or she still has the ability to contribute as much, or more, as the next person. This bill will help ensure that all our citizens have an opportunity commensurate with their abilities, for productive employment.

#### AMERICA'S ECONOMIC STATE OF MIND

Mr. BARRASSO. Mr. President, I rise today to submit for the RECORD a letter I received from the mayor of Evanston, WY, William Davis.

Evanston is a wonderful community located in the Bear River Valley of southwest Wyoming. The town was founded in the 1800's during construction of the First Transcontinental Railroad. Today, over 11,000 people call Evanston home.

Mayor Davis wrote to me last week. He wanted me to know that individuals and communities across Wyoming are feeling the impact of America's current economic times. This does not come as a surprise. What I found of particular interest in Mayor Davis' letter was his observations regarding the primary factor driving our economy: Americans' anxiety about the future.

Like Mayor Davis, I hear regularly from the people of Wyoming who are concerned about the future of our country. They are anxious about the changes being proposed in Washington. They are concerned about losing control over their own lives to Federal bureaucracies. They are angry about the financial train wreck called the Federal deficit that is picking up steam and headed their way.

Mr. President, the mayor's sentiments are shared by thousands of people across Wyoming. I would ask that his letter be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

CITY OF EVANSTON, WYOMING,  
September 28, 2009.

Senator MIKE ENZI,  
Russell Senate Office Building,  
Washington, DC.

Senator JOHN BARRASSO,  
Dirksen Senate Office Building,  
Washington, DC.

Representative CYNTHIA LUMMIS,  
Longworth House Office Building,  
Washington, DC.

DEAR SIRS AND MADAM, you have already heard that sales tax revenues in Wyoming have been plunging for quite some time as the economic times continue to challenge the people who live and work here. I am also confident that you are all well aware of the impact that these lost taxes have on local governments in the state— Uinta County's sales taxes for this fiscal year are down nearly 35% from this same time last year. Evanston's last distribution from the Department of Revenue was 48% less than for this same month last year!

It goes without saying that we are spending many hours looking into our budgets for ways to provide city services to our residents and citizens while facing head on the loss of such important revenues. We will survive but it will be painful to say the least.

This brings me to the reason for this letter. I have been giving much thought and consideration to the reasons that people are not spending their money on those items that generate sales taxes that the local governments depend so heavily upon. Without trying to pick a fight I think that Congress shares much of the burden for the fears and feelings that are keeping citizens and businesses from spending money.

Every day we hear the news of a new \$800 billion program here or a \$1 trillion overhaul of the healthcare system. Seniors hear about a potential loss of Medicare benefits that will cost them more out of pocket for many of their daily needs. Young families see the prices of groceries and utilities on the rise. It is harder for them to afford the basic needs of their children when it comes to school supplies and new clothes. They hear that energy costs to heat their homes and drive their cars are going to go up because of a new cap and trade bill already passed by the House and awaiting action in the Senate. Businesses are stagnant as well while their owners and managers wait to see just what the federal government is going to change that will affect the way they do business. What costs will increase? Will I have to pay even more out from my shrinking bottom line to cover increased costs of unemployment? Healthcare? Utilities? With shrinking sales can I even afford to keep my current employees let alone hire anyone additional? The list just seems to go on and on.

Why would a business seek to expand or hire someone else until these issues are all ironed out? Why would a mother and father plan a vacation or purchase almost anything that is not a necessity when there is so much that is unknown about their future? Will there be an income? Will I have any benefits? Will the prices continue to rise? How can I save for my kids education expenses? What will my taxes be in the future? How much higher can my credit card interest rate go?

These are the questions in the real world that I live in everyday. I don't have to travel back to Wyoming to get this perspective. I hear about it everyday when I go the store or out to dinner. People share their fears and anxieties with me almost everywhere I go these days. Try as I might to offer some assurances that we can work together to make

things better my efforts are not very successful.

My quick solution to these problems? Tell Congress to back off for awhile. Certainly there are many problems that need to be addressed on the national level. We all want to have a clean and healthy environment but we all want to have a job as well. All of us would like to see roads and bridges improved and made safer but we also need food to eat and clothes to wear. No one wants to see someone suffer because they don't have adequate health insurance but no one wants to lose that benefit themselves because their employer just laid people off or, worse yet, just closed the doors. In most communities people are used to rallying and supporting their neighbors when they face a sudden illness or get a terminal diagnosis, but if they can't pay the rent they can't do much for their neighbor either.

They read that the national debt ceiling just had to be raised but only by a couple of trillion dollars, so not that much more. The people that talk to me aren't stupid. They know the day of reckoning for all of this spending is coming. They are trying their best to be ready for it but they also know that they won't be able to save enough today to be ready for that tomorrow. They see the treasury print more money or sell more of our debt to a foreign nation and they know that this is not good. They used to be able to get some money to cover their debts from their house but this has gone away. They used to have some retirement funds in the market but this has gone away. They used to think about retirement at some point in their lives but now figure they will be working much longer now than they had once thought.

Their decisions to not spend money really hurt on the local level in Wyoming. I suspect the same is true in many other states because we (local governments) do not have the means to reach directly into their pockets to get the necessary funds for our services like the federal and state governments do.

People and businesses are hunkered down and holding tight while they wait to see when the Congress is going to quit proposing massive and expensive changes to the entire landscape of the country. If this were a battlefield I would say that the current strategies being employed are a well thought out and all encompassing assault. We are effectively being surrounded. We have no open flanks to escape through. Almost every aspect of our lives appears to be exposed and we have no way to cover it up.

I ask the question then: are we creating more panic and fear with all that is going on? If we just settled down and got out of crisis mode would businesses begin to expand on their own? Would people once again shop without fear this could be their last shopping trip for awhile? If everyone just stopped and took in a very deep breath and exhaled slowly would the increased flow of oxygen into the body bring clearer thoughts and a more relaxing mood?

It is almost the first of October. It just doesn't seem to me that we need to disarm and dismantle all of the world's nuclear arms; create a massive overhaul of the world's best healthcare system; return the atmosphere to a pre 1950's condition; balance a federal budget; save every endangered species; find a cure for H1N1 virus; create a vaccine for HIV/AIDS; declare what is left of the public lands in the west as wilderness; save the polar ice cap; become energy self sufficient; tear down all of the coal fired generation facilities; replace every incandescent

light bulb with a fluorescent one; paint every roof top in the United States white; and do everything else that is being talked about and have it all done by the end of this year. It makes no sense to me and I don't think it makes much sense to anyone else.

I realize that none of you belong to the party currently "in power" (such an awful term), but there may be something that you can do to just slow things down some. The people of this country need time to catch their breath.

Thank you for letting me share my thoughts with you. We will continue to do the best we can at picking up the pieces that are left to us. We will also continue to hope for bigger pieces to come our way.

Respectfully yours,

WILLIAM R. DAVIS,

Mayor.

#### ADDITIONAL STATEMENTS

##### TRIBUTE TO DR. FORREST M. BIRD

• Mr. CRAPO. Mr. President, today I am proud to honor and congratulate Idaho resident Dr. Forrest M. Bird for a lifetime of service and achievement. I had the pleasure today of meeting with Dr. Bird and his wife Pam, and very much enjoyed that short visit. Dr. Bird is well and widely known around the world for his lifesaving inventions: the Bird Mark 7 respirator, which was the first reliable and low-cost respirator in the world; and the Baby Bird respirator, which has greatly decreased infant mortality rates. In addition to being a brilliant inventor and scientist, Dr. Bird is a former pilot and founder of the Bird Aviation Museum and Invention Center, which is located in Sagle, ID, where his company, Percussionaire Corporation, produces his lifesaving medical devices. He has been the recipient of numerous awards, including two Lifetime Scientific Achievement awards, and has been inducted into the National Inventors Hall of Fame. In 2008, he was awarded the Presidential Citizens Medal by President Bush and received the National Medal of Technology and Innovation by President Obama just this week.

Dr. Bird's interest in aviation and his invention of the world-renowned Bird respirators are remarkably intertwined. His father served as a pilot in World War I, and, after earning a degree in aeronautics, Dr. Bird served as an Army Air Corps pilot in WWII. At the time, airplanes were designed to reach higher altitudes, but pilots were increasingly unable to breathe as the altitude increased. Dr. Bird's consideration of this problem, and his attendance at medical school after the war, eventually led him to the invention of the famous Bird respirator. In 2007, his twin interests of aviation and invention led him to open the Bird Aviation Museum and Invention Center.

Clearly there is good reason for the impressive list of honors that Dr. Bird

has received throughout his life. It has been a life of service that has made an incredible mark upon the world. His inventions have touched, transformed, enhanced and saved the lives of millions around the world. His museum provides a great service to his community by educating and inspiring young visitors and by bringing long-lost memories alive for older visitors. For his groundbreaking contributions to America and the world, Idaho is proud to have produced such an impressive citizen. We appreciate and honor his remarkable achievements.●

##### REMEMBERING BRIGADIER GENERAL MILDRED INEZ CAROON BAILEY

• Mrs. HAGAN. Mr. President, today I honor a woman of great character; a woman who provided unquestionable leadership to our Nation and a woman who proudly hailed from North Carolina. Our State motto, "Esse Quam Videri," "To be, rather than to seem," richly describes BG Mildred Inez Caroony Bailey; a trailblazer who thrived on challenges, especially when she was told, "it can't be done." As a member of the Senate Armed Services Committee, I am proud to recognize General Bailey's contributions to the U.S. Army in this Chamber today.

Brigadier General Bailey was born in 1919 in Fort Barnwell, NC, and raised in nearby Kinston. Inez, as she was known to her friends, directed the Women's Army Corps, WAC, from 1971 to 1975. Enlisting at a time when a woman's role in uniform was unclear, she experienced unquestionable changes for women in the military throughout her 33-year career. General Bailey was the third female to be promoted to brigadier general, a rank she never sought, but would never have thought to turn down.

When she wasn't studying her favorite subject, French, Inez worked in her parents' grocery store. Upon graduation, she enrolled in Flora McDonald College in Red Springs, NC, and later transferred to the Woman's College of the University of North Carolina—now the University of North Carolina at Greensboro. She graduated in 1940 with a degree in education and one professional goal—to be a French teacher. She eventually accepted a job teaching French in Taylorsville, NC.

When World War II broke out, this North Carolina French teacher thought a job in the Army Air Corps might be interesting, but it wasn't until a friend dragged her along to Fort Bragg that she really gave the military a second thought. The Army needed women to take the place of male soldiers who worked nonbattlefield jobs in order to free them for service on the front lines. Six months after Pearl Harbor, Inez joined the Women's Army Auxiliary Corps, WAAC, the predecessor to WAC,

at Fort Bragg. Although her parents were unhappy about her decision, they supported her nonetheless. Although women held primarily administrative, clerical and supply-type positions, she was encouraged to discover that women were also packing parachutes and were even mechanics. Due to her college degree, General Bailey was eligible for officer candidate school.

Her first unit command was at George Field Army Air Base in Illinois. There, she became very good at marching. She said, "I didn't know any women who didn't like marching. We thought it was fun and we were proud of our marching, we could keep a good beat with the Colonel Bogey March!" They even added words to the march, "Duty is calling you and me. We have a date with destiny. Ready, the WACs are ready. Our hearts are steady, the world to set free. Service, we're in it heart and soul. Victory is our only goal. We love our country's honor, and we'll defend it against any foe."

Eventually the Army made use of her background as a French teacher, assigning her to teach English to freed French prisoners of war who had been held in Morocco. She was thrilled to teach the soldiers because they were excited to learn, unlike the high school students she taught before joining the Army. At the end of the war, the debate about women serving in the military continued. Brigadier General Bailey could have left, but by then she was married and making, as she recalled, "a magnificent sum of \$166.60 and 2/3 cents a month—much more than a teacher's salary." She commanded a WAC attachment in the 98th General Hospital in Munich, where she was the highest ranking first lieutenant, male or female, in the European Command. She made first lieutenant within 6 months after she joined the service and had many great assignments that she described as "wonderful assignments—but there were no promotions involved, because women weren't promoted."

Eventually General Bailey returned to the States where she was initially assigned to intelligence work in the Military District of Washington before reporting for duty as a recruiter in charge of recruiting women in the seven Southeastern States; including North Carolina. Recruiting was a turning point for Inez Bailey. She discovered she was a "ham and loved being interviewed on television and making speeches." She led a team of recruiters who exhibited around the country with a program that highlighted the historic contributions of women in every branch of the military. The exhibit included Belle Boyd, a Confederate spy who was a captain and honorary aide de camp to GEN Stonewall Jackson. After recruiting, Brigadier General Bailey became the Army's Senate liaison. She said for the first few weeks, all she saw were the backs of the Senators' heads from the Senate galleries.

After 29 years of service, she was assigned to Fort McClellan, AL, as the deputy commander of the training center. When General Westmoreland summoned her to Washington, she asked if the meeting could be postponed because she was involved in a theater production she didn't want to miss. All the while she thought, "If General Westmoreland suggests I might be the new director of the Women's Army Corps, I'm just going to say no thank you. If I'm your first choice, then take the second choice." She didn't get a chance to argue when he told her she would be the new WAC director. She was needed because the Army needed to recruit more women. Under her tenure the number of women in the Army tripled; from 13,000 to 39,000. And for the first time, women were allowed to command men.

She retired from the Army with the rank of brigadier general. Her military decorations included the Distinguished Service Medal and the Legion of Merit. General Bailey will be interred at Arlington National Cemetery on October 14. Her husband, Marine Sergeant Major Roy C. Bailey, died in a traffic accident in 1966.●

#### RECOGNIZING THE INTERNATIONAL FERTILIZER DEVELOPMENT CENTER

● Mr. SHELBY. Mr. President, I wish to honor the International Fertilizer Development Center, IFDC, as it celebrates the 35th anniversary of its founding today, October 8.

In the wake of the worldwide food and energy shortages of the 1970s, the IFDC was established in Muscle Shoals, AL, to be a national center of excellence with expertise in fertilizers to service the needs of developing countries. Since its inception, the IFDC has worked to address issues such as international food security, the alleviation of global hunger and poverty, environmental protection, and the promotion of economic development and self-sufficiency.

Today, with staff members working in 30 nations throughout Africa, the Near and Far East, and Latin America, the IFDC is critical to ensuring underdeveloped countries have more efficient fertilizer and, therefore, food for their people. The IFDC has helped increase sustainable food production in more than 130 nations and has also contributed to the development of institutional capacity-building through training.

I sincerely congratulate the IFDC on its anniversary and wish it continued success in Muscle Shoals and abroad.●

#### MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mrs. Neiman, one of his secretaries.

#### EXECUTIVE MESSAGES REFERRED

As in executive session the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

#### MESSAGE RELATIVE TO THE WORLD TRADE ORGANIZATION WAIVER REQUIRED BY THE CLEAN DIAMOND TRADE ACT—PM 32

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States which was referred to the Committee on Finance:

*To the Congress of the United States:*

The Clean Diamond Trade Act (Public Law 108-19) (the "Act") authorizes the President to "prohibit the importation into, or exportation from, the United States of any rough diamond, from whatever source, that has not been controlled through the Kimberley Process Certification Scheme." The Act takes effect on the date that the President certifies to the Congress that (1) an applicable waiver that has been granted by the World Trade Organization (WTO) is in effect, or (2) an applicable decision in a resolution adopted by the United Nations Security Council pursuant to Chapter VII of the Charter of the United Nations is in effect. The Act remains in effect during those periods in which, as certified by the President to the Congress, such an applicable waiver or decision is in effect.

On July 29, 2003, the President certified that the WTO General Council had adopted a decision granting a waiver pursuant to Article IX of the Marrakesh Agreement Establishing the World Trade Organization concerning the Kimberley Process Certification Scheme for rough diamonds. The waiver applies to the United States and other WTO members that requested the waiver and to any WTO member that notifies the WTO of its desire to be covered by the waiver. The waiver was scheduled to have effect from January 1, 2003, through December 31, 2006. On December 19, 2006, the WTO General Council adopted a decision to extend the waiver through December 31, 2012.

I hereby certify that an applicable waiver, within the meaning of the Act, granted by the World Trade Organization has been in effect since January 1, 2003, and will remain in effect through December 31, 2012.

BARACK OBAMA.  
THE WHITE HOUSE, October 8, 2009.

#### MESSAGES FROM THE HOUSE

At 11:38 a.m., a message from the House of Representatives, delivered by

Ms. Niland, one of its reading clerks, announced that the House has passed the following bill, without amendment:

S. 1717. An act to authorize major medical facility leases for the Department of Veterans Affairs for fiscal year 2010, and for other purposes.

At 12:42 p.m., a message from the House of Representatives, delivered by Mrs. Cole, one of its reading clerks, announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 2092. An act to amend the National Children's Island Act of 1995 to expand allowable uses for Kingman and Heritage Islands by the District of Columbia, and for other purposes.

H.R. 2174. An act to designate the facility of the United States Postal Service located at 18 Main Street in Howland, Maine, as the "Clyde Hichborn Post Office".

H.R. 3547. An act to designate the facility of the United States Postal Service located at 936 South 250 East in Provo, Utah, as the "Rex E. Lee Post Office Building".

The message also announced that the House agrees to the amendment of the Senate to the bill (H.R. 1035) to amend the Morris K. Udall Scholarship and Excellence in National Environmental and Native American Public Policy Act of 1992 to honor the legacy of Stewart L. Udall, and for other purposes; with an amendment, in which it requests the concurrence of the Senate.

At 3:44 p.m., a message from the House of Representatives, delivered by Ms. Niland, one of its reading clerks, announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 2647) to authorize appropriations for fiscal year 2010 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe military personnel strengths for such fiscal year, to provide special pays and allowances to certain members of the Armed Forces, expand concurrent receipt of military recruitment and VA disability benefits to disabled military retirees, and for other purposes.

The message further announced that the House agrees to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 196. Concurrent resolution making corrections in the enrollment of the bill H.R. 2647.

At 4:24 p.m., a message from the House of Representatives, delivered by Mrs. Cole, one of its reading clerks, announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 3590. A bill to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes.

H.J. Res. 26. A joint resolution proclaiming Casimir Pulaski to be an honorary citizen of the United States posthumously.

The message also announced that the House agrees to the amendment of the Senate to the bill (H.R. 1016) to amend title 38, United States Code, to provide advance appropriations authority for certain accounts of the Department of Veterans Affairs, and for other purposes; with an amendment, in which it requests the concurrence of the Senate.

#### MEASURES REFERRED

The following bills and joint resolutions were read the first and the second times by unanimous consent, and referred as indicated:

H.R. 2092. An act to amend the National Children's Island Act of 1995 to expand allowable uses for Kingman and Heritage Islands by the District of Columbia, and for other purposes; to the Committee on Homeland Security and Governmental Affairs.

H.R. 2174. An act to designate the facility of the United States Postal Service located at 18 Main Street in Howland, Maine, as the "Clyde Hichborn Post Office"; to the Committee on Homeland Security and Governmental Affairs.

H.R. 3547. An act to designate the facility of the United States Postal Service located at 936 South 250 East in Provo, Utah, as the "Rex E. Lee Post Office Building"; to the Committee on Homeland Security and Governmental Affairs.

H.J. Res. 26. Joint resolution proclaiming Casimir Pulaski to be an honorary citizen of the United States posthumously; to the Committee on the Judiciary.

#### MEASURES READ THE FIRST TIME

The following bills were read the first time:

H.R. 3548. An act to amend the Supplemental Appropriations Act, 2008 to provide for the temporary availability of certain additional emergency unemployment compensation, and for other purposes.

H.R. 3590. An act to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes.

S. 1772. A bill to require that all legislative matters be available and fully scored by CBO 72 hours before consideration by any subcommittee or committee of the Senate or on the floor of the Senate.

#### EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, and were referred as indicated:

EC-3291. A communication from the Director of the Regulatory Management Division, Office of Policy, Economics, and Innovation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "C10-C18-Alkyl dimethyl amine oxides; Exemption from the Requirement of a Tolerance" (FRL No. 8437-3) received in the Office of the President of the Senate on October 5, 2009; to the Committee on Agriculture, Nutrition, and Forestry.

EC-3292. A communication from the Director of the Regulatory Management Division, Office of Policy, Economics, and Innovation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Ammonium chloride; Exemption from the Requirement of a Tolerance" (FRL No. 8438-1) received in the Office of the President of the Senate on October 6, 2009; to the Committee on Agriculture, Nutrition, and Forestry.

EC-3293. A communication from the Director of the Regulatory Management Division, Office of Policy, Economics, and Innovation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Quinclorac; Pesticide Tolerance for Emergency Exemption" (FRL No. 8434-3) received in the Office of the President of the Senate on October 6, 2009; to the Committee on Agriculture, Nutrition, and Forestry.

EC-3294. A communication from the Director of the Regulatory Management Division, Office of Policy, Economics, and Innovation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Sodium and Ammonium Naphthalenesulfonate Formaldehyde Condensates; Exemption from the Requirement of a Tolerance" (FRL No. 8439-1) received in the Office of the President of the Senate on October 6, 2009; to the Committee on Agriculture, Nutrition, and Forestry.

EC-3295. A communication from the Director of the Regulatory Management Division, Office of Policy, Economics, and Innovation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Pyraclostrobin; Pesticide Tolerances" (FRL No. 8793-2) received in the Office of the President of the Senate on October 5, 2009; to the Committee on Agriculture, Nutrition, and Forestry.

EC-3296. A communication from the Director of the Regulatory Management Division, Office of Policy, Economics, and Innovation, Environmental Protection Agency, transmitting, a Uniform Resource Locator (URL) for a document entitled "Issuance of 2009 Revised CERCLA Model Remedial Design/Remedial Action Consent Decree" received in the Office of the President of the Senate on October 6, 2009; to the Committee on Environment and Public Works.

EC-3297. A communication from the Director of the Regulatory Management Division, Office of Policy, Economics, and Innovation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Operating Permit Programs; Flexible Air Permitting Rule" (FRL No. 8964-8) received in the Office of the President of the Senate on October 5, 2009; to the Committee on Environment and Public Works.

EC-3298. A communication from the Director of the Regulatory Management Division, Office of Policy, Economics, and Innovation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Standard of Performance for Coal Preparation and Processing Plants" (FRL No. 8965-3) received in the Office of the President of the Senate on October 5, 2009; to the Committee on Environment and Public Works.

EC-3299. A communication from the Director of the Regulatory Management Division, Office of Policy, Economics, and Innovation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Approval and Promulgation of Air Quality Implementation Plans; Delaware; Regulation to Reduce Idling of Heavy-Duty Vehicles" (FRL No. 8967-1) received in the

Office of the President of the Senate on October 6, 2009; to the Committee on Environment and Public Works.

EC-3300. A communication from the Director of the Regulatory Management Division, Office of Policy, Economics, and Innovation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Approval and Promulgation of Implementation Plans; Corrections to the Arizona and Nevada State Implementation Plans" (FRL No. 8966-3) received in the Office of the President of the Senate on October 6, 2009; to the Committee on Environment and Public Works.

EC-3301. A communication from the Director of the Regulatory Management Division, Office of Policy, Economics, and Innovation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Approval and Promulgation of Air Quality Implementation Plans; Indiana; Extended Permit Terms for Renewal of Federally Enforceable State Operating Permits" (FRL No. 8963-4) received in the Office of the President of the Senate on October 5, 2009; to the Committee on Environment and Public Works.

EC-3302. A communication from the Chief of the Publications and Regulations Branch, Internal Revenue Service, Department of the Treasury, transmitting, pursuant to law, the report of a rule entitled "Taxation of Fringe Benefits" (Rev. Rul. 2009-28) received in the Office of the President of the Senate on October 5, 2009; to the Committee on Finance.

EC-3303. A communication from the Chief of the Publications and Regulations Branch, Internal Revenue Service, Department of the Treasury, transmitting, pursuant to law, the report of a rule entitled "Definition of Omission from Gross Income" (RIN1545-B194) received in the Office of the President of the Senate on October 5, 2009; to the Committee on Finance.

EC-3304. A communication from the Chief of the Publications and Regulations Branch, Internal Revenue Service, Department of the Treasury, transmitting, pursuant to law, the report of a rule entitled "Update of Weighted Average Interest Rates, Yield Curves, and Segment Rates" (Notice No. 2009-76) received in the Office of the President of the Senate on October 7, 2009; to the Committee on Finance.

#### EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of nominations were submitted:

By Mr. LEVIN for the Committee on Armed Services.

\*Army nomination of Lt. Gen. David M. Rodriguez, to be Lieutenant General.

By Mr. BINGAMAN for the Committee on Energy and Natural Resources.

\*John R. Norris, of the District of Columbia, to be a Member of the Federal Energy Regulatory Commission for the remainder of the term expiring June 30, 2012.

\*Jose Antonio Garcia, of Florida, to be Director of the Office of Minority Economic Impact, Department of Energy.

\*Joseph G. Pizarchik, of Pennsylvania, to be Director of the Office of Surface Mining Reclamation and Enforcement.

By Mr. LEAHY for the Committee on the Judiciary.

Brendan V. Johnson, of South Dakota, to be United States Attorney for the District of South Dakota for the term of four years.

Karen Louise Loeffler, of Alaska, to be United States Attorney for the District of Alaska for the term of four years.

Steven Gerard O'Donnell, of Rhode Island, to be United States Marshal for the District of Rhode Island for the term of four years.

\*Nomination was reported with recommendation that it be confirmed subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

(Nominations without an asterisk were reported with the recommendation that they be confirmed.)

#### INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second times by unanimous consent, and referred as indicated:

By Mr. FRANKEN (for himself, Mr. WHITEHOUSE, and Mr. BROWN):

S. 1763. A bill to amend the Internal Revenue Code of 1986 to deny the deduction for advertising and promotional expenses for prescription pharmaceuticals; to the Committee on Finance.

By Mr. LAUTENBERG:

S. 1764. A bill to clarify the application of section 14501(d) of title 19, United States Code, to prevent the imposition of unreasonable transportation fees; to the Committee on Commerce, Science, and Transportation.

By Mr. CARDIN (for himself, Ms. COLLINS, Mr. BROWN, Ms. MIKULSKI, Mr. WHITEHOUSE, Mr. SCHUMER, and Mr. BURRIS):

S. 1765. A bill to amend the Hate Crime Statistics Act to include crimes against the homeless; to the Committee on the Judiciary.

By Mr. BROWN (for himself and Mrs. HAGAN):

S. 1766. A bill to enhance reciprocal market access for United States domestic producers in the negotiating process of bilateral, regional, and multilateral trade agreements; to the Committee on Finance.

By Mr. BURR (for himself and Mrs. HAGAN):

S. 1767. A bill to authorize a land exchange to acquire land for the Blue Ridge Parkway from the Town of Blowing Rock, North Carolina, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. BURR (for himself and Mrs. HAGAN):

S. 1768. A bill to adjust the boundaries of Pisgah National Forest in McDowell County, North Carolina; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. VITTER:

S. 1769. A bill to amend the Internal Revenue Code of 1986 to allow certain coins to be acquired by individual retirement accounts and other individually directed pension plan accounts, and for other purposes; to the Committee on Finance.

By Ms. MURKOWSKI (for herself, Mr. CRAPO, and Mr. NELSON of Nebraska):

S. 1770. A bill to recognize the heritage of recreational fishing, hunting, and shooting on Federal public lands and ensure continued opportunities for these activities; to the Committee on Energy and Natural Resources.

By Mr. CASEY (for himself and Mr. SPECTER):

S. 1771. A bill to authorize the Secretary of Health and Human Services to establish a program of grants to newly accredited allopathic medical schools for the purpose of

increasing the supply of physicians; to the Committee on Health, Education, Labor, and Pensions.

By Mr. BUNNING:

S. 1772. A bill to require that all legislative matters be available and fully scored by CBO 72 hours before consideration by any subcommittee or committee of the Senate or on the floor of the Senate; read the first time.

#### SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. REID (for himself and Mr. ENSIGN):

S. Res. 309. A resolution recognizing and celebrating the 145th anniversary of the entry of Nevada into the Union as the 36th State; considered and agreed to.

By Mr. CASEY (for himself, Mr. ROBERTS, Mr. SANDERS, Mr. BROWN, Mr. FEINGOLD, and Mr. AKAKA):

S. Res. 310. A resolution expressing support for the designation of October 20, 2009, as the National Day on Writing; considered and agreed to.

#### ADDITIONAL COSPONSORS

S. 484

At the request of Mrs. FEINSTEIN, the name of the Senator from Hawaii (Mr. INOUE) was added as a cosponsor of S. 484, a bill to amend title II of the Social Security Act to repeal the Government pension offset and windfall elimination provisions.

S. 624

At the request of Mr. DURBIN, the name of the Senator from Nebraska (Mr. JOHANNIS) was added as a cosponsor of S. 624, a bill to provide 100,000,000 people with first-time access to safe drinking water and sanitation on a sustainable basis by 2015 by improving the capacity of the United States Government to fully implement the Senator Paul Simon Water for the Poor Act of 2005.

S. 632

At the request of Mr. BAUCUS, the name of the Senator from New Hampshire (Mr. GREGG) was added as a cosponsor of S. 632, a bill to amend the Internal Revenue Code of 1986 to require that the payment of the manufacturers' excise tax on recreational equipment be paid quarterly.

S. 825

At the request of Mrs. LINCOLN, the name of the Senator from South Dakota (Mr. JOHNSON) was added as a cosponsor of S. 825, a bill to amend the Internal Revenue Code of 1986 to restore, increase, and make permanent the exclusion from gross income for amounts received under qualified group legal services plans.

S. 844

At the request of Mr. LAUTENBERG, the name of the Senator from New Jersey (Mr. MENENDEZ) was added as a cosponsor of S. 844, a bill to amend the

Public Health Service Act to prevent and treat diabetes, to promote and improve the care of individuals with diabetes, and to reduce health disparities relating to diabetes within racial and ethnic minority groups, including African-American, Hispanic American, Asian American, Native Hawaiian and Other Pacific Islander, and American Indian and Alaskan Native communities.

S. 868

At the request of Mr. BAUCUS, the name of the Senator from Idaho (Mr. RISCH) was added as a cosponsor of S. 868, a bill to repeal certain provisions of the Federal Lands Recreation Enhancement Act.

S. 870

At the request of Mrs. LINCOLN, the name of the Senator from Georgia (Mr. ISAKSON) was added as a cosponsor of S. 870, a bill to amend the Internal Revenue Code of 1986 to expand the credit for renewable electricity production to include electricity produced from biomass for on-site use and to modify the credit period for certain facilities producing electricity from open-loop biomass.

S. 883

At the request of Mr. KERRY, the names of the Senator from Vermont (Mr. SANDERS), the Senator from Texas (Mrs. HUTCHISON), the Senator from Utah (Mr. HATCH), the Senator from West Virginia (Mr. ROCKEFELLER) and the Senator from Florida (Mr. NELSON) were added as cosponsors of S. 883, a bill to require the Secretary of the Treasury to mint coins in recognition and celebration of the establishment of the Medal of Honor in 1861, America's highest award for valor in action against an enemy force which can be bestowed upon an individual serving in the Armed Services of the United States, to honor the American military men and women who have been recipients of the Medal of Honor, and to promote awareness of what the Medal of Honor represents and how ordinary Americans, through courage, sacrifice, selfless service and patriotism, can challenge fate and change the course of history.

S. 907

At the request of Mr. CARPER, the name of the Senator from Florida (Mr. LEMIEUX) was added as a cosponsor of S. 907, a bill to establish procedures for the expedited consideration by Congress of certain proposals by the President to rescind amounts of budget authority.

S. 941

At the request of Mr. CRAPO, the name of the Senator from South Dakota (Mr. THUNE) was added as a cosponsor of S. 941, a bill to reform the Bureau of Alcohol, Tobacco, Firearms, and Explosives, modernize firearm laws and regulations, protect the community from criminals, and for other purposes.

S. 1076

At the request of Mr. MENENDEZ, the name of the Senator from Oregon (Mr. MERKLEY) was added as a cosponsor of S. 1076, a bill to improve the accuracy of fur product labeling, and for other purposes.

S. 1160

At the request of Mr. SCHUMER, the name of the Senator from New Mexico (Mr. UDALL) was added as a cosponsor of S. 1160, a bill to provide housing assistance for very low-income veterans.

S. 1232

At the request of Mr. DORGAN, the name of the Senator from Virginia (Mr. WEBB) was added as a cosponsor of S. 1232, a bill to amend the Federal Food, Drug, and Cosmetic Act with respect to the importation of prescription drugs, and for other purposes.

S. 1366

At the request of Mrs. BOXER, the name of the Senator from New Mexico (Mr. UDALL) was added as a cosponsor of S. 1366, a bill to amend the Internal Revenue Code of 1986 to allow taxpayers to designate a portion of their income tax payment to provide assistance to homeless veterans, and for other purposes.

S. 1395

At the request of Mr. CRAPO, the name of the Senator from Nebraska (Mr. NELSON) was added as a cosponsor of S. 1395, a bill to amend the Marine Mammal Protection Act of 1972 to allow importation of polar bear trophies taken in sport hunts in Canada before the date on which the polar bear was determined to be a threatened species under the Endangered Species Act of 1973.

S. 1547

At the request of Mr. REED, the name of the Senator from New Mexico (Mr. UDALL) was added as a cosponsor of S. 1547, a bill to amend title 38, United States Code, and the United States Housing Act of 1937 to enhance and expand the assistance provided by the Department of Veterans Affairs and the Department of Housing and Urban Development to homeless veterans and veterans at risk of homelessness, and for other purposes.

S. 1660

At the request of Ms. KLOBUCHAR, the name of the Senator from Georgia (Mr. ISAKSON) was added as a cosponsor of S. 1660, a bill to amend the Toxic Substances Control Act to reduce the emissions of formaldehyde from composite wood products, and for other purposes.

S. 1678

At the request of Mr. CARDIN, the name of the Senator from Connecticut (Mr. DODD) was added as a cosponsor of S. 1678, a bill to amend the Internal Revenue Code of 1986 to extend the first-time homebuyer tax credit, and for other purposes.

S. 1694

At the request of Mr. ROCKEFELLER, the name of the Senator from Virginia

(Mr. WARNER) was added as a cosponsor of S. 1694, a bill to allow the funding for the interoperable emergency communications grant program established under the Digital Television Transition and Public Safety Act of 2005 to remain available until expended through fiscal year 2012, and for other purposes.

S. 1744

At the request of Mr. SCHUMER, the name of the Senator from Vermont (Mr. LEAHY) was added as a cosponsor of S. 1744, a bill to require the Administrator of the Federal Aviation Administration to prescribe regulations to ensure that all crewmembers on air carriers have proper qualifications and experience, and for other purposes.

S. CON. RES. 14

At the request of Mrs. LINCOLN, the name of the Senator from Oklahoma (Mr. INHOFE) was added as a cosponsor of S. Con. Res. 14, a concurrent resolution supporting the Local Radio Freedom Act.

S. RES. 307

At the request of Mr. BUNNING, the name of the Senator from Alaska (Ms. MURKOWSKI) was added as a cosponsor of S. Res. 307, a resolution to require that all legislative matters be available and fully scored by CBO 72 hours before consideration by any subcommittee or committee of the Senate or on the floor of the Senate.

AMENDMENT NO. 2393

At the request of Mr. JOHANNES, the name of the Senator from Georgia (Mr. ISAKSON) was added as a cosponsor of amendment No. 2393 proposed to H.R. 2847, a bill making appropriations for the Departments of Commerce and Justice, and Science, and Related Agencies for the fiscal year ending September 30, 2010, and for other purposes.

AMENDMENT NO. 2627

At the request of Mr. LEVIN, the names of the Senator from Rhode Island (Mr. WHITEHOUSE) and the Senator from New Hampshire (Mrs. SHAHEEN) were added as cosponsors of amendment No. 2627 proposed to H.R. 2847, a bill making appropriations for the Departments of Commerce and Justice, and Science, and Related Agencies for the fiscal year ending September 30, 2010, and for other purposes.

AMENDMENT NO. 2636

At the request of Ms. LANDRIEU, the name of the Senator from New Hampshire (Mrs. SHAHEEN) was added as a cosponsor of amendment No. 2636 intended to be proposed to H.R. 2847, a bill making appropriations for the Departments of Commerce and Justice, and Science, and Related Agencies for the fiscal year ending September 30, 2010, and for other purposes.

AMENDMENT NO. 2637

At the request of Mr. BROWN, the names of the Senator from Maine (Ms. SNOWE) and the Senator from Louisiana (Ms. LANDRIEU) were added as cosponsors of amendment No. 2637 intended to be proposed to H.R. 2847, a

bill making appropriations for the Departments of Commerce and Justice, and Science, and Related Agencies for the fiscal year ending September 30, 2010, and for other purposes.

AMENDMENT NO. 2642

At the request of Mr. LEAHY, the name of the Senator from Vermont (Mr. SANDERS) was added as a cosponsor of amendment No. 2642 proposed to H.R. 2847, a bill making appropriations for the Departments of Commerce and Justice, and Science, and Related Agencies for the fiscal year ending September 30, 2010, and for other purposes.

AMENDMENT NO. 2647

At the request of Mr. DURBIN, the name of the Senator from Pennsylvania (Mr. CASEY) was added as a cosponsor of amendment No. 2647 proposed to H.R. 2847, a bill making appropriations for the Departments of Commerce and Justice, and Science, and Related Agencies for the fiscal year ending September 30, 2010, and for other purposes.

AMENDMENT NO. 2648

At the request of Mr. ENSIGN, the name of the Senator from Texas (Mr. CORNYN) was added as a cosponsor of amendment No. 2648 proposed to H.R. 2847, a bill making appropriations for the Departments of Commerce and Justice, and Science, and Related Agencies for the fiscal year ending September 30, 2010, and for other purposes.

AMENDMENT NO. 2652

At the request of Mr. FEINGOLD, the name of the Senator from Vermont (Mr. LEAHY) was added as a cosponsor of amendment No. 2652 intended to be proposed to H.R. 2847, a bill making appropriations for the Departments of Commerce and Justice, and Science, and Related Agencies for the fiscal year ending September 30, 2010, and for other purposes.

AMENDMENT NO. 2653

At the request of Mr. BUNNING, the names of the Senator from Tennessee (Mr. ALEXANDER), the Senator from Wyoming (Mr. ENZI), the Senator from New Hampshire (Mr. GREGG) and the Senator from Idaho (Mr. CRAPO) were added as cosponsors of amendment No. 2653 proposed to H.R. 2847, a bill making appropriations for the Departments of Commerce and Justice, and Science, and Related Agencies for the fiscal year ending September 30, 2010, and for other purposes.

STATEMENTS ON INTRODUCED  
BILLS AND JOINT RESOLUTIONS

By Mr. FRANKEN (for himself, Mr. WHITEHOUSE, and Mr. BROWN):

S. 1763. A bill to amend the Internal Revenue Code of 1986 to deny the deduction for advertising and promotional expenses for prescription pharmaceuticals; to the Committee on Finance.

Mr. FRANKEN. Mr. President, I am pleased today to introduce the Protecting Americans from Drug Marketing Act. Health care spending is out of control, and this bill represents a small but significant step toward reigning in unnecessary health care costs.

Right now, the Federal Government gives pharmaceutical companies a tax break every time you see a drug advertisement on TV—and for every free mug your doctor receives that has a pharmaceutical company logo on it. These tax breaks add up to billions of dollars of lost revenue for the Federal Government.

Pharmaceutical companies are getting a huge boost at a time when thousands of Americans are going bankrupt because of health care bills, and millions more are struggling to pay for health insurance coverage. This legislation will remove these unfair tax benefits so pharmaceutical companies can focus their dollars on developing new drugs, not excessive marketing schemes.

Nationwide, prescription drug spending rose 500 percent between 2000 and 2005, from \$40 billion to \$200.7 billion per year. But while costs to patients are growing exponentially, the pharmaceutical industry is spending an astonishing \$30 billion annually on marketing. Of course, these companies have the right to advertise. But taxpayers shouldn't be subsidizing these expenses.

Research has shown that glossy advertisements and logo-laden pens don't add any value to our health care system. Instead, drug companies are trying to use both consumers and doctors as pawns in order to maximize profits. The Federal Government should not subsidize these activities.

It is challenging enough to navigate our health care system; the recent explosion of prescription drug ads on television, on the Internet, and in magazines just confuses things further. Many ads encourage consumers to use expensive drugs over cheaper alternatives that may work just as well. Other ads provide a skewed view of what the drug does, minimizing the risks while overemphasizing the benefits. Health care already costs enough—taxpayers shouldn't be paying to subsidize these unhelpful and confusing messages.

Drug companies are capitalizing on this confusion. Studies have shown that every dollar spent on advertising to consumers yields an additional \$4.20 in sales for drug manufacturers. This is a very high return on investment, and so not unsurprisingly companies have increased spending on ads to consumers by 536 percent from 1996 to 2007. That is 536 percent. In 2007 alone, pharmaceutical companies spent nearly \$4.8 billion on these excessive marketing campaigns. This spending is passed on

to consumers, resulting in higher prescription drug costs for Americans. This bill will simply take away tax breaks that encourage drug companies to do this.

The Protecting Americans from Drug Marketing Act is also needed to make sure doctors and other providers are making decisions based on the best scientific evidence. Today, doctors frequently receive information about prescription drugs from the drug companies themselves. The Protecting Americans from Drug Marketing Act also takes away the tax break that drug companies receive for sending representatives to hospitals and doctors' offices to encourage them to use their drugs. These representatives are the ones who leave behind the pens and coffee mugs—or even nicer gifts—that you see at the clinic, logoed with the names of specific drugs.

We have created a culture in which doctors receive far too much biased information about drugs—and how they can be used in unapproved ways—from pharmaceutical reps who aren't doctors, often have no scientific training, and most certainly have a vested interest in selling the newest, most expensive products. This bill won't end that practice, but it will end the lucrative tax breaks that encourage it. For this reason, it will help providers make medical decisions based on objective, peer-reviewed research—not on biased materials from companies standing to profit from doctors' prescription pads and patients' wallets.

The Federal Government could save up to \$3.5 billion every year by eliminating these tax breaks used every day by drug companies. In this small way, we can help stem the tide of confusing and misleading drug ads that you and your family see every day on TV and in magazines. Just as importantly, we can bring down the cost of health care, make prescription drugs more affordable for all Americans, and help pay for the cost of health reform that is so sorely needed.

Americans are struggling just to keep their health insurance and pay their bills. Let us end this counterproductive subsidy and spend our taxpayer dollars more wisely. I thank Senators WHITEHOUSE and BROWN for joining me in introducing this important legislation, and I urge my colleagues to work with us to include it in health reform legislation.

By Mr. CARDIN (for himself, Ms. COLLINS, Mr. BROWN, Ms. MIKULSKI, Mr. WHITEHOUSE, Mr. SCHUMER, and Mr. BURRIS):

S. 1765. A bill to amend the Hate Crime Statistics Act to include crimes against the homeless; to the Committee on the Judiciary.

Mr. CARDIN. Mr. President, I rise today to introduce the Hate Crimes Against the Homeless Statistics Act of

2009. I am joined in this effort by Senator COLLINS. I am also joined by the Presiding Officer, Senator BROWN, Senator MIKULSKI, Senator WHITEHOUSE, and Senator SCHUMER.

This week marks the 1-year anniversary of the tragic murder of John Robert McGraham. Mr. McGraham was a well-known member of the Wilshire neighborhood of Los Angeles, CA, for more than 20 years. On October 9, 2008, he was doused with gasoline and set ablaze as he slept. By the time neighbors and residents ran to his rescue, his clothes had been burned off and his face blackened. The attacker apparently had a dislike toward homeless individuals. Known for rarely asking for money and not bothering anyone in the community, Mr. McGraham lost his life because of his homeless status. Days after his murder, hundreds of people gathered at the spot of his death and created a memorial for him.

Mr. McGraham is just one of many homeless individuals who have suffered hate crimes because they were homeless. In a popular men's magazine, under the blurb titled "Hunt for the Homeless," the following was displayed: "Kill one for fun. We're 87 percent sure it's legal." We have heard the horrific stories: A woman sleeping was pushed into a river; a man was beaten, soaked in beer and urine and covered with trash; a woman was beaten in the face with a tire iron; and many more unfortunate stories. This behavior should not and cannot be tolerated in our society. What kind of society would we be if we allowed these types of attacks to continue without standing up against them?

The Hate Crimes Statistics Act of 1990 requires the Department of Justice to collect data from law enforcement agencies about "crimes that manifest evidence of prejudice based upon race, religion, sexual orientation or ethnicity." In 1994, Congress expanded coverage to require reporting on crimes based on disability. Data collection provides the needed information to policymakers, law enforcement, and communities so they can make informed decisions as to how best to proceed with the problem presented to us. The Hate Crimes Against the Homeless Statistics Act will again expand coverage by adding "homeless status" to the list of categories required to be reported on by the Department of Justice.

In order to measure the level of bias-motivated crimes, data is needed. Currently, there is a significant problem in establishing a baseline for meaningful comparison. The best way to prove or disprove an issue's validity is data collection. According to the National Coalition for the Homeless, which has tracked these types of attacks since 1999, they have reported an increase in the number of hate crimes targeted at homeless individuals in the last decade. If we take the statistics provided

by this coalition and compare them to the available statistics currently being collected by the FBI under the Hate Crimes Statistics Act, the results are startling.

The number of hate crimes resulting in death among listed members, those in the statute, is lower than the known number of fatal attacks on homeless individuals. Between 1999 and 2007, there were 94 hate crime fatalities among the listed individuals, compared to 218 fatalities in the same period directed at homeless individuals. I am introducing this bill today in an effort to get uniform data collection on these attacks so that we have a uniform basis on which to know how serious the problem is.

There are approximately 3.5 million people a year who are likely to experience homelessness. They are mothers, fathers, and children, and they are among the most vulnerable members of our society. Veterans account for 20 percent of our homeless population. Families displaced because of domestic violence make up another 28 percent of the homeless population. With increased funding to provide housing for the homeless, the previous administration had seen a 20-percent drop in family homelessness. However, because of the current economic crisis, an increase in the homeless population has been reported.

The 2008 annual homeless assessment report to Congress revealed that the number of homeless families, particularly those in suburban and rural areas, has increased. The number of families seeking shelter has increased by 9 percent overall and by nearly 56 percent in suburban and rural areas. Our current economic crisis has reversed the progress that we made between 2005 and 2007. There is also evidence that when State and local budgets are cut, homeless services are affected. With an increase in the vulnerable population, with the government unable to provide funding, at a minimum we have a duty to report senseless violence against this risk population.

That is what I am asking, pure and simple, that we find out exactly how many homeless people are being victimized in a uniform way by having reliable data and information so that we, the policymakers, can make the right policy decisions.

Homeless people are part of America. Every day we see veterans, men, women, and families who have been forced by circumstances to live on the streets. We have walked by them on our way to work or to school. In an effort to monitor bias-motivated violence, the first step is to realize the scope of the situation by gathering the data.

I urge my colleagues to support this modest legislation so that we are better prepared to deal with this challenge.

## SUBMITTED RESOLUTIONS

### SENATE RESOLUTION 309—RECOGNIZING AND CELEBRATING THE 145TH ANNIVERSARY OF THE ENTRY OF NEVADA INTO THE UNION AS THE 36TH STATE

Mr. REID (for himself and Mr. ENSIGN) submitted the following resolution; which was considered and agreed to:

S. RES. 309

Whereas October 31, 2009, marks the 145th anniversary of President Abraham Lincoln's proclamation admitting Nevada into the Union as the 36th State;

Whereas Nevadans celebrate the anniversary of "Battle Born" statehood every year as Nevada Day;

Whereas Nevada's State motto is "All for Our Country", reflecting the patriotism and sense of duty demonstrated by countless Nevadans since the State's entrance into the Union;

Whereas Nevada's brave veterans and service members have made critical contributions to our Nation's security in times of war and of peace;

Whereas the Henderson magnesium mines and the Nevada Test Site played key roles in the United States' victories during World War II and the Cold War, respectively;

Whereas Nevada is honored to host our Nation's Armed Forces at Nellis Air Force Base, Creech Air Force Base, Naval Air Station Fallon, and the Hawthorne Army Depot, as well as National Guard Armories and Reserve Readiness Centers throughout the State;

Whereas Nevada is a premier destination for tourists, business travelers, family vacationers, and outdoor enthusiasts throughout the United States and around the globe;

Whereas Nevada's unique features attract vacationers and locals alike, including the pastoral Washoe Valley, the crags of the Ruby Mountains, the "Biggest Little City in the World", the Las Vegas Strip, the Hoover Dam, Lovers Lock Plaza, and the annual National Cowboy Poetry Gathering;

Whereas mining became an important industry to the Silver State with the 1859 discovery of the Comstock Lode, the most valuable deposit of silver in the Nation;

Whereas Nevada produces more gold than all other States combined and is one of the largest sources of gold in the world;

Whereas the entrepreneurial spirit of Nevadans is reflected in a versatile economy, from the world's largest gaming establishments to small businesses that make up the vast majority of Nevada's employers;

Whereas Nevada has a rich cultural heritage that draws from diverse populations, from multi-generational ranching families to new residents, from Hispanic Americans to Asian Americans and Pacific Islanders, and from Basque communities to Mormon pioneers;

Whereas Nevada recognizes the language, culture, and generosity of Nevada's first dwellers, the Northern and Southern Paiutes, Shoshone, and Washoe peoples;

Whereas Nevada celebrates Thocmonteny, or Sarah Winnemucca, the first Native American woman to author a publication in English, whose statue graces Emancipation Hall in the Capitol Visitor Center;

Whereas the snow-capped mountains of Nevada (pronounced Neváda) were the inspiration for the Spanish origin of its name;

Whereas Nevada offers beautiful outdoor settings ranging from vibrant desert landscapes to grand ski slopes, and from picturesque hiking trails to flowing river currents;

Whereas Lake Tahoe is one of the deepest and clearest alpine lakes in the world, and Lake Mead is the largest engineered reservoir in the United States;

Whereas Nevada is home to Great Basin National Park, 17 State parks, 2 national forests, and 3,400,000 acres of wilderness, including Sloan Canyon, Red Rock Canyon, and Black Rock Desert;

Whereas Nevada exemplifies the independence, opportunity, and pioneering spirit of the West; and

Whereas Nevada's delegation to the 111th Congress—Senator Harry Reid, Senator John Ensign, Representative Shelley Berkley, Representative Dean Heller, and Representative Dina Titus—invite all to join in the celebration of Nevada statehood: Now, therefore, be it

*Resolved*, That the Senate recognizes and celebrates the 145th anniversary of the entry of Nevada into the Union as the 36th State.

#### SENATE RESOLUTION 310—EX-PRESSING SUPPORT FOR THE DESIGNATION OF OCTOBER 20, 2009, AS THE NATIONAL DAY ON WRITING

Mr. CASEY (for himself, Mr. ROBERTS, Mr. SANDERS, Mr. BROWN, Mr. FEINGOLD, and Mr. AKAKA) submitted the following resolution; which was considered and agreed to:

S. RES. 310

Whereas people in the 21st century are writing more than ever before for personal, professional, and civic purposes;

Whereas the social nature of writing invites people of every age, profession, and walk of life to create meaning through composing;

Whereas more and more people in every occupation deem writing as essential and influential in their work;

Whereas writers continue to learn how to write for different purposes, audiences, and occasions throughout their lifetimes;

Whereas developing digital technologies expand the possibilities for composing in multiple media at a faster pace than ever before;

Whereas young people are leading the way in developing new forms of composing by using different forms of digital media;

Whereas effective communication contributes to building a global economy and a global community;

Whereas the National Council of Teachers of English, in conjunction with its many national and local partners, honors and celebrates the importance of writing through the National Day on Writing;

Whereas the National Day on Writing celebrates the foundational place of writing in the personal, professional, and civic lives of Americans;

Whereas the National Day on Writing provides an opportunity for individuals across the United States to share and exhibit their written works through the National Gallery of Writing;

Whereas the National Day on Writing highlights the importance of writing instruction and practice at every educational level and in every subject area;

Whereas the National Day on Writing emphasizes the lifelong process of learning to

write and compose for different audiences, purposes, and occasions;

Whereas the National Day on Writing honors the use of the full range of media for composing, from traditional tools like print, audio, and video, to Web 2.0 tools like blogs, wikis, and podcasts; and

Whereas the National Day on Writing encourages all Americans to write, as well as to enjoy and learn from the writing of others: Now, therefore, be it

*Resolved*, That the Senate—

(1) supports the designation of October 20, 2009, as the National Day on Writing;

(2) strongly affirms the purposes of the National Day on Writing and encourages participation in the National Gallery of Writing, which serves as an exemplary living archive of the centrality of writing in the lives of Americans; and

(3) encourages educational institutions, businesses, community and civic associations, and other organizations to promote awareness of the National Day on Writing and celebrate the writing of their members through individual submissions to the National Gallery of Writing.

#### AMENDMENTS SUBMITTED AND PROPOSED

SA 2656. Mr. BROWNBACK (for himself and Mr. SCHUMER) submitted an amendment intended to be proposed by him to the bill H.R. 2847, making appropriations for the Departments of Commerce and Justice, and Science, and Related Agencies for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table.

SA 2657. Mr. DODD submitted an amendment intended to be proposed by him to the bill H.R. 2847, supra; which was ordered to lie on the table.

SA 2658. Ms. CANTWELL submitted an amendment intended to be proposed by her to the bill H.R. 2847, supra; which was ordered to lie on the table.

SA 2659. Mr. VITTER submitted an amendment intended to be proposed by him to the bill H.R. 2847, supra; which was ordered to lie on the table.

SA 2660. Mr. ENSIGN submitted an amendment intended to be proposed by him to the bill H.R. 2847, supra; which was ordered to lie on the table.

SA 2661. Mr. COBURN submitted an amendment intended to be proposed by him to the bill H.R. 2847, supra; which was ordered to lie on the table.

SA 2662. Mr. THUNE submitted an amendment intended to be proposed by him to the bill H.R. 2847, supra; which was ordered to lie on the table.

SA 2663. Mr. VITTER submitted an amendment intended to be proposed by him to the bill H.R. 2847, supra; which was ordered to lie on the table.

SA 2664. Mr. VITTER submitted an amendment intended to be proposed by him to the bill H.R. 2847, supra; which was ordered to lie on the table.

SA 2665. Mr. SESSIONS submitted an amendment intended to be proposed by him to the bill H.R. 2847, supra; which was ordered to lie on the table.

SA 2666. Mrs. HUTCHISON (for herself, Mr. CORNYN, Mr. KYL, and Mr. MCCAIN) submitted an amendment intended to be proposed by her to the bill H.R. 2847, supra; which was ordered to lie on the table.

SA 2667. Mr. COBURN submitted an amendment intended to be proposed by him to the bill H.R. 2847, supra; which was ordered to lie on the table.

SA 2668. Mr. REID (for himself, Mr. BAUCUS, Mr. REED, Mrs. SHAHEEN, Mr. DODD, Mr. DURBIN, Mr. SCHUMER, Mr. HARKIN, Mr. LEAHY, Mr. CASEY, Mr. CARDIN, Mr. LEVIN, Mr. SANDERS, Mr. KAUFMAN, Mr. BROWN, Ms. STABENOW, Mr. UDALL of Colorado, Mr. BENNET, Ms. KLOBUCHAR, Mr. LAUTENBERG, Mr. AKAKA, Mr. ROCKEFELLER, Mr. BYRD, Mrs. MCCASKILL, Mr. WEBB, Ms. MIKULSKI, Mr. BURRIS, Mrs. GILLIBRAND, Mrs. BOXER, Mr. BEGICH, Mr. FRANKEN, Mrs. MURRAY, Mr. KERRY, Mr. MENENDEZ, Mr. BINGAMAN, and Mrs. FEINSTEIN) submitted an amendment intended to be proposed by him to the bill H.R. 3548, to amend the Supplemental Appropriations Act, 2008 to provide for the temporary availability of certain additional emergency unemployment compensation, and for other purposes; which was ordered to lie on the table.

SA 2669. Mr. GRAHAM (for himself, Mr. MCCAIN, and Mr. LIEBERMAN) proposed an amendment to the bill H.R. 2847, making appropriations for the Departments of Commerce and Justice, and Science, and Related Agencies for the fiscal year ending September 30, 2010, and for other purposes.

SA 2670. Mr. DURBIN submitted an amendment intended to be proposed by him to the bill H.R. 2847, supra; which was ordered to lie on the table.

SA 2671. Mr. THUNE submitted an amendment intended to be proposed by him to the bill H.R. 2847, supra; which was ordered to lie on the table.

SA 2672. Mr. BINGAMAN (for himself, Mr. CORNYN, Mrs. LINCOLN, Mr. UDALL of New Mexico, and Mr. CRAPO) submitted an amendment intended to be proposed by him to the bill H.R. 2847, supra; which was ordered to lie on the table.

SA 2673. Mr. BROWNBACK (for himself and Mr. SCHUMER) submitted an amendment intended to be proposed by him to the bill H.R. 2847, supra; which was ordered to lie on the table.

SA 2674. Mr. ROCKEFELLER submitted an amendment intended to be proposed by him to the bill H.R. 2847, supra; which was ordered to lie on the table.

SA 2675. Mr. ENSIGN submitted an amendment intended to be proposed by him to the bill H.R. 2847, supra; which was ordered to lie on the table.

#### TEXT OF AMENDMENTS

**SA 2656.** Mr. BROWNBACK (for himself and Mr. SCHUMER) submitted an amendment intended to be proposed by him to the bill H.R. 2847, making appropriations for the Departments of Commerce and Justice, and Science, and Related Agencies for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 108, line 4, strike the period at the end and insert the following: “: *Provided further*, That of the amount appropriated under this heading, not less than \$1,000,000 shall be made available for overseas end use checks to curtail the transshipment or reexportation of goods originating in the United States to Iran.”.

**SA 2657.** Mr. DODD submitted an amendment intended to be proposed by him to the bill H.R. 2847, making appropriations for the Departments of Commerce and Justice, and Science, and Related Agencies for the fiscal

year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place, insert the following:

SEC. \_\_\_\_\_. Section 129 of the Continuing Appropriations Resolution, 2010 (Public Law 111-68) is amended by striking “by substituting” and all that follows through the period at the end, and inserting “by substituting June 30, 2010 for the date specified in each such section.”.

**SA 2658.** Ms. CANTWELL submitted an amendment intended to be proposed by her to the bill H.R. 2847, making appropriations for the Departments of Commerce and Justice, and Science, and Related Agencies for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 125, between lines 10 and 11, insert the following:

SEC. 111. (a) ADDITIONAL AMOUNT FOR THE UNITED STATES PATENT AND TRADEMARK OFFICE TO PROVIDE TECHNICAL ASSISTANCE PROGRAMS TO BUILD CAPACITY RELATED TO THE PROTECTION AND ENFORCEMENT OF INTELLECTUAL PROPERTY RIGHTS IN THE PEOPLE'S REPUBLIC OF CHINA.—The amount appropriated by title I under the heading “SALARIES AND EXPENSES” under the heading “UNITED STATES PATENT AND TRADEMARK OFFICE” is hereby increased by \$1,000,000, with the amount of the increase to be available to provide technical assistance to build capacity related to the protection and enforcement of intellectual property rights in the People's Republic of China in accordance with subsection (b).

(b) TECHNICAL ASSISTANCE.—The United States Patent and Trademark Office shall provide technical assistance to the Government of the People's Republic of China to build capacity related to the protection and enforcement of intellectual property rights in China, based on existing memoranda of understanding between the United States Patent and Trademark Office and the Government of China, by—

(1) providing joint seminars with, and technical assistance to, officials of the Government of China, including patent and trademark examiners, judges, and prosecutors;

(2) exchanging information and best practices with respect to the administration of offices in China with responsibility for protecting and enforcing intellectual property rights; and

(3) collaborating with the Government of China with respect to educating persons that hold intellectual property rights about how to protect those rights in China and how to use the intellectual property rights protection system of China to have those rights enforced.

(c) OFFSET.—The amount appropriated by title I under the heading “OPERATIONS AND ADMINISTRATION” under the heading “INTERNATIONAL TRADE ADMINISTRATION” and made available for the Trade Promotion and United States and Foreign Commercial Service is hereby decreased by \$1,000,000.

**SA 2659.** Mr. VITTER submitted an amendment intended to be proposed by him to the bill H.R. 2847, making appropriations for the Departments of Commerce and Justice, and Science, and Related Agencies for the fiscal year ending September 30, 2010, and for

other purposes; which was ordered to lie on the table; as follows:

At the appropriate place, insert the following:

SEC. \_\_\_\_\_. Of amounts made available by this Act for activities authorized under the Second Chance Act of 2007 to facilitate the successful reentry of prisoners into communities following incarceration \$25,000,000 shall be made available to the United States Marshals Service account to fulfill the requirements of the Adam Walsh Child Protection and Safety Act of 2006 to hire and equip at least 500 new Deputy Marshals over the next 3 to 5 years.

**SA 2660.** Mr. ENSIGN submitted an amendment intended to be proposed by him to the bill H.R. 2847, making appropriations for the Departments of Commerce and Justice, and Science, and Related Agencies for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 170, between lines 19 and 20, insert the following:

**SEC. 220. ADDITIONAL FUNDING FOR DRUG COURTS.**

(a) IN GENERAL.—For an additional amount under the heading “STATE AND LOCAL LAW ENFORCEMENT ASSISTANCE” under the heading “OFFICE OF JUSTICE PROGRAMS” under this title, there is appropriated, for the fiscal year ending September 30, 2010, \$5,000,000 for Drug Courts, as authorized by section 1001(25)(A) of title I of the 1968 Act.

(b) OFFSET.—All amounts appropriated under this Act, except for amounts appropriated for Drug Courts, as authorized by section 1001(25)(A) of title I of the 1968 Act under the heading “STATE AND LOCAL LAW ENFORCEMENT ASSISTANCE” under the heading “OFFICE OF JUSTICE PROGRAMS” under this title, shall be reduced on a pro rata basis by the amount necessary to reduce the total amount appropriated under this Act, except for amounts appropriated for Drug Courts, as authorized by section 1001(25)(A) of title I of the 1968 Act under the heading “STATE AND LOCAL LAW ENFORCEMENT ASSISTANCE” under the heading “OFFICE OF JUSTICE PROGRAMS” under this title, by \$5,000,000.

**SA 2661.** Mr. COBURN submitted an amendment intended to be proposed by him to the bill H.R. 2847, making appropriations for the Departments of Commerce and Justice, and Science, and Related Agencies for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place, insert the following:

SEC. \_\_\_\_\_. (a) ADDITIONAL AMOUNT FOR OFFICE OF INSPECTOR GENERAL.—The amount appropriated by this title under the heading “OFFICE OF INSPECTOR GENERAL” is hereby increased by \$3,499,000.

**SA 2662.** Mr. THUNE submitted an amendment intended to be proposed by him to the bill H.R. 2847, making appropriations for the Departments of Commerce and Justice, and Science, and Related Agencies for the fiscal

year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place, insert the following:

SEC. \_\_\_\_\_. Not later than 180 days after the date of enactment of this Act, the Attorney General shall establish the Emergency Plan for Indian Safety and Health as required by section 601 of Public Law 110-293.

**SA 2663.** Mr. VITTER submitted an amendment intended to be proposed by him to the bill H.R. 2847, making appropriations for the Departments of Commerce and Justice, and Science, and Related Agencies for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 125, between lines 10 and 11, insert the following:

SEC. 111. The Secretary of Commerce shall submit to the Committee on Appropriations and the Committee on Commerce, Science, and Transportation of the Senate and the Committee on Appropriations and the Committee on Natural Resources of the House of Representatives a report on the manner in which implementation of all future catch share programs in fisheries that include commercial and recreational fishers will—

(1) provide improvements in management and data collection for both categories of fishers; and

(2) resolve fishery allocation disputes between those categories of fishers.

**SA 2664.** Mr. VITTER submitted an amendment intended to be proposed by him to the bill H.R. 2847, making appropriations for the Departments of Commerce and Justice, and Science, and Related Agencies for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 125, between lines 10 and 11, insert the following:

SEC. 111. None of the funds made available in this Act may be used to issue offshore aquaculture permits for the Gulf of Mexico until after the date that the Secretary of Commerce submits to the Committee on Appropriations and the Committee on Commerce, Science, and Transportation of the Senate and the Committee on Appropriations and the Committee on Natural Resources of the House of Representatives a report on the manner in which offshore aquaculture in the Gulf of Mexico will be properly regulated to prevent adverse environmental impacts and the escape of pen-raised fin-fish species.

**SA 2665.** Mr. SESSIONS submitted an amendment intended to be proposed by him to the bill H.R. 2847, making appropriations for the Departments of Commerce and Justice, and Science, and Related Agencies for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 203, between lines 23 and 24, insert the following:

SEC. 533. Section 401(b) of the Illegal Immigration Reform and Immigrant Responsibility Act of 1996 (division C of Public Law 104-208; 8 U.S.C. 1324a note) is amended by striking “Unless” and all that follows.

SEC. 534. The head of each agency or department of the United States that enters into a contract shall require, as a condition of the contract, that the contractor participate in the pilot program described in 404 of the Illegal Immigration Reform and Immigrant Responsibility Act of 1996 (division C of Public Law 104-209; 8 U.S.C. 1324a note) to verify the employment eligibility of—

(1) all individuals hired during the term of the contract by the contractor to perform employment duties within the United States; and

(2) all individuals assigned by the contractor to perform work within the United States the under such contract.

SEC. 535. (a)(1) Sections 401(c)(1), 403(a), 403(b)(1), 403(c)(1), and 405(b)(2) of the Illegal Immigration Reform and Immigrant Responsibility Act of 1996 (division C of Public Law 104-208; 8 U.S.C. 1324a note) are amended by striking “basic pilot program” each place that term appears and inserting “E-Verify Program”.

(2) The heading of section 403(a) of the Illegal Immigration Reform and Immigrant Responsibility Act of 1996 is amended by striking “BASIC PILOT” and inserting “E-VERIFY”.

(b) Section 404(h)(1) of the Illegal Immigration Reform and Immigrant Responsibility Act of 1996 (Public Law 104-208; 8 U.S.C. 1324a note) is amended by striking “under a pilot program” and inserting “under this subtitle”.

**SA 2666.** Mrs. HUTCHISON (for herself, Mr. CORNYN, Mr. KYL, and Mr. MCCAIN) submitted an amendment intended to be proposed by her to the bill H.R. 2847, making appropriations for the Departments of Commerce and Justice, and Science, and Related Agencies for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 170, between lines 19 and 20, insert the following:

**SEC. 220. INCREASE IN STATE CRIMINAL ALIEN ASSISTANCE PROGRAM FUNDING.**

(a) IN GENERAL.—For an additional amount under the heading “STATE AND LOCAL LAW ENFORCEMENT ASSISTANCE” under the heading “OFFICE OF JUSTICE PROGRAMS” under this title, there is appropriated, for the fiscal year ending September 30, 2010, \$172,000,000 for the State Criminal Alien Assistance Program, as authorized by section 241(i)(5) of the Immigration and Nationality Act (8 U.S.C. 1231(i)(5)).

(b) OFFSET.—The total amount appropriated under the heading “OPERATIONS, RESEARCH, AND FACILITIES” under the heading “NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION” under title I is reduced by \$172,000,000.

**SA 2667.** Mr. COBURN submitted an amendment intended to be proposed by him to the bill H.R. 2847, making appropriations for the Departments of Commerce and Justice, and Science, and Related Agencies for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place, insert the following:

SEC. \_\_\_\_\_. (a) ADDITIONAL AMOUNT FOR OFFICE OF INSPECTOR GENERAL.—The amount appropriated by title I under the heading “OFFICE OF INSPECTOR GENERAL” under the heading “DEPARTMENTAL MANAGEMENT”

under the heading “DEPARTMENT OF COMMERCE” is increased by \$4,499,000.

(b) OFFSET.—The amount appropriated by title I under the heading “HERBERT C. HOOVER BUILDING RENOVATION AND MODERNIZATION” under the heading “DEPARTMENTAL MANAGEMENT” under the heading “DEPARTMENT OF COMMERCE” is decreased by \$5,000,000.

**SA 2668.** Mr. REID (for himself, Mr. BAUCUS, Mr. REED, Mrs. SHAHEEN, Mr. DODD, Mr. DURBIN, Mr. SCHUMER, Mr. HARKIN, Mr. LEAHY, Mr. CASEY, Mr. CARDIN, Mr. LEVIN, Mr. SANDERS, Mr. KAUFMAN, Mr. BROWN, Ms. STABENOW, Mr. UDALL of Colorado, Mr. BENNET, Ms. KLOBUCHAR, Mr. LAUTENBERG, Mr. AKAKA, Mr. ROCKEFELLER, Mr. BYRD, Mrs. MCCASKILL, Mr. WEBB, Ms. MIKULSKI, Mr. BURRIS, Mrs. GILLIBRAND, Mrs. BOXER, Mr. BEGICH, Mr. FRANKEN, Mrs. MURRAY, Mr. KERRY, Mr. MENENDEZ, Mr. BINGAMAN, and Mrs. FEINSTEIN) submitted an amendment intended to be proposed by him to the bill H.R. 3548, to amend the Supplemental Appropriations Act, 2008 to provide for the temporary availability of certain additional emergency unemployment compensation, and for other purposes; which was ordered to lie on the table; as follows:

Strike all after the enacting clause and insert the following:

**SECTION 1. SHORT TITLE.**

This Act may be cited as the “Emergency Unemployment Compensation Extension Act of 2009”.

**SEC. 2. REVISIONS TO SECOND-TIER BENEFITS.**

(a) IN GENERAL.—Section 4002(c) of the Supplemental Appropriations Act, 2008 (Public Law 110-252; 26 U.S.C. 3304 note) is amended—

(1) in paragraph (1)—

(A) in the matter preceding subparagraph (A), by striking “If” and all that follows through “paragraph (2))” and inserting “At the time that the amount established in an individual’s account under subsection (b)(1) is exhausted”;

(B) in subparagraph (A), by striking “50 percent” and inserting “54 percent”;

(C) in subparagraph (B), by striking “13” and inserting “14”;

(2) by striking paragraph (2); and

(3) by redesignating paragraph (3) as paragraph (2).

(b) EFFECTIVE DATE.—The amendments made by this section shall apply as if included in the enactment of the Supplemental Appropriations Act, 2008, except that no amount shall be payable by virtue of such amendments with respect to any week of unemployment commencing before the date of the enactment of this Act.

**SEC. 3. THIRD-TIER EMERGENCY UNEMPLOYMENT COMPENSATION.**

(a) IN GENERAL.—Section 4002 of the Supplemental Appropriations Act, 2008 (Public Law 110-252; 26 U.S.C. 3304 note) is amended by adding at the end the following new subsection:

“(d) THIRD-TIER EMERGENCY UNEMPLOYMENT COMPENSATION.—

“(1) IN GENERAL.—If, at the time that the amount added to an individual’s account under subsection (c)(1) (hereinafter ‘second-tier emergency unemployment compensation’) is exhausted or at any time thereafter, such individual’s State is in an extended benefit period (as determined under paragraph

(2)), such account shall be further augmented by an amount (hereinafter ‘third-tier emergency unemployment compensation’) equal to the lesser of—

“(A) 50 percent of the total amount of regular compensation (including dependents’ allowances) payable to the individual during the individual’s benefit year under the State law; or

“(B) 13 times the individual’s average weekly benefit amount (as determined under subsection (b)(2)) for the benefit year.

“(2) EXTENDED BENEFIT PERIOD.—For purposes of paragraph (1), a State shall be considered to be in an extended benefit period, as of any given time, if—

“(A) such a period would then be in effect for such State under such Act if section 203(d) of such Act—

“(i) were applied by substituting ‘4’ for ‘5’ each place it appears; and

“(ii) did not include the requirement under paragraph (1)(A) thereof; or

“(B) such a period would then be in effect for such State under such Act if—

“(i) section 203(f) of such Act were applied to such State (regardless of whether the State by law had provided for such application); and

“(ii) such section 203(f)—

“(I) were applied by substituting ‘6.0’ for ‘6.5’ in paragraph (1)(A)(i) thereof; and

“(II) did not include the requirement under paragraph (1)(A)(ii) thereof.

“(3) LIMITATION.—The account of an individual may be augmented not more than once under this subsection.”.

(b) CONFORMING AMENDMENT TO NON-AUGMENTATION RULE.—Section 4007(b)(2) of the Supplemental Appropriations Act, 2008 (Public Law 110-252; 26 U.S.C. 3304 note) is amended—

(1) by striking “then section 4002(c)” and inserting “then subsections (c) and (d) of section 4002”; and

(2) by striking “paragraph (2) of such section)” and inserting “paragraph (2) of such subsection (c) or (d) (as the case may be))”.

(c) EFFECTIVE DATE.—The amendments made by this section shall apply as if included in the enactment of the Supplemental Appropriations Act, 2008, except that no amount shall be payable by virtue of such amendments with respect to any week of unemployment commencing before the date of the enactment of this Act.

**SEC. 4. FOURTH-TIER EMERGENCY UNEMPLOYMENT COMPENSATION.**

(a) IN GENERAL.—Section 4002 of the Supplemental Appropriations Act, 2008 (Public Law 110-252; 26 U.S.C. 3304 note), as amended by section 3(a), is amended by adding at the end the following new subsection:

“(e) FOURTH-TIER EMERGENCY UNEMPLOYMENT COMPENSATION.—

“(1) IN GENERAL.—If, at the time that the amount added to an individual’s account under subsection (d)(1) (third-tier emergency unemployment compensation) is exhausted or at any time thereafter, such individual’s State is in an extended benefit period (as determined under paragraph (2)), such account shall be further augmented by an amount (hereinafter ‘fourth-tier emergency unemployment compensation’) equal to the lesser of—

“(A) 24 percent of the total amount of regular compensation (including dependents’ allowances) payable to the individual during the individual’s benefit year under the State law; or

“(B) 6 times the individual’s average weekly benefit amount (as determined under subsection (b)(2)) for the benefit year.

“(2) EXTENDED BENEFIT PERIOD.—For purposes of paragraph (1), a State shall be considered to be in an extended benefit period, as of any given time, if—

“(A) such a period would then be in effect for such State under such Act if section 203(d) of such Act—

“(i) were applied by substituting ‘6’ for ‘5’ each place it appears; and

“(ii) did not include the requirement under paragraph (1)(A) thereof; or

“(B) such a period would then be in effect for such State under such Act if—

“(i) section 203(f) of such Act were applied to such State (regardless of whether the State by law had provided for such application); and

“(ii) such section 203(f)—

“(I) were applied by substituting ‘8.5’ for ‘6.5’ in paragraph (1)(A)(i) thereof; and

“(II) did not include the requirement under paragraph (1)(A)(ii) thereof.

“(3) LIMITATION.—The account of an individual may be augmented not more than once under this subsection.”.

(b) CONFORMING AMENDMENT TO NON-AUGMENTATION RULE.—Section 4007(b)(2) of the Supplemental Appropriations Act, 2008 (Public Law 110-252; 26 U.S.C. 3304 note), as amended by section 3(b), is amended—

(1) by striking “and (d)” and inserting “, (d), and (e) of section 4002”; and

(2) by striking “or (d)” and inserting “, (d), or (e) (as the case may be))”.

(c) EFFECTIVE DATE.—The amendments made by this section shall apply as if included in the enactment of the Supplemental Appropriations Act, 2008, except that no amount shall be payable by virtue of such amendments with respect to any week of unemployment commencing before the date of the enactment of this Act.

#### SEC. 5. COORDINATION.

Section 4002 of the Supplemental Appropriations Act, 2008 (Public Law 110-252; 26 U.S.C. 3304 note), as amended by section 4, is amended by adding at the end the following new subsection:

“(f) COORDINATION RULE.—Notwithstanding an election under section 4001(e) by a State to provide for the payment of emergency unemployment compensation prior to extended compensation, such State may pay extended compensation to an otherwise eligible individual prior to any emergency unemployment compensation under subsection (c), (d), or (e) (by reason of the amendments made by sections 2, 3, and 4 of the Emergency Unemployment Compensation Extension Act of 2009), if such individual claimed extended compensation for at least 1 week of unemployment after the exhaustion of emergency unemployment compensation under subsection (b) (as such subsection was in effect on the day before the date of the enactment of this subsection).”.

#### SEC. 6. TRANSFER OF FUNDS.

Section 4004(e)(1) of the Supplemental Appropriations Act, 2008 (Public Law 110-252; 26 U.S.C. 3304 note) is amended by striking “Act;” and inserting “Act and sections 2, 3, and 4 of the Emergency Unemployment Compensation Extension Act of 2009;”.

#### SEC. 7. EXPANSION OF MODERNIZATION GRANTS FOR UNEMPLOYMENT RESULTING FROM COMPELLING FAMILY REASON.

(a) IN GENERAL.—Clause (i) of section 903(f)(3)(B) of the Social Security Act (42 U.S.C. 1103(f)(3)(B)) is amended to read as follows:

“(i) One or both of the following offenses as selected by the State, but in making such selection, the resulting change in the State

law shall not supercede any other provision of law relating to unemployment insurance to the extent that such other provision provides broader access to unemployment benefits for victims of such selected offense or offenses:

“(I) Domestic violence, verified by such reasonable and confidential documentation as the State law may require, which causes the individual reasonably to believe that such individual’s continued employment would jeopardize the safety of the individual or of any member of the individual’s immediate family (as defined by the Secretary of Labor); and

“(II) Sexual assault, verified by such reasonable and confidential documentation as the State law may require, which causes the individual reasonably to believe that such individual’s continued employment would jeopardize the safety of the individual or of any member of the individual’s immediate family (as defined by the Secretary of Labor).”.

(b) EFFECTIVE DATE.—The amendment made by this section shall apply with respect to State applications submitted on and after January 1, 2010.

#### SEC. 8. TREATMENT OF ADDITIONAL REGULAR COMPENSATION.

The monthly equivalent of any additional compensation paid by reason of section 2002 of the Assistance for Unemployed Workers and Struggling Families Act, as contained in Public Law 111-5 (26 U.S.C. 3304 note; 123 Stat. 438) shall be disregarded after the date of the enactment of this Act in considering the amount of income and assets of an individual for purposes of determining such individual’s eligibility for, or amount of, benefits under the Supplemental Nutrition Assistance Program (SNAP).

#### SEC. 9. ADDITIONAL EXTENDED UNEMPLOYMENT BENEFITS UNDER THE RAILROAD UNEMPLOYMENT INSURANCE ACT.

(a) BENEFITS.—Section 2(c)(2)(D) of the Railroad Unemployment Insurance Act, as added by section 2006 of the American Recovery and Reinvestment Act of 2009 (Public Law 111-5), is amended—

(1) in clause (iii)—

(A) by striking “June 30, 2009” and inserting “June 30, 2010”; and

(B) by striking “December 31, 2009” and inserting “December 31, 2010”; and

(2) by adding at the end of clause (iv) the following: “In addition to the amount appropriated by the preceding sentence, out of any funds in the Treasury not otherwise appropriated, there are appropriated \$175,000,000 to cover the cost of additional extended unemployment benefits provided under this subparagraph, to remain available until expended.”.

(b) ADMINISTRATIVE EXPENSES.—Section 2006 of division B of the American Recovery and Reinvestment Act of 2009 (Public Law 111-5; 123 Stat. 445) is amended by adding at the end of subsection (b) the following: “In addition to funds appropriated by the preceding sentence, out of any funds in the Treasury not otherwise appropriated, there are appropriated to the Railroad Retirement Board \$807,000 to cover the administrative expenses associated with the payment of additional extended unemployment benefits under section 2(c)(2)(D) of the Railroad Unemployment Insurance Act, to remain available until expended.”.

#### SEC. 10. 0.2 PERCENT FUTA SURTAX.

(a) IN GENERAL.—Section 3301 of the Internal Revenue Code of 1986 (relating to rate of tax) is amended—

(1) by striking “through 2009” in paragraph (1) and inserting “through 2010 and the first 6 months of calendar year 2011”;

(2) by striking “calendar year 2010” in paragraph (2) and inserting “the remainder of calendar year 2011”; and

(3) by inserting “(or portion of the calendar year)” after “during the calendar year”.

(b) EFFECTIVE DATE.—The amendments made by this section shall apply to wages paid after December 31, 2009.

**SA 2669.** Mr. GRAHAM (for himself, Mr. MCCAIN, and Mr. LIEBERMAN) proposed an amendment to the bill H.R. 2847, making appropriations for the Departments of Commerce and Justice, and Science, and Related Agencies for the fiscal year ending September 30, 2010, and for other purposes; as follows:

At the appropriate place in title II, insert the following:

SEC. \_\_\_\_ (a) PROHIBITION ON USE OF FUNDS FOR PROSECUTION OF 9/11 TERRORISTS IN ARTICLE III COURTS.—None of the funds appropriated or otherwise made available for the Department of Justice by this Act may be obligated or expended to commence or continue the prosecution in an Article III court of the United States of an individual suspected of planning, authorizing, organizing, committing, or aiding the attacks on the United States and its citizens that occurred on September 11, 2001.

(b) ARTICLE III COURT OF THE UNITED STATES DEFINED.—In this section, the term “Article III court of the United States” means a court of the United States established under Article III of the Constitution of the United States.

**SA 2670.** Mr. DURBIN submitted an amendment intended to be proposed by him to the bill H.R. 2847, making appropriations for the Departments of Commerce and Justice, and Science, and Related Agencies for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 157, line 8, after “Act,” insert the following: “of which, the Attorney General may use up to \$5,000,000 for community-based violence prevention strategies that focus on street-level outreach, conflict mediation, and the changing of community norms to reduce violence, and”.

**SA 2671.** Mr. THUNE submitted an amendment intended to be proposed by him to the bill H.R. 2847, making appropriations for the Departments of Commerce and Justice, and Science, and Related Agencies for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place, insert the following:

SEC. \_\_\_\_ Not later than December 31, 2009, the Attorney General shall establish the Emergency Plan for Indian Safety and Health as required by section 601 of Public Law 110-293.

**SA 2672.** Mr. BINGAMAN (for himself, Mr. CORNYN, Mrs. LINCOLN, Mr. UDALL of New Mexico, and Mr. CRAPO) submitted an amendment intended to

be proposed by him to the bill H.R. 2847, making appropriations for the Departments of Commerce and Justice, and Science, and Related Agencies for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 108, line 14, before the period at the end, insert “: *Provided further*, That the funds appropriated by this Act for trade adjustment assistance for communities shall not be allocated among the regional offices of the Economic Development Administration until such time as 50 percent of the total amount of the funds appropriated by the American Recovery and Reinvestment Act of 2009 (Public Law 111-5) for that purpose have been distributed to grantees: *Provided further*, That the Secretary of Commerce shall reevaluate the spending plan for trade adjustment assistance based on up-to-date economic data before allocating those funds among the regional offices”.

**SA 2673.** Mr. BROWNBACK (for himself and Mr. SCHUMER) submitted an amendment intended to be proposed by him to the bill H.R. 2847, making appropriations for the Departments of Commerce and Justice, and Science, and Related Agencies for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 108, line 4, strike the period at the end and insert the following: “: *Provided further*, That of the amount appropriated under this heading, not less than \$1,000,000 shall be made available to the Bureau of Industry and Security Export Enforcement to curtail the illicit transshipment, reexportation, or diversion of U.S.-origin items to Iran.”.

**SA 2674.** Mr. ROCKEFELLER submitted an amendment intended to be proposed by him to the bill H.R. 2847, making appropriations for the Departments of Commerce and Justice, and Science, and Related Agencies for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place, insert the following:

#### NOAA CHIEF SCIENTIST

SEC. \_\_\_\_\_. Chapter 53 of title 5, United States Code, is amended—

(1) by striking “Chief Scientist, National Oceanic and Atmospheric Administration” in section 5316; and

(2) by adding “Chief Scientist, National Oceanic and Atmospheric Administration” at the end of section 5315.

**SA 2675.** Mr. ENSIGN submitted an amendment intended to be proposed by him to the bill H.R. 2847, making appropriations for the Departments of Commerce and Justice, and Science, and Related Agencies for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 163, line 6, strike “\$179,000,000” and insert “\$174,000,000”.

On page 163, line 8, strike “\$125,830,000” and insert “\$120,830,000”.

On page 170, between lines 19 and 20, insert the following:

#### SEC. 220. ADDITIONAL FUNDING FOR DRUG COURTS.

For an additional amount under the heading “STATE AND LOCAL LAW ENFORCEMENT ASSISTANCE” under the heading “OFFICE OF JUSTICE PROGRAMS” under this title, there is appropriated, for the fiscal year ending September 30, 2010, \$5,000,000 for Drug Courts, as authorized by section 1001(25)(A) of title I of the 1968 Act.

#### AUTHORITY FOR COMMITTEES TO MEET

##### COMMITTEE ON BANKING, HOUSING, AND URBAN AFFAIRS

Mr. CONRAD. Mr. President, I ask unanimous consent that the Committee on Banking, Housing, and Urban Affairs be authorized to meet during the session of the Senate on October 8, 2009, at 9:30 a.m., to conduct a hearing entitled “Future of the Mortgage Market and the Housing Enterprises.”

The PRESIDING OFFICER. Without objection, it is so ordered.

##### COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. CONRAD. Mr. President, I ask unanimous consent that the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate on October 8, 2009 at 10 a.m., in room SD-366 of the Dirksen Senate Office Building.

The PRESIDING OFFICER. Without objection, it is so ordered.

##### COMMITTEE ON FOREIGN RELATIONS

Mr. CONRAD. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on October 8, 2009, at 2:30 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

##### COMMITTEE ON THE JUDICIARY

Mr. CONRAD. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet during the session of the Senate on October 8, 2009, at 10 a.m. in SD-226 of the Dirksen Senate Office Building, to conduct an executive business meeting.

The PRESIDING OFFICER. Without objection, it is so ordered.

##### COMMITTEE ON VETERANS AFFAIRS

Mr. CONRAD. Mr. President, I ask unanimous consent that the Committee on Veterans' Affairs be authorized to meet during the session of the Senate on October 8, 2009, at 9:30 a.m. to conduct a hearing on VA/DOD Response to Certain Military Exposures. The Committee will meet in room 562 of the Dirksen Senate Office Building.

The PRESIDING OFFICER. Without objection, it is so ordered.

##### SELECT COMMITTEE ON INTELLIGENCE

Mr. CONRAD. Mr. President, I ask unanimous consent that the Select Committee on Intelligence be authorized to meet during the session of the Senate on October 8, 2009, at 2:30 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

##### SUBCOMMITTEE ON IMMIGRATION, REFUGEES, AND BORDER SECURITY

Mr. CONRAD. Mr. President, I ask unanimous consent that the Committee on the Judiciary, Subcommittee on Immigration, Refugees, and Border Security, be authorized to meet during the session of the Senate on October 8, 2009, at 3 p.m. in room SD-226 of the Dirksen Senate Office Building, to conduct a hearing entitled “Comprehensive Immigration Reform: Faith-Based Perspectives.”

The PRESIDING OFFICER. Without objection, it is so ordered.

##### SUBCOMMITTEE ON PUBLIC LANDS AND FORESTS

Mr. CONRAD. Mr. President, I ask unanimous consent that the Subcommittee on Public Lands and Forests be authorized to meet during the session of the Senate to conduct a hearing on October 8, 2009, at 2:30 p.m., in room SD-366 of the Dirksen Senate Office Building.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### ANNIVERSARY OF NEVADA'S STATEHOOD

Mr. REID. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of S. Res. 309, submitted earlier today.

The PRESIDING OFFICER. The clerk will report the resolution by title.

The legislative clerk read as follows:

A resolution (S. Res. 309) recognizing and celebrating the 145th anniversary of the entry of Nevada into the Union as the 36th State.

There being no objection, the Senate proceeded to consider the resolution.

Mr. REID. Mr. President, does my distinguished colleague from Nevada wish to speak on this matter?

The PRESIDING OFFICER. The Senator from Nevada.

Mr. ENSIGN. Mr. President, I just want to applaud the senior Senator from Nevada, the leader of the Senate, for this resolution recognizing the 145th anniversary of Nevada's statehood.

Mr. REID. Mr. President, as it approaches Halloween, which is the real day, I will have more to say on this resolution.

Mr. President, I ask unanimous consent that the resolution be agreed to, the preamble be agreed to, the motions to reconsider be laid upon the table; that there be no intervening action or debate, and any statements relating to this matter be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 309) was agreed to.

The preamble was agreed to.  
The resolution, with its preamble, reads as follows:

## S. RES. 309

Whereas October 31, 2009, marks the 145th anniversary of President Abraham Lincoln's proclamation admitting Nevada into the Union as the 36th State;

Whereas Nevadans celebrate the anniversary of "Battle Born" statehood every year as Nevada Day;

Whereas Nevada's State motto is "All for Our Country", reflecting the patriotism and sense of duty demonstrated by countless Nevadans since the State's entrance into the Union;

Whereas Nevada's brave veterans and service members have made critical contributions to our Nation's security in times of war and of peace;

Whereas the Henderson magnesium mines and the Nevada Test Site played key roles in the United States' victories during World War II and the Cold War, respectively;

Whereas Nevada is honored to host our Nation's Armed Forces at Nellis Air Force Base, Creech Air Force Base, Naval Air Station Fallon, and the Hawthorne Army Depot, as well as National Guard Armories and Reserve Readiness Centers throughout the State;

Whereas Nevada is a premier destination for tourists, business travelers, family vacationers, and outdoor enthusiasts throughout the United States and around the globe;

Whereas Nevada's unique features attract vacationers and locals alike, including the pastoral Washoe Valley, the crags of the Ruby Mountains, the "Biggest Little City in the World", the Las Vegas Strip, the Hoover Dam, Lovers Lock Plaza, and the annual National Cowboy Poetry Gathering;

Whereas mining became an important industry to the Silver State with the 1859 discovery of the Comstock Lode, the most valuable deposit of silver in the Nation;

Whereas Nevada produces more gold than all other States combined and is one of the largest sources of gold in the world;

Whereas the entrepreneurial spirit of Nevadans is reflected in a versatile economy, from the world's largest gaming establishments to small businesses that make up the vast majority of Nevada's employers;

Whereas Nevada has a rich cultural heritage that draws from diverse populations, from multi-generational ranching families to new residents, from Hispanic Americans to Asian Americans and Pacific Islanders, and from Basque communities to Mormon pioneers;

Whereas Nevada recognizes the language, culture, and generosity of Nevada's first dwellers, the Northern and Southern Paiutes, Shoshone, and Washoe peoples;

Whereas Nevada celebrates Thocmentony, or Sarah Winnemucca, the first Native American woman to author a publication in English, whose statue graces Emancipation Hall in the Capitol Visitor Center;

Whereas the snow-capped mountains of Nevada (pronounced Nevāda) were the inspiration for the Spanish origin of its name;

Whereas Nevada offers beautiful outdoor settings ranging from vibrant desert landscapes to grand ski slopes, and from picturesque hiking trails to flowing river currents;

Whereas Lake Tahoe is one of the deepest and clearest alpine lakes in the world, and Lake Mead is the largest engineered reservoir in the United States;

Whereas Nevada is home to Great Basin National Park, 17 State parks, 2 national forests, and 3,400,000 acres of wilderness, including Sloan Canyon, Red Rock Canyon, and Black Rock Desert;

Whereas Nevada exemplifies the independence, opportunity, and pioneering spirit of the West; and

Whereas Nevada's delegation to the 111th Congress—Senator Harry Reid, Senator John Ensign, Representative Shelley Berkley, Representative Dean Heller, and Representative Dina Titus—invite all to join in the celebration of Nevada statehood: Now, therefore, be it

*Resolved*, That the Senate recognizes and celebrates the 145th anniversary of the entry of Nevada into the Union as the 36th State.

## EXECUTIVE SESSION

## NOMINATIONS DISCHARGED

Mr. BEGICH. Mr. President, I ask unanimous consent that the Senate proceed to executive session and that the Agriculture Committee be discharged en bloc of the following: PN486, PN620, PN831, PN789, PN817, PN818, PN925, PN926, PN1021, PN1022; and that the Senate then proceed en bloc to their consideration; that the nominations be confirmed and the motions to reconsider be laid upon the table en bloc; that no further motions be in order and any statements relating to the nominations be printed in the Record; that the President be immediately notified of the Senate's action. The PRESIDING OFFICER. Without objection, it is so ordered.

The nominations considered and confirmed are as follows:

## COMMODITY FUTURES TRADING COMMISSION

Bartholomew Chilton, of Maryland, to be a Commissioner of the Commodity Futures Trading Commission for a term expiring April 13, 2013.

## DEPARTMENT OF AGRICULTURE

Edward M. Avalos, of New Mexico, to be Under Secretary of Agriculture for Marketing and Regulatory Programs.

## COMMODITY CREDIT CORPORATION

Edward M. Avalos, of New Mexico, to be a Member of the Board of Directors of the Commodity Credit Corporation.

## COMMODITY FUTURES TRADING COMMISSION

Jill Sommers, of Kansas, to be a Commissioner of the Commodity Futures Trading Commission for a term expiring April 13, 2014.

## FARM CREDIT ADMINISTRATION

Kenneth Albert Spearman, of Florida, to be a Member of the Farm Credit Administration Board, Farm Credit Administration for the remainder of the term expiring May 21, 2010.

Kenneth Albert Spearman, of Florida, to be a Member of the Farm Credit Administration Board, Farm Credit Administration for a term expiring May 21, 2016.

## COMMODITY FUTURES TRADING COMMISSION

Scott D. O'Malia, of Michigan, to be a Commissioner of the Commodity Futures Trading Commission for the remainder of the term expiring April 13, 2010.

Scott D. O'Malia, of Michigan, to be a Commissioner of the Commodity Futures Trading Commission for a term expiring April 13, 2015.

## DEPARTMENT OF AGRICULTURE

Harris D. Sherman, of Colorado, to be Under Secretary of Agriculture for Natural Resources and Environment.

## COMMODITY CREDIT CORPORATION

Harris D. Sherman, of Colorado, to be a Member of the Board of Directors of the Commodity Credit Corporation.

## EXECUTIVE CALENDAR

Mr. BEGICH. Mr. President, I ask unanimous consent that the Senate proceed to Calendar No. 484, the nomination of LTG David M. Rodriguez, reported today by the Armed Services Committee; that the nomination be confirmed and the motion to reconsider be considered made and laid upon the table; that no further motions be in order, and any statements relating to the nomination be printed in the RECORD; the President be immediately notified of the Senate's action, and the Senate then resume legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nomination considered and confirmed is as follows:

## IN THE ARMY

The following named officer for appointment in the United States Army to the grade indicated while assigned to a position of importance and responsibility under title 10, U.S.C., section 601:

*To be lieutenant general*

Lt. Gen. David M. Rodriguez

## LEGISLATIVE SESSION

The PRESIDING OFFICER. Under the previous order, the Senate will return to legislative session.

## NATIONAL DAY ON WRITING

Mr. BEGICH. Mr. President, I ask unanimous consent the Senate proceed to the immediate consideration of S. Res. 310, submitted earlier today.

The PRESIDING OFFICER. The clerk will report the resolution by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 310) expressing support for the designation of October 20, 2009, as the National Day on Writing.

There being no objection, the Senate proceeded to consider the resolution.

Mr. BEGICH. I ask unanimous consent the resolution be agreed to, the preamble be agreed to, the motions to reconsider be laid upon the table, with no intervening action or debate, and any statements related to the resolution be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 310) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

## S. RES. 310

Whereas people in the 21st century are writing more than ever before for personal, professional, and civic purposes;

Whereas the social nature of writing invites people of every age, profession, and

walk of life to create meaning through composing;

Whereas more and more people in every occupation deem writing as essential and influential in their work;

Whereas writers continue to learn how to write for different purposes, audiences, and occasions throughout their lifetimes;

Whereas developing digital technologies expand the possibilities for composing in multiple media at a faster pace than ever before;

Whereas young people are leading the way in developing new forms of composing by using different forms of digital media;

Whereas effective communication contributes to building a global economy and a global community;

Whereas the National Council of Teachers of English, in conjunction with its many national and local partners, honors and celebrates the importance of writing through the National Day on Writing;

Whereas the National Day on Writing celebrates the foundational place of writing in the personal, professional, and civic lives of Americans;

Whereas the National Day on Writing provides an opportunity for individuals across the United States to share and exhibit their written works through the National Gallery of Writing;

Whereas the National Day on Writing highlights the importance of writing instruction and practice at every educational level and in every subject area;

Whereas the National Day on Writing emphasizes the lifelong process of learning to write and compose for different audiences, purposes, and occasions;

Whereas the National Day on Writing honors the use of the full range of media for composing, from traditional tools like print, audio, and video, to Web 2.0 tools like blogs, wikis, and podcasts; and

Whereas the National Day on Writing encourages all Americans to write, as well as to enjoy and learn from the writing of others: Now, therefore, be it

*Resolved*, That the Senate—

(1) supports the designation of October 20, 2009, as the National Day on Writing;

(2) strongly affirms the purposes of the National Day on Writing and encourages participation in the National Gallery of Writing, which serves as an exemplary living archive of the centrality of writing in the lives of Americans; and

(3) encourages educational institutions, businesses, community and civic associations, and other organizations to promote awareness of the National Day on Writing and celebrate the writing of their members through individual submissions to the National Gallery of Writing.

#### MEASURES READ THE FIRST TIME—H.R. 3548, H.R. 3590, S. 1772

Mr. BEGICH. Mr. President, I understand there are three bills at the desk. I ask for their first reading en bloc.

The PRESIDING OFFICER. The clerk will report the bills by title.

The assistant legislative clerk read as follows:

A bill (H.R. 3548) to amend the Supplemental Appropriations Act, 2008, to provide for the temporary availability of certain additional emergency unemployment compensation, and for other purposes.

A bill (H.R. 3590) to amend the Internal Revenue Code of 1986 to modify the first-time

homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes.

A bill (S. 1772) to require that all legislative matters be available and fully scored by CBO 72 hours before consideration by any subcommittee or committee of the Senate or on the floor of the Senate.

Mr. BEGICH. I now ask for the second reading en bloc and object to my requests en bloc.

The PRESIDING OFFICER. Objection is heard. The bills will be read on the next legislative day.

#### APPOINTMENTS

The PRESIDING OFFICER. The Chair, on behalf of the President pro tempore, pursuant to 22 U.S.C. 276n, as amended, appoints the following Senator as Chairman of the U.S.-China Interparliamentary Group conference during the 111th Congress: the Honorable PATTY MURRAY of Washington.

The Chair, pursuant to Executive Order 12131, renewed by Executive Order 13446, reappoints and appoints the following Members to the President's Export Council:

Reappointment: the Senator from Texas (Mr. CORNYN)

Appointment: the Senator from Idaho (Mr. CRAPO) vice the Senator from Wyoming (Mr. ENZI).

#### EXTENSION FOR TRIBUTES TO SENATORS KENNEDY AND MARTINEZ

Mr. BEGICH. I ask unanimous consent that the deadline for tributes to Senators Kennedy and Martinez to be submitted to the CONGRESSIONAL RECORD be extended until Wednesday, October 14, 2009.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BEGICH. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. REID. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Morning business is closed.

#### COMMERCE, JUSTICE, SCIENCE, AND RELATED AGENCIES APPROPRIATIONS ACT, 2010—Continued

##### CLOTURE MOTION

Mr. REID. Mr. President, I have a cloture motion at the desk on the committee-reported substitute amendment to H.R. 2847.

The PRESIDING OFFICER. The clerk will report the bill by title.

The assistant legislative clerk read as follows:

A bill (H.R. 2847) making appropriations for the Departments of Commerce and Justice, and Science, and Related Agencies for the fiscal year ending September 30, 2010, and for other purposes.

The PRESIDING OFFICER. The cloture motion having been presented under rule XXII, the Chair directs the clerk to read the motion.

The legislative clerk read as follows:

##### CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on the committee-reported substitute amendment to H.R. 2847, the Departments of Commerce, Justice and Science and Related Agencies Appropriations Act of Fiscal Year 2010.

Harry Reid, Barbara A. Mikulski, Barbara Boxer, Robert Menendez, Charles E. Schumer, Patty Murray, Tom Harkin, Patrick J. Leahy, Roland W. Burris, Mark Begich, Ben Nelson, Daniel K. Inouye, Debbie Stabenow, Bernard Sanders, Dianne Feinstein, John F. Kerry, Edward E. Kaufman.

##### CLOTURE MOTION

Mr. REID. Mr. President, I have a cloture motion on the bill. I ask that it be stated.

The PRESIDING OFFICER. The cloture motion having been presented under rule XXII, the Chair directs the clerk to read the motion.

The legislative clerk read as follows:

##### CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on H.R. 2847, the Departments of Commerce, Justice and Science and Related Agencies Appropriations Act of Fiscal Year 2010.

Harry Reid, Barbara A. Mikulski, Barbara Boxer, Robert Menendez, Charles E. Schumer, Patty Murray, Tom Harkin, Patrick J. Leahy, Roland W. Burris, Mark Begich, Ben Nelson, Daniel K. Inouye, Debbie Stabenow, Bernard Sanders, Dianne Feinstein, John F. Kerry, Edward E. Kaufman.

Mr. REID. I ask unanimous consent that the cloture vote on the substitute amendment occur at 5:30 p.m., Tuesday, October 13, that the hour prior to the vote be for debate with respect to the cloture motion, the hour be equally divided and controlled between Senators MIKULSKI and SHELBY or their designees, and that the mandatory quorums be waived.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### ENERGY AND WATER DEVELOPMENT AND RELATED AGENCIES APPROPRIATIONS ACT, 2010—CONFERENCE REPORT

Mr. REID. I ask unanimous consent that the Senate proceed to the consideration of the conference report to accompany H.R. 3183.

The PRESIDING OFFICER. Without objection, it is so ordered. The report will be stated.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 3183), making appropriations for energy and water development and related agencies for the fiscal year ending September 30, 2010, and for other purposes, having met, have agreed to recommend and do recommend to their respective Houses that the House recede from its disagreement to the amendment of the Senate and agree to the same with an amendment and the Senate agree to the same, signed by a majority of the conferees on the part of both Houses.

(The conference report is printed in the House proceedings of the RECORD of September 30, 2009.)

#### CLOTURE MOTION

Mr. REID. I have a cloture motion on the conference report at the desk. I ask that it be stated.

The PRESIDING OFFICER. The cloture motion having been presented under rule XXII, the Chair directs the clerk to read the motion.

The assistant legislative clerk read as follows:

#### CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on the conference report to accompany H.R. 3183, the Energy and Water Appropriations Act for Fiscal Year 2010.

Harry Reid, Charles E. Schumer, Patrick J. Leahy, Dianne Feinstein, Evan Bayh, Mark L. Pryor, Jon Tester, Robert Menendez, Frank R. Lautenberg, Kent Conrad, Patty Murray, John F. Kerry, Daniel K. Inouye, Sheldon Whitehouse, Carl Levin, Jack Reed, John D. Rockefeller IV, Bill Nelson.

Mr. REID. I ask unanimous consent that the cloture vote on the conference report occur upon disposition of H.R. 2847, provided that if cloture is not invoked on the substitute amendment to H.R. 2847, then a motion to reconsider the vote by which cloture was not invoked on the substitute be considered entered; that the cloture vote on the bill be delayed to occur upon reconsideration, and that upon reconsideration and cloture is not invoked on the substitute, then the cloture motion on the bill be withdrawn; further, that if cloture has not been invoked as specified above, then the vote on the motion to invoke cloture on the conference report to accompany H.R. 3183 occur 1 hour after the Senate convenes on Wednesday, October 14, and that the mandatory quorum be waived.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDERS FOR FRIDAY, OCTOBER 9, 2009, AND TUESDAY, OCTOBER 13, 2009

Mr. REID. Mr. President, I ask unanimous consent that when the Senate

completes its business today, it adjourn until 10 a.m. tomorrow, Friday, October 9, for a pro forma session only, with no business conducted; that following the pro forma session, the Senate adjourn until 2 p.m. on Tuesday, October 13; that following the prayer and pledge on that day, the Journal of proceedings be approved to date, the morning hour be deemed expired, the time for the two leaders be reserved for their use later in the day, and the Senate proceed to a period of morning business until 3 p.m., with Senators permitted to speak for up to 10 minutes each; that following morning business, the Senate resume consideration of H.R. 2847, the Commerce-Justice-Science appropriations bill. Finally, I ask that the filing deadline for first-degree amendments be at 3 p.m. on Tuesday.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### PROGRAM

Mr. REID. Mr. President, the cloture vote on the substitute amendment to CJS will occur at 5:30 p.m. on Tuesday. That will be the first vote of the day. We are still hopeful and confident Senators SHELBY and MIKULSKI can work out a finite list of amendments to be voted on, and we will start voting on those Tuesday. I hope we can do that. If not, we will have to go forward. We worked all afternoon trying to come up with something, but the amendments kept coming. There was a time we had to draw the line. The number of amendments we received had nothing to do with this legislation, so it was determined to be the time to file cloture.

#### ADJOURNMENT UNTIL 10 A.M. TOMORROW

Mr. REID. If there is no further business to come before the Senate, I ask unanimous consent that it adjourn under the previous order.

There being no objection, the Senate, at 9:18 p.m., adjourned until Friday, October 9, 2009, at 10 a.m.

#### NOMINATIONS

Executive nominations received by the Senate:

FARM CREDIT ADMINISTRATION

KENNETH ALBERT SPEARMAN, OF FLORIDA, TO BE A MEMBER OF THE FARM CREDIT ADMINISTRATION BOARD, FARM CREDIT ADMINISTRATION FOR THE REMAINDER OF THE TERM EXPIRING MAY 21, 2010.

KENNETH ALBERT SPEARMAN, OF FLORIDA, TO BE A MEMBER OF THE FARM CREDIT ADMINISTRATION BOARD, FARM CREDIT ADMINISTRATION FOR A TERM EXPIRING MAY 21, 2016.

## EXTENSIONS OF REMARKS

### TRIBUTE TO THE CONGREGATION GEMILUTH CHASSODIM

#### HON. RODNEY ALEXANDER

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, October 7, 2009*

Mr. ALEXANDER. Madam Speaker, I rise today to pay tribute to the Congregation Gemiluth Chassodim of Alexandria, La., originally known as the Hebrew Benevolent Society of Rapides. Chartered on Oct. 2, 1859, the congregation recently celebrated its 150th anniversary of distinguished service to the Jewish community, as well as to providing faithful dedication to the Alexandria area.

The congregation first held religious services in various private homes with lay leadership. The initial Jewish sanctuary was built in 1870, and the first rabbi, Marx Klein, came in 1873. On Oct. 14, 1873, the young congregation became one of the original charter members of the Union of American Hebrew Congregations, presently known as the Union for Reform Judaism, which today represents 900 affiliate congregations in the United States and abroad. The present sanctuary was constructed in 1952.

The congregation has been served by 23 rabbis and 33 board presidents. It grew to a peak of nearly 300 families during the mid-twentieth century.

Many members of the Temple have held various leadership roles in civic and charitable organizations throughout Central Louisiana. In addition, they have made significant contributions in the fields of medicine, law, government, social services, education and the cultural life of the region.

The Temple, the Rabbi and individual members continue to play an integral part in achieving better interfaith understanding, working to strengthen the quality of life for all citizens in the communities of the region.

Madam Speaker, I ask my colleagues to join with me in commending the Congregation Gemiluth Chassodim.

### EARMARK DECLARATION

#### HON. BRIAN P. BILBRAY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, October 7, 2009*

Mr. BILBRAY, Madam Speaker, I would like to submit the following Earmark request:

Requesting Member: Congressman BRIAN BILBRAY

Bill Number: Conference Report to H.R. 3183, FY 2010 Energy and Water Appropriations

Account: Army Corps of Engineers, General Investigations, Miscellaneous

Legal Name of Requesting Entity: Scripps Institution of Oceanography, UC San Diego

Address of Requesting Entity: 9500 Gilman Drive, La Jolla, CA 92093

I received \$897,000 for the Coastal Data Information Program/Southern California Beach Processes Study within the Army Corps of Engineers. Through this program, high-resolution wave data and forecasts are disseminated in real time via the internet to the National Weather Service and to tens of thousands of diverse users each day. Sea state and surf warnings are issued based on this information for the protection of life and property. In addition, beach elevations are monitored and analyzed, and this information is provided to coastal communities online where local governments and engineers use it for making educated policy decisions for protecting and enhancing local beaches. This request is consistent with the intended and authorized purpose of the Army Corps of Engineers, which has the federal responsibility for shoreline protection and uses this data for coastal dredging and construction projects. This program is critical to marine safety and operations for the coastal United States and there are no competitive funding sources available.

### PERSONAL EXPLANATION

#### HON. J. GRESHAM BARRETT

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, October 7, 2009*

Mr. BARRETT of South Carolina. Madam Speaker, unfortunately, I missed recorded votes on the House floor on Thursday, October 1, 2009.

Had I been present, I would have voted "Aye" on rollcall vote No. 746, on Motion to Instruct Conferees to H.R. 2892; "Aye" on rollcall vote No. 747, on motion to suspend the rules and agree to H. Res. 517; "Aye" on rollcall vote No. 748, on motion to suspend the rules and agree to H. Res. 487; "No" on rollcall vote No. 749, on agreeing to H. Res. 788, which provides for consideration of the conference report to accompany H.R. 3183; "Aye" on rollcall vote No. 750, on motion to suspend the rules and agree to H. Res. 692; "Aye" on rollcall vote No. 751, on motion to suspend the rules and agree to H. Con. Res. 151; "Aye" on rollcall vote No. 752, on Agreeing to the Conference Report to H.R. 3183.

### BREAST CANCER AWARENESS MONTH

#### HON. ZOE LOFGREN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, October 7, 2009*

Ms. ZOE LOFGREN of California. Madam Speaker, I rise this October day in strong sup-

port of and to draw attention to Breast Cancer Awareness month. According to the National Cancer Institute, in the United States, breast cancer is the most common non-skin cancer and the second leading cause of cancer-related death in women.

It is estimated that approximately \$8.1 billion is spent in the United States each year on treatment of breast cancer. However, while the rate of breast cancer diagnosis has increased, the overall breast cancer mortality rate has dropped steadily—decreasing by 1.8% per year from 1999 to 2005 among women according to the Centers for Disease Control and Prevention.

This decrease in mortality rates can be attributed to a combination of early detection, expanding screening, and improvements in treatments as well as a willingness to openly discuss breast cancer. Breast Cancer Awareness month is an opportunity to help the more than 211,000 American women who learn they have this disease each year. These newly diagnosed women, survivors, their families, and all those affected will benefit from the research, education, and awareness, which increase early diagnoses and save lives that Breast Cancer Awareness month highlights.

### HONORING REVEREND ROBERT E. HENSON

#### HON. DALE E. KILDEE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, October 7, 2009*

Mr. KILDEE. Madam Speaker, Reverend Robert E. Henson is celebrating 30 years as pastor of the South Flint Tabernacle on October 10th at a dinner to be held at the church. I ask the House of Representatives to join me in congratulating Reverend Henson on this momentous occasion.

Prior to his ministry at South Flint Tabernacle, Reverend Henson served pastorates in Texas and Indiana. He has over 40 years serving as a minister. For seven years he was the Youth President of the Indiana District of the United Pentecostal Church International. He also worked as the Editor of the Indiana District United Pentecostal Church International periodical the "Indiana Apostolic Trumpet." After he moved to Michigan, Reverend Henson spent 16 years as presbyter and member of the Michigan District Board of the United Pentecostal Church International. He was the Home Missions director for one year.

Reverend Henson has written several articles and several books including "Effective Altar Ministry," "The Silhouette of Majesty," "Prayer Force One," "Marvelous Mercy," "Living a Balanced Life . . . In an Unbalanced World," "World Changers," and "Just Braggin' on Jesus." He co-authored "Victorious Living for New Christians."

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.

Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

Together with his wife, Shirley, Reverend Henson has two daughters, Melissa and her husband Jonathan Hudson, and Jerusha and her husband Jason McGhee, and four granddaughters: Jelissa, Macy, Jade, and Madelyn.

Madam Speaker, I ask the House of Representatives to rise with me today and applaud the work of Reverend Robert E. Henson and South Flint Tabernacle as they celebrate 30 years of worship, service, and spirituality under his guidance. I pray that he will continue to guide the congregation and serve the community for many, many years to come.

HONORING PAULETTE WALZ,  
LEESBURG, FLORIDA

**HON. GINNY BROWN-WAITE**

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, October 7, 2009*

Ms. GINNY BROWN-WAITE of Florida, Madam Speaker, I rise today to honor Paulette Walz of Lake County, Florida. This past week, she was awarded the Social Security Administration's highest honorary award; the Commissioner's Citation. I cannot think of a more deserving recipient.

Born in a small town in middle Tennessee, she first began her work with Social Security recipients while working as a Claims Development clerk in the Cookeville, TN Social Security Office. From there she was promoted to the Service Representative position in Leesburg, FL and thus made her move to the 5th district, where she continues to work as the Public Affairs Specialist for Lake and Sumter Counties.

For the past 24 years, Paulette has done an exceptional job of both helping Social Security recipients with their every concern and in keeping SSA issues front and center. Her efforts span much farther than her office however; she utilizes print, radio and TV to educate recipients about the Social Security options available to them. Paulette hosts two weekly radio shows in The Villages, as well as records weekly Public Service Announcements. She also records a 30 minute television program three times a month where she and her guests discuss programs the Agency administers. Additionally, she utilizes her weekly column in The Villages Daily Sun to respond to congressional inquiries regarding Social Security.

When she is not covering the issue in the media, Paulette teaches a monthly class on SSA benefits at The Villages Life Long Learning College. Additionally, she conducts pre-release seminars at area Correctional Institutions, including the Coleman Federal Correctional Complex, the largest federal prison in the United States. She was also instrumental in implementing the North Florida Area's eServices Outreach Pilot Program; this initiative offers individuals who are close to retirement assistance in making an informed decision as to when to retire.

I have only scratched the service on all she has accomplished. From working first hand with Paulette on many Social Security issues, I can tell you that her expertise and dedication are invaluable.

I congratulate her on this prestigious honor and wish her only the very best in the years to come.

TRIBUTE TO JESUS GONZALES,  
RECIPIENT OF THE 2009 ST. MADELEINE SOPHIE AWARD, SACRED  
HEART SCHOOLS

**HON. ANNA G. ESHOO**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, October 7, 2009*

Ms. ESHOO. Madam Speaker, I rise today to honor Mr. Jesus Gonzales, a recipient of the prestigious St. Madeleine Sophie Award from Sacred Heart Schools. Established in the year 2000, the St. Madeleine Sophie Award honors individuals in the Sacred Heart community who have made a sustained and significant contribution to the Schools and embody the Goals and Criteria of a Sacred Heart education. The individuals honored are selected by a committee comprised of the senior administrative team in conjunction with the Chair of the Board of Trustees and are honored at a reception and at the Mass of the Holy Spirit, the first all-school liturgy of the school year. The recipients will be VIP guests at various SHS events throughout the year and featured in their alumni magazine, The Heart of the Matter, for their commitment to the mission of Sacred Heart education.

This year, Jesus Gonzales was chosen, along with two other distinguished recipients, to be recognized with the Award for his tireless work and commitment to the Sacred Heart School as the Physical Plant Manager. His award was presented by Mr. Dan Greenleaf, who gave this speech at the Awards Ceremony in tribute to Jesus:

Jesus Gonzales is a lover. What I mean here is his heart is full of love.

He shares that love everyday with the students, faculty, staff, administration and parents at Sacred Heart Schools.

Which is not always easy. But he gives this love. And he gets love in return.

He shares this love everyday of his life with his brothers and sisters, nieces and nephews and friends.

He has a lot of love to give and he gets lots in return. Which is no surprise to me because I knew his father Gabriel.

Gabriel didn't speak English and I don't speak Spanish but we still knew each other well.

Gabriel raised 8 wonderful kids into happy productive adults while he was working here at Sacred Heart.

The family is: Theresa, Gabriel Jr., Vidal, Valentine, Jesus, Urlinda, Maria and Tony.

This is a very close family who hold on tightly to their heritage while raising their own families here in the melting pot of the Bay Area.

They see each other every day. They share meals, they vacation together, they hang out on the porch doing nothing together, they have strong relationships with each others children. They give love to each other and they get love from each other.

I tell you this because the family is so much of who Jesus is.

Jesus first stepped on the Sacred Heart campus in 1981, when he was 5 years old. One of Jesus' oldest memories on the campus was

Sr. Mesa's chickens and rabbits down by the shop.

Sr. Mesa would sell the rabbits for \$1 each, dead or alive. They tasted like chicken. At that time, there was: no McGanney Gym, no Montessori, no Spieker Pavilion, no Apartments, no football field/house.

Sr. Lawrence had warm cookies in the Main Building and Jesus had a great place to grow up.

His 14th summer, 1989, was his first summer working for Sacred Heart. He painted speed bumps and dug irrigation trenches.

Always a big smile on his face and usually a wise crack to go with it to try and deflect me from seeing how sore he was from swinging the pick.

In high school he worked in the Gator Pit where he would flash those green eyes and talk with all of the high school girls because, well, heck, he was in high school too.

In 1997 he was hired full time in the Maintenance Department.

Two years later he was put in charge of St. Joseph's and the Montessori School and his job changed from actually physically hands on working, to management and dealing with the administration, faculty, coaches, parents and neighbors. He was in his element, this was his strength. He was happier than a pig wallowing in slop. He did well.

In 2003 he was promoted to "Physical Plant Manager" in charge of all of the buildings on the campus. There are many decisions made by the Board and the Operations Department and they get handed down to Jesus and his crew.

They might have a list of 25 things to do. They do 10 of them and check the list again and it's up to 30 things to do. It never ends.

Jesus gets to deal with everyone on campus by e-mail, phone and face-to-face. That starts with his crew of about 20 maintenance and housekeeping personnel. They are the front lines. They are the men and women in the trenches. They are the people we all depend on but might not realize it.

Jesus is very fair with his crew. He is consistent in dealing with 20 personalities. He evaluates, makes changes and implements these changes fairly across the board. He can be stern and honest when he needs to be, but he talks to them the same way he would expect someone to talk to him.

Most of his conversations are peppered with humor. He listens, I mean really listens and makes informed decisions. He is not above his crew.

Then he deals with everyone else: administrators, teachers, parents, vendors, police department, fire department, city hall, contractors.

There is nobody that he doesn't approach with a smile and an open mind. He is patient. He is organized, and he will give you all his time to get you what you need.

In the big picture he knows why he's here. I've heard him say it before, "We are here for the kids." It is that easy. You give love, you get love, "We are here for the kids."

He is who his father and family and maybe even a little bit of Sacred Heart raised him to be.

A child of the Sacred Heart.

But still after all of this, there is still one person who remains the center of his life. Someone who goes for camping, fishing, bowling and makes him laugh. Someone who helps him get ready for work in the morning.

That most special someone in his life is his son Vidal who is now 8 years old and who gets to grow up in the loving glow of his father and the whole Gonzales family.

Madam Speaker, I ask the entire House of Representatives to join me in offering our congratulations to Jesus Gonzales on the very

special occasion of being chosen for the St. Madeleine Sophie Award and for all he does daily to strengthen our community and our country.

HONORING EGGLESTON SERVICES  
AND THE SARAH BONWELL  
HUDGINS CENTER

**HON. ROBERT J. WITTMAN**

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, October 7, 2009*

Mr. WITTMAN. Madam Speaker, I am privileged to rise today to honor Eggleston Services for the meaningful opportunities they provide for individuals with disabilities. Eggleston Services is a company in southeastern Virginia that has close to 600 employees, and upwards of three fourths of those employees have a disability. Many of these workers are able to work through a federal program called Ability One. Ability One encourages federal entities to work directly with agencies like Eggleston to provide valuable work at a fair price, all the while utilizing the skills of persons with disabilities.

Eggleston Services is dedicated to providing a broad array of programs and services for individuals with disabilities. Since 1955 their goal has been to assist people in obtaining meaningful work opportunities, and to help them participate fully in their communities. Eggleston Services helps individuals with disabilities gain freedom from dependence on government support by providing them on-the-job training and stable work opportunities.

Just recently, I had the honor to visit the Sarah Bonwell Hudgins Center in Hampton, Virginia. The center is owned by the Sarah Bonwell Hudgins Foundation and managed by Eggleston Services, Inc. The center provides dynamic programs for individuals with mental and/or physical disabilities. Through its partnership with Eggleston Services, the Foundation helps persons with disabilities by providing a place to work, a place to live in a safe caring environment, and a place to learn to live independently.

The profound work and programs that are available at the center help many and are invaluable. At the Sarah Bonwell Hudgins Center, Eggleston Services operates a Life Enhancement Program, which provides specialized services, activities, and residential care. Eggleston Services also provides programs at the center, including Eggleston Document Destruction, a full-service secure document destruction and shredding business, a business fulfillment center, and a ceramics manufacturing facility.

These remarkable programs serve as a way for people with disabilities to find independence and a sense of one's own. None of this would be possible without the Ability One Program and the dedication of Eggleston Services. Businesses can look to Eggleston Services and the Ability One program and use their successful programs as a model for their own business practices. Persons with disabilities can be key contributors in the workplace and I commend Eggleston Services in conjunction with the Ability One program and the Sarah

Bonwell Hudgins Foundation for their work in providing opportunities for individuals with disabilities.

RECOGNIZING OCTOBER AS  
BREAST CANCER AWARENESS  
MONTH

**HON. DARRELL E. ISSA**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, October 7, 2009*

Mr. ISSA. Madam Speaker, today I rise in support of October as Breast Cancer Awareness Month.

Many of us have concerns for family and friends impacted by breast cancer. This month we must take those concerns and turn the emotion into action.

According to the American Cancer Society, breast cancer is the most commonly diagnosed form of cancer in women in California and the United States as a whole. It is the second most common cause of cancer death. The California Cancer Registry estimates that each year, more than 25,000 California women develop breast cancer and over 4,000 die as a result. California represents a large portion of the 192,370 new cases of breast cancer that have been diagnosed in 2009 alone.

This disease is not gender specific; it will develop in approximately almost 2,000 men this year as well. Early detection and treatment for both sexes has resulted in 2.5 million breast cancer survivors in the United States.

We must continue to encourage all women and men to undergo mammography screening, as it is the most effective test to determine the presence of breast cancer. To do so, I have joined with my colleagues to cosponsor the Breast Cancer Education and Awareness Requires Learning Young Act of 2009. This bill will enhance efforts to increase public awareness regarding the threats posed by breast cancer to young women and men, as well as to enhance campaigns that will further educate the community on the risk factors of breast cancer and the importance of early detection.

I am proud to stand today with my colleagues to recognize the importance of continuing efforts to enhance awareness and preventative actions.

TRIBUTE TO JAN TITTLE

**HON. DALE E. KILDEE**

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, October 7, 2009*

Mr. KILDEE. Madam Speaker, I rise today to pay tribute to Jan Tittle, the National President of the Ladies Auxiliary to the Veterans of Foreign Wars of the United States. Mrs. Tittle will address the Veterans of Foreign Wars Fall Conference on October 10th in Sault Ste. Marie, Michigan.

The 600,000 members of the Ladies Auxiliary of the Veterans of Foreign Wars have spent the last 96 years honoring those who have sacrificed and served our Nation to pre-

serve our freedoms. They volunteer their time maintaining memorials to the persons making the ultimate sacrifice for our country and to teach our youth about our veterans. They provide financial assistance to preserve the Statue of Liberty, have volunteered over 2 million hours in Veterans Affairs Medical Centers and other hospitals. They provide awards and scholarships to students based upon their expressions of patriotism through art, speech and volunteerism.

Jan Tittle was elected the 2009-2010 National President this past August at the 96th National Convention. She is a Life Member of the TSgt. Walter C. Fulda Auxiliary 3433 in Ladson, South Carolina. She is eligible through her father, Arlen Owens, a World War II Purple Heart recipient. As the National President she plans to focus on the Auxiliary's core programs for veterans and their families. She also plans to lead the Auxiliary in topping \$3 million to the Cancer Aid and Research Fund.

Madam Speaker, I ask the House of Representatives to rise and applaud Jan Tittle as she brings together the Ladies Auxiliary under the theme, "It's Time for America's Military Heroes." I congratulate her and the members of the Auxiliary for their commitment to safeguarding the memory of our veterans and their sacrifice for our Nation.

GOVERNORS OF ALASKA, ALABAMA, AND ARIZONA EXPRESS  
CONCERNS WITH UNFUNDED  
MANDATES IN HEALTH REFORM

**HON. MIKE ROGERS**

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, October 7, 2009*

Mr. ROGERS of Michigan. Madam Speaker, I rise today to express concerns regarding health reform proposals which would create unfunded state mandates. Legislation currently before the House would dramatically expand the Medicaid program and place over \$35 billion in new liabilities on state budgets over the next ten years. In addition, these proposals would expand the federal government's role in administering Medicaid, which would severely handcuff states' ability to run their own programs and preempt state authority to manage Medicaid eligibility and benefits.

Over the last several weeks, governors have expressed concerns over these proposals. I would like to submit for the RECORD the following letters from the governors of Alaska, Alabama and Arizona:

SEPTEMBER 8, 2009.

Hon. MAX BAUCUS,  
Chairman, Senate Finance Committee, Hart  
Senate Office Building, Washington, DC.

Hon. CHARLES GRASSLEY,  
Ranking Member, Senate Finance Committee,  
Hart Senate Office Building, Washington,  
DC.

DEAR CHAIRMAN BAUCUS AND RANKING MEMBER GRASSLEY: States cannot afford to carry the huge costs of health care reform. States (and their businesses and residents) are struggling to recover financially. The National Conference of State Legislatures (NCSL) reports states had a \$113 billion dollar budget shortfall in 2009 and the situation

is getting worse. NCSL estimates state budget shortfalls will increase to \$142 billion in 2010. I am also concerned with the proposed new federal mandates that would undercut state authority over the Medicaid program.

On fiscal impact, H.R. 3200 expands Medicaid coverage to all citizens under 133 percent of the Federal Poverty Level (FPL) while the Senate HELP committee legislation assumes an expansion to 150 percent of the FPL. The Congressional Budget Office estimates these proposed expansions would require spending hundreds of billions of dollars in new public funds. While the proposals would initially place responsibility on the federal government to pay for expanding Medicaid coverage, a shift would later occur to state treasuries and the impact would be significant. For Alaska, the National Governors Association estimates it would cost \$140 million in state general funds to expand Medicaid for all Alaskans up to 133 percent of FPL in 2015. (Assuming there is full federal funding the first two years.) This amount would increase to \$168 million by 2019, with new state expenditures amounting to billions over time.

This fiscal hit to states would come on top of the Medicaid funding cliff created by Congress in American Recovery and Reinvestment Act. (ARRA). ARRA established a temporary increase in the Federal Medical Assistance Percentage (FMAP) rate to help states deal with Medicaid costs. This higher FMAP rate is set to expire on December 31, 2010. If the higher FMAP rate is not extended, states will face an immediate and significant increase in costs to operate Medicaid programs. In Alaska, approximately \$120 million more in state general funds will be needed to operate the Medicaid program for just one year.

Further, proposals in Congress would give the federal government a stronger role in administering Medicaid and undercut state authority. Coverage would have to be expanded to childless adults who qualify and would replace the current state option to cover parents of low-income children with a federal mandate to provide coverage to qualifying adults. Maintenance of effort requirements would prevent states from adjusting eligibility to meet ever-changing fiscal conditions. Lower limits of practitioner reimbursement and coverage limits would be imposed. New services and the coverage of additional provider groups would be mandated and state flexibility in the eligibility process would be constrained. All these mandates limit state control and flexibility to control the Medicaid program.

While I am sympathetic to the dilemma of health care reform and I applaud your efforts to find a solution, I cannot support legislation from Congress that imposes costly unfunded federal mandates on Alaska and other states. Instead, the federal government should be looking for ways to give the states increased flexibility with federal funding to meet the unique needs of each state's population. This tact would lead to innovation and cost-containment as compared to the current rout pursued in existing health care legislation.

Sincerely,

SEAN PARNELL,  
Governor, Alaska.

SEPTEMBER 30, 2009.

Hon. RICHARD SHELBY,  
U.S. Senate, Russell Senate Office Building,  
Washington, DC.

DEAR SENATOR SHELBY: Democrats and Republicans alike agree that our health care

system is in need of reform; however, it appears the proposal you will likely be called to vote on has serious flaws that will have a dire budgetary impact on Alabama. As governor of our state, I am writing to express a specific concern I have about this proposal.

The Senate and House of Representatives are considering a bill that includes a major expansion of Medicaid and an increase in costs to the states. Our Medicaid Department has reviewed the cost of expanding Medicaid to 150% Federal Poverty Level and determined that it would cost state and federal taxpayers an additional \$1.2 billion per year to cover this mandate alone. Unlike the federal government, our state actually has to balance its budget. Given the effects of the current economic condition on our budgets, any additional costs will overwhelm our resources. Expecting states in the current economic climate to provide additional funding for federal mandates is not reasonable or even practical.

Instead of raising taxes, imposing mandates and charging penalties on small businesses, Congress and the White House may want to consider an approach we have begun to take in Alabama. Small businesses, those with 24 or fewer employees, can now deduct 150% of the money they spend on health insurance premiums from their state taxes, and their employees earning up to \$50,000/year can do the same.

Rather than increasing the size and cost of government by putting more people on Medicaid, and thereby making more citizens dependent on government as Washington appears ready to do, Alabama is trying to reduce the burden of health care costs for the overwhelming majority of its employers and their employees. I believe our state can be looked to as a model for other states.

Our Medicaid program is a national innovator in the area of medical homes and health information technology. A higher percentage of Alabamians have health insurance than the nation as a whole, and Alabama has a lower percentage of uninsured children than the nation as a whole. In addition to achieving higher rates of coverage, Alabama has some of the nation's lowest health care costs. That is one reason why Alabama has been so successful in attracting national and international companies and the thousands of jobs they have created in our state.

Not only is health care less expensive in Alabama than just about anywhere else in the country, we are also an open market for insurers. More than 300 companies are licensed to sell health care insurance in our state. We encourage competition and welcome insurers to help in the effort to drive down costs.

We, as a nation, must address the problems of our existing health care system, but simply unloading them on the states will not work. I thank you for your interest in this very important matter and look forward to working with you to find common sense ways to reform our health care system.

Sincerely,

BOB RILEY,  
Governor, Alabama.

JULY 16, 2009.

Senator JOHN MCCAIN,  
U.S. Senate, Russell Senate Bldg.,  
Washington DC.  
Senator JON KYL,  
U.S. Senate, Hart Senate Bldg.,  
Washington DC.

DEAR SENATOR MCCAIN AND SENATOR KYL: Thank you for the opportunity to provide information about Arizona's Medicaid pro-

gram, the Arizona Health Care Cost Containment System (AHCCCS).

As you know, Arizona is facing one of the worst financial deficits in the nation and projections show that the State is expected to make a slow recovery. In the meantime, unemployment has continued to increase and counter-cyclical programs like AHCCCS have continued to experience record-breaking enrollment. In the last four months alone, AHCCCS has grown by more than 100,000 new enrollees, and July 2009 enrollment is almost 17 percent above the same month in 2008. Total enrollment, including our Title XXI KidsCare program, in July reached 1,275,109 members, which is almost 19 percent of the state's total population.

I am proud that AHCCCS program has served as a model for other state Medicaid programs across the country in terms of cost containment. This is due, in large part, to the fact that AHCCCS is a capitated managed care model and 65 percent of its long-term care members receive home and community based services rather than institutional care. According to the Kaiser Family Foundation, AHCCCS has the lowest per member per year (PMPY) cost among Medicaid programs in the country. The average PMPY costs are: (1) \$5,645.52 for acute care; (2) \$45,960.72 for long-term care, which is a blended average of our elderly and physically disabled and developmentally disabled programs. The weighted average PMPY cost across all Title XIX groups is \$7,182.60.

I am concerned that the Medicaid expansion proposals being discussed at the federal level do not consider the fiscal difficulties states are facing and are likely to continue to face over the next few years. At the same time as Congress is considering prohibiting states from changing their Medicaid eligibility standards, there have been discussions about establishing a federal floor for Medicaid provider rates, which even further limits state flexibility in setting funding levels. State flexibility has been key to Arizona's success in developing and efficiently managing a Medicaid program that provides high quality care at a low cost.

Even with our strong cost containment measures, I remain concerned about Arizona's ability to sustain the existing AHCCCS model, let alone a mandatory expansion to 150 percent, regardless of whether the federal government provides full financing of the expansion for the first five years. Medicaid is already an increasing share of state budgets—Arizona's General Fund spending on AHCCCS has increased by 230% over the past ten years, and has risen from 8 percent of General Fund spending in FY 1999 to an estimated 16 percent in FY 2009.

Maintaining this level of spending increases will be difficult, especially given that Medicaid enrollment and costs continue to rise. Moreover, Arizona's revenues are not expected to turn around for several years and, even when they do rebound, we would require significant revenue growth in order to sustain rising expenditures for the existing Medicaid program.

Attached, please find data responsive to your requests. There is a summary sheet that provides an overview of the information requested, along with several other sheets that provide additional detail. As you know, there are many unanswered questions regarding the proposals. This analysis includes the assumptions that were used to develop the figures, which will obviously change as the proposals are refined.

Please do not hesitate to contact my office if you have questions or should require additional information. I share your concern regarding Arizona's ability to expand its Medicaid program and what the long-term fiscal implications will be for Arizona, and I hope you find this information useful as you consider the various proposals that are before you.

Sincerely,

JANICE K. BREWER,  
Governor, Arizona.

COMMENDING JOYCE BOLAND FOR  
RECEIVING THE REGIONAL COM-  
MISSIONER'S CITATION FROM  
THE SOCIAL SECURITY ADMINIS-  
TRATION

**HON. TODD RUSSELL PLATTS**

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 7, 2009

Mr. PLATTS. Madam Speaker, I rise today to commend my constituent, Joyce Boland, for receiving the Regional Commissioner's Citation from the Social Security Administration. The Regional Commissioner's Citation is the second highest award that Social Security gives to employees who demonstrate the highest standards of professionalism as established by the agency.

Joyce Boland has worked for the Social Security Administration for 39 years and has dedicated her life to public service. She is often asked to train and mentor employees in other branches, which she does without hesitation. In fact, this is the third time she has received the Regional Commissioner's Citation, an award that is rarely awarded even once in a career, let alone three times.

I applaud the good service that Joyce Boland has not only provided the Social Security Administration, but to the citizens of York County and Pennsylvania as a whole. For this reason, I urge my colleagues to join me in commending Joyce Boland for her good work and service to her country.

INTRODUCTION OF THE "WATER  
TRANSFER FACILITATION ACT  
OF 2009"

**HON. JIM COSTA**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 7, 2009

Mr. COSTA. Madam Speaker, today with Congressman CARDOZA I introduced the "Water Transfer Facilitation Act of 2009." The measure should reduce unnecessary delays in water transfers at a time when Central Valley farmers have been hard hit by a three-year drought. It would allow new water transfers of roughly 250,000 to 300,000 acre-feet of water per year. The bill would grant new authority to the Bureau of Reclamation to approve voluntary water transfers between sellers and buyers in the San Joaquin Valley. The measure also would streamline environmental reviews for Central Valley water transfers by ensuring that they occur on a programmatic

basis, instead of the current project-by-project basis.

Transferring water between and within counties for water districts is a critical tool during periods of drought. While the best solution would be to have the federal and state pumps fully operational, because we have been unable to modify the Endangered Species Act, this change in the law provides us some relief. This legislation makes permanent the ability to transfer water to our Valley's farms when it is most needed, therefore, allowing our farmers a lifeline to continue to grow crops and help our local economy. More will need to be done to protect the Valley's water, and I will continue that fight.

The bill is supported by a great number of water users across the Central Valley, including the following: Friant Water Users Authority, San Joaquin River Exchange Contractors Authority, Delta-Mendota Canal Authority, Westlands Water District, Metropolitan Water District, Glenn Colusa Irrigation District, Northern California Water Association, Banta-Carbena Irrigation District, Tehama-Colusa Canal Authority, Association of California Water Agencies, Placer County Water Agency, Conaway Preservation Group, and Reclamation District 2035.

I have submitted several of these support letters, and I understand that Mr. CARDOZA will submit additional letters as well.

FRIANT WATER USERS AUTHORITY,  
Lindsay, CA, October 1, 2009.

Subject: Support for transfer legislation for the Central Valley Project.

Hon. Congressman JIM COSTA,  
Longworth House Building,  
Washington, DC.

DEAR CONGRESSMAN COSTA: On behalf of Friant Water Users Authority (Authority), we thank you for introducing transfer legislation for the Central Valley Project (CVP) and we support your efforts and this legislation as a means of providing greater flexibility for management of CVP water supplies.

The diminished water deliveries to the CVP as a result of 3 years of below average precipitation amplified by various regulatory restrictions, including the ESA and the most recent delta smelt and salmon Biological Opinions, have, as you know, created a desperate situation in the San Joaquin Valley.

While long-term solutions are being sought, numerous short term efforts are needed to help bridge the water supply gap and greater flexibility, as provided in your legislation, to move water supplies across the San Joaquin Valley would be a useful tool. In addition, the legislation would help Friant districts affected by the SJR Settlement improve management of surface and groundwater supplies.

The Authority consists of nineteen member water, irrigation and public utility districts. The Friant Service area includes approximately one million acres and 15,000 mostly small family farms on the east side of the southern San Joaquin Valley (Madera, Fresno, Tulare and Kern County). Friant Division water supplies are also relied upon by several cities and towns, including the City of Fresno, as a major portion of their municipal and industrial water supplies.

We look forward to engaging in this effort and working closely with you and your staff

in advancing this legislation and addressing California water issues.

Sincerely,

RONALD D. JACOBSMA,  
Consulting General Manager.

SAN LUIS & DELTA MENDOTA

WATER AUTHORITY,

Los Banos, CA, October 5, 2009.

Re Water Transfer Facilitation Act of 2009.

Hon. DIANNE FEINSTEIN,

U.S. Senate,

Washington, DC.

Hon. BARBARA BOXER,

U.S. Senate,

Washington, DC.

Hon. DENNIS CARDOZA,

House of Representatives,

Washington, DC.

Hon. JIM COSTA,

House of Representatives,

Washington, DC.

DEAR SENATOR FEINSTEIN, SENATOR BOXER, MR. CARDOZA, AND MR. COSTA: I am writing on behalf of the San Luis & Delta-Mendota Water Authority to express our enthusiastic support for your bill, the Water Transfer Facilitation Act of 2009, authorizing certain transfers of water in the Central Valley Project and other purposes. Water transfers are essential to sound water management and often are time sensitive. Your legislation will bring important reform to existing transfer authorization thus increasing the efficacy of this essential water management tool.

As you are keenly aware, coping with California's water crisis and, in particular, the chronic water supply shortages impacting the Central Valley Project demands utilization of various best management practices including water transfers. Moreover, the need to transfer water is often urgent and in response to climactic conditions that are frequently sporadic and ephemeral. Regrettably, bureaucratic process can unnecessarily thwart successful execution of a transfer and the best management of this all too precious resource. The clarity your legislation brings to existing authorizations will only improve the capability of water managers throughout the State to effectively respond to the ongoing crisis and put our scant water resources to use even more efficiently.

The Westside of the great San Joaquin Valley is inarguably the most transfer dependent region of the State. Your efforts to address this important matter as well as your vast knowledge of and longstanding commitment to water resource issues vital to the State are most deeply appreciated. If there is anything I can do to be of further service to you in this cause, please do not hesitate to call.

Very truly yours,

DANIEL G. NELSON,  
Executive Director.

GLENN-COLUSA IRRIGATION DISTRICT,  
Willows, CA, October 2, 2009.

Re Support for water transfer legislation.

Hon. JIM COSTA,

House of Representatives,

Washington, DC.

DEAR CONGRESSMAN COSTA: On behalf of Glenn-Colusa Irrigation District (GCID), we thank you for introducing legislation authorizing and establishing a permanent long-term program to promote and manage water transfers in the Central Valley of California. We support your efforts and this legislation as a means of providing greater flexibility in the management of Central Valley Project (CVP) and other water supplies to help meet

unmet needs critical to the future of the State of California.

As you are aware, the devastating impacts of diminished water deliveries to the CVP as a result of 3 years of below average precipitation have been made even greater by the various regulatory restrictions, including the requirements established by the recent federal biological opinions for endangered fish under the ESA. Your legislation will provide immediate, much needed relief in the form of a flexible and useful tool that will allow water to be transferred from willing parties to those in need within the CVP.

GCID is the largest and one of the oldest diverters of water from the Sacramento River, dating back to 1880. As a senior water right holder and CVP Sacramento River Settlement Contractor, we believe we can and will actively participate in this water transfer program. The language in your legislation directing the Bureau of Reclamation to work with other federal agencies to implement the necessary long-term environmental processes addressing impacts of a water transfer program on the ESA-listed Giant Garter Snake will be imperative to its usefulness and success.

We look forward to working with you and your staff in the coming months in this important legislative effort, and appreciate your leadership in advancing this legislation and addressing California water issues so important to our collective future.

Sincerely,

THADDEUS L. BETTNER,  
General Manager.

BANTA-CARBONA IRRIGATION DISTRICT,

Tracy, CA, October 2, 2009.

Re Water Transfer Facilitation Act of 2009.

Hon. DIANNE FEINSTEIN,  
Hart Senate Office Building,  
Washington, DC.

Hon. DENNIS CARDOZA,  
Longworth Building,  
Washington, DC.

Hon. JIM COSTA,  
Longworth House Office Building,  
Washington, DC.

DEAR HONORABLE PUBLIC SERVANTS: We encourage you to pass this proposed bill as it can only help Californians best use the waters within the state. It is a waste of storage and conveyance systems to limit the uses of these facilities to strictly one brand of water, ie. CVP water. When facilities can be used to move various sources of water to diverse destinations and beneficial uses then the facilities are doing the most good for the American public. These public facilities will then better serve municipal, industrial and agricultural water needs while the environment is being served during times of drought. This bill will clarify a portion of law that federal regulatory agencies are interpreting in such a way as to prevent conveyance and storage of otherwise legal water transfers within the State of California in Federal facilities. Please pursue passage of this legislative correction.

Sincerely,

DAVID WEISENBERGER,  
General Manager.

## EARMARK DECLARATION

HON. BRIAN P. BILBRAY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 7, 2009

Mr. BILBRAY. Madam Speaker, I would like to submit the following Earmark request:

Requesting Member: Congressman BRIAN BILBRAY

Bill Number: Conference Report to H.R. 3183, FY 2010 Energy and Water Appropriations

Account: EERE

Legal Name of Requesting Entity: UC San Diego

Address of Requesting Entity: 9500 Gilman Drive, San Diego CA 92093

Description of Request: I received \$750,000 for the San Diego Center for Algae Biotechnology (SD-CAB). SD-CAB is a consortium of renowned research institutions—including UC San Diego, The Scripps Research Institute, the Salk Institute, Scripps Institution of Oceanography, San Diego State University and other regional entities—that are collaborating with industry partners in a broad-scale research effort to develop advanced transportation fuels from algae. Scientists from these institutions established SD-CAB in an effort to make sustainable algae-based fuel production and carbon dioxide abatement a reality within the next 5 to 10 years. The primary goal of the center is to create a national facility capable of developing and implementing innovative research solutions for the commercialization of fuel production from algae. Algae biofuels have the potential to provide a secure and renewable source of transportation fuel that is at least carbon neutral, and does not compete for land or fresh water resources required to grow food supply crops.

To further establish the SD-CAB as a national research resource for the sustainable development of algae-based biofuels, I made a project request intended to help develop the facilities necessary to the production and culturing of a variety of algae strains. These facilities would be both on campus at UCSD and at an off-site location where existing infrastructure can be readily upgraded, refurbished and leveraged for the SD-CAB research enterprise. A congressionally directed appropriation of \$750,000 has been provided in the House FY 2010 Energy and Water Development appropriations bill to help meet these needs.

This advanced research project will provide an important training component for both students and faculty, in this critical emerging field of research. It will serve as a platform for continued collaboration with other universities and key industry partners. It is also a logical continuation of the San Diego region's leadership role at both the state and federal levels in developing and deploying viable alternative energy and transportation fuel solutions. Further, the cutting edge R&D into alternative transportation fuels derived from algae enabled by this project will be reflective of current related policy goals and funding priorities of both the federal government and the State of California.

GOVERNORS OF CALIFORNIA AND FLORIDA EXPRESS CONCERNS WITH UNFUNDED MANDATES IN HEALTH REFORM

HON. MIKE ROGERS

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 7, 2009

Mr. ROGERS of Michigan. Madam Speaker, I rise today to express concerns regarding health reform proposals which would create unfunded state mandates. Legislation currently before the House would dramatically expand the Medicaid program and place over \$35 billion in new liabilities on state budgets over the next ten years. In addition, these proposals would expand the federal government's role in administering Medicaid, which would severely handcuff states' ability to run their own programs and preempt state authority to manage Medicaid eligibility and benefits.

Over the last several weeks, governors have expressed concerns over these proposals. I would like to submit for the RECORD the following letters from the governors of California and Florida:

JULY 31, 2009.

Hon. HARRY REID,  
Majority Leader, U.S. Senate,  
Washington, DC.

Hon. MITCH MCCONNELL,  
Minority Leader, U.S. Senate,  
Washington, DC.

Hon. NANCY PELOSI,  
Speaker of the House, House of Representatives,  
Washington, DC.

Hon. JOHN A. BOEHNER,  
Minority Leader, House of Representatives,  
Washington, DC.

DEAR SENATOR REID, SENATOR MCCONNELL, MADAM SPEAKER AND MR. BOEHNER: I appreciate your commitment and hard work toward reforming the nation's health care system. I think we can all agree that the current system is not working as it should, and I have long supported a significant overhaul. Costs continue to explode, while tens of millions remain uninsured or underinsured. Many families are one illness away from financial ruin—even if they do have insurance. We have the greatest medical technology in the world at our fingertips, yet Americans' health status lags behind many countries that spend less than half what we do per capita. Any successful health care reform proposal must be comprehensive and built around the core principles of cost containment and affordability; prevention, wellness and health quality; and coverage for all.

### COST CONTAINMENT AND AFFORDABILITY

Cost containment and affordability are essential not only for families, individuals and businesses, but also for state governments. Congress is proposing significant expansions of Medicaid to help reduce the number of uninsured and to increase provider reimbursement.

Today, California administers one of the most efficient Medicaid programs in the country, and still the state cannot afford its Medicaid program as currently structured and governed by federal rules and regulations. The House originally proposed fully funding the expansion with federal dollars, but due to cost concerns, members decided to shift a portion of these expansion costs to states. I will be clear on this particular proposal: if Congress thinks the Medicaid expansion is too expensive for the federal government, it is absolutely unaffordable for

states. Proposals in the Senate envision passing on more than \$8 billion in new costs to California annually—crowding out other priority or constitutionally required state spending and presenting a false choice for all of us. I cannot and will not support federal health care reform proposals that impose billions of dollars in new costs on California each year.

The inclusion of maintenance of effort restrictions on existing state Medicaid programs only compounds any cost shift to states. We simply cannot be locked into a cost structure that is unsustainable. Governors have three primary ways to control Medicaid costs: they can adjust eligibility, benefits and/or reimbursement rates. Maintenance of effort requirements linked to existing Medicaid eligibility standards and procedures will effectively force state legislatures into autopilot spending and lead to chronic budget shortfalls.

The federal government must help states reduce their Medicaid financing burden, not increase it. A major factor contributing to Medicaid's fiscal instability, before any proposed expansion, is that the program effectively remains the sole source of financing for long-term care services. Therefore, I am encouraged by congressional proposals that create new financing models for long-term care services. Proposals that expand the availability and affordability of long-term care insurance are steps in the right direction, but they must be implemented in a fiscally sustainable way. More fundamentally, however, the federal government must take full responsibility for financing and coordinating the care of the dually eligible in order to appreciably reduce the cost trend for this group. This realignment of responsibilities is absolutely essential to controlling costs for this population, while ensuring that state governments will be better positioned to fill in any gaps that will undoubtedly arise from federal health care reform efforts. I also encourage Congress to incorporate other strategies to help stabilize Medicaid costs for states.

Delaying the scheduled phase-out of Medicaid managed care provider taxes pending enactment of new Medicaid rates, reimbursement for Medicaid claims owed to states associated with the federal government's improper classification of certain permanent disability cases, and federal support for legal immigrant Medicaid costs are examples of federal efforts that could provide more stability to state Medicaid programs. Moreover, given the fiscal crisis that many states, including California, are experiencing, I strongly urge Congress to extend the temporary increase in the federal matching ratio to preserve the ability of state Medicaid programs to continue to provide essential services to low-income residents pending full implementation of national health reform.

#### PREVENTION, WELLNESS AND HEALTH QUALITY PREVENTION

Wellness and health promotion, along with chronic disease management, can help to lower the cost curve over the long run and improve health outcomes in the near term. This was one of the cornerstone pieces of my health care reform proposal in California, and I continue to believe it should be a key piece of the federal efforts. Prevention, wellness and chronic disease management programs should include both the individual and wider population levels.

At the individual level, proposals to provide refunds or other incentives to Medicare, Medicaid and private plan enrollees who successfully complete behavior modification

programs, such as smoking cessation or weight loss, are critical reforms. To ensure they are widely used, individual prevention and wellness benefits should not be subject to beneficiary cost sharing.

Because individuals' behaviors are influenced by their environments, health reform must place a high priority on promoting healthy communities that make it easier for people to make healthy choices. California has demonstrated through its nationally recognized tobacco control efforts that population-based strategies can be effective and dramatically change the way the people think and act about unhealthy behaviors, such as tobacco use. A similar model, community transformation grants, has been advanced in the Senate Committee on Health, Education, Labor, and Pension legislation, and it should be included to support policy, environmental, programmatic and infrastructure changes that address chronic disease risk factors, promote healthy living and decrease health disparities.

Quality improvement measures are also critical to health reform. The House proposal for a Center for Quality Improvement to improve patient safety, reduce healthcare-associated infections and improve patient outcomes and satisfaction is a positive step. Coordinated chronic disease management is necessary to improve outcomes for chronically ill people.

Systematic use of health information technology and health information exchange, including access for public health agencies, is vital to providing the necessary tools to measure the success of quality improvement efforts. Finally, investments in core public health infrastructure can be facilitated through the creation of the proposed Prevention and Wellness Trust.

#### COVERAGE FOR ALL

Coverage for all is also an essential element of health care reform and I believe an enforceable and effective individual mandate, combined with guaranteed issuance of insurance, is the best way to accomplish this goal. The individual mandate must provide effective incentives to help prevent adverse selection that could occur if the mandate is too weak. Creating transparent and user-friendly health insurance exchanges to help consumers compare insurance options will also help facilitate participation. States should maintain a strong role in regulating the insurance market and have the ability to maintain and operate their own exchanges, with the understanding that some national standards will need to be established. California has a long history of protecting consumers through our two separate insurance regulators, one covering health maintenance organizations and the other monitoring all other insurance products. Maintaining a strong regulatory role at the state level is in the best interest of consumers, and I urge Congress to maintain this longstanding and effective relationship as you design these new market structures.

I hope our experience in California working toward comprehensive health care reform has informed the debate in Washington. There will be many short-term triumphs and seemingly insurmountable roadblocks for Congress and the nation on the road to comprehensive health care reform. We must all remain focused on the goal of fixing our health care system and remember that we all have something to gain from the reforms, and we all have a shared responsibility to achieve them. I look forward to working

with you as you move forward on this desperately needed legislation.

Sincerely,

ARNOLD SCHWARZENEGGER,  
Governor, California.

SEPTEMBER 17, 2009.

Hon. BILL NELSON,  
U.S. Senate, Hart Senate Office Building,  
Washington, DC.

DEAR SENATOR NELSON: Thank you for your valuable work on behalf of Floridians in the United States Congress. I am pleased with our ability to work together on issues important to our state, including the health and well being of our residents.

We can all agree that we need to work together to make quality health care more affordable and accessible, especially to those who currently do not have health insurance. I stand united with my fellow governors; however, with our concerns about how Congressional proposals may affect our ability to manage scarce state resources.

In the last year, enrollment in Florida's Medicaid program has increased from 2.2 million in July 1, 2008 to 2.63 million in July 2009, causing a strain on our state budget. Congressional proposals would increase those numbers by expanding Medicaid eligibility. Under the U.S. Senate Health, Education, Labor and Pensions (HELP) Committee proposal for example, more than 1.46 million people would be added to our current Medicaid caseload in Florida at a cost of \$4.93 billion for the next fiscal year.

Although providing more access to health care for individuals and families in our struggling economy is an affable goal, our preliminary Florida estimates show that in the following year (State Fiscal Year 2010–2011), once the American Recovery and Reinvestment Act Federal Medical Assistance Percentage funds have been exhausted, the impact increases as more than 1.72 million people are expected to be added to our case load at a cost of \$5.875 billion.

Some Members of Congress have indicated that states should shoulder some of the burden to fund the expansion of Medicaid at a time when our economy and residents are struggling. To pay for this expansion, states fear the need to cut critical services like education or public safety to add more money to Medicaid. This would have a crippling effect on Florida's state economy and the national economy.

In addition, state Medicaid programs currently take on the burden of financing long term care services for our aging and disabled residents. Due to our large elderly population, Florida is estimating expenditures of \$4.3 billion for state fiscal year 2009–2010 (this includes coverage of institutional care, home and community based waiver and our nursing home diversion waiver services). Medicaid is the primary payor for nearly two-thirds of all nursing home residents in the state. While the U.S. Senate HELP proposal and the House bill call for the creation of a new voluntary federal insurance program for community-based long-term care services, the Congressional Budget Office has questioned the long term viability of this provision. Any federal health care reform discussion must include a combined federal and state approach to the financing and provision of Medicaid and long term care services.

Lack of health insurance is the greatest barrier to accessing health care. With nearly four million Floridians currently lacking health insurance, our state has launched initiatives designed to reduce that number and assist those who need prescription medication. Many of these programs can serve as

examples to our nation. I have attached a brief summary outlining several of these successful programs Florida is using to address the health care needs of our residents, while targeting ways to reduce costs to our health care system.

The partnership between our state and our federal government is critical in enabling Florida to serve its residents, and I stand ready to work with you to address those issues which are most essential in health care reform: access and affordability. Our goal should remain clear: maintaining a high quality health care system which allows individuals to get treatment when they need it. I hope I can count on your support to work together on solutions to improve care at the same time as providing sustainability in essential programs like Medicaid through sound financing options at the state and federal levels. Thank you for your consideration and support.

Sincerely,

CHARLIE CRIST,  
Governor, Florida.

TRIBUTE TO CEE SALBERG—RECIPIENT OF 2009 ST. MADELEINE SOPHIE AWARD, SACRED HEART SCHOOLS

HON. ANNA G. ESHOO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 7, 2009

Ms. ESHOO. Madam Speaker, I rise today to honor Ms. Cee Salberg, a recipient of the prestigious St. Madeleine Sophie Award from Sacred Heart Schools. Established in the year 2000, the St. Madeleine Sophie Award honors individuals in the Sacred Heart community who have made a sustained and significant contribution to the Schools and embody the Goals and Criteria of a Sacred Heart education. The individuals honored are selected by a committee comprised of the senior administrative team in conjunction with the Chair of the Board of Trustees and are honored at a reception and at the Mass of the Holy Spirit, the first all-school liturgy of the school year. The recipients will be VIP guests at various SHS events throughout the year and featured in their alumni magazine, *The Heart of the Matter*, for their commitment to the mission of Sacred Heart education.

This year, Cee Salberg was chosen along with two other distinguished recipients to be recognized with the Award for her tireless work as an educator as well as to the Goals and Criteria of Sacred Heart Schools. Her award was presented by Mr. James Everitt, who gave this speech at the Awards Ceremony in tribute to Cee:

I am still a little unclear as to why Cee Salberg asked me to introduce her for this prestigious award. I cannot figure out if she asked me to do her this honor because I don't actually work in the pre-school and Kindergarten so, therefore, I don't really know how she behaves on a daily basis. Or, if it is because she knows that I am afraid of her and that it is unlikely that I will share anything other than the most positive sentiments about her. In any case, tonight we get to celebrate a wonderful and a brilliant educator.

I am so thrilled to be able to introduce Cee Salberg for the St. Madeleine Sophie Award

tonight. As I understand it, this award is given to those who have committed themselves to Sacred Heart Schools and who embody the Spirit of St. Madeleine Sophie Barat. For those of you who know Cee it is clear to you why she is the winner of this award. Put quite simply . . .

Cee has the vision of Sophie.

Cee has the courage of Sophie.

Cee has the generosity of Sophie.

Cee has the direct communication style of Sophie.

And most importantly, Cee has the single-hearted love of children that we believe is the most important characteristic of Sophie's own life and legacy.

I believe it is this last characteristic that has landed Cee here this evening. Cee has a single-hearted love of children that is awe inspiring for those who work closely with her and for those whose children have been in the pre-school and kindergarten. If you speak to children who attended our Montessori program they will tell you that they love Ms. Salberg. One high school student told me that Ms. Salberg is the kindest woman that she knows.

However, let me get something clear from the beginning. I am not suggesting that Cee is touchy-feely or that she has never been accused of being aloof or unfriendly. She is in fact, sometimes scary for parents and other adults. As Rich Dioli recently said to me, "Cee may not say hi to every parent who walks through the door but she knows every kid by name and she is the best educator we have." I have several funny anecdotes about times when Cee has scared me but I will save those for her retirement roast in about 15 years.

After Cee invited me to introduce her, which I am sure she is now regretting, I started asking people about her and why they felt that she should be the recipient of this award. I had a great time. People feel very strongly about Cee and almost every person I spoke with, particularly those that work in the preschool and kindergarten, made it clear that they are thrilled that she is receiving this award. And they feel strongly about her for four reasons: because she loves scotch, because she loves the San Francisco Giants, because she keeps chocolate stocked in the faculty room and, most importantly, because everything she does—every day—is about the children that walk through the doors of the Montessori building. I was tempted to summarize what people said about Cee but perhaps I should just report some of the thoughts that Cee's colleagues have about her. . .

Cee has always been available to me when I needed advice, a sounding board, or a kind shoulder on which to cry. She has helped me navigate the Sacred Heart experience. She has been a constant beacon for all of us.

Cee has a loving and giving heart. She is committed to the mission of the school; to economic, social, and ethnic diversity and she is an educational leader that works very closely with her teachers to ensure that the students are being loved and having success in the classroom.

Cee travels the world to learn about other cultures and enhances her own life to better understand humanity.

Cee is kind.

Cee believes in our mission and does everything possible to instill the mission of the school in the children.

Each decision Cee makes is for the children.

Although some say she is not warm and fuzzy—my entire family adores her. She is

there for the children and that is what matters.

Cee cares about every child in her school—no matter what.

Cee teaches the children independence, respect, kindness, understanding, and thoughtfulness—everything a parent wants in a child.

Cee is not a woman of many words but she hears all.

Cee always has the perfect outfit for every occasion; classy and elegant.

Cee will bend down and pick up every last scrap of litter under the lunch tables.

Cee is organized, efficient and thrives on order—the preschool runs like a well oiled machine under her control.

Cee is a blessing; a wonderful leader for the parents, children and her staff—I feel proud to be a member of her staff.

Cee has always based her goals for the Montessori on the Goals and Criteria.

Cee has led us to be a faculty that values professional growth, love of God and one another, and social justice.

Cee encourages teachers to keep up on all the newest information in teaching and often gives us professional articles, internet sites, and always encourages us to attend classes and workshops.

Cee has a professional commitment to get to know each student at the Montessori. She spends from 12:15 p.m. to 1:00 p.m. at recess each day, observing and interacting with the children.

Cee always encourages early intervention when students are having difficulties socially, emotionally, or academically.

Most importantly Cee has dedicated her years here to boost our financial aid, based on her value of social justice. We now have many wonderful students who would not have been able to attend Sacred Heart without Cee's dedication to financial aid increases.

I am guessing that by now you have gotten the point. Cee is wonderful. In fact, she sounds almost perfect. So, let me share with you some of her shortcomings. Just kidding Cee.

I do, however, want to share with you how I feel about Cee Salberg.

It is unlikely that you will ever hear Cee give a speech about God, St. Madeleine Sophie Barat or the Mission of the School. It would surprise me to find Cee in a large group talking about the latest instructional strategies or arguing about pedagogical methods. It is rare that you will find Cee making loud protests against injustice. It is unusual to hear Cee gossiping about a colleague or undermining the work of her peers. I can almost guarantee that you won't find Cee creating arbitrary policies that prevent a child's growth.

But in my experience you will . . .

Find Cee hugging her students and making sure that they feel loved.

Find Cee allocating resources for teacher development and creating an environment at the Montessori in which student interest drives student learning and achievement.

Find Cee fighting for financial aid and non-tuition related financial aid so that all students have access to a Sacred Heart education.

Find Cee confronting parents and colleagues who do things that don't build community. And, you will find the kind joy and laughter in the Montessori building that is at the very heart of building community.

And, my favorite, you will find Cee on vacation in the middle of the school year because she values balance in her life and she understands the importance of her family.

SEPTEMBER 8, 2009.

I was not surprised to learn that Cee was nominated and ultimately selected to be one of the St. Madeleine Sophie Award winners. Cee has been an amazing mentor to me and I can say from the very depth of my being that I have learned more from Cee Salberg about teaching and learning and about what it means to be a Sacred Heart educator than from any other person in my career. Cee is a woman who St. Madeleine Sophie Barat and St. Rose Philippine Duchesne would recognize as one of their own.

I want to end by reading a nice poem that was written by a member of Cee's staff.

There once was a principal named Cee  
As good at her job as she could be.

She juggles admins, parents, kids and teachers,

But she'd rather be cheering in the bleachers  
For the San Francisco Giants, her favorite team.

Soon, the World Series? Hey, a girl can dream!

Cee and Keir travel to many a port.  
And luckily, Janet can hold down the fort.

At work and at home, Cee has a great crew.  
She's the captain, she knows what to do!

For Cee to get this award, we're all very proud,

And not a bit shy to say right out loud:  
She deserves this award and can pass any test.

All of us know that Cee is the best!

Cee, it is a true honor and pleasure to be your friend and your colleague. I look forward to celebrating your retirement with you in about 15-20 years.

Congratulations.

Madam Speaker, I ask the entire House of Representatives to join me in offering our congratulations to Cee Salberg on the very special occasion of being chosen for the St. Madeleine Sophie Award, and for all she does daily to strengthen our community and our country.

#### GOVERNORS OF IDAHO, INDIANA, AND LOUISIANA EXPRESS CONCERNS WITH UNFUNDED MANDATES IN HEALTH REFORM

#### HON. MIKE ROGERS

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 7, 2009

Mr. ROGERS of Michigan. Madam Speaker, I rise today to express concerns regarding health reform proposals which would create unfunded state mandates. Legislation currently before the House would dramatically expand the Medicaid program and place over \$35 billion in new liabilities on state budgets over the next ten years. In addition, these proposals would expand the federal government's role in administering Medicaid, which would severely handcuff states' ability to run their own programs and preempt state authority to manage Medicaid eligibility and benefits.

Over the last several weeks, governors have expressed concerns over these proposals. I would like to submit for the RECORD the following letters from the governors of Idaho, Indiana, Louisiana and Minnesota:

SEPTEMBER 15, 2009.

Hon. MIKE CRAPO,  
U.S. Senate, Dirksen Senate Office Building,  
Washington, DC.

DEAR SENATOR CRAPO: Idaho has a proud history of fiscal responsibility, ensuring that

our State government serves its proper role for the people of Idaho while staying within their financial means. As the United States Congress attempts to address the healthcare challenges facing our nation, it is important that we remain diligent in assessing the implications of our decisions, always ensuring that we take seriously our duty to safeguard the financial resources of the American public, and allocating taxpayer money in an efficient and effective manner.

As revised healthcare proposals continue appearing in Congress, the full consequences of these reforms remain unknown and we are uncertain of the possible negative impacts on local businesses, families and senior citizens. However, it is clear that these sweeping proposals would irresponsibly shift a substantial and unmanageable financial burden to the states. Like Idaho, many states already are functioning under severely limited and strained budgets. It is certain that the burden of these reforms would be placed upon the shoulders of hardworking Americans.

The costs associated with these proposed reforms are astounding. Conservative estimates from the Idaho Division of Medicaid indicate that the bill's Medicaid eligibility proposal would increase our state share of Medicaid and the federal matching rate effective would drop in the middle of fiscal year 2011, leaving Idaho struggling to fill the void. Idaho's tax base could not support this large unfunded mandate without resorting to tax increases, including a possible increase in Idaho's already 6-percent sales tax—an irresponsible action which would do serious harm to Idaho taxpayers. The proposed reforms would impose an undue burden on citizens already struggling in this difficult economy.

It has been estimated that combined federal-state Medicaid costs in Idaho could increase by \$501 million. In addition, raising the Medicaid reimbursement rate to 110 percent of the Medicare reimbursement rate would increase total federal-state costs \$50 million more.

This proposed change in the federal reimbursement rate likely would reduce the number of plans that are offered to persons on Medicare, resulting in increased premiums and reduced services and access to service providers. Seniors in rural Idaho already have trouble finding providers who accept Medicare patients.

Should these changes be approved, that trend could continue statewide—severely limiting access to medical care for some of Idaho's most vulnerable residents. The people of Idaho have entrusted us with a responsibility to use our government resources wisely and efficiently. Imposing costly federal mandates that cannot be sustained in the long run is an irresponsible violation of this public trust. Quite simply, these proposals are financially irresponsible and would not adequately address the needs of senior citizens and other vulnerable groups.

I encourage you to join me in opposing current health care reform proposals. By ending these nonsensical debates and stopping the proposed reforms, we can move forward in a more positive, measured and reasonable direction, using common sense to find a workable healthcare solution that benefits all Americans.

As Always—Idaho "Esto Perpetua",  
C.L. "BUTCH" OTTER,  
Governor, Idaho.

Hon. RICHARD LUGAR,  
Hart Senate Office Building, Washington, DC.

DEAR SENATOR LUGAR: During your summer recess I am sure that many, if not all of you heard from your constituents regarding health care reform.

I have heard from them as well. In fact, over the past few months, I have watched Americans come forward to passionately express their anxieties about the legislation currently making its way through Congress. Their worries are well-founded.

There is no disputing the fact that aspects of American health care, such as access and affordability, truly do need to be restructured and improved. Yet, I have serious concerns about Congress's proposed solutions to these problems. In fact, I fear the current rush to overhaul the system will ultimately do more damage than good and create far more problems than it solves.

And unfortunately, Indiana would bear the brunt of many of the reckless policies being proposed. For example, our Healthy Indiana Plan (HIP), an innovative and successful state sponsored health insurance program for uninsured citizens, would suffer greatly as Congress expands Medicaid coverage, forcing many of the Hoosiers already enrolled in HIP out of the plan and into a broken Medicaid program that does not focus on prevention, healthy lifestyles, or personal responsibility.

Additionally, states will likely have to pick up the tab for this extension of Medicaid. We have estimated that the price for Indiana could reach upwards of \$724 million annually. These additional costs will overwhelm our resources and obliterate the reserves we have fought so hard to protect.

While these reforms could do serious damage to our state, I fear they will also have harmful consequences all across the country by reducing the quality and quantity of available medical care, stifling innovation, and further burdening taxpayers.

There is another way. Americans from all walks of life and every political stripe should work together with President Obama and Congress to create a set of measured and sensible reforms that bring down costs, increase access and portability and stress the importance of innovative state-run health insurance programs.

The majority of Americans do believe that health care reform is needed, but do not believe that the legislation currently on offer is the answer. I agree. And I will do everything in my power to raise these concerns and work with you to find a solution.

Sincerely,

MITCH DANIELS,  
Governor, Indiana.

SEPTEMBER 30, 2009.

Hon. STEVE SCALISE,  
Cannon House Office Building, Washington, DC.

DEAR CONGRESSMAN SCALISE: I join many of my fellow Republican and Democrat governors in expressing concern with any health care legislation being signed into law that would serve as an unfunded mandate to states.

Louisiana is similar to many other states around the country in that we are attempting to address budgetary deficits in large part by working to streamline government to be more efficient and cost-effective. In short, we are trying to emulate many of our working families, small businesses and seniors by watching our spending, doing more with less, and making every dollar count.

However, Louisiana's budgetary situation is uniquely challenged due to an unprecedented FMAP rate drop from 72 to 63.1 percent beginning next fiscal year that will cost Louisiana at least \$700 million annually. This additional cost will place significant pressures on our ability to expand our economy, create new jobs and protect critical services in our state.

Louisiana is proud of its commitment to its citizens' health in the face of long-standing issues of extreme poverty experienced in few other states. Our state is a national model for insuring children with over a 95% rate of child insurance and we were recently recognized for achieving the 2nd highest child immunization rates in the nation after an intensive state-wide private-public effort.

My Department of Health & Hospitals has submitted a Medicaid waiver to the US Department of Health & Human Services that can help improve the cost and quality delivered in the Medicaid program. This waiver proposes national best practices of coordinated care, medical homes, provider payment reform, electronic medical records, and consumer incentives to manage cost and improve quality. This proposal can help improve the efficiency in Medicaid and utilize those savings, along with the shifting of DSH dollars from expensive hospital based care to community based outpatient care, to expand coverage through private insurance to tens of thousands of adults in our state.

Again, I ask that you consider the budgetary pressures being felt by Louisiana and many other states and avoid passing any health care legislation that would serve as an unfunded mandate to the states.

Best regards,

BOBBY JINDAL,  
*Governor, Louisiana.*

[From the Washington Post, Aug. 3, 2009]  
TO FIX HEALTH CARE, FOLLOW THE STATES  
(By Governor Tim Pawlenty of Minnesota)

If you tie money to results, you'll get better results. Unfortunately, government often dumps money into programs without regard to accountability and outcomes. This past week, Democrats in Congress have been busy tinkering with a Washington takeover of the health-care system, but perhaps they should look instead to the states for models of market-driven, patient-centered and quality-focused reform. Rather than taking power away from states, federal health-care reform should use the lessons we've learned tackling this crisis in our back yards.

In Minnesota, our state employee health-care plan has demonstrated incredible results by linking outcomes to value. State employees in Minnesota can choose any clinic available to them in the health-care network they've selected. However, individuals who use more costly and less-efficient clinics are required to pay more out-of-pocket. Not surprisingly, informed health-care consumers vote wisely with their feet and their wallets. Employees overwhelmingly selected providers who deliver higher quality and lower costs as a result of getting things right the first time. The payoff is straightforward: For two of the past five years, we've had zero percent premium increases in the state employee insurance plan.

Minnesota has also implemented an innovative program called QCARE, for Quality Care and Rewarding Excellence. QCARE identifies quality measures, sets aggressive outcome targets for providers, makes comparable measures transparent to the public and changes the payment system to reward quality rather than quantity. We must stop

paying based on the number of procedures and start paying based on results.

Instead of returning power to patients and rewarding positive outcomes, many Democrats in Washington want a government-run plan that would require states to comply with dozens of new mandates and regulations. One study by the Lewin Group recently concluded that an estimated 114 million Americans could be displaced from their current coverage under such a plan, and another study by House Republicans said the plan could result in the loss of up to 5 million jobs over the next 10 years.

In typical fashion, the self-proclaimed experts piecing together this Democratic health-care legislation are focusing on only one leg—access—of a three-legged stool that also includes cost and quality. Expanding access to health care is a worthwhile goal. But equal or greater focus should be placed on containing costs for the vast majority of Americans who already have insurance. Those costs will not be contained by a massive expansion of federal programs.

Massachusetts's experience should caution Congress against focusing primarily on access. While the Massachusetts plan has reduced the number of uninsured people, costs have been dramatically higher than expected. The result? Increased taxes and fees. The Boston Globe has reported on a current short-term funding gap and the need to obtain a new federal bailout.

Imagine the scope of tax increases, or additional deficit spending, if that approach is utilized for the entire country.

IN HONOR OF THE CALIFORNIA  
UNIVERSITY OF PENNSYLVANIA  
STUDENTS, FACULTY, AND  
STAFF WHO HAVE SERVED OUR  
NATION IN IRAQ

HON. JOHN P. MURTHA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 7, 2009

Mr. MURTHA. Madam Speaker, I rise today to ask this chamber to recognize the students, faculty, and staff at California University of Pennsylvania who have valiantly served their country in Iraq. Cal. U. students have an exemplary record of serving our country in times of need and have done so again during the war in Iraq.

There have been nineteen California University students who have been deployed to Iraq. Furthermore, five members of the staff and faculty were also deployed. Many were part of the Pennsylvania Army National Guard 56th Stryker Brigade Combat Team, north of Baghdad. This was the largest National Guard call-up in support of a single operation in the history of the university. I have joined my colleagues in recognizing the 56th Stryker Brigade by becoming an original cosponsor of H. Res. 754, which honors the citizen-soldiers of the National Guard of the State of Pennsylvania, including the 56th Brigade Combat Team (Stryker) of the Pennsylvania Army National Guard on its return to the United States from deployment in Iraq.

Madam Speaker, these students, just like countless others across Pennsylvania and the rest of the country, are choosing to serve their Nation and put their own education on hold.

I have seen the consequences and effects of returning home after combat and I am pleased that Cal. U. has an Office of Veterans Affairs. This office has been instrumental in helping veterans reintegrate into the university community and has helped to facilitate the issuance of G.I. Bill benefits. This is an excellent way to help those who have given so much to our country.

I wish to conclude my remarks by commending the California University of Pennsylvania students, faculty and staff members who have selflessly dedicated themselves to our great Nation by serving their country. I would also like to commend students and university staff and faculty across our great Nation who have done the same.

#### PERSONAL EXPLANATION

HON. STEVE KING

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 7, 2009

Mr. KING of Iowa. Madam Speaker, on roll-call No. 754, I was unable to reach the House floor to cast my vote before the vote was closed.

Had I been present, I would have voted "yea."

GOVERNORS OF MISSISSIPPI AND  
NEBRASKA EXPRESS CONCERNS  
WITH UNFUNDED MANDATES IN  
HEALTH REFORM

HON. MIKE ROGERS

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 7, 2009

Mr. ROGERS of Michigan. Madam Speaker, I rise today to express concerns regarding health reform proposals which would create unfunded state mandates. Legislation currently before the House would dramatically expand the Medicaid program and place over \$35 billion in new liabilities on state budgets over the next ten years. In addition, these proposals would expand the federal government's role in administering Medicaid, which would severely handcuff states' ability to run their own programs and preempt state authority to manage Medicaid eligibility and benefits.

Over the last several weeks, governors have expressed concerns over these proposals. I would like to submit for the RECORD the following letters from the governors of Mississippi and Nebraska:

AUGUST 6, 2009.

Hon. GREGG HARPER,  
Cannon HOB,  
Washington, DC.

DEAR CONGRESSMAN HARPER: As Congress debates healthcare reform, I want to raise a few issues of concern with the policies being considered in both House and Senate bills. Healthcare reform is truly a bipartisan issue; after all, Republicans and Democrats understand that our healthcare system faces significant challenges—from steadily increasing medical costs to confusing insurance provisions. As the national debate continues, it is

important that everyone realizes the severe impact the proposed legislation would have on states like Mississippi.

As Governor, I am particularly concerned about the direction the Senate and House are taking in regards to Medicaid expansion. Instead of discussing policies to reform a broken system, the debate in Congress has shifted to finding ways to fund an expanded Medicaid program at the state level. At the end of the day, both the Senate and House proposals are unfunded mandates, which, for states like Mississippi, would result in burdensome and costly changes to the system.

For example, when we talk about sharing the cost of an expanded Medicaid program, Mississippi would pay another \$333 million annually under a larger program covering up to 150 percent below the Federal Poverty Level (FPL). A Medicaid program covering up to 133 percent FPL expansion would cost an extra \$297 million. In many states, funding the current Medicaid programs robs other critical programs. The same is true for us. Each year we struggle to cover our Medicaid expenses while providing for essential services including public education and public safety.

While there has been some discussion at the federal level to assist states in paying for this expansion, my staff learned last week that the Senate Finance Committee is proposing to cap the amount of federal money distributed to the states to pay for this expansion at \$40 billion over 10 years. Estimates show the cost of expanding the Medicaid system to all states at the lowest level, or 133 percent FPL, is \$30 billion per year. At 133 percent FPL, states would be saddled with Medicaid expansion costs in the second year of expansion.

These projections are overwhelming as Mississippi, like all states, continues to grapple with budget realities. Our General Fund Revenue collections for July 2009 are 11.27 percent below our estimate. Compared to the prior year, collections for this July are 21.43 percent or \$56.3 million below what was collected in July 2008. During Fiscal Year 2009, Mississippi's revenue was \$390 million short of the revenue estimate, causing most of state government, except for education and Medicaid, to take approximately a 6 percent cut in the Fiscal Year 2010 budget.

Our Fiscal Year 2010 budget included \$523 million in stimulus funds; otherwise, we would have faced even more significant cuts. It will take our state years to catch up, and that's without a \$297 million or \$333 million Medicaid state-share increase.

Further, the proposed healthcare reform legislation also includes numerous tax increases to finance significant expansions of government-run healthcare. Different versions of the House legislation incorporate a payroll tax on small businesses. Although the recent House Energy and Commerce Committee agreement included an 8 percent payroll tax for small businesses with an annual payroll of \$500,000, previous versions taxed small businesses with a payroll of \$250,000.

This tax will do nothing more than punish wage and job growth, especially when you consider that the tax rate increases as the size of payroll increases. According to the National Federation of Independent Businesses (NFIB), such employer mandates could cost 1.6 million jobs with more than 1 million of those jobs lost in the small business sector. That means higher taxes for Mississippians, since 96.7 percent of our employers are small businesses. In addition, the

Senate HELP Committee proposal requires employers to offer health coverage to their employees and contribute at least 60 percent of the premium cost or pay \$750 for each employee that is not offered coverage.

Language in the proposed legislation also would mandate an individual to purchase health insurance and, should he be unable to afford such coverage, he'll be slapped with a 2.5 percent additional income tax for the coverage. But the proposed legislation goes even further, taxing higher income individuals beginning at \$280,000 and families at \$350,000 on a sliding scale.

This language generates a massive tax increase on high income filers, more than half of whom are small business owners already being taxed if they do not provide health insurance to their employees. A tax increase in the middle of a recession, with unemployment rising, is not the answer.

Besides increasing taxes, the House bill cuts Medicare nearly \$500 billion. These cuts include reductions to Medicare providers and hospitals, while gutting Medicare Advantage by \$150 billion to \$160 billion. Admittedly, I am baffled as to why Congress would propose slicing funding for a program that our seniors support and that provides for their health and well-being.

As Congress heads home for the recess, I urge Members to review the proposed legislation with their state leadership. I am primarily concerned about the effect this legislation may have on Mississippi's financial stability, both now and in the future. These so-called "reforms" would severely impact Mississippi's budget and our ability to fund other important priorities, like education and public safety. Before Congress makes such sweeping reforms to our healthcare system, I implore you to first ensure that these changes are efficient and beneficial to our citizens, without burdening our states through unfunded mandates.

Sincerely,

HALEY BARBOUR,  
Governor, Mississippi.

SEPTEMBER 8, 2009.

Hon. ROGER WICKER,  
U.S. Senate, Russell Senate Office Building,  
Washington, DC.

DEAR SENATOR WICKER: Governors across the nation are growing increasingly concerned about the financial strain rising healthcare costs are putting on state budgets. During the National Governors Association (NGA) meeting in July, governors—both Republicans and Democrats—formalized their opposition to current Congressional reform proposals by issuing a policy opposing unfunded mandates that shifts costs to the states. This will necessarily require almost all states to raise taxes to manage this burden. In Mississippi, the issue of Medicaid expansion hits close to home, since our state's share of the Medicaid program is currently \$707 million, or 12 percent of a \$5.87 billion state supported budget, which includes temporary stimulus funds.

Nevertheless, the current proposals, both in the House and Senate, will expand the Medicaid program at additional costs paid not by the federal government, but passed down to the states. After a call with the governors representing the NGA Healthcare Task Force and the Senate Finance Committee, Chairman Baucus told the news media it would be impossible for the federal government to pick up all the costs for new Medicaid recipients; thus, states would have to bear some of the costs.

Why? Although CBO appears to estimate that H.R. 3200 will cost more than \$1 trillion

over the next ten years, the fine print reveals the true cost would be much higher. By imposing tax increases early in the budget window, before the bulk of the spending occurs, the true cost of the bill is hidden by budget gimmickry. Delaying the implementation of the program until the fourth year also uses budget tricks effectively to hide the immense long-term cost of this proposal. CBO has projected a 10 year deficit of more than \$200 billion associated with the bill as is. However, when the full cost of the bill is taken into account after it is fully implemented, the spending in the bill skyrockets to nearly \$2 trillion over 10 years (2014-23) with a deficit of more than \$600 billion. I have included an attachment showing the scoring of H.R. 3200 the only comprehensive health care reform bill CBO has scored.

According to the National Association of State Budget Officers, Medicaid expenses in 2007 for federal and state government combined were \$336 billion. This number is projected to reach \$523 billion by 2013, a 56 percent increase in just six years. Should the reforms being debated in Congress become law, Mississippi would be saddled with an average increase of \$360 million in additional costs, on top of the already \$707 million it costs to fund Mississippi's annual state share of the Medicaid program. These proposals, which would cover all individuals at 133 percent federal poverty level (FPL), will burden state budgets, forcing states to raise taxes. In Mississippi, that would necessarily mean increases in our state income or sales tax rates. Mississippi, like so many states, simply can't afford to pick up the tab for another unfunded mandate passed by Congress.

Such state tax increases would be on top of the federal tax increases already included in the House and Senate bills, like huge tax increases on small businesses whether in the form of an additional 8 percent payroll tax or a 5.4 percent income tax surcharge. During a deep recession, when most people believe job creation and economic growth should be top priorities, huge tax increases will make it more expensive to employ people; consequently, employers will employ fewer people.

Medicare, the nation's largest provider of health coverage for the elderly and people with disabilities covering over 46 million Americans, is on the chopping block. CBO has estimated that provisions in H.R. 3200 would lead to a total of \$162.2 billion in cuts being taken from Medicare Advantage plans. This \$162.2 billion impacts 11 million people and represents nearly \$15,000 in new costs passed to every Medicare Advantage senior beneficiary. These harmful and arbitrary cuts could result in Medicare Advantage plans dropping out of the program, harming beneficiary choice, and causing millions of seniors to lose their current coverage. Moreover, the bill grants federal bureaucrats the power to eliminate the Medicare Advantage program entirely, making the oft-repeated statement, "if you like your plan you can keep it," ring hollow for seniors.

Lastly, if we are trying to make health care more affordable, how do you leave out tort reform? After all, litigation and the resulting practice of defensive medicine add tens of billions to the cost of health care. In Mississippi we passed comprehensive tort reform in 2004, partially to stop lawsuit abuse in the area of medical liability. It worked. Medical liability insurance costs are down 42 percent, and doctors have received an average rebate of 20 percent of their annual paid premium. The number of medical liability lawsuits against Mississippi doctors fell almost 90 percent one year after tort reform

went into effect. Doctors have quit leaving the state and limiting their practices to avoid lawsuit abuse.

With all the issues concerning a government-run health care system, I wanted to warn you of the state tax increases Mississippi will shoulder on top of the federal tax increases in the pending bills as well as my concern for the increased costs our senior citizens will face as Medicare Advantage is cut. Congress must slow down and work in a bipartisan manner. Everybody agrees that health reform is needed, but it should be done thoughtfully. I hope you'll keep this important information in mind when proposals that shift costs to states or to our senior citizens are considered.

Sincerely,

HALEY BARBOUR,  
*Governor, Mississippi.*

JULY 21, 2009.

Hon. BENJAMIN NELSON,  
*U.S. Senator, Hart Building, Washington, DC.*

Hon. MIKE JOHANNIS,  
*U.S. Senator, Russell Senate Office Building, Washington, DC.*

DEAR SENATOR NELSON AND SENATOR JOHANNIS: I just returned from the National Governors Association meeting and much of the discussion among Governors was about health care. As former Governors, I thought you might appreciate the information that we received from the NGA staff. Attached are seven handouts.

The handouts and discussion among Governors reflect concerns about funding, cost, Medicaid, employer mandate, and insurance reforms. The single most important concern was this legislation would be the biggest unfunded mandate on the fifty states in the history of our country.

President Obama has told the Governors that health care reform must not be an unfunded mandate for the states. I am in strong agreement that an unfunded health care mandate would be unfair to state taxpayers.

In handout 4, NGA Executive Director Ray Scheppach outlines concerns about Medicaid in the context of health care reform. He indicates that if the Medicaid expansion becomes an unfunded mandate, states are likely to reduce their investments in education. That would be very unfortunate and as Scheppach writes "Reducing state education investment will lower U.S. competitiveness, productivity and real income of U.S. citizens. This is not good long-run policy for the U.S."

While I have other concerns about health care reform, one of the most troubling aspects is the potential for an unfunded mandate on the states. I strongly urge you to avoid an unfunded mandate on the states. Thank you.

Sincerely,

DAVE HEINEMAN,  
*Governor, Nebraska.*

FORMER CONGRESSMAN  
BRADEMAS AWARDED HONORARY DEGREE BY THE AMERICAN COLLEGE OF GREECE

HON. JOHN P. SARBANES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 7, 2009

Mr. SARBANES. Madam Speaker, I am pleased to note that on June 27, 2009, our

distinguished former colleague in the House of Representatives, Dr. John Brademas, was awarded the honorary degree of Doctor of Laws by The American College of Greece.

John Brademas was the first Greek-American elected to the United States House of Representatives and as such this honorary degree from The American College of Greece has particular symbolic resonance. I add, however, that this is the 55th honorary degree received by Dr. Brademas.

Madam Speaker, the remarks of Dr. Brademas at The American College of Greece on June 27, 2009 follow.

JUNE 27, 2009.

REMARKS OF DR. JOHN BRADEMAMAS, PRESIDENT EMERITUS, NEW YORK UNIVERSITY, NEO FALIRO, PEACE AND FRIENDSHIP STADIUM, ATHENS, GREECE

Father Constantinos, President Horner, Dr. Sue Horner, Consul General McKeever, Chancellor Bailey, chairman Peter Thun of the Board of Trustees, Senior Vice President Protopsaltis, fellow honorees, members of the faculty and graduating students of The American College of Greece.

It is for more than one reason that I count the award I have just received among the great honors of my life, and I'm especially pleased that my wife, Mary Ellen, a practicing physician, was able to break away from New York City to join us here.

In the first place, this is a degree from The American College of Greece. As you know, my late father, Stephen J. Brademas, was born in Greece—in Kalamata—and my two brothers and sister and I were all raised to be deeply proud of our Hellenic heritage.

"Be proud that you are an American", my father used to say, but "be proud, too, that you are a Greek!"

All four of the Brademas children were deeply conscious of the importance of our Greek background.

Here let me say how pleased I am that my cousin, Anna Bredima, General Counsel for the Union of Greek Shipowners, is here today with her two children, Evangelo and Ersiliana.

Anna, by the way, is a graduate of Pierce College.

Although my mother was not of Greek descent she was, like her father, a teacher—and that fact emphasizes another dimension of his Greek ancestry that my father used to press upon his children—the importance of learning, of knowledge, of education.

A second dimension of the history of Greece that my father and I often discussed was democracy. "We Greeks invented democracy!" my father reminded us, and said that some of us should still practice it.

Accordingly, after graduating from Harvard University and one year of postgraduate study there, I went to England, on a Rhodes Scholarship, to study at Oxford University. At Oxford, I wrote a doctoral dissertation on the anarchist movement in Spain but I like to note that although I studied anarchism, I did not practice it!

For on my return to my hometown in Indiana, I immediately plunged into politics and became a candidate for election to the Congress of the United States. Just old enough—25—under our Constitution to be a candidate, I lost my first race by half a percent. Naturally, I ran again, two years later, but lost a second time. Undaunted, I was first elected, on my third attempt, and then ten times re-elected. So I served as a Member of Congress for 22 years.

In the House of Representatives, I gave particular attention to writing legislation to

support schools, colleges and universities; and the students who attend them; to measures to help libraries and museums; and the arts and the humanities, generally.

In my last four years as a Member of Congress, I was the Majority Whip of the House of Representatives, an assignment that brought me every other week, with Speaker of the House of Representatives, "Tip" O'Neill of Massachusetts, and the other Democratic Leaders of the House and Senate to breakfast at the White House with President Jimmy Carter and Vice President Walter Mondale. All Democrats, we talked politics and policy.

It was, of course, while a Member of Congress that I became deeply involved in the issue of Cyprus, a matter that continues to preoccupy me. I worked closely then with my valued friend, also a Rhodes Scholar at Oxford, and the first Greek-American elected to the United States Senate, Paul S. Sarbanes. And I'm pleased to note that Paul's son, John Sarbanes, now serves in the United States House of Representatives.

As I am the son of a Greek immigrant, I am pleased to call your attention to another son of Greek immigrants, both his father and mother. I speak of Peter C. Peterson, the highly successful and highly respected American business leader and public servant. Peter G. Peterson, co-founder of Blackstone Group and former Secretary of Commerce, has just published a fascinating book, *The Education of an American Dreamer*, which I am pleased to present to President Horner for the College library. Your faculty and students will find the story of this remarkable son of Greek immigrants inspiring, I am confident.

More modestly, I am pleased also to present a book of my own to The American College of Greece, *The Politics of Education*, in which I describe my experience as a Member of Congress in writing legislation to assist schools, colleges and universities; the students who attend them; and measures to assist libraries and museums.

I move ahead, in 1980, as a result of the landslide victory of Ronald Reagan, I lost my race for reelection to a twelfth term. Shortly thereafter, I was invited to become president of New York University, the largest private, or independent, university in the United States. In 1991 I became president emeritus, my present responsibility, so now I'm only going some twelve hours a day!

If I were to single out one dimension, of my commitment to strengthening New York University, it would be that I gave particular attention to building our programs for the study of other countries and cultures, not only through programs in New York City but centers abroad as well. Much of the responsibility of an American university president focuses on fundraising, both from the Federal government and private sources. So I pressed hard, and, I believe, effectively, to bolster the financial situation of New York University.

I must add just a word about my present initiative, another strongly shaped by my Greek origins, the establishment at NYU of the John Brademas Center for the Study of Congress, of Congress as a policy-making institution.

Let me explain that unlike parliamentary institutions in Europe, the Congress of the United States has great power, in addition to that of the President of the United States, to make national policy. But with 100 Senators and 435 Representatives and without the party discipline characteristic of parliamentary systems, it is not easy for even informed Americans to understand Congress.

So we are, with the establishment of the John Brademas Center for the Study of Congress at New York University, creating an institution that will bring together Senators, Representatives, scholars and citizens to discuss the ways in which our national legislature makes national policy and ways of improving the system.

Now, ladies and gentlemen, from what I have told you, I hope you can see that I have inherited from my Greek father at least two dimensions of the extraordinary contributions of Hellenic civilization to today's complex world: first, respect for learning, for education; and second, respect for politics, for democracy.

So even as I pay tribute to two distinguished persons you are also honoring here today, Andrew Athens, a valued friend of many years and an outstanding leader of the Greek-American community; and Mikis Theodorakis, musician, scholar, public servant, I reiterate how deeply touched I am to receive an honorary degree from The American College of Greece.

#### RECOGNITION OF THE ANNIVERSARY OF THE CLEAN TRUCK PROGRAM

**HON. LAURA RICHARDSON**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, October 7, 2009*

Ms. RICHARDSON. Madam Speaker, I rise today to applaud the economic and environmental benefits the landmark Clean Truck Program has brought to southern California during its first year.

California is home to one of our nation's largest and most vibrant economic hubs: the ports of Long Beach and Los Angeles. Unfortunately, the ports are also home to emissions generated by the short-haul transport of goods. The neighborhoods surrounding the ports of Long Beach and Los Angeles are disproportionately impacted by the air pollution caused by trucks and suffer from associated health problems including emphysema, asthma, and cancer.

Successfully addressing localized air pollution and climate change will require a national strategy and a federal framework to coordinate implementation of air quality goals. Cities, local communities and local government can and should play a role in our national strategy.

As seen by the Clean Truck Program's success, local governments are already making important contributions to federal efforts to improve air quality. On October 1, 2008 the ports of Long Beach and Los Angeles implemented a ban on trucks with model years prior to 1989. Today, port officials estimate that approximately 1,500–2,000 "dirty" diesel trucks have been removed from drayage operations. The new trucks that replaced them generate 90 percent fewer emissions than the old dirty diesels.

Beyond cleaning the air the Clean Truck Program has successfully stimulated local economic activity. The program's financial incentives have stimulated \$500 million in private investment. Nationwide, new truck sales are down 60 percent. In contrast, truck dealers near the ports of Long Beach and Los Angeles have reported a 33 percent year over year

increase in sales due to the financing made available by the Clean Truck Program. These new truck sales include the sale of several liquefied natural gas trucks, which draw upon one of America's greatest energy assets.

Almost 800 trucking companies have embraced the program's financial incentives, resulting in the deployment of more than 5,000 2007 EPA compliant trucks. At the program's current pace, the ports estimate that by January 2010, more than 90 percent of the cargo transit at port terminals will be made by trucks meeting USEPA 2007 heavy duty truck emissions standards. This achievement will allow the ports to meet their 2012 goal of 80 percent emissions reductions from overall drayage operations two years ahead of schedule.

The ports of Long Beach and Los Angeles Clean Truck Program has been a tremendous success and has brought economic and environmental benefits to the Area. I congratulate the ports on the first year of an innovative solution, and I optimistically look forward to the results of the program next year.

#### RECOGNIZING THE IMPORTANCE OF CLINICAL TRIALS THAT FOCUSED ON WOMEN AND PEOPLE OF COLOR IN THE UNITED STATES

**HON. MICHAEL M. HONDA**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, October 7, 2009*

Mr. HONDA. Madam Speaker, people of color, both women and men, have historically been underrepresented in the medical profession, biomedical and biotechnology research, and clinical trials in the United States. As we move toward an era of personalized medicine, we realize that small differences between people become critically important in devising more effective, tailored treatments to improve and extend quality of life while helping doctors and patients better prevent and treat disease. Language and cultural barriers, stigma about participating in studies, and a historical lack of diverse community involvement in clinical trials by industry must be overcome so that all of our communities can be assured that they equally participate in the future of medicine.

To address this problem, we need more studies that reflect the changing face of the HIV/AIDS and other epidemics, both on effective messaging and education campaigns for the diverse group of affected individuals and on possible vaccines. One notable example of this kind of effort is the Gender Race and Clinical Experience (GRACE) study conducted by Tibotec Therapeutics, part of the Johnson & Johnson family of companies. The GRACE study, findings from which were recently presented at the International AIDS Society conference in South Africa, is the largest study to date to examine gender and race differences in response to an HIV therapy. In addition, the trial was designed to help overcome some of the barriers, identified by the advisors, which have historically deterred women and people of color from participating in clinical studies, including stigma, lack of child care, transportation and personal support systems. Based

upon advisor and community input, study participants could obtain assistance to cover costs associated with their participation in the study, including funds for travel and childcare, as well as food vouchers. Through innovative strategies like these, the GRACE study was able to enroll seventy percent women, sixty percent African Americans and twenty-two percent Latinos. I believe that the GRACE study is significant for reasons beyond just its clinical results. Studies like this, which are designed to overcome the barriers to participation and engage affected communities and providers show that with greater industry effort, meaningful numbers of women and racial and ethnic minorities can be enrolled in important clinical trials.

For example, studies in the United States and across the world are seeking an answer to the devastating HIV/AIDS epidemic. The epidemic is changing its face, spreading into new populations and presenting new challenges to education and outreach efforts. In the United States, women are increasingly affected by HIV/AIDS, accounting for more than one quarter of all new HIV/AIDS diagnoses, with African American and Latina women representing seventy-nine percent of women living with the disease. HIV/AIDS disproportionately impacts our African American and Latino communities, and the infection rate is rising among Asian American and Pacific Islanders as well. In my home state of California, there are almost 150,000 people living with AIDS, and Latinos represent about one-quarter of these cases. There are over 60,000 people living with HIV/AIDS in the greater Los Angeles area alone. In terms of new HIV infections, Latina women are infected at a rate almost four times as high as white women. African Americans in my district are also highly impacted by HIV/AIDS.

I commend Tibotec Therapeutics, Johnson & Johnson, and all researchers and companies actively engaged in diversifying their clinical trials and creating new relationships with affected communities. As Congress moves forward with health reform, with outcome and effectiveness-based reimbursement models, we must strongly encourage the expansion of efforts industry and academia are making to reflect the diversity of our nation in their workforce and clinical trials.

#### PERSONAL EXPLANATION

**HON. RON KLEIN**

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, October 7, 2009*

Mr. KLEIN of Florida. Madam Speaker, I would have voted on September 15, 2009 when I was unavoidably detained as follows:

Had I voted, I would have voted "yes" on rollcall No. 702.

GOVERNORS OF NEBRASKA,  
NORTH DAKOTA, NEVADA, AND  
RHODE ISLAND EXPRESS CON-  
CERNS WITH UNFUNDED MAN-  
DATES IN HEALTH REFORM

**HON. MIKE ROGERS**

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 7, 2009

Mr. ROGERS of Michigan. Madam Speaker, I rise today to express concerns regarding health reform proposals which would create unfunded state mandates. Legislation currently before the House would dramatically expand the Medicaid program and place over \$35 billion in new liabilities on state budgets over the next ten years. In addition, these proposals would expand the federal government's role in administering Medicaid, which would severely handcuff states' ability to run their own programs and preempt state authority to manage Medicaid eligibility and benefits.

Over the last several weeks, governors have expressed concerns over these proposals. I would like to submit for the RECORD the following letters from the governors of Nebraska, North Dakota, Nevada and Rhode Island:

SEPTEMBER 16, 2009.

Hon. BENJAMIN NELSON,  
U.S. Senator, Hart Building, Washington, DC.

Hon. MIKE JOHANNES,  
U.S. Senator, Russell Senate Office Building,  
Washington, DC.

DEAR SENATOR NELSON AND SENATOR JOHANNES: I am writing to alert you that the analysis provided by the staff to the members of the NGA Health Care Reform Task Force indicates that the Chairman's Mark released by Senator Baucus this morning contains a new unfunded Medicaid mandate. Earlier this year I wrote both of you expressing my concern that this might occur as part of health care reform.

I greatly appreciate the fact that both of you have repeatedly expressed concerns about the negative impact that health care reform could have on the Federal deficit and the State budget. As former Governors you understand the impact that Medicaid has on state spending. This new unfunded federal Medicaid mandate could result in higher taxes on Nebraskans or in cutting state aid to Nebraska's school districts as well as state appropriations to our universities, state colleges and community colleges. This proposal is not in Nebraska's best interests.

As we develop more specific information, I will be providing you with our best estimates of the magnitude of the impact on Nebraska. Thank you for your attention to this matter.

Sincerely,

DAVE HEINEMAN,  
Governor, Nebraska.

SEPTEMBER 30, 2009.

KATHLEEN SEBELIUS,  
Secretary of Health and Human Services, Hu-  
bert H. Humphrey Building, Washington  
DC.

DEAR SECRETARY SEBELIUS: As Congress and the Administration work through the various versions of health care reform currently moving through the legislative process, we ask that you carefully consider the following issues.

First, having served as chief executive of a state yourself, I am sure you are mindful of

the growing concern among the nation's governors about the risk to states of including unfunded mandates in national healthcare legislation. States are constitutionally mandated to balance their budgets, which means that any shortfalls caused by unfunded federal mandates could force increases in taxes, a reduction in services or both. This potential is especially troubling at a time when states are financially struggling.

We cannot be certain what form evolving legislation will take, and what the impact of that final legislation will be on state budgets. For that reason, we, along with the National Governors Association, urge extreme caution in moving forward with any plan that would commit the states, without their express participation and consent, to obligations that may financially bind them for decades into the future.

Second, it is important that any healthcare reform plan passed by Congress and signed by the President reward the states for good Medicare and Medicaid outcomes. North Dakota health care providers, for example, consistently provide low-cost, high-quality healthcare, yet have the lowest reimbursement rates in the nation. Any reform of the system must have incentives for good performance and cost-effectiveness.

Notwithstanding these issues, like Americans everywhere, we too are concerned about rising healthcare costs and the need to provide access to affordable, high-quality healthcare for our citizens. Congress and the Administration should be looking at a range of reforms that can deliver meaningful and almost immediate benefits for our healthcare system. These include measures, among others, like tort reform for medical liability; tax credits to help make insurance more affordable; providing transparency in billing; ensuring healthcare insurance portability; and limiting denials for preexisting conditions.

Clearly, healthcare reform is needed. On that matter there is no disagreement, but it needs to be done right. To that end, I do hope that you will keep in mind OUR concerns and recommendations as you consider proposals to improve America's healthcare system.

Sincerely,

JOHN HOEVEN,  
Governor, North Dakota.

SEPTEMBER 11, 2009.

Hon. HARRY REID,  
Senate Majority Leader, U.S. Senate, Wash-  
ington, DC.

DEAR SENATOR REID: It has been clear from the early days of the 111th Congress that health insurance reform will be a top priority for lawmakers this year. Comprehensive reform should lower health care costs while increasing insured populations, quality of care, and point-of service accessibility for all Nevadans.

One common thread appears throughout recent legislative proposals: the expansion of Medicaid as a central "reform" component. Simply put, the expansion of existing healthcare programs is not authentic reform and further, places the cost burden to the states at a time when states can ill afford it.

It is essential that Congress take the time to examine all possible options for health insurance reform in order to find sustainable long-term solutions. Lowering healthcare costs and reforming the healthcare system is possible without unfunded mandates or Medicaid expansions forced on the states. While certain changes to the current Medicaid program could advance the overall function of

health insurance reform, expansion of the program without a permanent funding mechanism is not something that any state can support, nor is it a viable solution.

As you know, unlike the United States Constitution, most state constitutions require a balanced budget, including Nevada. In Nevada, we will spend nearly \$907,000,000 for Medicaid programs in Fiscal Years 2010 and 2011. This accounts for 13.8 percent of our General Fund budget. Any further expansion of this program would be another great example of Washington playing budget games by passing on costs to the state—this is unrealistic in the current economy and as a long term resolution.

Additional expansions of the Medicaid program will force Nevada into deep cuts in other programs and services which are not federally mandated in order to balance our General Fund. In the current fiscal year gaming revenues are down 12.5 percent, and sales tax revenues are down 20 percent. By overriding my veto, the 2009 Nevada Legislature passed substantial tax increases to burden our already beleaguered citizens.

Many current proposals also include significant cuts to the Medicare program. Nevada's growing senior population is frightened by the proposed \$162,200,000 reductions which will impact an estimated 11,000,000 seniors. Harmful and arbitrary cuts to Medicare Advantage may result in plans dropping out of the program, limiting beneficiary choice, and causing millions of seniors to lose their current coverage. These proposals must be stopped.

Nevadans cannot afford more taxes. Now is not the time to place unfunded Medicaid or other mandates on the states. By expanding Medicaid programs, the United States Congress will be forcing the State of Nevada into deep budget cuts in other state programs. I do not believe that any child's education should be placed on the chopping block to fund these new programs, but we will face that dilemma if these proposals of the Democratic Congress are enacted.

Health insurance reform should be addressed in a cooperative manner by both the federal and state governments. If states are treated as partners—not pawns—we can work to enact important reforms in concert with federal efforts. State-enacted caps on medical malpractice lawsuits, for example, would have a transformative impact on the health care and health insurance industry in each state, cutting costs for consumers without negatively affecting the stability of our current health care industry.

I am ready to work with my fellow Governors and the U.S. Congress in order to support sensible, accountable, and workable health insurance reform that helps, not hurts, Nevadans.

Sincerely,

JIM GIBBONS,  
Governor, Nevada.

SEPTEMBER 25, 2009.

Hon. JACK REED,  
Senator, U.S. Senate, Hart Building, Wash-  
ington, DC.

DEAR SENATOR REED: I appreciate your work and that of your colleagues in the Congress to craft legislation to reform the health care system in America. As you know, Rhode Island took on reform last year, albeit on a smaller scale, as we developed and pursued approval of our groundbreaking Global Consumer Choice Waiver.

One of the primary reasons the State pursued the Global Waiver is that federal Medicaid rules often limit the ability of the

states to adapt to fiscal realities and the complex and changing needs of beneficiaries. It is difficult to deliver vital services to the beneficiaries and be fair to all taxpayers when the federal government denies us the flexibility to effectively structure and manage a program representing such a significant financial investment.

I am extremely concerned that several of the health reform initiatives recently introduced in Congress will prevent Rhode Island from fulfilling the Global Waiver's promise. Such initiatives will further strain the state's budget at a time of great fiscal uncertainty and impose even more debt on our children, grandchildren and great grandchildren.

Therefore, I ask for your support and that of all members of the Rhode Island Congressional Delegation, to preserve the innovative health care initiatives now under way in Rhode Island and in many other states. I ask that you reject any reform proposals that impose additional financial burdens on the states and the people and communities we serve or that otherwise limit our capacity to meet our constituents' needs.

As originally proposed, the Senate Finance bill required a significant portion of the costs for covering the uninsured through Medicaid to be paid by lower and middle income taxpayers and the states. I am aware that changes in the proposed legislation provide, at least temporarily, additional funding for the required Medicaid expansions to "high need" states like Rhode Island. However, full federal funding will only be available for a limited period and would cease at the very time population projections estimate we will begin to see a surge in Medicaid eligibility for elders. It is unclear how the state or federal government will be able to sustain these Medicaid expansions in light of these projections and at a time of decreasing revenues and sky-rocketing deficits. The House legislation imposes burdens on state budgets and working Americans that are unacceptable.

Likewise, there still remain Medicaid eligibility and coverage mandates that will limit the flexibility of the states to operate financially sound, sustainable programs. Moreover, ongoing health reform efforts, such as those now under way in Rhode Island, may be hampered as limited administrative resources are diverted to finance the mandated expansions. Federal oversight of the Medicaid program should be streamlined, and allow for far greater innovation at the state level.

As a Governor, I am particularly concerned about the prospect of additional "short-term funded" federal Medicaid mandates. The Medicaid program itself is expensive, provider-centered, inefficient, slow to innovate and, as such, ultimately unsustainable. For these reasons, the Medicaid program is hardly the best and by no means the most appropriate platform for expanding health coverage to tens-of-thousands of additional Rhode Islanders and millions of other Americans.

I hope you will ensure that any legislation enacted by Congress does not include additional mandates on states, or at the very least compensates states fully for those it does impose, including the administrative costs associated with expansion. Additionally, providing states with the flexibility they need to implement the relevant provisions of reform should be a top priority today and in the future.

There are better ways to reform America's health care system, and I hope that Presi-

dent Obama and Congress will work with Governors, providers, consumers and others to bring about sensible reforms that increase quality, contain costs and ensure portability of health care.

Sincerely,

DONALD L. CARCIERI,  
Governor, Rhode Island.

#### EARMARK DECLARATION

**HON. FRANK A. LoBIONDO**

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 7, 2009

Mr. LoBIONDO. Madam Speaker, as per the requirements of the Republican Conference Rules on earmarks, I secured the following earmarks in the Conference Report to accompany H.R. 2997:

Requesting Member: Congressman FRANK LoBIONDO (NJ-02)

Bill Number: H.R. 2997 (Conference Report)

Account: National Institute of Food and Agriculture—SRG

Legal Name of Requesting Entity: Rutgers University Marucci Center for Blueberry and Cranberry Research and Extension

Address of Requesting Entity: 125A Oswego Road, Chatsworth, NJ 08019

Description of Request: Provide an earmark of \$550,000 for the Cranberry/Blueberry Disease Project for research on breeding and pest management to provide continued support for the \$50 million a year industry. Past research has found bacterial anti-adherence mechanisms helping to fight urinary tract infection and dental caries, and other antioxidant properties. A major effort within the breeding program aims to enhance these health beneficial properties.

Requesting Member: Congressman FRANK LoBIONDO (NJ-02)

Bill Number: H.R. 2997 (Conference Report)

Account: Animal and Plant Health Inspection Service—Salaries and Expenses

Legal Name of Requesting Entity: State of New Jersey, Department of Agriculture

Address of Requesting Entity: 369 S. Warren Street, P.O. Box 330, Trenton, NJ 08625

Description of Request: Provide an earmark of \$500,000 for the New Jersey Gypsy Moth Pest Management Program to support and enhance gypsy moth control on affected communities and public lands. Funds will be used to cost share aerial treatments borne by local municipalities; for outreach in developing a web-based interactive online map showing the distribution of the gypsy moth in New Jersey and proposed treatment areas; and for technical support for salaries for field scouts and vehicle operation.

#### PERSONAL EXPLANATION

**HON. J. GRESHAM BARRETT**

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 7, 2009

Mr. BARRETT of South Carolina. Madam Speaker, unfortunately, I missed recorded votes on the House floor on Tuesday, October 6, 2009.

Had I been present, I would have voted "aye" on rollcall vote No. 753 (on motion to authorize conferees to close conference on H.R. 2647), "aye" on rollcall vote No. 754 (on motion to instruct conferees to H.R. 2647), "aye" on rollcall vote No. 755 (on motion to suspend the rules and agree to H. Res. 707).

#### GOVERNORS OF SOUTH CAROLINA AND TEXAS EXPRESS CONCERNS WITH UNFUNDED MANDATES IN HEALTH REFORM

**HON. MIKE ROGERS**

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 7, 2009

Mr. ROGERS of Michigan. Madam Speaker, I rise today to express concerns regarding health reform proposals which would create unfunded state mandates. Legislation currently before the House would dramatically expand the Medicaid program and place over \$35 billion in new liabilities on State budgets over the next 10 years. In addition, these proposals would expand the Federal Government's role in administering Medicaid, which would severely handcuff States' ability to run their own programs and preempt state authority to manage Medicaid eligibility and benefits.

Over the last several weeks, governors have expressed concerns over these proposals. I would like to submit for the RECORD the following letters from the governors of South Carolina and Texas:

SEPTEMBER 11, 2009.

Hon. LINDSEY O. GRAHAM,  
U.S. Senate, Russell Senate Office Building,  
Washington, DC.

DEAR LINDSEY: Thank you for the work you do on behalf of this country and our state.

With this work in mind I write to respectfully layout some concerns our administration has with regard to proposed health care changes in Washington. I am not writing to second guess your work, or that of Congress, but just to give you the vantage point from the seat I hold—and the consequent implications for taxpayers of this state given the proposed changes' impact in Medicaid administered by our state.

Like many governors across the nation, our administration is growing increasingly concerned about the financial strain rising health care costs are putting on South Carolina's annual budget. During the National Governors Association meeting in July, many governors joined together in a bipartisan effort to formally oppose the current Congressional health care proposals by issuing a policy opposing unfunded mandates. If these so-called reform proposals move forward, almost all states will have to raise taxes to manage this health care expansion. In South Carolina, Medicaid already receives up to \$880 million annually—16 percent of our budget.

The current House and Senate proposals would expand Medicaid and pass health care costs down to the states. Senate Finance Committee Chairman Max Baucus said that it would be impossible for the federal government to pick up all of the costs for new Medicaid recipients and that states would have to bear additional costs. To help put this matter into perspective, when the enhanced federal medical assistance percentage expires at the end of 2010, South Carolina will

be spending \$1.2 billion, or more than 20 percent of our state budget, on Medicaid annually. That total represents just one-third of the total Medicaid dollars spent in our state—not counting the costs associated with the proposed changes to our health care system.

The Congressional Budget Office (CBO) estimates H.R. 3200 will cost in excess of \$1 trillion over the next ten years. However, the fine print reveals that the true cost would be much higher. The legislation relies on a large tax increase, which is implemented four years before most of the program's spending is ramped up. This delay in implementation is nothing more than a budget trick masking the true cost of the proposal. Even under the CBO projection, H.R. 3200 would add more than \$200 billion to the budget deficit in the next 10 years.

This projection is predicated on \$219 billion in spending changes that may be an illusion. A strong indicator that suggests that these savings will not materialize is found in a further analysis of the CBO study by Ways and Means Committee staff, which shows that the total price tag will reach \$2 trillion by 2024, including roughly \$600 billion in deficit spending. These are the significant costs you are contending with at the federal level in times of \$2 trillion deficits.

According to the National Association of State Budget Officers (NASBO), Medicaid expenses nationally will reach \$523 billion by 2013—a 56 percent increase in just six years. The proposed changes to the program would increase Medicaid spending by \$450 million in South Carolina—more than half of what we already spend on Medicaid. With that significant an increase, South Carolina would be forced to either raise taxes or cut critical services in education and public safety, the two other large spending items in our budget.

Any state tax increase would be in addition to the proposed federal tax increases included in the House and Senate bills, like huge tax increases in the form of an additional 8 percent payroll tax or a 5.4 percent income tax surcharge on small businesses. Even in prosperous times, we would not support the incredible burden of this unfunded mandate, but in the current global economy, that impact would be disastrous for our state.

The proposal being discussed in the United States Senate has similar problems for South Carolina as, by 2015, this proposal would add more than 400,000 South Carolinians to the Medicaid program. The federal government would cover increased funding only until 2015. After 2015, South Carolina must start picking up the tab. By 2020, South Carolina would be forced to come up with an additional nearly \$900 million annually for the increased number of Medicaid enrollees. Federal programs will grow at South Carolina's expense, and will increase Medicaid costs in our state by 50 percent.

Lastly, if we are trying to make health care more affordable, why exclude tort reform and national insurance markets from the plan? Litigation, and its negative impact on the practice of medicine, significantly increases the cost of health care in this state. South Carolina passed comprehensive tort reform legislation in 2004, partially to stop lawsuit abuse in medical liability cases. Subsequently, medical liability insurance costs are down 42 percent, and doctors have received an average rebate of 20 percent of their annual paid premium. The number of lawsuits against South Carolina doctors fell almost 90 percent one year after tort reform

went into effect. Doctors have stopped leaving the state and no longer limit their practices to avoid lawsuit abuse.

Likewise, eliminating the interstate purchasing restrictions for insurance would create a bigger market for insurance, thereby giving consumers more options and driving down the price. A national market for health or life insurance means that South Carolinians can purchase whichever policy best fits their needs—whether the policy is from South Carolina, New York or California.

With all the issues surrounding a government-run health care system, I wanted to bring to your attention the increased taxes that South Carolinians might shoulder on top of the federal tax increases in the proposed bills.

Everybody agrees that there should be reforms to our health care system, but it should be done thoughtfully. I look forward to working with you on this and other issues.

Sincerely,

MARK SANFORD,  
Governor, South Carolina.

JUNE 5, 2009.

Hon. JOE L. BARTON,  
House of Representatives, Rayburn House Office Building, Washington, DC.

DEAR REPRESENTATIVE BARTON: As Congress continues to grapple with the daunting challenge of enacting significant health care reform measures before the August recess, I urge you to contemplate the effects of certain policy considerations on our great state.

Government-run health care is not the solution to fix a broken health care system, and is financially unsustainable. At today's costs, extending Medicaid benefits to uninsured citizens at or below 100 percent of the federal poverty level would cost Texas an additional \$4.6 billion in general revenue per year (equal to a 2.3 cent, or 27 percent, sales tax increase), on top of the \$19 billion in general revenue the state expects to spend on Medicaid in the 2010–11 biennium. This type of federal government spending mandate would erode the state's economic viability without containing health care costs or improving health care quality and access.

Health and human services general revenue spending in Texas for the 2010–11 biennium is projected to grow almost 13 percent, to \$25.3 billion. The Texas Health and Human Services Commission already projects a Medicaid-related shortfall of more than \$1 billion in general revenue in the coming biennium, and combined Medicaid and Children's Health Insurance Program caseloads will exceed 3 million people. The number of uninsured Texans also continues to grow, and the state continues efforts to address a critical primary care physician shortage in many areas of the state.

In 2007, I set forth a comprehensive plan to transform health care in Texas. This reform waiver has been languishing before the Centers for Medicare and Medicaid Services for more than a year. My plan would provide more people with insurance, reduce expensive emergency room visits for basic care, and make it easier for the working poor to buy into employer-sponsored insurance. I am pleased to note that many of the policy proposals in this waiver are surfacing in Congressional discussions on health care reform, including programs that emphasize quality preventive care and reforms that promote a robust, competitive private insurance market centered on consumer choice and affordability.

The Texas waiver proposal reflected strong bipartisan acknowledgement of the need for

reform. Improving quality of care, controlling escalating health care costs and addressing access-to-care issues requires collaboration among federal, state and local governments. A one-size-fits-all federal government mandate will not achieve significant reform. Rather, allowing states and local governments the flexibility to restructure the way health care is financed and delivered is critical to significant reform.

Texas just concluded its 81st Legislative Session, which was marked by the passage of a biennial state budget with less than 1 percent growth in general revenue spending, leaving intact the state's Rainy Day Fund, which will provide an expected balance of \$9.1 billion to address future state needs. However, despite the many legislative accomplishments that will continue to position Texas as an economic leader in this country, the state faces significant financial burdens ahead due to rapidly increasing Medicaid caseload and health care cost growth.

I urge you to ensure that the momentum surrounding the current health care reform debate is informed by the effect on Texas in a way that protects state flexibility and innovation while guarding against growing federally mandated programs that will be financially unsustainable, not only for Texas, but for most other states and the federal government, as well. No government has ever taxed, or borrowed, its way to prosperity, no matter how laudable the spending goal may have been. I hope you will resist the temptation to finance an item as basic as health care with deficit financing that cannot be maintained.

Sincerely,

RICK PERRY,  
Governor, Texas.

SEPTEMBER 23, 2009.

Hon. MAX BAUCUS,  
Chairman, Committee on Finance,  
U.S. Senate, Hart Senate Office Building, Washington, DC.

DEAR CHAIRMAN BAUCUS: Last week, Senate Majority Leader Harry Reid said he was concerned that the health care legislation you have proposed will expand the Nevada Medicaid population beyond what his state can afford. Speaking as governor of a state with a significantly larger caseload than Nevada—a caseload that could double under your proposed Senate Finance plan—let me respectfully say I am troubled by the financial impact on Texas taxpayers and our budget.

The Texas Health and Human Services Commission estimates that the various federal health care proposals circulating around Congress could add as much as \$60 billion to the state budget over the next 10 years, creating twice the number of Texas Medicaid recipients.

Additionally, these bills place a new tax burden on certain businesses and provide for the federal takeover of some current state insurance functions. These one-size-fits-all government mandates are both unsustainable and unable to fix our broken health care system.

Instead of government mandates and more deficit spending, successful health care reforms can only be achieved by providing states with the flexibility to develop state-specific solutions.

For example, in 2003, I signed into law medical liability reform that has improved access to medical care in Texas, particularly in underserved areas. Prior to these reforms, Texas doctors were being sued at twice the national average, and many were giving up practicing in Texas altogether. Today, doctors are coming to Texas as fast as they can,

with record numbers applying to practice medicine in the Lone Star State. Tort reform is the sort of state-specific, market-driven reform measure that will help provide effective, affordable solutions to our health care woes.

In addition, as you may know, last month, I wrote to Secretary Kathleen Sebelius to again urge approval of the Texas Medicaid reform waiver, which was originally submitted in April 2008. This waiver—which would promote preventive care, improve quality and access to care, and enable more low-income working Texans to purchase private health insurance—continues to languish at the Centers for Medicare and Medicaid Services.

I urge you to support our right, as a state, to further explore these approaches, rather than forcing us to implement federal mandates that promise financial hardships for the states and little in the way of benefits for our economy and all of our constituents.

Sincerely,

RICK PERRY,  
Governor, Texas.

#### HONORING THE STUDENTS AND STAFF OF DEVINE HIGH SCHOOL

**HON. CIRO D. RODRIGUEZ**

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, October 7, 2009*

Mr. RODRIGUEZ. Madam Speaker, I commend the students and staff for their hard work and dedication in the pursuit of academic excellence. Through their efforts, they have garnered the prestigious honor of being named a National Blue Ribbon School by Secretary of Education Arne Duncan, the highest distinction a school in the United States can achieve.

The Blue Ribbon Schools Program was established in 1982 by Secretary of Education Terrell Bell. The program honors public and private elementary, middle, and high schools that demonstrate academic superiority or dramatic gains in student achievement. Only 3.9 percent of all schools in the United States have received this award.

As their Member of Congress, I am proud of their ambition and inspired by their success. I have always believed that our future prosperity is predicated on our present commitment to education. They are lighting the way as a beacon for those not only in our district, but also in our nation. I applaud them for their efforts and encourage them to keep up the excellent work.

IN HONOR OF THE SANTA CRUZ  
COUNTY PARTICIPANTS OF  
"PEDAL FOR PEACE" OCTOBER 7,  
2009

**HON. SAM FARR**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, October 7, 2009*

Mr. FARR. Madam Speaker, I want to commend the Santa Cruz County Participants of "Follow the Women—Pedal for Peace". This year's participants are Jane DeJarnette, Janet

Fogel, Lilly Ann Popken, JoAnn Smith, Marilyn Marzell, and Elizabeth Schwartz. The objective of the ride is to raise awareness of violence in the Middle East and its affects on women and children, who suffer the most as a result of the conflict. The women from Santa Cruz County will be joining women from 40 other countries.

Created in 2004, the "Follow The Women" annual bicycle ride is the brainchild of 2001 European Woman of the Year and Nobel Peace Prize Nominee Detta Regan. In April 2004, she gathered together 270 women from all over the world, including the United States, Palestine, Britain and Iraq, to bike across Lebanon, Syria and Jordan to campaign for peace and an end to violence in the region. Traditionally throughout the Middle East, women do not ride bicycles making the "Follow the Women—Pedal for Peace" ride extraordinary. It brings much attention to the worthy cause of promoting good relations between different cultures and ethnicities.

"Follow the Women" has held several different events in addition to the annual bike ride. In 2007, they distributed medical kits in Gaza throughout the conflict. That year, they also held a youth exchange to explore and share the experiences between different cultures. The participants gained a better understanding of themselves and others.

"Follow the Women" has also helped fund a counseling project in Ramallah. The aim of this project was to offer support to children and their families who were suffering following the conflict in the Middle East. This year, "Follow the Women—Pedal for Peace" hopes to raise enough funds to build a playground or possibly two for the children of Gaza.

Madam Speaker, I congratulate Follow the Women and especially wish to recognize the riders from Santa Cruz. I wish them much luck in their annual bike ride.

#### REMEMBERING JACK ALLEN STONE

**HON. DALE E. KILDEE**

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, October 7, 2009*

Mr. KILDEE. Madam Speaker, I rise today to pay tribute to Jack Allen Stone. Sadly, Jack passed away on July 28, 2009 in Bay City, Michigan. I have known Jack since the early 1960s and will deeply miss him.

Jack Stone moved to Michigan from Missouri in 1930. He was the Class President at Beecher High School when he graduated in 1944 and this began his dual interests in education and politics. He joined the U.S. Army and served as a Corporal E4 during the Korean War. Returning to Flint, Jack worked for Chevrolet and became a committeeman for the UAW. During this time he married, had three daughters and attended the University of Michigan-Flint. He graduated with a B.A. degree in 1961 and began teaching that same year.

Teaching U.S. Government and Michigan History at Grand Blanc High School for 27 years, Jack was a moving force in starting the Grand Blanc chapter of the National Honor Society. During this time he also was active

with negotiating teacher contracts. He negotiated the first teacher contract with Grand Blanc Schools and played a major role in negotiating contracts for many years. He was an advisor for MEA PAC and sat on the interview board for school board candidates. Active in the Genesee County Democratic Party, Jack worked on my first campaign and successive campaigns. He also helped elect Senator Don Reigle and State of Michigan Speaker of the House Bobby Crim.

After retiring in 1988, Jack moved to Gladwin, Michigan and built his dream home on Sugar Springs Lake. He is survived by his wife Joan, and his daughters: Janine Wallace, Rebecca Tereau and Leslie Stone.

Madam Speaker, I ask the House of Representatives to join me in honoring the memory of a dear friend, Jack Allen Stone. Over the years I have respected his wisdom, enjoyed his friendship, heeded his advice and I am saddened by his passing.

#### RESOLUTION TO HONOR OUR SCHOOL PRINCIPALS

**HON. SUSAN A. DAVIS**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, October 7, 2009*

Mrs. DAVIS of California. Madam Speaker, I rise today to introduce a resolution supporting October 2009 as National Principals Month. This designation will honor and recognize the critical role that school principals play in the lives of our students.

One of the principle reasons behind a school's success is often a strong principal.

Elementary, middle and high school principals consistently provide the vision, dedication, and mobilizing force behind successful schools.

Principals set the academic tone for their schools and work collaboratively with teachers to develop performance goals and objectives, all in an effort to improve student achievement.

Today's principals are expected to fill a variety of roles, each complex in its own right.

On any given day, they are likely to be everything from educational visionary, to community builder, to budget analyst, to facility manager, to counselor.

This means that principals often work long hours. In fact, the Bureau of Labor Statistics estimates that one in three principals works more than 40 hours per week and often works additional time supervising school activities at night and on weekends.

During my time on the San Diego School Board, I worked with many of these remarkable individuals. I witnessed how their commitment and energy can inspire an entire school—from the youngest student to the most senior teacher.

In the end, it is principals who are responsible for creating and managing the environment where our students learn and grow.

This month, let's honor this important role, which they dedicate themselves to year-round.

I am pleased to introduce this bipartisan resolution with my colleague from the Education and Labor Committee, Congressman TODD PLATTS.

# INTRODUCTION OF THE "WATER TRANSFER FACILITATION ACT OF 2009"

**HON. DENNIS A. CARDOZA**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 7, 2009

Mr. CARDOZA. Madam Speaker, today with Congressman COSTA, I introduced the "Water Transfer Facilitation Act of 2009." the measure should reduce unnecessary delays in water transfers at a time when Central Valley farmers have been hard hit by a three-year drought. It would allow new water transfers of roughly 250,000 to 300,000 acre-feet of water per year. The bill would grant authority to the Bureau of Reclamation to approve voluntary water transfers between sellers and buyers in the San Joaquin Valley. The measure also would streamline environmental reviews for Central Valley water transfers by ensuring that they occur on a programmatic basis, instead of the current project-by-project basis.

Transferring water between and within counties for water districts is a critical tool during periods of drought. While the best solution would be to fully operate the federal and state pumps, this change in the law provides us some relief. This legislation makes permanent the ability to transfer water to our Valley's farms when it is most needed, therefore, allowing our farmers a lifeline to continue to grow crops and help our local economy. More will need to be done to protect the Valley's water, and I will continue that fight.

The bill is supported by a great number of water users across the Central Valley, including the following: Friant Water Users Authority, San Joaquin River Exchange Contractors Authority, Delta-Mendota Canal Authority, Westlands Water District, Metropolitan Water District, Glen Colusa Irrigation District, Northern California Water Association, Banta-Carbona Irrigation District, Tehama-Colusa Canal Authority, Association of California Water Agencies, Placer County Water Agency, Conaway Preservation Group, and the Reclamation District 2035.

I have submitted several of these support letters here for the RECORD, and I understand that Mr. COSTA will submit additional letters as well.

ASSOCIATION OF CALIFORNIA

WATER AGENCIES,

October 6, 2009.

Re ACWA support for Water Transfer Legislation.

Representative CARDOZA,  
Longworth House Office Building,  
Washington, DC.

Representative COSTA,  
Longworth House Office Building,  
Washington, DC.

DEAR REPRESENTATIVES CARDOZA AND COSTA: Thank you for introducing water transfer legislation for the Central Valley Project (CVP) which ACWA is pleased to support. As California's water supply challenges multiply, this legislation can provide greater flexibility for management of CVP water supplies. As you know, ACWA's 450 public agency members are collectively responsible for 90 percent of the water delivered in California for residential and agricultural uses.

California's water supply situation is dire and worsening. Three years of below average

precipitation along with heavy regulatory restrictions through the ESA and Biological Opinions, have seriously diminished California's water supplies. Under these conditions, it is essential that short term actions, such as provided by your legislation to flexibly enable water supplies to move across the San Joaquin Valley, be pursued.

Again, thank you for introducing water transfer legislation. ACWA looks forward to working with you to secure its passage in an expedited manner.

Sincerely,

TIMOTHY QUINN,  
Executive Director.

NORTHERN CALIFORNIA

WATER ASSOCIATION,

Sacramento, CA, October 2, 2009.

Re Support for Water Transfer Legislation.

Hon. JIM COSTA,  
House of Representatives,  
Washington, DC.

DEAR CONGRESSMAN COSTA: On behalf of the Northern California Water Association (NCWA), we thank you for introducing legislation authorizing and establishing a permanent long-term program to promote and manage water transfers in the Central Valley of California. We support your efforts and this legislation as a means of providing greater flexibility in the management of Central Valley Project (CVP) and other water supplies to help meet unmet needs critical to the future of the State of California.

As you are aware, the devastating impacts of diminished water deliveries to the CVP as a result of three years of below average precipitation have been made even greater by the various regulatory restrictions, including the requirements established by the recent federal biological opinions for endangered fish under the ESA. Your legislation will provide immediate, much needed relief in the form of a flexible and useful tool that will allow water to be transferred from willing parties to those in need within the CVP.

NCWA was formed in 1992 to present a unified voice working to resolve California's water issues and protect the water rights and supplies of the diverse Northern California region, now and into the future. NCWA represents 54 agricultural water districts and agencies, private water companies, and individual water rights holders with rights and entitlements to the surface waters and groundwater resources of the Sacramento Valley. Many of our members can and will actively participate in this water transfer program. The language in your legislation directing the Bureau of Reclamation to work with other federal agencies to implement the necessary long-term environmental processes addressing impacts of a water transfer program on the ESA-listed Giant Garter Snake will be imperative to its usefulness and success.

We look forward to working with you and your staff in the coming months in this important legislative effort, and appreciate your leadership in advancing this legislation and addressing California water issues so important to our collective future.

Sincerely,

DONN ZEA,  
President and CEO.

TEHAMA-COLUSA CANAL AUTHORITY,

Willows, CA, October 5, 2009.

Re Support for Water Transfer Legislation.

Hon. JIM COSTA,  
House of Representatives,  
Washington, DC.

DEAR CONGRESSMAN COSTA: On behalf of the Tehama Colusa Canal Authority (TCCA), we thank you for introducing legislation authorizing and establishing a programmatic program to promote and manage water transfers in California, including the Sacramento Valley. We support your efforts and this legislation as a means of providing greater regulatory certainty for the management of Central Valley Project (CVP) water supplies for water users.

As you are aware, the TCCA is intimately aware of the impacts of diminished water deliveries to the CVP as a result of below average precipitation and regulatory requirements placed upon the CVP and its water users through the requirements established by the recent National Marine Fisheries Service biological opinions for endangered salmon. Your legislation will provide much needed relief in the form of a flexible and useful tool that will allow water to be transferred from willing parties to those in need within the CVP.

Many of our members have participated in water transfer programs in the past and would continue under this legislation in a more flexible manner. Also, the language in your legislation directing the Bureau of Reclamation to work with other federal agencies to implement the necessary long-term environmental processes addressing impacts of a water transfer program on the ESA-listed Giant Garter Snake will be imperative to its usefulness and success.

We look forward to working with you and your staff in the coming months in this important legislative effort, and appreciate your leadership in advancing this legislation and addressing California water issues so important to our collective future.

Sincerely,

JEFFREY SUTTON,  
General Manager.

THE METROPOLITAN WATER DISTRICT OF SOUTHERN CALIFORNIA,

Los Angeles, CA, October 5, 2009.

Hon. DIANNE FEINSTEIN,  
U.S. Senate, Hart Senate Office Building,  
Washington, DC.

DEAR SENATOR FEINSTEIN: The Metropolitan Water District of Southern California is pleased to support the legislation you are introducing related to water transfers for the Central Valley Project (CVP). This legislation will help provide good water management while providing flexibility for CVP customers.

As a regional wholesale water provider, Metropolitan provides water for nearly 19 million people throughout our six-county service area in Southern California. As Metropolitan and the entire state continue to address water supply challenges throughout California, the vitality of our economy and environment has been seriously affected. Your proposed legislation will help address these critically important issues.

Please let me know if we can be helpful in any way.

Sincerely,

JEFFREY KIGHTLINGER,  
General Manager.

GOVERNOR OF UTAH EXPRESSES  
CONCERNS WITH UNFUNDED  
MANDATES IN HEALTH REFORM

**HON. MIKE ROGERS**

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, October 7, 2009*

Mr. ROGERS of Michigan. Madam Speaker, I rise today to express concerns regarding health reform proposals which would create unfunded state mandates. Legislation currently before the House would dramatically expand the Medicaid program and place over \$35 billion in new liabilities on state budgets over the next ten years. In addition, these proposals would expand the federal government's role in administering Medicaid, which would severely handcuff states' ability to run their own programs and preempt state authority to manage Medicaid eligibility and benefits.

Over the last several weeks, governors have expressed concerns over these proposals. I would like to submit for the RECORD the following letter from the governor of Utah:

SEPTEMBER 15, 2009.

DEAR SENATOR BENNETT, as Governor of the State of Utah, I am aware of the critical importance of health system reform in our country. However, I believe the best place for innovation and policy change is in the individual states, as we have a greater understanding of the specific needs of our citizens. This effort is already underway in Utah, with great success. I am worried, however, that the direction of the current language of federal health system reform bills will preclude state-directed reform and place a detrimental burden on states' budgets. Therefore, I am contacting you in order to forge a partnership to enact reform that will benefit not only the citizens of Utah, but will benefit everyone throughout our great country.

In Utah, we have a good system of public medical programs that provide for our neediest population. However, the weight of the current programs strains our state budget. So far, we have managed to fully fund the existing programs, although it becomes more challenging each year. The extension of Medicaid to additional populations, as discussed in proposed federal healthcare legislation, will amount to an unfunded mandate that would create financial havoc for our state.

While I understand the idea that everyone must "share in the pain," and appreciate the Administration's commitment to reforming healthcare without increasing the size of the federal deficit, to force Medicaid cost increases onto states will simply shift massive cost increases to the states. As I am sure you know, Utah, like most other states, is suffering from the negative impacts of a nationwide recession. As we prepare the state's fiscal year 2011 budget, we face continued cuts to agency budgets and reduced government services on top of painful reductions made last year. The unfunded mandate of a forced Medicaid expansion will only exacerbate an already dire situation. If required to increase our Medicaid program as envisioned in Washington, Utah, and most every other state, will be forced to find the money to do so through other means. This will require states to either raise taxes or continue to cut budgets in areas currently suffering from a lack of funding, such as public and higher education. We must work together to ensure that no new requirements for states to fund health care for additional populations pass.

This does not mean, however, that the State is ignoring or has forgotten about middle-income uninsured families in Utah. Quite the contrary, the aggressive health system reform being pursued in Utah is designed to address the healthcare needs of those families in a manner that does not shift additional burden to the State.

As mentioned above, Utah has made remarkable progress toward health system reform. One of the cornerstones of our State's efforts is the introduction of a defined contribution health benefit system and implementation of the Utah Health Exchange, which provides the technology to make that market work. This new market approach is proving to be very popular. In fact, in just nine days, following the official launch of the Utah Health Exchange, 136 of Utah's small businesses signed up to contribute to health care coverage for their employees, representing approximately 7,000 covered lives.

It is essential that federal legislation not derail this promising effort to provide insurance in a new way to Utah's small business employees, who are the backbone of our economy. When fully implemented, the Exchange will help individuals and employees access the information they need to make informed choices about their health and health care, as well as their health insurance. This tool has a standardized application process and allows people to apply for a broad range of coverage electronically, which further increases access to affordable coverage.

To me, the highlight of the Exchange is that it is almost entirely run by the private sector. The State brought together a technology company, a finance company, and many different insurers who have worked out the necessary details to provide a platform for this new marketplace. We were able to go from a signed bill to a functioning exchange in just five months. This is the very definition of forging unprecedented partnerships to find solutions that government alone cannot provide. The driving force behind any proposed exchange must continue to be private sector ingenuity, with government assisting in the appropriate ways.

I look forward to working with you in a similar manner to ensure that federal and state healthcare reforms are compatible and will result in success for the citizens of our great State. I believe that together we can develop workable alternatives to the traditional Washington D.C. "one-size-fits-all" solution. We must continue to recognize that states are the laboratories of innovation and that the best solution to our nation's challenges is to empower states to serve their unique populations in the best ways possible.

Please contact me if there is any way I can be of assistance with this very important issue.

Best Regards,

GARY R. HERBERT,  
Governor, Utah.

HONORING STAFF SERGEANT  
ZACHARY J. RHYNER, USO AIR-  
MAN OF THE YEAR

**HON. BOB ETHERIDGE**

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, October 7, 2009*

Mr. ETHERIDGE. Madam Speaker, I rise in honor of Staff Sergeant Zachary J. Rhyner's distinguished service in the United States Air

Force, and to congratulate him on being named USO Airman of the Year. Staff Sergeant Rhyner's extraordinary heroism in Shok Valley, Afghanistan on April 6, 2008 as part of Operation Enduring Freedom is a testament to his training, character, and personal strength.

While conducting an air assault infiltration as Special Tactics Combat Controller, Sergeant Rhyner and his team were caught in an ambush. Intense sniper, machine gun and rocket-propelled grenade fire rained down on the team from a well-trained insurgent force. Sergeant Rhyner was shot once in his left leg and struck twice in his chest. Although wounded, Sergeant Rhyner stayed calm and called in more than 50 air strikes and strafing gun runs. He placed himself between enemy forces and his men several times in order to return fire and to allow his teammates to retrieve the critically wounded and the deceased. He has been recognized for his heroism several times. In addition to being named USO Airman of the Year today, he received the Air Force Cross, the service's second highest medal for valor, on March 10, 2009. He also received a Purple Heart and the Jewish Institute for National Security Affairs Grateful Nation Award.

Staff Sergeant Rhyner is based at Pope Air Force Base, in North Carolina's Second District and lives in Harnett County, my home county. I am proud to have him as a fellow North Carolinian, and I urge my colleagues to join me in congratulating him on this honor and saluting his service.

HONORING SENATOR EDWARD  
KENNEDY

**HON. LYNN C. WOOLSEY**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, October 7, 2009*

Ms. WOOLSEY. Madam Speaker, I rise today to honor Senator Edward Kennedy, who passed away August 25, 2009, at age 77. A leader in the Senate for over 46 years, Senator Kennedy dedicated his career to equality and justice for all.

Senator Kennedy believed that the fight for quality and affordable healthcare was the cause of his life and nothing less than a moral obligation for us all. His courageous commitment to improving the welfare of all people was inspirational to me and millions of Americans. As Chairman of the Senate Committee on Health, Education, Labor, and Pensions, he influenced nearly every piece of legislation that came before the Senate. Because of his deep concern for the treatment of mental health patients, he helped individuals suffering from mental health and substance abuse disorders receive adequate coverage and prompted the growth of America's Community Mental Health Centers. Senator Kennedy was also committed to increasing access to health care for everyone. I wish he was with us long enough to see all his hard work come true.

Senator Kennedy was a compelling advocate for equal access to education for all children. His leadership was instrumental in expanding the Head Start Program and he devoted himself to improving teaching quality and equality across the country.

Senator Kennedy fought tirelessly to ensure all students who wished to obtain higher education were able to do so. During the 110th Congress, he helped enact the most substantial increase in student aid funding, making higher education more accessible and affordable to all.

Madam Speaker, Senator Kennedy was a shining example of what the very best public servants can aspire to become and his passion for helping others will live on through the lives he has touched. His legacy of hard work, compassion, and excellence will continue to impact America for generations to come.

HONORING ELDON ROTH

**HON. JACK KINGSTON**

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, October 7, 2009*

Mr. KINGSTON. Madam Speaker, I rise today to honor Eldon Roth, a celebrated and respected member of the agricultural community. I am privileged to be joined by the distinguished Congresswoman ROSA DELAURO in recognizing Mr. Roth. It is a remarkable day indeed when we can both wholeheartedly endorse the same objective.

Growing up in rural South Dakota, Eldon Roth learned the values of a strong work ethic and perseverance. Lacking access to electricity and running water in his home, he never allowed the limitations of sheer circumstance to hinder his pursuit for excellence. Eldon and his wife Regina, who is his business partner, started their business in San Francisco back in the 1970s. A self-educated man who never accepted the status quo, Mr. Roth occupied his spare time by employing his understanding of mechanics to improve the efficiency of the meat freezing process.

This focus led him to working with stainless steel firms in the area to develop a large drum. His natural mechanical genius devised a way to liquefy the meat product at the lowest possible temperature. The FMI Roller Press Freezer, a huge piece of equipment, was a new concept for the continuous quick-freezing of ground meats and other similar consistency products. Through his work, the freezing process was trimmed from two days to a matter of mere minutes. It revolutionized the industry and standardized the quick-chill process that now assures high levels of food safety.

Over the years, Mr. Roth continued his innovating work and as a selfless man of integrity, he takes time to share his discoveries with other meat processors to protect consumer health. Mr. Roth has not only developed unique ways to increase the value of beef and pork, but he led a revolution in equipment design. By taking great pride in his work, Mr. Roth undoubtedly raised the bar in terms of excellence for the U.S. meat and poultry processing industry.

Today, the company Mr. Roth founded, Beef Products Inc. is the world's leading producer of boneless beef. Mr. Roth's impact in the market of beef and poultry has justly earned him multiple awards. BPI has built plants in Texas, Kansas, Iowa and Nebraska. He is a

recipient of a 2008 Beef Industry Division award presented by the National Cattlemen's Foundation as well as the recipient of the 2007 E. Floyd Forbes Award, the highest honor from the National Meat Association.

Along with founding the world's leading producer of high-quality lean-beef trimmings, Mr. Roth made sure to give back to the local community. Last year, Mr. Roth organized an event in Sioux City, Iowa where he hosted a prime rib appreciation dinner Salute to the 185th Refueling Wing of the Iowa Air National Guard. He had about 1,500 Guardsmen with their families and guests to attend at the BPI aircraft hangar, and he and his company staff cooked hot roast beef for everyone! One of his special guests was Congressional Award winner Col. Bud Day, along with other local dignitaries.

Mr. Roth is known as a self-made man who possesses unequalled discipline, drive, and discernment. He is successfully building a legacy of generosity by giving back to the people of his own community. I am proud to stand here today, shoulder to shoulder with Congresswoman ROSA DELAURO, to honor Eldon Roth of South Dakota.

#### PERSONAL EXPLANATION

**HON. ANNA G. ESHOO**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, October 7, 2009*

Ms. ESHOO. Madam Speaker, I was not present during the rollcall vote Numbers 758 to 760 on October 7, 2009. Had I been present, I would have voted:

On rollcall vote No. 758 I would have voted "yes."

On rollcall vote No. 759 I would have voted "yes."

On rollcall vote No. 760 I would have voted "yes."

#### IRAN—GLOBAL THREAT REQUIRING GLOBAL ACTION

**HON. KAY GRANGER**

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, October 7, 2009*

Ms. GRANGER. Madam Speaker, the global threat of Iran's nuclear program is growing every day. The luxury of time has vanished and the need for Congressional action is absolute.

What we already knew about the Iranian nuclear program, compounded with the recent revelations of an additional uranium enrichment facility outside of Tehran and Iran's continued testing of long-range missiles, only continues to build on an already disturbing scenario.

The Iranian regime is furiously building its nuclear program and threatening anyone who walks the streets of Paris, Beijing, London and New York. Every day that goes by without weakening the regime or its ambitions, the world becomes less safe. We MUST act now.

I wholeheartedly support increased sanctions and divestment efforts and hope the U.S.

Congress responds immediately to provide these critical tools to the President.

The United States needs to show strong leadership to show the world that we are serious in taking down this imminent threat from Iran. U.S. actions should be matched by other world leaders—especially Russia and China.

Iran's potential peril to the world is global, so too should be the response.

#### EARMARK DECLARATION

**HON. MIKE ROGERS**

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, October 7, 2009*

Mr. ROGERS of Alabama. Madam Speaker, pursuant to the Republican Leadership standards on earmarks, I am submitting the following information regarding earmarks I received as part of the Conference Report accompanying H.R. 2997—Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act, 2010.

Requesting Member: Congressman MIKE ROGERS (AL)

Bill Number: Conference Report accompanying H.R. 2997

Account: ARS, Salaries and expenses account, \$1,293,000

Legal Name of Requesting Entity: Auburn University, Auburn, AL

Address of Requesting Entity: 102 Samford Hall, Auburn, Alabama 36849

Description of Request: "Improved Crop Production Practices" Taxpayer justification—It is my understanding that this funding will provide \$1,293,000 to develop and assist in adopting cropping systems that reduce production cost primarily by reducing the need for nitrogen fertilizer, pesticides, fuel, and equipment. Federal funding would allow the program to expand reniform nematode research throughout the State, develop more intense mature management research that includes bioenergy crops, and expand research on the development of alternative substrates for nursery crop production. Current and future profitability of agronomic based crop production in Alabama is dependent on the research and outreach efforts. Use of precision technologies associated with these studies have resulted in practices that saves fuel, herbicides, and fertilizers and protects Alabama's vital natural resources. The project's total budget is \$8,874,000. Specifically within the budget, \$1,298,734 will go toward permanent personnel salaries, \$360,760 for research expense, and \$240,500 for equipment. This request is consistent with the intended and authorized purpose of the Agricultural Research Service, ARS Account. Auburn University will meet or exceed all statutory requirements for matching funds where applicable.

# HONORING RODNEY B. LEWIS ON HIS DISTINGUISHED CAREER—

## HON. ED PASTOR

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 7, 2009

Mr. PASTOR of Arizona. Madam Speaker, I rise before you today to praise and reflect upon the career of an outstanding attorney and community leader, Rodney B. Lewis. I would also like to congratulate Rod on recently being honored with a Lifetime Achievement Award by the Native American Bar Association of Arizona.

Rod Lewis comes from a family dedicated to serving the Native American community in Arizona. Rod is one of three sons born to the late Reverend Roe B. Lewis and Sallie Lewis. He and his brothers, John and Robert, grew up on the Gila River Indian Reservation. All three attended college and graduate school and each has devoted their careers to the service of Indian tribes and Indian people. In fact, John is the Executive Director of the Inter Tribal Council of Arizona.

Rod earned his bachelor's degree from Trinity College in San Antonio, Texas. While in college, Rod participated in the Reserve Officers' Training Corps and upon graduation was commissioned as a second lieutenant in the Army Rangers, ultimately obtaining the rank of first lieutenant upon discharge from the Army. Rod earned his master's degree from Arizona State University in 1969 and went on to law school at the University of California Los Angeles. Upon graduating with his JD in 1972, Rod returned to the Gila River Indian Community to serve as the tribal attorney for the Community and to raise a family. He and his wife Willardene have three children and five grandchildren.

Rod has had an extraordinary legal career. He was the first Native American to pass the Arizona Bar Exam and be licensed to practice law in Arizona. He was also the first Native American lawyer to argue a case before the United States Supreme Court. Shortly after law school, Rod faced an effort by the State of Arizona to tax the sale of tractors to the Gila River Indian Community farms. Rod fought this effort and prevailed in a 5 to 4 Supreme Court decision. The Central Machinery v. Arizona State Tax Commission decision continues to stand as the definitive case recognizing the right of Indian tribes to operate beyond the taxing authority of states.

Rod served as the General Counsel of the Gila River Indian Community for more than 30 years. For much of his tenure as General Counsel, Rod led the battle to secure the water rights of the Gila River Indian Community. Rod worked tirelessly in litigating and ultimately negotiating the single largest Indian water rights settlement in the history of the United States. This settlement resulted in the return of 653,000 acre-feet of water to the "River People" of the Gila River Indian Community and \$200 million to construct a system to deliver water to the reservation.

Rod Lewis has dedicated his life to being a champion for the Gila River Indian Community. He is a genuine trailblazer who has broken down barriers and served as a role model

for a new generation of Native American lawyers. Madam Speaker, I am honored to recognize Rod for his distinguished career and outstanding leadership and thank him for being my friend.

## EARMARK DECLARATION

### HON. BRIAN P. BILBRAY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 7, 2009

Mr. BILBRAY. Madam Speaker, I would like to submit the following request:

Requesting Member: Congressman BRIAN BILBRAY

Bill Number: Conference Report to H.R. 3183, FY 2010 Energy and Water Appropriations

Account: Army Corps of Engineers, General Investigations

Legal Name of Requesting Entity: The City of Solana Beach

Address of Requesting Entity: 635 South Highway 101, Solana Beach, CA, USA 92075

I received \$305,000 to complete the feasibility study for the Solana Beach-Encinitas Shoreline Protection Project. The protective beaches throughout the Solana Beach area are severely eroded, leaving residences, portions of Highway 101, and public access points susceptible to dangerous wave attack and beachgoers subject to falling rocks as bluffs are destabilized by erosion. This Shore Protection Project will build up the protective beaches along the coast, preserving public access, recreational areas, and as well as public infrastructure and private homes.

## TRIBUTE TO JOAN BURDICK, RECIPIENT OF THE 2009 ST. MADELEINE SOPHIE AWARD, SACRED HEART SCHOOLS

### HON. ANNA G. ESHOO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 7, 2009

Ms. ESHOO. Madam Speaker, I rise today to honor Joan Burdick, a recipient of the prestigious St. Madeleine Sophie Award from Sacred Heart Schools. Established in the year 2000, the St. Madeleine Sophie Award honors individuals in the Sacred Heart community who have made a sustained and significant contribution to the Schools and embody the Goals and Criteria of a Sacred Heart education. The individuals honored are selected by a committee comprised of the senior administrative team in conjunction with the Chair of the Board of Trustees and are honored at a reception and at the Mass of the Holy Spirit, the first all-school liturgy of the school year. The recipients will be VIP guests at various SHS events throughout the year and featured in their alumni magazine, The Heart of the Matter, for their commitment to the mission of Sacred Heart education.
